Product Introduction

Product Overview

Button Functions

No.	Button	Functions
1		Switch to turn the Slumber on / off
2	BT	Press once to enter Bluetooth mode or to manually reconnect to the last-paired device Press & hold for 2 seconds to enter pairing mode
3	MP3 / AUX	Press once to enter AUX / MP3 mode Press & hold for 2 seconds to switch among ordered / single cycle / shuffle playback modes (MP3 only)
4		Press once to play / pause music
5		Press once to switch between clear voice / well-balanced audio modes
6		Turn to adjust volume
7		Press once to skip / replay track (Bluetooth / MP3 only)
8		Press & hold both buttons for 10 seconds to clear pairing history
9		Press once to cycle through sleep timer options (30 mins / 1hr / 2hr) or to cancel the timer
10	 STEREO MONO	Switch to put the Slumber in stereo / mono mode (stereo mode splits audio between L & R speakers; mono mode combines audio signals so L & R speakers both receive the same audio)

LED Indicators

In order to avoid disturbing your sleep, all LED indicators will turn off after 30 seconds.

No.	Indicator	Status
A	Solid white for 30 seconds then off	Ordered / single cycle / shuffle playback mode (MP3 only)
B	Alternate red & blue flashes	Pairing
	Solid blue for 30 seconds then off	Connected
C	Solid white for 30 seconds then off	Timer on
D	Solid white for 30 seconds then off	AUX mode
E	Solid white for 30 seconds then off	Clear voice mode

Getting Started

You can use the Slumber by either placing it on top of your existing pillow, or by inserting it into your pillow cover. Make sure both speakers are facing upwards.

The two speakers facing upward

STEP 1

The Slumber must be connected to a power source via the provided power cable in order to function. Plug the provided type C charging cable into the charging port, then connect the other end to a 5V/500mA-2A rated USB adapter (your phone charger or similar should work) or PC USB port.

STEP 2

Slide the  switch to the "ON" position to turn the Slumber on.

Choosing an Audio Mode

You can choose to stream audio in three different ways: via MP3, Bluetooth, or AUX. The Slumber will default to the last-used mode each time it's powered on.

MP3 Mode

For first time use, the Slumber will enter MP3 mode automatically, playing the built-in white noises. If not, press the **MP3 / AUX** button once to enter MP3 mode manually. You can change the playback mode by pressing & holding the **MP3 / AUX** button until the corresponding    indicator turns solid white.

-  Ordered playback
-  Single cycle playback
-  Shuffle playback

The Slumber contains a built-in 4GB storage card that it uses while in MP3 mode. In addition to the 10 enclosed white noise options, you can upload your own tracks by connecting the Slumber to your PC via the included USB C cable. Transfer your chosen files to the "Avantree Slumber" disc and enjoy!

AUX Mode

Plug the AUX 3.5mm audio cable into both the Slumber and your audio output device (i.e. your phone / PC / tablet), and the Slumber will enter AUX mode automatically. If not, press **MP3 / AUX** once to swap from MP3 mode or twice if you're swapping from Bluetooth mode.

NOTE: The **⏮** and **⏭** buttons do not work in AUX mode.

Bluetooth Mode

STEP 1

Press the **BT** button once to enter Bluetooth mode. For first time use, the Slumber will enter PAIRING mode automatically. If not, put your Slumber into PAIRING mode by pressing & holding the **BT** button until the LED flashes blue and red alternately.

STEP 2

Turn on your device's Bluetooth and select "Avantree Slumber" in the Bluetooth menu.

STEP 3

Keep them close and wait for 5-10 seconds or until they connect. Once connected, the Slumber's Bluetooth connection indicator will turn solid blue.

For subsequent use, the Slumber should automatically reconnect to the last-paired device within a few seconds of being switched to Bluetooth mode. If not, you can manually activate reconnection by tapping the **BT** button once, or by selecting "Avantree Slumber" in your device's Bluetooth menu.

NOTE: You'll need to adjust the volume on both the Slumber & your audio device to reach the lowest volume level.

Setting a Sleep Timer

EN

The sleep timer can be set to make the Slumber automatically turn off after a specified amount of time. You can choose among 30 mins, 1 hour, or 2 hours by pressing the button. The corresponding LED will light up to indicate your selection.

- ☒ 30 mins
- ☐ 1 hour
- ☐ ☐ 2 hours

Specifications

Bluetooth version	v5.3
Supported profiles	A2DP; AVRCP
Frequency response	20Hz-20KHz
Audio input level	1000mV
Rated Input	DC5V/500mA-2.0A

Fabric	Polyester nylon
Speakers	28mm drivers, 4Ω, 3W
Product dimensions	400mm x 135mm x 15mm
Net weight	215g

FAQ

EN

Below are some of the most common questions people have during setup.

Is the pillow washable?

Yes, you can wash the pillow by hand whenever necessary. Please take out the speakers before washing. When re-assembling, make sure that the main speakers are facing upwards. You can find more specific directions on re-assembling at avantree.com/support/slumber/install.

I turned the volume down as low as possible -- why can someone else still hear?

Make sure to adjust the volume on both your device and the Slumber in order to reach the lowest volume levels. If the sound is still leaking, you can consider resting your ear directly on top of the speaker and turning the volume down even further.

You can find a full FAQ list at avantree.com/support/slumber, or contact us directly for additional assistance.
