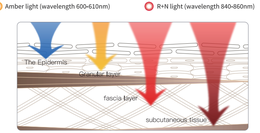
Product parameters

Product name: LED Light Therapy Mask
Charging voltage: 5V⎓
Working current: 1.2A
Rated power: 5W
Battery capacity: 4000mAh

Mode Introduction

82 LED beads with light source wavelength

- Blue light (wavelength 455-465nm)
- Red light (wavelength 625-635nm)
- Amber light (wavelength 600-610nm)
- R+N light (wavelength 840-860nm)



Usage

Safety precautions

●Before use, please carefully read the "Safety Precautions".
●Please use it reasonably according to the prescribed steps.
●When an abnormality occurs, please stop using it immediately and contact customer service for consultation.
●If used in a faulty state, it may have adverse effects on the body, please be sure to pay attention.
●The precautions here specify important content related to safety, please be sure to comply.
●To indicate the magnitude and urgency of the harm and damage, situations caused by misoperation are classified as "danger", "warning", and "caution".

If you feel pain, fatigue, skin discomfort or abnormal skin during use, please stop using.

If you feel uncomfortable with your skin, please stop using it. If the situation does not improve the next day, please consult a professional doctor.

Be sure to comply

⚠ warn (About power supply)

· Be sure to ensure that the plug is properly inserted, otherwise it may cause host malfunction, electric shock, or fire.
· Once an abnormality occurs, please immediately turn off the power.
· Be sure to use a dedicated power adapter, otherwise it may cause short circuits, electric shock, or fire.

be sure to comply with

⚠ warn (Precautions for Overseas Use)

· Be sure to use AC voltage of 100V~240V for charging, otherwise it may cause electric shock or fire.

be sure to comply with

· Be sure to confirm the plug and voltage before use, otherwise it may cause the host to malfunction, heat up, or catch fire.

Attention on fire

· Sometimes, due to differences in region and accommodation, the shape and voltage of the plug may vary slightly. Please make sure to confirm before use.

Maintenance methods

· To keep the controller and mask clean, please make sure to clean them after each use.
· Wipe clean the stains on the host (including the controller) with a dry soft cloth.
· When stubborn stains are difficult to clean, please use a cloth dipped in diluted neutral detergent to gently wipe them.
· Do not place it in a state of being contaminated with sebum, dirt, skincare products, etc.

attention

· Be sure to turn off the power before maintenance, otherwise it may cause short circuit, electric shock or fire.
· Do not rinse with water. This product is not waterproof, otherwise it may cause the host to malfunction.
· Do not use alkaline cleaning agents, alcohol, diluents, gasoline, nail polish remover and other solvents and drugs, or grinding reagents with grinding effects to wipe the instrument.

frequently asked questions

Q: What is the recommended frequency and duration of use?
A: It is recommended to use the same part once a day for about 10 minutes each time. The mask is recommended to use one mode per day, and when using multiple modes, the usage time should not exceed 30 minutes.

Q: Can it be used during sleep?
A: Do not use during sleep.

Q: Has there been rash, inflammation, and itching on the skin?
A: It may be caused by intolerance to light and heat, please suspend use. If the situation does not improve the next day, please consult a professional doctor immediately.

Q: Can it be used on dry skin?
A: It can be used, but it is recommended to apply an appropriate amount of skincare products on the face before use for better results.

Q: Is there an odor on the face mask?
A: There may be a silicone specific odor, which is not abnormal and will gradually dissipate. Please do not worry.

Q: Can I use it with facial mask?
A: Do not use with facial mask.

Q: Did you experience discomfort and fatigue?
A: It may be caused by intolerance to light and heat. Please stop using until the discomfort subsides.

Q: Have you experienced toothache?
A: While undergoing dental treatment, being squeezed by a face mask may cause toothache. If discomfort occurs, please consult a professional doctor immediately.

Q: Can I use it immediately after sunburn?
A: May cause inflammation and skin problems. Please stop using immediately and consult a professional doctor.

Q: Has there been a red mark on the skin?
A: Due to the compression of the mask, the skin may experience temporary redness. If the situation does not improve the next day, please consult a professional doctor.

Q: Did you leave a mask mark on your face?
A: The facial mask instrument is made of expandable silica gel. After use, there may be traces of the mask on the face, which will disappear after a period of time. It can be used
Heart usage.

This table is prepared in accordance with the provisions of SJ/T 11364.
○: indicates that the content of the hazardous substance in all homogeneous materials of the component is below the limit requirements specified in GB/T26572.
X: indicates that the content of the hazardous substance in at least one homogeneous material of the component exceeds the limit requirements specified in GB/T26572.

environment-friendly use period
This label refers to the period (ten years) during which toxic and harmful substances or elements contained in electronic products will not leak or mutate under normal conditions, and users using the electronic product will not cause serious pollution to the environment or serious damage to their personal or property.

Battery processing methods

Before discarding the appliance, the battery must be removed from the appliance.
When removing the battery, the appliance must be powered off.
A battery should be disposed of safely.
1. Use auxiliary tools to pry open the body panel, separate the front and rear shells, cut off the battery leads, and then remove the internal battery completely.
2. Do not dispose of the battery casually when removing it. Please place the battery in a dedicated recycling bin and do not mix it with other household waste to avoid polluting the environment.
