Bofdent

Electric Space Heater

Model: HAU-1

Langlai Cross-Border E-Commerce (Shandong) Co., Ltd.

Bofdent Space Heater

I. Introduction

Thank you for purchasing our Hauxionex Space Heater.
The product you have purchased has undergone strict testing and inspection before leaving the factory to ensure its quality. We hope you are satisfied with your purchase.

Please read this user manual carefully before using the product.

Any accidents or damages caused by failure to follow the instructions and safety precautions in this manual are not covered by our warranty, and the company bears no responsibility for such incidents.

Please keep this manual in a safe place for future reference.

Note: Disconnect the power supply if the product will not be used for a long time to avoid potential danger.

Reminder: Room temperature and electricity consumption are directly related to the room layout and insulation conditions.

II. Product Overview

This product offers features such as adjustable constant temperature, independent control, energy efficiency, comfort, long lifespan, safety, and maintenance-free operation. It is an energy-saving, comfortable, and eco-friendly heating solution with no pollution.

The convection heater provides even heat distribution, excellent temperature control, energy savings, and does not consume indoor oxygen.

III. Preparation Before Use

1. Transportation and Storage

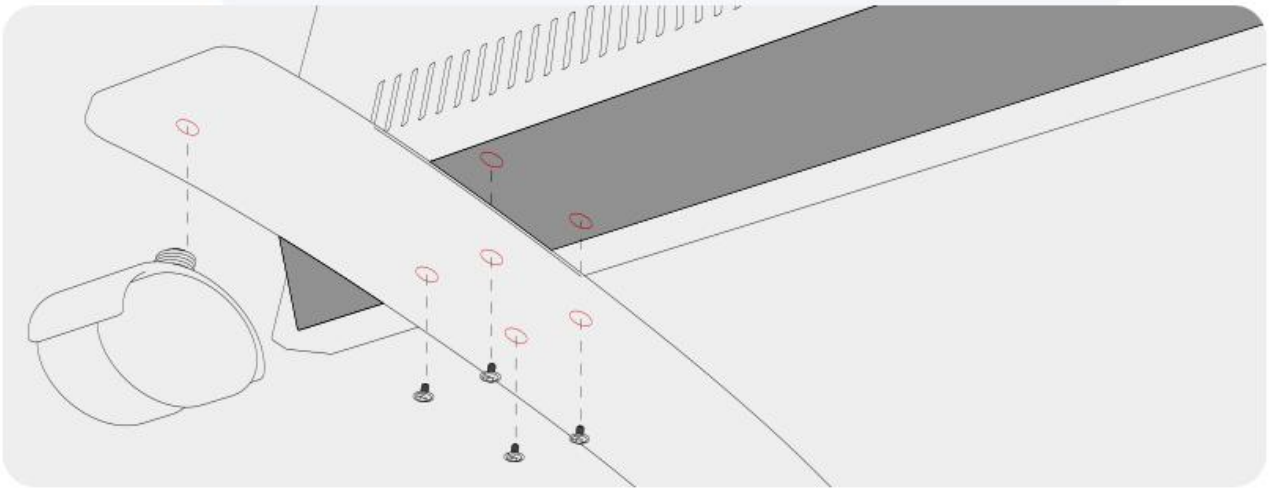

During loading and handling, the product should be handled with care. Do not throw, drop, roll, or drag it. Avoid exposure to direct sunlight and rain.

The storage area should be well-ventilated, free from corrosive gases, and with a relative humidity not exceeding 85%.
Avoid heavy pressure, do not stack outdoors, and do not stack more than six boxes high.

IIII. Installation Options

This heater supports two installation methods. Please choose one according to your needs.

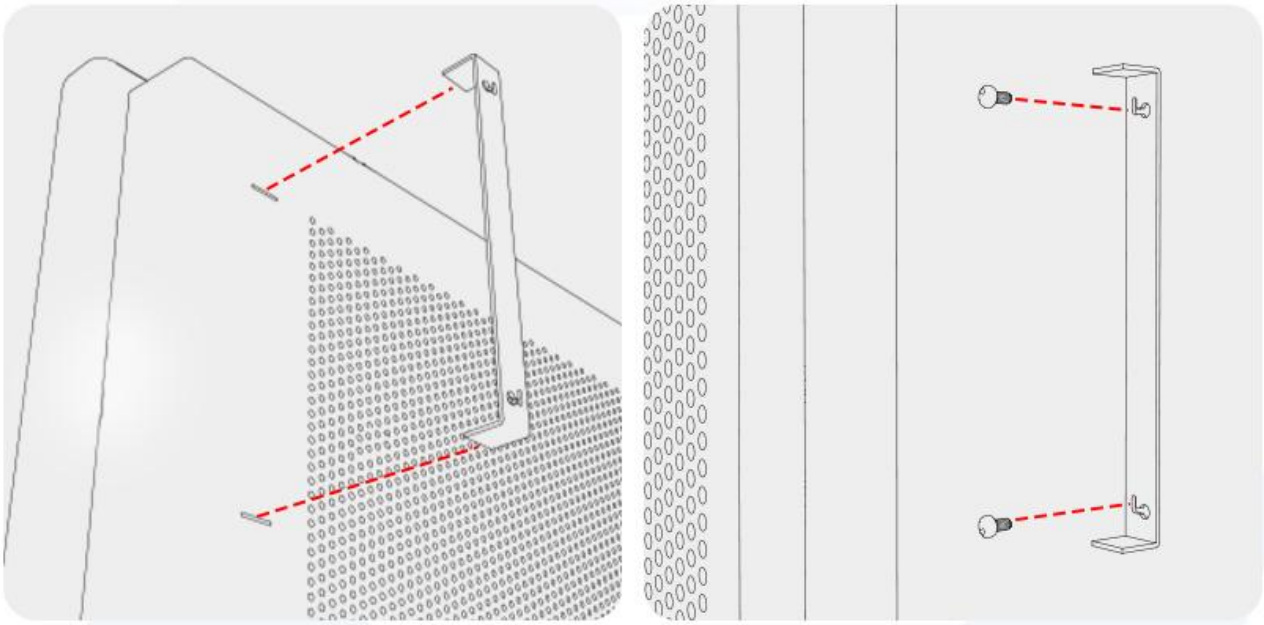

★ FREESTANDING

Align the heater's base with the installation holes at the bottom of the heater and fix it in place with screws.

Attach the caster wheels into the base holes and tighten the screws securely.

★ WALL MOUNTED

Measure the distance between the mounting holes and mark the positions on the wall (use a spirit level to ensure precise alignment).

Drill holes in the wall according to the markings and insert the expansion bolts.

After securing the expansion bolts, hang the heater onto the bolts via its mounting holes, then push the bolts into the heater's slot to prevent easy removal.

For best performance, install the heater as low as possible. However, the bottom must be at least 20 cm (8 inches) above the ground. Ensure no obstructions within 50 cm (20 inches) above or on either side of the heater. The mounting height should not exceed 180 cm (71 inches).

WARNING INFORMATION

1. DON'T cover this heater. Covering this appliance is a overheating or fire hazard.

2. Extreme caution is necessary when any heater is used by or near children or those in
need of assistance, especially whenever the heater is left operating and unattended.

3. To reduce the risk of fire keep textiles, curtains, or any flammable material a
minimum distance of 1 meter from the air outlet.

4. It is recommended that this appliance is plugged directly into the wall socket. Power boards are not rated to supply power to high wattage appliances.

5. This heater is hot when in use. To avoid burns, do not let bare skin touch hot
surfaces. Always use the handle when moving this heater.

6. Always unplug heater when not in use.

7. Use only the voltage specified on the rating label of the appliance.

8. Indoor using only.

9. Use this appliance only as described in this manual.

10. Ensure hands are dry before handling the plug or main unit.

11. Ensure appliance is on a flat, stable, heat- resistant surface.

12. Carry out regular checks of the supply cord to ensure no damage is evident.

WARNING INFORMATION

13. Always ensure that all cord has been removed from heater and is unrolled before
use. In avoid the insulation to weaken and split.

14. Do not remove plug from power socket until the appliance has been switched off.

15. Keep this appliance and cable away from heated surfaces. Do not position the cable
under furniture or appliances.

16. Arrange the cord so it cannot be tripped over.

17. Do not place appliance close to radiant heat source

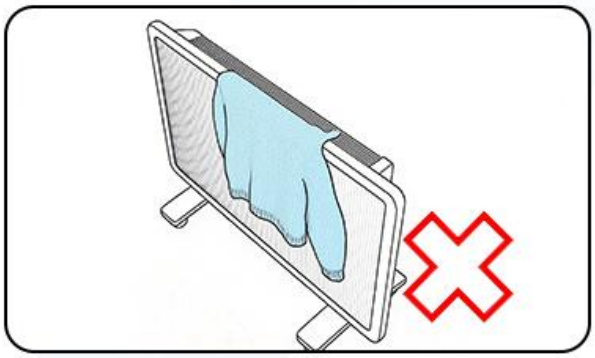

18. Do not insert or allow foreign objects to enter any ventlation or exhaust opening, as
this may cause an electric shock, fire or damage to the appliance.

19. A heater has hot and arcing or sparking parts inside. It must NOT be used in
potentially angerous locations such as flammable, explosive, chemi-cal-laden or wet
atmospheres. This heater is intended for general use ONLY.

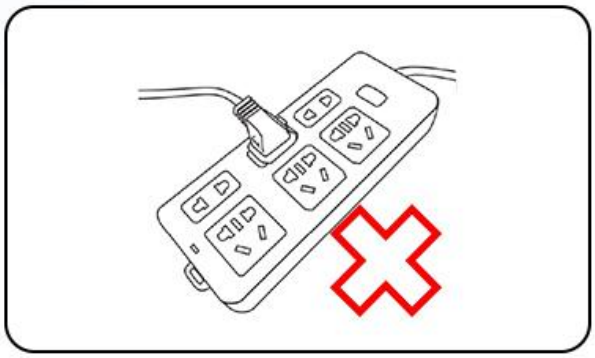

20. Do not use this appliance in the immediate surrounds of a bath, a shower or
swimming pool or other liquids.

21. If your appliance does not work, or is not working properly, con-tact the Hauxionex Customer Services Team.

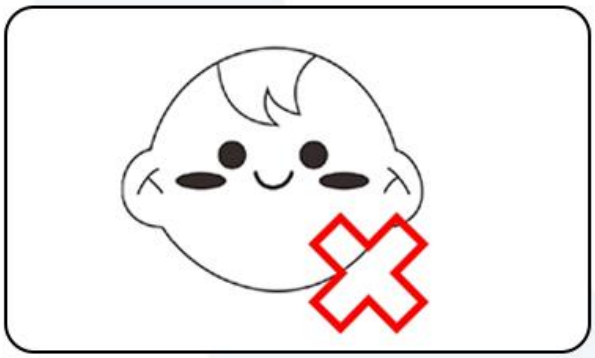

SAFETYINSTRUCTIONS

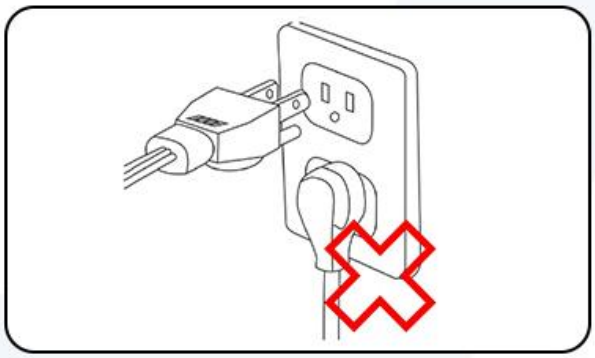

Do not place or cover it ems or clothing on top of the product!

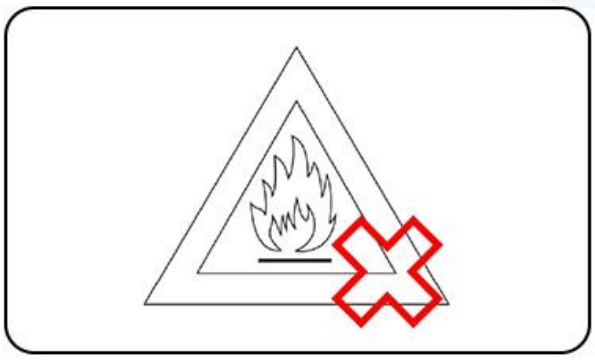

Do not use power strips or exte nsion cords to avoid plug damage caused by excessive power.

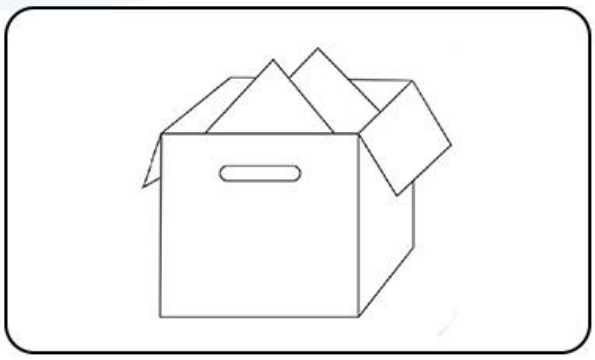

Do not let children with delicate skin touch or trip over the product!

FCC REQUIREMEN

FCC Caution:
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

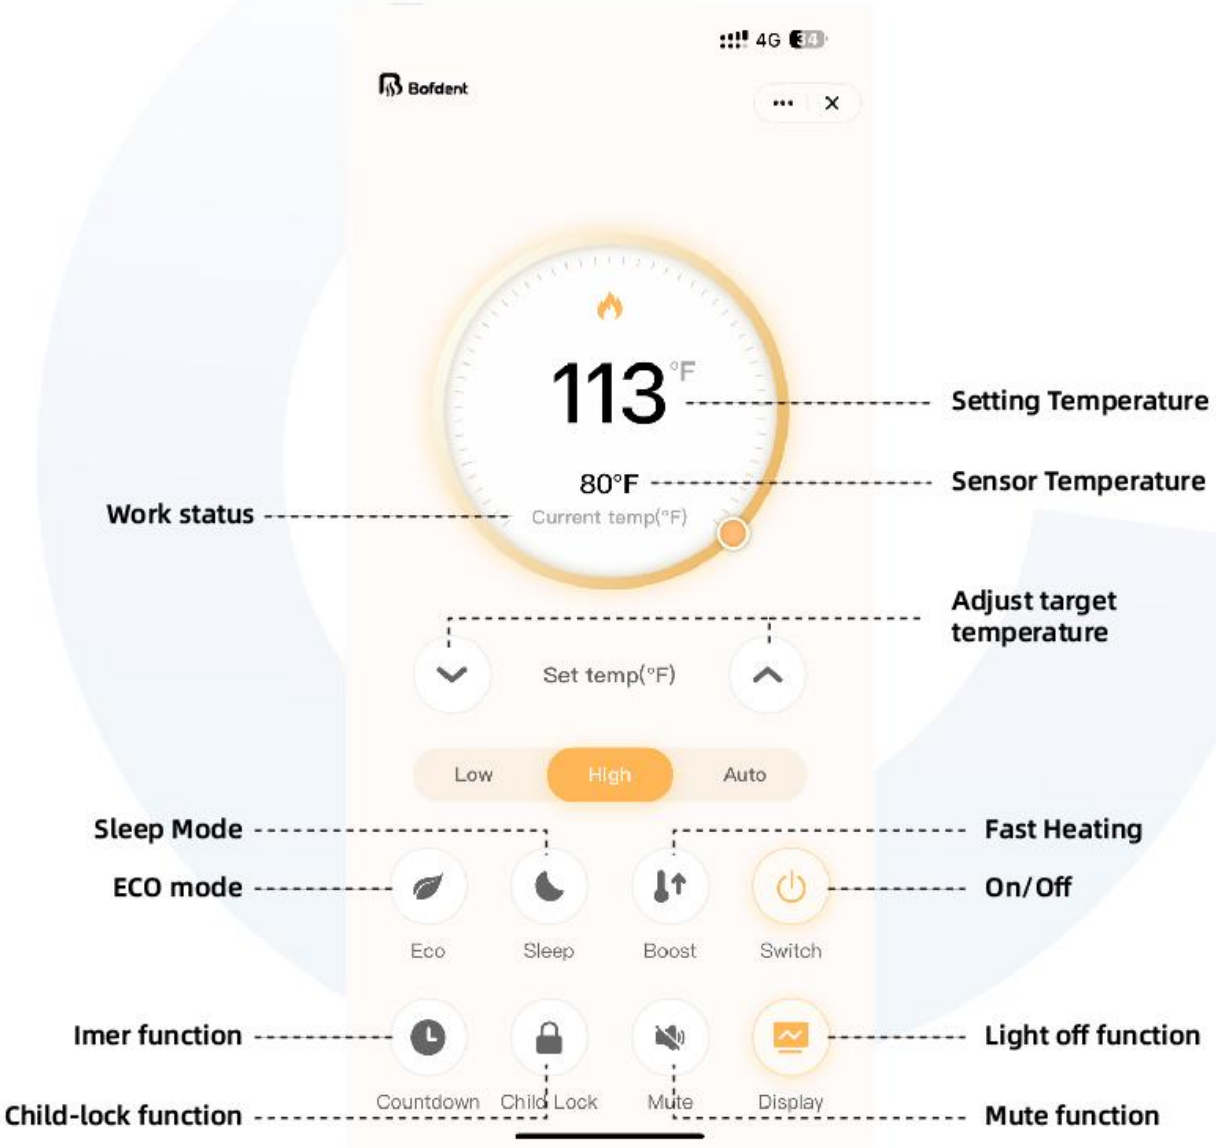

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

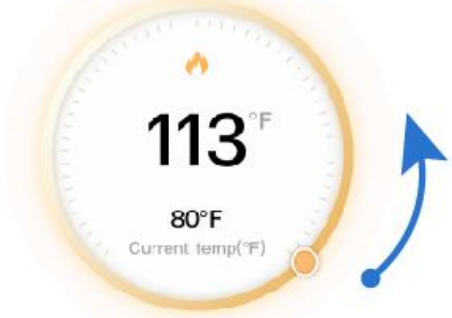

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception,which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.

APP FUNCTION

Drag the slider to set your preferred temperature

Maximum Power 1500W

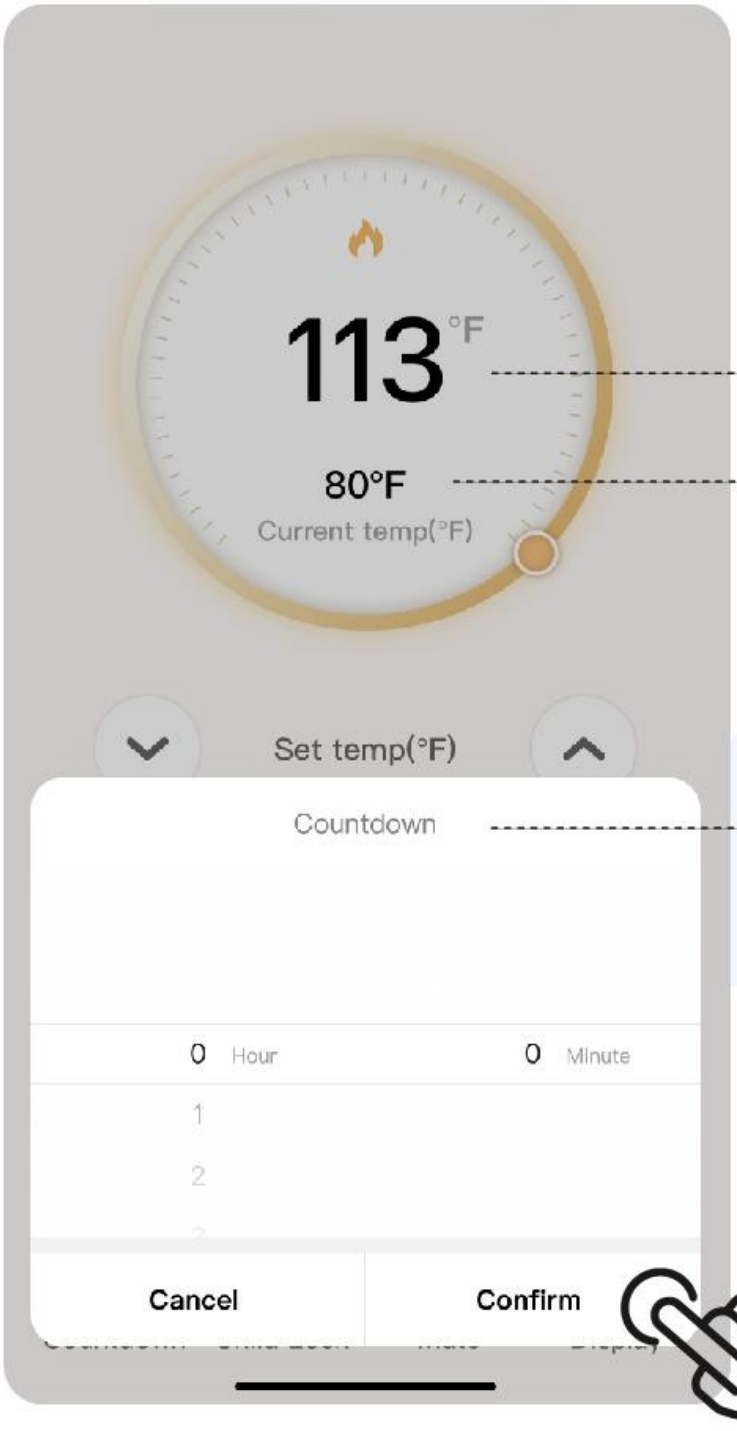

Low | High | Auto

Maximum Power 750W

Automatically adjusts heating to maintain the selected temperature while reducing unnecessary energy consumption

Langlai Cross-Border E-Commerce (Shandong) Co., Ltd.

APP FUNCTION

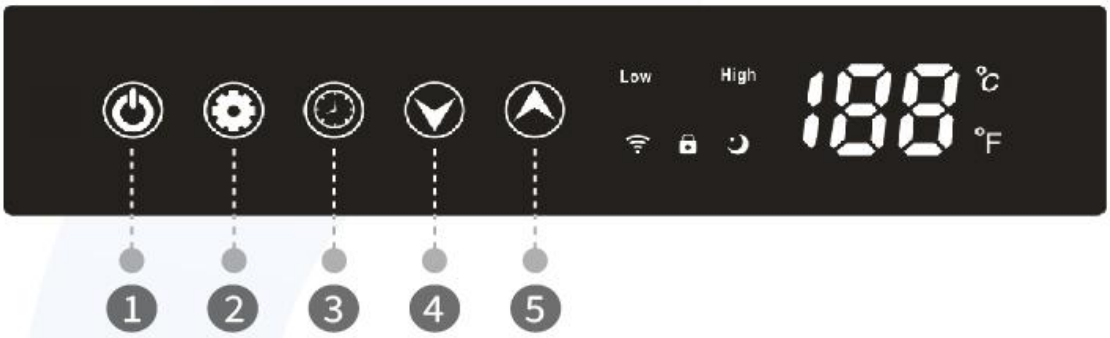

Setting Temperature

Sensor Temperature

Timer Function

Choose the desired time setting and the heater will automatically turn off after the selected hours

OPERATING INSTRUCTIONS

1、Power Button

Press once: Turn on the heater. The display shows real-time temperature and heating status.
Press again: Turn off the heater. Only the button indicator light remains on (required for Wi-Fi pairing).

2、Mode Button

Press to switch between High (Level 2) → Low (Level 1) → High (Level 2) in sequence. The heating icon lights up when the heater is operating. The current level indicates the running mode.

3、Timer Button

When ON: Set auto shut-off time (1–12 hours).
When OFF: Set auto start time (1–12 hours).
Press and hold for 3 seconds: Activate Sleep Mode (default temperature 64°F).
Press and hold again for 3 seconds: Exit Sleep Mode.

4、 Temperature Up Button

Press to increase temperature (32°F–113°F).
Press and hold to enter Wi-Fi pairing mode.
Heating starts if the set temperature is higher than the ambient temperature; heating stops if it is lower.

5、Temperature Down Button

Press to decrease temperature (32°F–113°F).
Press and hold for 3 seconds to activate Child Lock.
Press and hold again for 3 seconds to deactivate Child Lock.
Heating starts if the set temperature is higher than the ambient temperature; heating stops if it is lower.

SMART LIFE OPERATING METHODS

DOWNLOAD THE SMART LIFE APP

GET IT ON Google Play

Download on the App Store

Scan the QR code above to download the Smart Life app from the App Store or Google Play. Install and open the app, then register for a new account using your email address.

FRIENDLY REMINDER:

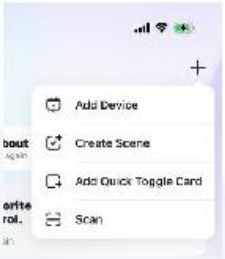

1. After a successful connection, the indicator light will turn on.

2. When the connection fails, it will flash or disappear. Please check if your mobile phone is connected to 2.4 GHz WiFi and Bluetooth. If so, please turn off and reset the program, then perform the first step to reconnect.

HOW TO CONNECT SMART LIFE

Connect your mobile phone to 2.4GHz Wi-Fi and turn on Bluetooth.

Click the "+" button in the upper right corner, then click Add Device.

Wait for the device to be detected, then click the "Add button" to confirm the Wi-Fi information and successfully connect.

RESET WIFI AND PROGRAMMES

After connecting the product to the power supply, turn off the control panel screen using the power button. Then hold down the power button for 5 seconds.
The product will begin to flash. Wait 15 seconds for the reset to complete.

HOW TO CONNECT ALEXA

Find "Third- Party Services" in the "Me" section of the SMART LIFE and click on the Alexa icon to be redirected to the Alexa app for linking.
