Paper Feed Roller for Cassette A (C1)	C12C938261
Paper Feed Roller for Cassette B (C2-C4)	C12C938281

Parent topic: Installing or Using Optional Parts

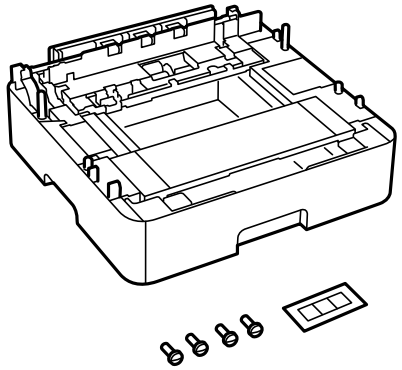

Installing the Optional Paper Cassette Units

You can install up to three optional paper cassette units to provide more paper capacity.

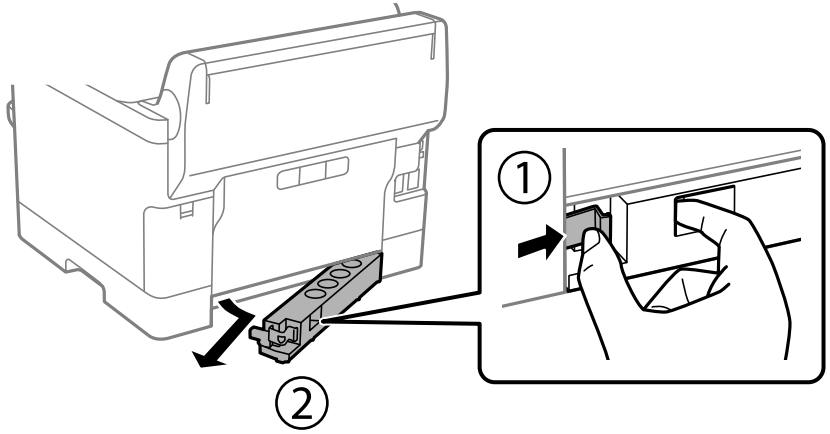

1. Turn off the product, and unplug the power cord and any connected cables.

   Warning: To avoid electric shock, make sure you unplug the power cord.

2. Remove the paper cassette unit from its packaging and remove any protective materials.
3. Make sure you have all the items shown here. You will also need a screwdriver to attach the paper cassette unit, and two people to lift the printer.

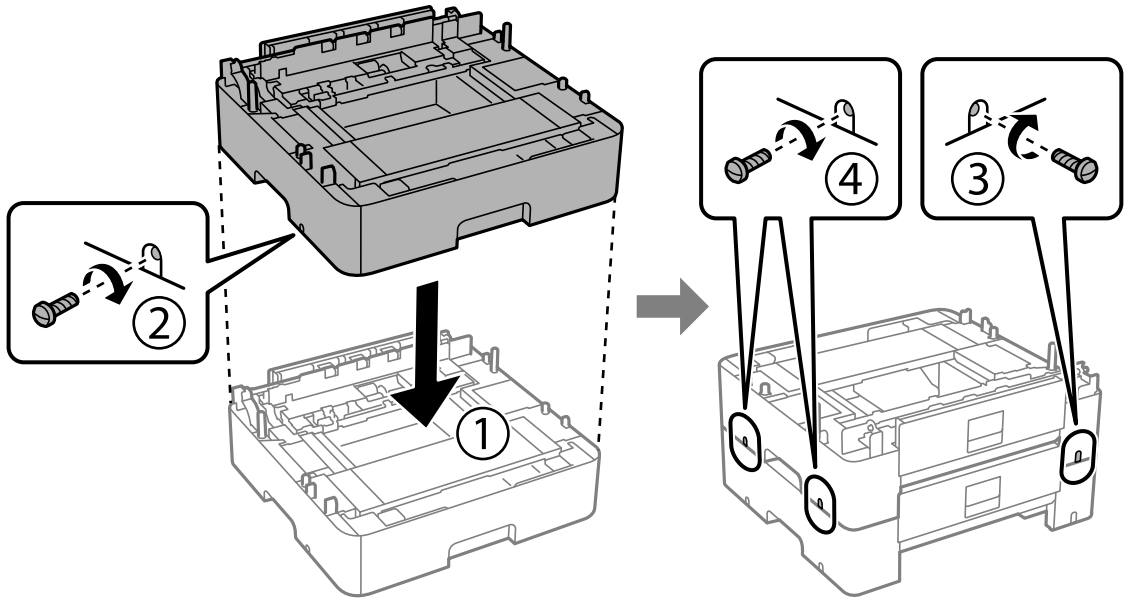

4. Remove the protective piece from the back of the printer.

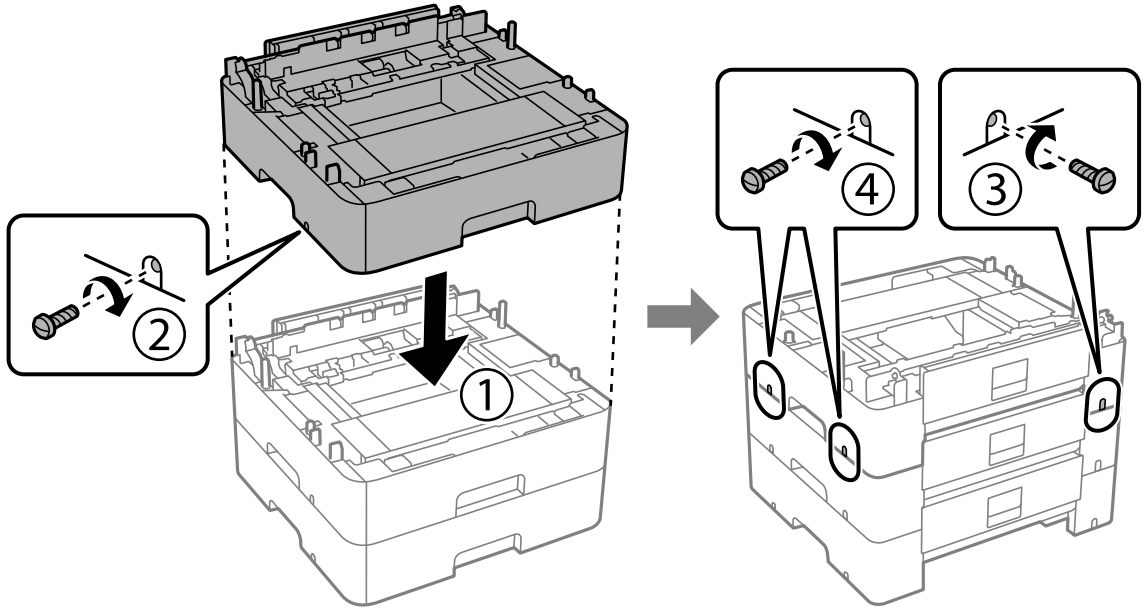

Note: Do not throw the piece away; you will use it later.

5. Place the first optional paper cassette unit in the location where you want to set up the printer.

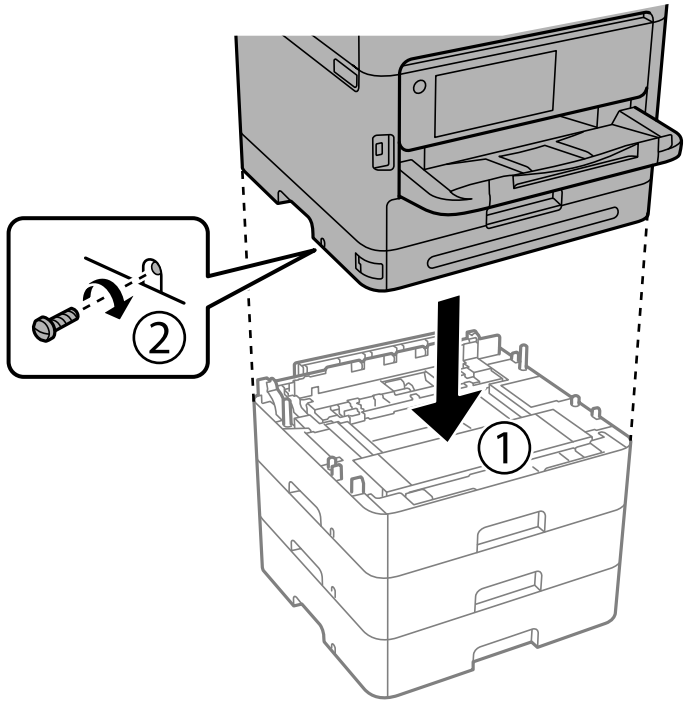

6. If you are installing more than one optional paper cassette unit, stack them on top of each other and secure them with the included screws.

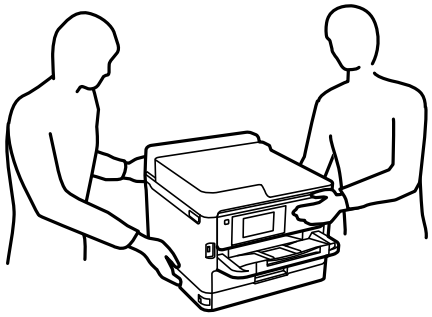

7. Repeat this step for all paper cassette units.

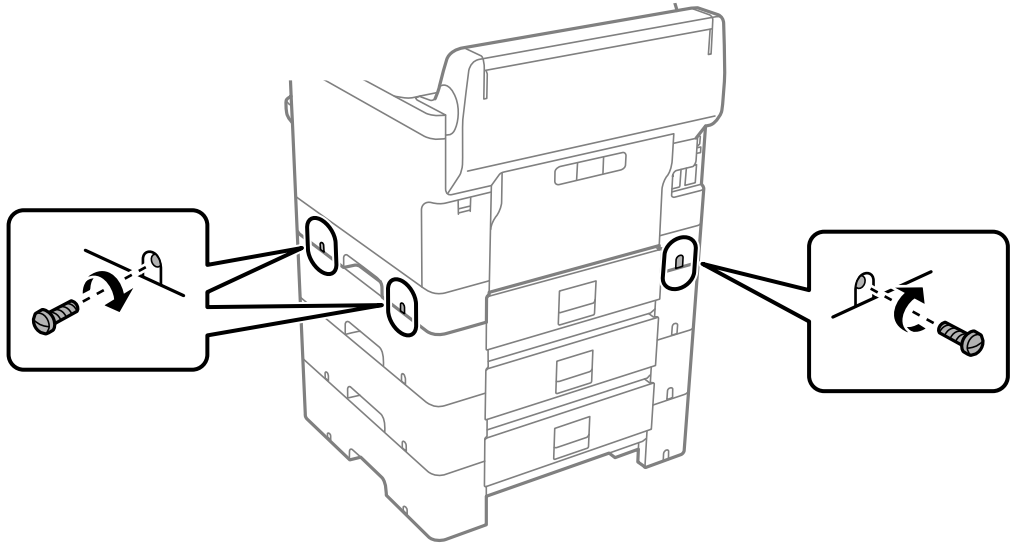

8. Lift up your product and gently lower it onto the paper cassette unit with the corners aligned. Secure the product to the paper cassette unit using the included screws.

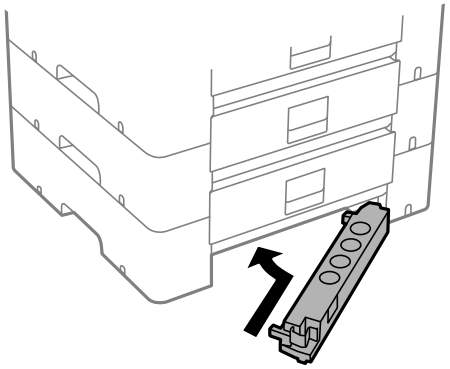

Caution: Because the product is heavy, two or more people should lift and carry it using the hand positions shown:

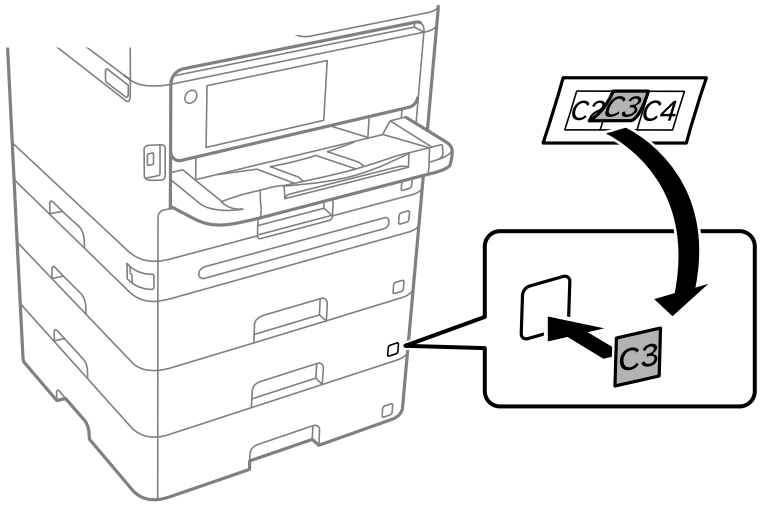

9. Secure the printer and paper cassette units at the back and right side using the included screws as shown.

10. Re-insert the part you removed earlier into the back of the lowest paper cassette unit.

11. Place the correct sticker on each cassette unit to indicate the cassette number.

12. Connect the power cord and other connection cables, then plug in the product.
13. Turn on the product.
14. Press the **Paper Setting** button and make sure the installed cassette units are displayed on the screen.
15. Enable the optional paper cassette units in the printer software.

Synchronizing Printer Settings - PCL Driver - Windows

Enabling the Optional Paper Cassettes - Windows

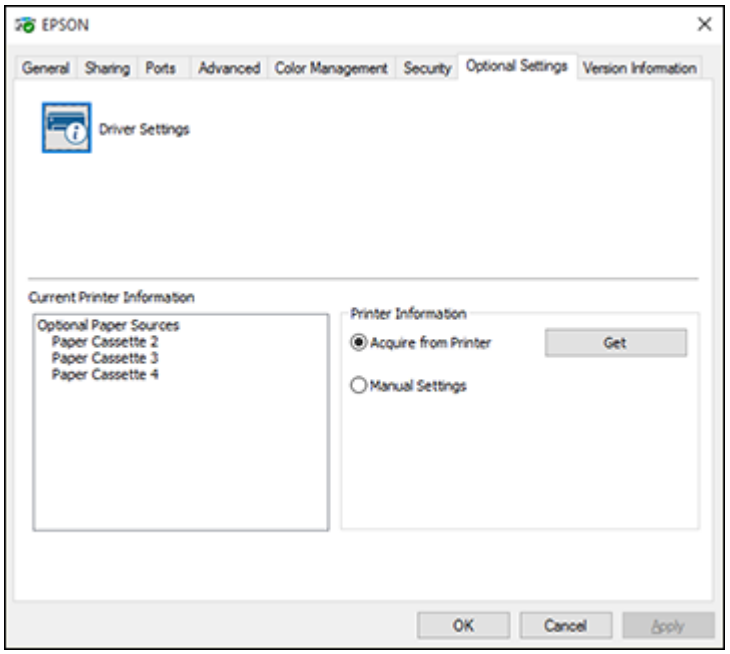

You need to enable the optional paper cassette units before you can use them with the printer software.

Note: If you are using the PCL driver or PostScript (PS3) printer software, see the link below to enable the optional cassette units.

Note: Log on to your computer as an administrator.

1. Do one of the following:
   - **Windows 11:** Click , search for **Settings** and select it. Select **Bluetooth & devices** > **Printers & scanners**. Select your product name, then select **Printer properties**.
   - **Windows 10:** Click  and select  (Settings) > **Devices** > **Printers & scanners**. Select your product name and select **Manage** > **Printer properties**.
   - **Windows 8.x:** Navigate to the **Apps** screen and select **Control Panel** > **Hardware and Sound** > **Devices and Printers**. Right-click your product name and select **Printer properties**.
   - **Windows 7:** Click  and select **Devices and Printers**. Right-click your printer name and select **Printer properties**.
   - **Windows Vista:** Click  and select **Control Panel**. Click **Printer** under **Hardware and Sound**, then right-click your printer name and select **Properties**.
2. Click the **Optional Settings** tab.

You see a window like this:

3. Make sure **Acquire from Printer** is selected and click **Get**.

   The optional paper sources are listed in the Current Printer Information section.

4. Click **OK**.

The optional paper cassettes are now enabled.

Enabling the Optional Paper Cassettes - PostScript Printer Software - Windows

Enabling the Optional Paper Cassettes - PostScript Printer Software - Windows

If you installed optional paper cassette units, you need to enable the optional cassette units before you can use them with the PS3 printer software.

1. Do one of the following:
   - **Windows 11:** Click , search for **Settings** and select it. Select **Bluetooth & devices** > **Printers & scanners**. Select your product name, then select **Printer properties**.
   - **Windows 10:** Click  and select  (Settings) > **Devices** > **Printers & scanners** . Select your product name and select **Manage** > **Printer properties**.
   - **Windows 8.x:** Navigate to the **Apps** screen and select **Control Panel** > **Hardware and Sound** > **Devices and Printers**. Right-click your product name and select **Printer properties**.
   - **Windows 7:** Click  and select **Devices and Printers**. Right-click your product name and select **Printer Properties**.
   - **Windows Vista:** Click  and select **Control Panel**. Click **Printer** under **Hardware and Sound**, then right-click your product name, and select **Properties**.
2. Click the **Device Settings** tab.

You see a window like this:

3. Select the number of optional cassettes installed as the Lower Cassette Unit setting.
4. Click **OK**.

The optional paper cassettes are now enabled.

Status Icon Information

Your product displays status icons on the LCD screen for certain product status conditions. Press the  icon to view or change the current network settings.

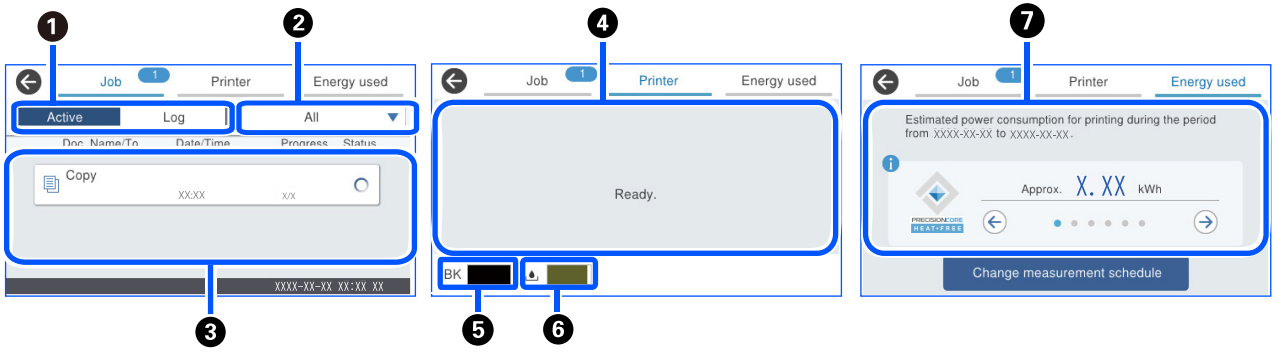

Icons	Description
	Displays additional information or instructions, such as loading paper or placing a document.
	Indicates whether a firmware update is available, Press the icon to update the firmware.
	Displays the Printer Status screen

Icons	Description
	Displays the sound setting screen. You can set the Mute and Quiet Mode settings, When Quiet Mode is enabled, noise is reduced during printing, but the print speed may be reduced. Press this icon to change the settings.
	Displays the Fax Data Information screen.
	Press this icon to enable sleep mode and turn off the LCD screen.
	The indicated setting has changed.
	There is a problem with the indicated setting. Press the icon to resolve the problem.
	No Ethernet connection.
	An Ethernet connection is established.
	No Wi-Fi connection.
	A Wi-Fi network error has occurred or the product is searching for a connection.
	A Wi-Fi connection is established. The number of bars indicates the connection's signal strength.
	No Wi-Fi Direct connection.
	A Wi-Fi Direct connection is established.
	Access to the product's functions are restricted to authorized users. Press the icon to log in to the printer using a user name and password. Contact your administrator if you do not know the login information.
	Access to the product's functions are restricted to authorized users and a user is currently logged in. Press the icon to log out of the current user account.

Parent topic: Control Panel Buttons and Lights

Job/Status Screen

You can press the **Job/Status** button to view the status of your product or print jobs.

1 Select to view active jobs or the job history

2 Select a job filter

3 Displays a list of ongoing jobs or the job history

4 Displays any errors; select the error for details

5 Displays approximate ink level

6 Displays approximate maintenance box level

7 Displays the estimated power consumption*

*The displayed power amount is a guideline value for general use and may vary depending on how you use this product. It is calculated using the following formula.<The amount of power required to print on one sheet of paper with this product> × <The number of sheets printed in the past 7 days>

* TEC is an abbreviation of Typical Electricity Consumption and is the power consumption (kWh) for a standard week (5 days of repeated operation and sleep/off and two days of sleep/off). This value is used as a reference value to comply with the "International Energy Star Program".

Parent topic: Control Panel Buttons and Lights

Selecting the Date and Time

Before using your product, select the current date, time, and daylight saving phase in your area, and choose your preferred date and time format.

Note: This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the home button, if necessary.
2. Select **Settings** > **General Settings** > **Basic Settings** > **Date/Time Settings**.
3. Select **Daylight Saving Time**.
4. Select the setting that applies to your area:
   - **Winter**: it is winter or your region does not use Daylight Saving Time (DST)
   - **Summer**: it is spring or summer and your region uses Daylight Saving Time (DST)

   Note: If your region uses Daylight Saving Time (DST), you must change this setting to match the season. When you change from **Winter** to **Summer**, your product automatically sets its clock ahead one hour. When you change from **Summer** to **Winter**, it sets its clock back one hour.
5. Select **Date/Time**.
6. Select the date format you want to use.
7. Use the numeric keypad to enter the current date and select **OK**.
8. Select the time format you want to use.
9. Use the numeric keypad to enter the current time and select **OK**.

Parent topic: Using the Control Panel

Selecting Your Country or Region

Before using your product, select the country or region in which you are using your product.

Note: If you change the country or region, your fax settings return to their defaults and you must select them again. This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the home button, if necessary.
2. Select **Settings** > **General Settings** > **Basic Settings** > **Country/Region**.
3. Scroll up or down, if necessary, and select your country or region.

   You see a confirmation screen.
4. If the setting is correct, select **Yes**. (If not, select **No** and retry.)

Parent topic: Using the Control Panel

Entering Characters on the LCD Screen

Follow these guidelines to enter characters for passwords and other settings.

- To move the cursor, select the left or right arrows.
- To change the case of letters, select .
- To delete the previous character, select .
- To enter numbers or symbols, select .
- To enter a space, select **Space**.

Parent topic: Using the Control Panel

Using Presets

You can save frequently used copy, fax, and scan settings as presets. This lets you easily reuse them whenever necessary.

Note: Presets can be locked by an administrator. If you cannot access or change presets, contact your administrator for assistance.

1. Press the home button, if necessary.
2. Select **Presets**.
3. Select **Add New**. Enter the administrator password, if necessary.

   Note: You can save up to 50 presets.

4. Select the function for which you want to set up a preset.
5. Select the settings you want to save and select **Register**.
6. Select **Name**.
7. Use the displayed keyboard to enter a name for the preset and select **OK**.
8. Select **OK** to return to the **Presets** screen.

When you copy, fax, or scan, you can use the preset by selecting **Presets** and selecting your preset name from the list.

Parent topic: Using the Control Panel

Changing LCD Screen Language

You can change the language used on the LCD screen.

Note: This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the home button, if necessary.
2. Select **Settings** > **General Settings** > **Basic Settings** > **Language**.
3. Select a language.

Parent topic: Using the Control Panel

Adjusting Control Panel Sounds

You can adjust the sound level heard when you press buttons on the control panel.

Note: This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the home button, if necessary.

2. Select **Settings** > **General Settings** > **Basic Settings** > **Sounds**.
3. Select **Mute** to turn off all control panel sounds, then go to step 7.
4. Select **Normal Mode** or **Quiet Mode** to adjust control panel sounds.

   Note: You can also select the icon on the home screen to adjust sounds.

5. Select **Button Press**.
6. Select  to decrease or  to increase the sound and select **OK** when you are finished.
7. Select the back arrow to exit.

Note: You can also adjust the **Sound Type** and the sound level for various product functions.

Parent topic: Using the Control Panel

Adjusting the Screen Brightness

You can adjust the brightness of the LCD screen.

1. Press the home button, if necessary.
2. Select **Settings** > **General Settings** > **Basic Settings** > **LCD Brightness**.
3. Select the **–** or **+** icons to decrease or increase the brightness.
4. Select **OK** to exit.

Parent topic: Using the Control Panel

Turning Off the Operation Time Out Setting

The Operation Time Out setting causes the LCD screen to return to the Home screen after a few minutes of inactivity. This feature is enabled by default, but you can turn it off.

Note: This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the home button, if necessary.
2. Select **Settings** > **General Settings** > **Basic Settings**.
3. Scroll down and set **Operation Time Out** to **Off**.

Parent topic: Using the Control Panel

Checking for Software Updates

It's a good idea to check Epson's support website occasionally for free updates to your product software. Visit epson.com/support (U.S.), epson.ca/support (Canada), or latin.epson.com/support (Latin America) and select your product.

Note: Your printer is designed to work only with genuine Epson-brand ink packs. Other brands of ink packs and ink supplies are not compatible and, even if described as compatible, may not function properly or at all. Epson periodically provides firmware updates to address issues of security, performance, minor bug fixes and ensure the printer functions as designed. These updates may affect the functionality of third-party ink. Non-Epson branded or altered Epson ink packs that functioned prior to a firmware update may not continue to function.

- **Windows**: Your printer software automatically checks for updates. You can also manually update the software by selecting **Software Update** here:
  - Accessing the Windows Desktop and right-clicking the  icon for your product in the right side of the Windows taskbar, or clicking the up arrow and right-clicking .
  - On the **Maintenance** tab in the printer settings window

  You can also update the software by selecting **EPSON Software Updater** in the **EPSON** or **Epson Software** program group, accessible by the **Start** button, or on the **Start** or **Apps** screens, depending on your version of Windows.
- **OS X**: You can manually update the software by opening the **Applications** > **Epson Software** folder and selecting **EPSON Software Updater**.
- **macOS 10.12.x to 13.x**: You can manually update the software by opening the **App Store**, selecting **Updates**, searching for a software update option for Epson Software, and selecting **Update**.

Parent topic: Product Basics

Using Power Saving Settings

Your product enters sleep mode automatically and turns off the LCD screen if it is not used for a period of time. You can make the time period shorter and select other options to save energy and resources.

Changing the Sleep Timer Settings
Changing the Power Off Timer Settings

Parent topic: Product Basics

Changing the Sleep Timer Settings

You can adjust the time period before your product enters sleep mode and turns off the LCD screen.

Note: This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the ⌂ home button, if necessary.
2. Select **Settings** > **General Settings** > **Basic Settings** > **Sleep Timer**.

   Note: Enter the administrator password, if necessary.

3. Do one of the following:
   - Select the **–** or **+** icon to decrease or increase the number of minutes.
   - Select the number of minutes on the LCD screen, select the number of minutes from the on-screen keypad, and select **OK**.
4. Select **OK**.
5. Select **Wake from Sleep**.
6. Select **Touch LCD Screen to Wake**.
7. Do one of the following:
   - Select **On** to wake the printer from sleep mode by tapping the LCD touchscreen or by pressing a button on the control panel.
   - Select **Off** to wake the printer from sleep mode by only pressing a button on the control panel. This prevents unintentional operations due to objects bumping the LCD touchscreen.
   - Select **Scheduled** to set a time range for the feature to be enabled.

Parent topic: Using Power Saving Settings

Changing the Power Off Timer Settings

You can have the product turn off automatically if it is not used for a specified period of time.

Note: This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the ⌂ home button, if necessary.

2. Select **Settings** > **General Settings** > **Basic Settings** > **Power Off Timer**.
3. Select a time period between **30minutes** and **12h** (12 hours).

Setting Up Epson Connect Services

If you did not activate your product's email address for use with Epson Connect when you set up your product, you can activate it using the product control panel.

1. Press the ⌂ home button, if necessary.
2. Select **Settings**.
3. Select **General Settings**.

You see a screen like this:

4. Select **Web Service Settings**.
5. Select **Epson Connect Services**.

   You see a screen like this:

6. Select **Register**.
7. Follow the instructions on the screen to activate your product's email address.

Parent topic: Epson Connect Solutions for Smartphones, Tablets, and More

Using Epson Email Print

With Epson Email Print, you can print from any device that can send email, such as your smartphone, tablet, or laptop. Just activate your product's unique email address. When you want to print, attach a PDF, Microsoft Office document, or photo to an email and send it to your product. Both the email and the attachments will print automatically.

1. Connect your product to your network. See the link below.
2. If you did not already set up Email Print when you installed your product software, see the link below to use your product control panel to activate your unique email address. Or visit epson.com/connect (U.S.), epson.ca/connect (Canada), or latin.epson.com/connect (Latin America) to learn more about Email Print, create your Epson Connect account, and register your product to the Epson Connect service.
3. Now you are ready to send and print emails to your product's Email Print address.

Note: Go to epsonconnect.com and log into your Epson Connect account to personalize your product's email, adjust print settings, and set up other Epson Connect services.

Printing a Network Status Sheet
Printing a Network Connection Report
Changing or Updating Network Connections

Network Security Recommendations

To help deter unauthorized access to your product over a network, you should protect your network environment using appropriate security measures.

Security measures such as these can help deter threats such as loss of user data, use of telephone and fax lines, and other intrusions:

- **Enable security on your wireless LAN**

  Enable the appropriate security on the wireless LAN you plan to use with your product. Network security such as a network password can deter interception of traffic over the wireless LAN. Your router may already have a default password enabled by your Internet service provider (ISP). See your ISP and router documentation for instructions on how to change the default password and better secure your network.

- **Connect your product only to a network protected by a firewall**

  Connecting your product directly to the Internet may leave it vulnerable to security threats. Instead, connect it to a router or other network connection protected by a firewall. Your router may already have a firewall set up by your Internet service provider; check with your ISP for confirmation. For best results, set up and use a private IP address for your network connection.

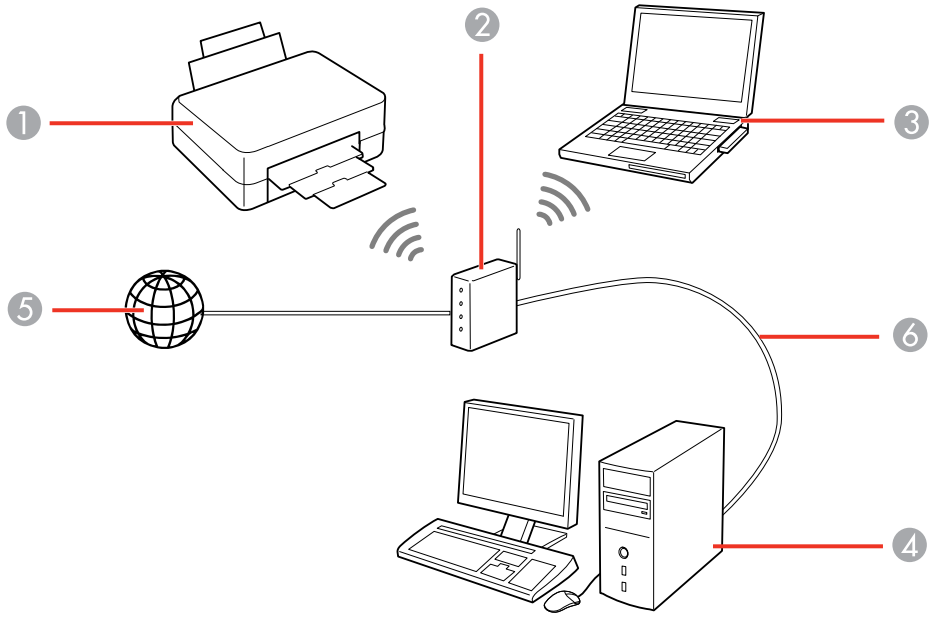

- **Change the default administrator password on your product**

  If your product has the option to set an administrator password, change the default administrator password to deter access by unauthorized users to personal data stored on your product, such as IDs, passwords, and contact lists.

Parent topic: Wi-Fi or Wired Networking

Wi-Fi Infrastructure Mode Setup

You can set up your product to communicate with your computer using a wireless router or access point. The wireless router or access point can be connected to your computer over a wireless or wired network.

1 Epson product
2 Wireless router or access point
3 Computer with a wireless interface
4 Computer
5 Internet
6 Ethernet cable (used only for wired connection to the wireless router or access point)

Selecting Wireless Network Settings from the Control Panel

Parent topic: Wi-Fi or Wired Networking

Selecting Wireless Network Settings from the Control Panel

You can select or change wireless network settings using your product control panel.

To install your product on a wireless network, follow the instructions on the *Start Here* sheet and install the necessary software by downloading it from the Epson website. The installer program guides you through network setup.

Note: Breakdown or repair of this product may cause loss of fax and network data and settings. Epson is not responsible for backing up or recovering data and settings during or after the warranty period. We recommend that you make your own backup or print out your fax and network data and settings.

1. Press the ⌂ home button, if necessary.
2. Press the icon.
3. Select **Router**.
4. Select **Start Setup**, **Change Settings**, or **Change to Wi-Fi Connection**.
5. Select **Wi-Fi Setup Wizard**.
6. Select the name of your wireless network or select **Enter Manually** to enter the name manually. Use the displayed keypad to enter your network name.
7. Select the **Enter Password** field and enter your wireless password using the displayed keypad.

Note: The network name and password are case sensitive. Be sure to correctly enter uppercase and lowercase letters, and numeric or special characters.

- To move the cursor, select the left or right arrows.
- To change the case of letters, select .
- To delete the previous character, select .
- To enter numbers and symbols, select .
- To enter a space, select **Space**.

8. Select **OK** when you finish entering your password.
9. Confirm the displayed network settings and select **Start Setup** to save them.

   A message appears when setup is complete.
10. Press the ⌂ home button to exit.

    You see the  icon on the LCD screen and should be able to connect to your product directly from your computer or device, and then print. If you are printing from a computer, make sure you installed the network software as described on the *Start Here* sheet.

    Note: If you don't see the  icon, you may have selected the wrong network name or entered the password incorrectly. Repeat these steps to try again.

Entering Characters on the LCD Screen

Wi-Fi Direct Mode Setup

You can set up your product to communicate directly with your computer or another device without requiring a wireless router or access point. In Wi-Fi Direct Mode, the product itself acts as a network access point for up to 8 devices.

1 Epson product

2 Computer with a wireless interface

3 Other wireless device

Note: The product normally uses W52 (36ch) as the channel when connecting to Wi-Fi Direct (Simple AP). Since the channel for wireless LAN (Wi-Fi) connection is selected automatically, the channel used may differ when used at the same time as a Wi-Fi Direct connection. Sending data to the printer may be delayed if the channels are different. If it does not interfere with use, connect to the SSID in the 2.4 GHz band. In the 2.4 GHz frequency band, the channels used will match.

When setting the wireless LAN to 5 GHz, we recommend disabling Wi-Fi Direct.

Connecting to a Mobile Device
Modifying the Wi-Fi Direct Network Name or Password

Parent topic: Wi-Fi or Wired Networking

Connecting to a Mobile Device

You can connect a mobile device directly to the printer without a wireless router or access point.

Note: Make sure the Epson Smart Panel app is installed on your mobile device before connecting to the printer.

1. Press the home button, if necessary.
2. Select the  icon.
3. Select **Wi-Fi Direct** .
4. Select **Start Setup**.
5. Do one of the following:
   - If you are using Epson Smart Panel, open the Epson Smart Panel app on your device and select the printer displayed on the LCD screen. Select **Complete** on the LCD screen.
   - For iOS devices, select **Other Methods**, then select **iOS**. Scan the QR code with the camera app on your device and follow the instructions on your device. On the printer LCD screen, select **Complete**.
   - For other types of devices, select **Other Methods**, then select **Other OS Devices**. Use your device to select the Wi-Fi network name (SSID) displayed on the LCD screen, then enter the password shown.
6. Follow the instructions on the LCD screen to complete Wi-Fi Direct setup.

   The  Wi-Fi Direct icon displayed on the LCD screen indicates if Wi-Fi Direct is enabled on the product.

   If you are printing from a computer, make sure you installed the network software as described on the *Start Here* sheet.

Entering Characters on the LCD Screen

Modifying the Wi-Fi Direct Network Name or Password

You can modify the Wi-Fi Direct name and password to create a more descriptive and secure Wi-Fi Direct network.

Note: If you are printing from a computer, make sure you installed the network software as described on the *Start Here* sheet.

1. Press the ⌂ home button, if necessary.
2. Select the  icon.
3. Select **Wi-Fi Direct**.
4. Select **Start Setup**.
5. Select the **Menu** icon.
6. Do one of the following:
   - To change the Wi-Fi Direct network name, select **Change Network Name**, and select **Yes**. Select **Change**, then use the on-screen keyboard to enter the new network name.
   - To change the Wi-Fi Direct password, select **Change Password**, then select **Yes**. Use the on-screen keyboard to enter your new Wi-Fi Direct password.

     Note: Your password must be at least 8 and no more than 22 characters long.

   Note: If you have already connected devices or computers to your product via Wi-Fi Direct, they will be disconnected when you change the network name or password.
7. When entering your Wi-Fi Direct network name or password, do the following:
   - To enter letters or symbols, tap them on the LCD screen.
   - To enter numbers and symbols or change the case of letters, select the **123#** icon.
   - To delete the previous character, select the  back icon.
   - To enter a space, select **Space**.
8. Use your computer or wireless device to select the Wi-Fi network name (SSID) displayed on the LCD screen, then enter the password shown.

   Note: Make a note of the SSID and password that appear.
9. Press the ⌂ home button to return to the home screen.

   Computers and wireless devices can now access the product using the new network name and password.

Parent topic: Wi-Fi or Wired Networking

Network Connection Report Codes and Messages

Check the error codes and messages on the network connection report to solve problems you may encounter with network connections. The tables here list solutions to problems based on the error codes and messages that may appear at the top of the report.

1 Error code

2 Message

Note: Error codes and messages listed here may not all apply to your product.

Error Codes and Messages

Error code and message	Solution
E-1 Confirm that the network cable is connected and network devices such as a hub, router, or access point are turned on.	Make sure your router, access point, and/or hub are turned on, and the network cable is securely connected to your device and your product. If you are trying to set up Wi-Fi, remove the network cable and set up Wi-Fi again. Ethernet and Wi-Fi cannot be connected at the same time.

Error code and message	Solution
E-2, E-3, or E-7 No wireless network names (SSID) found. Confirm that the router/access point is turned on and the wireless network (SSID) is set up correctly. Contact your network administrator for assistance. No wireless network names (SSID) found. Confirm that the wireless network name (SSID) of the PC you wish to connect is set up correctly. Contact your network administrator for assistance. Entered security key/password does not match the one set for your router/access point. Confirm security key/password. Contact your network administrator for assistance.	Check the following: • Make sure your router or access point is turned on and is correctly connected to your computer or network device. • Turn off the router or access point, wait about 10 seconds, and turn it on again. • Move your product closer to your router or access point, and remove any obstacles between them. Also move your product away from devices such as wireless phones or microwaves. • Confirm that the SSID shown on the network connection report matches the label on your router or access point. Also make sure your SSID uses only ASCII characters and symbols, or your product cannot display the SSID correctly. • If you are trying to connect using the WPS push button method, make sure your router or access point supports it. • If you are using a network password, check the label on your router or access point to confirm that you are using the correct password, or check with your network administrator or router/access point documentation. • If you are connecting to a smart device that generates an SSID, check the device documentation for the SSID and password you should use. • If your wireless connection suddenly disconnects, and another smart device was added to the network using a WPS push button method, or your network was set up using a non-WPS push button method, try downloading and installing your product software again.

Error code and message	Solution
E-5 Security mode (e.g. WEP, WPA) does not match the current setting of the printer. Confirm security mode, and contact the network administrator for assistance.	If the security on your router or access point is not one of the following types, change the type of security on your router or access point and reset your product's network settings. • WEP-64 bit (40 bit) • WEP-128 bit (104 bit) • WPA PSK (TKIP/AES); also known as WPA Personal • WPA2 PSK (TKIP/AES); also known as WPA2 Personal • WPA (TKIP/AES) • WPA2 (TKIP/AES) • WPA3-SAE (AES) • WPA2/WPA3-Enterprise Latin America: Also make sure you are connecting to the 2.4GHz band on your network and using the password for that band.
E-6 MAC address of your printer may be filtered. Check whether your router/access point has restrictions such as MAC address filtering. See the documentation of the router/access point or contact your network administrator for assistance.	If your router or access point has MAC address filtering enabled, register your product's MAC address so it is not filtered. Locate the MAC address on the network connection report and check your router or access point documentation for instructions. If your router or access point is using shared authentication with WEP security, confirm that you are using the correct authentication key and index. If your router or access point limits the number of connected devices, raise the connection limit. See your router or access point documentation for instructions.

Error code and message	Solution
E-8 Incorrect IP address is assigned to the printer. Confirm IP address setup of the network device (hub, router, or access point). Contact your network administrator for assistance.	If your product's **Obtain IP Address** setting is set to **Auto**, enable DHCP on your router or access point. If it is set to **Manual**, the IP address may be out of range or on a different network segment; set a valid IP address using your product control panel or the Web Config utility. You can also try turning off your product and the router or access point, waiting about 10 seconds, and turning them on again.
E-9 Confirm the connection and network setup of the PC or other device. Connection using the EpsonNet Setup is available. Contact your network administrator for assistance.	Make sure your computer or network device are turned on. Also make sure that you can access the Internet and other devices on the same network from the devices you are trying to connect to your product. If you still cannot connect to your product, turn off your router or access point, wait about 10 seconds, and turn it on again. Download and install your product software again to reset your network settings.
E-10 Confirm IP address, subnet mask, and default gateway setup. Connection using the EpsonNet Setup is available. Contact your network administrator for assistance.	Make sure other devices on the network are turned on and do the following: • If your product's **Obtain IP Address** setting is set to **Manual**, check the IP address, subnet mask, and default gateway addresses on the network connection report to see if they are correct. If not, correct the settings. • If DHCP is enabled, set your product's **Obtain IP Address** setting to **Auto**. If you want to use the DHCP-assigned address as a static address, set the **Obtain IP Address** setting to **Manual**, enter the product's IP address as listed on the network connection report, and set the subnet mask to 255.255.255.0. If you still cannot connect to your product, turn off your router or access point, wait about 10 seconds, and turn it on again.

Error code and message	Solution
E-11 Setup is incomplete. Confirm default gateway setup. Connection using the EpsonNet Setup is available. Contact your network administrator for assistance.	If you set your product's **TCP/IP Setup** setting to **Manual**, check that the default gateway address listed on the network connection report is correct. Also turn on the device that is set as the default gateway.
E-12 Confirm the following: -Entered security key/password is correct -Index of the security key/password is set to the first number -IP address, subnet mask, or default gateway setup is correct Contact your network administrator for assistance.	Make sure other devices on the network are turned on and do the following: • Make sure the IP address, subnet mask, and default gateway addresses are correct, if you are entering them manually. • Confirm that the subnet mask and default gateway addresses for other devices are the same. • Make sure the IP address does not conflict with other devices. If you still cannot connect to your product, do the following: • Turn off your router or access point, wait about 10 seconds, and turn it on again. • Download and install your product software again to reset your network settings. • If your router or access point uses WEP security with several registered passwords, make sure that the first registered password is set on your product.

Error code and message	Solution
E-13 Confirm the following: -Entered security key/password is correct -Index of the security key/password is set to the first number -Connection and network setup of the PC or other device is correct Contact your network administrator for assistance.	Make sure your router, access point, and/or hub are turned on. Also make sure the TCP/IP setup on your router, access point, and/or hub is not set manually; this may cause your product's network settings to differ from the manually set up devices. If you still cannot connect to your product, do the following: • Turn off your router or access point, wait about 10 seconds, and turn it on again. • Download and install your product software again to reset your network settings. • If your router or access point uses WEP security with several registered passwords, make sure that the first registered password is set on your product.

Network Environment Messages

Message	Solution
The Wi-Fi environment needs to be improved. Turn the wireless router off and then turn it on. If the connection does not improve, see the documentation for the wireless router.	Move your product closer to your router or access point, and remove any obstacles between them. Then turn off your router or access point, wait about 10 seconds, and turn it back on again. If you still cannot connect to your product, check the documentation that came with your router or access point for solutions.
*No more devices can be connected. Disconnect one of the connected devices if you want to add another one.	You can connect up to 8 computers or other devices to your product using a Wi-Fi Direct (Simple AP) connection. If you want to add another device, disconnect an existing connected device first.
The same SSID as Wi-Fi Direct exists in the environment. Change the Wi-Fi Direct SSID if you cannot connect a smart device to the printer.	Change the Wi-Fi Direct SSID. You can change the network name after "DIRECT-XX-". The custom name must be 22 characters or less.

Changing or Updating Network Connections

See these sections to change or update how your product connects to a network.

Changing a USB Connection to a Wi-Fi Connection
Changing a Wi-Fi Connection to a Wired Network Connection
Connecting to a New Wi-Fi Router
Disabling Wi-Fi Features

Parent topic: Wi-Fi or Wired Networking

Changing a USB Connection to a Wi-Fi Connection

If you have already connected your product to your computer using a USB connection, you can change to a Wi-Fi connection.

1. Disconnect the USB cable from your product.
2. Uninstall your product software.
3. Download and install your product software from the Epson website using the instructions on the *Start Here* sheet.

Parent topic: Changing or Updating Network Connections

Related concepts

Uninstall Your Product Software

Changing a Wi-Fi Connection to a Wired Network Connection

If you have already connected your product to your computer wirelessly, you can change to a wired network connection if necessary.

1. Disable your product's Wi-Fi features.
2. Connect one end of an Ethernet network cable to the product's **LAN** port.
3. Connect the other end to any available LAN port on your router or access point.
4. Uninstall your product software.
5. Download and install your product software from the Epson website.
6. Follow the on-screen instructions to install the software.
7. When you see the Select Your Connection screen, select **Wired network connection**.
8. If you see a Select Setup Option screen, select **Set up printer for the first time**.

9. Continue following the rest of the on-screen instructions.

Parent topic: Changing or Updating Network Connections

Uninstall Your Product Software

Related tasks

Disabling Wi-Fi Features

Connecting to a New Wi-Fi Router

If you change the wireless router you have been using on your network, you need to update your product's Wi-Fi connection to the new router.

Note: If you switch to a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation for instructions.

1. Do one of the following:
   - **Windows**: Uninstall your product software.
   - **Mac**: Go to the next step.
2. Download and install your product software from the Epson website using the instructions on the *Start Here* sheet.

Parent topic: Changing or Updating Network Connections

Related concepts

Uninstall Your Product Software

Disabling Wi-Fi Features

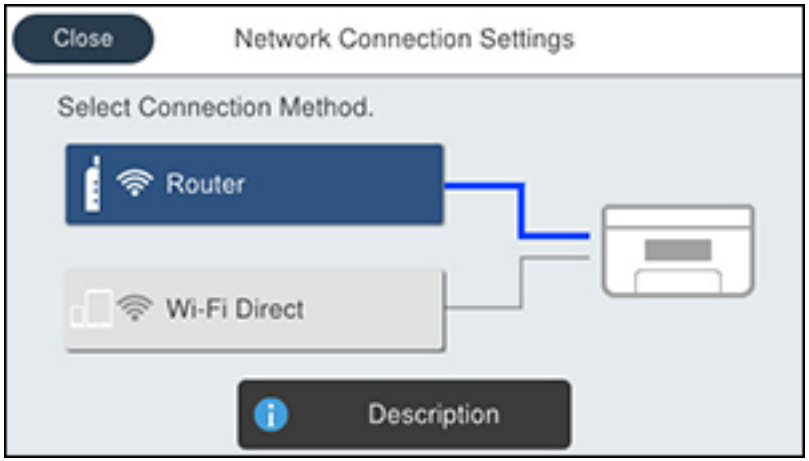

You may need to disable your product's Wi-Fi features if you change your network connection type or need to solve a problem with your network connection.

Note: Before disabling Wi-Fi features, make a note of your product's SSID (network name) and password, and any network settings selected for the Epson Connect services you may use.

1. Press the ⌂ home button, if necessary.

2. Press the icon.

   You see a screen like this:

3. Select **Router** > **Change Settings** > **Others** > **Disable Wi-Fi** > **Start Setup**.

   A message appears after Wi-Fi is disabled.

Parent topic: Changing or Updating Network Connections

Enabling PCL or PostScript Printing

Before enabling PCL or PostScript printing on your product, make sure you have installed the software as described on the *Start Here* sheet.

To download the PCL or PostScript drivers, visit epson.com/support (U.S.), epson.ca/support (Canada), or latin.epson.com/support (Latin America) and select your product.

Installing the PCL Driver - Windows
Installing the PostScript (PS3) Printer Software - Windows
Installing the PostScript (PS3) Printer Software - Mac
Selecting PDL (Page Description Language) Settings
Selecting Printer Language and Interface Settings
Printing a PCL or PS3 (PostScript) Status Sheet

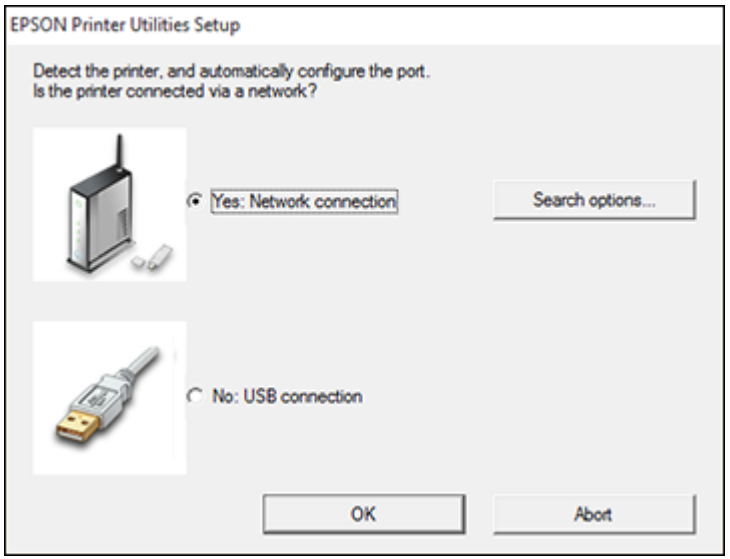

Installing the PCL Driver - Windows

The PCL driver can be installed on a Windows computer. Before enabling PCL printing on your product, make sure you have installed the software as described on the *Start Here* sheet.

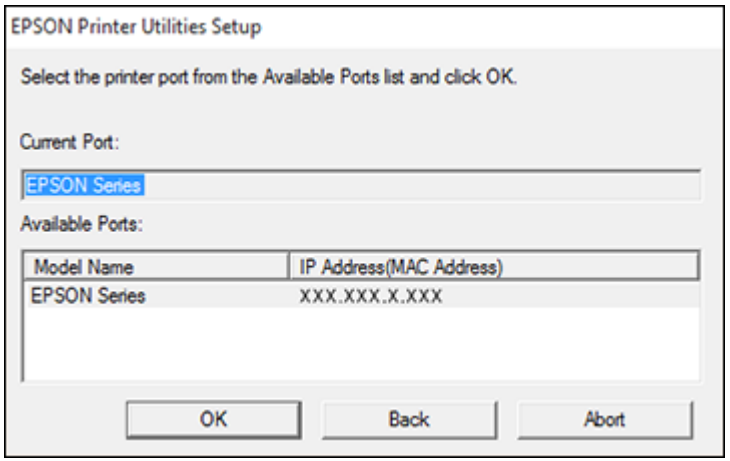

Note: Make sure your product is turned on and connected to the same network as your computer before installing the printer software. Depending on your model, not all printer languages may be supported.

1. To download the PCL file, visit epson.com/support (U.S.), epson.ca/support (Canada), or latin.epson.com/support (Latin America) and select your product.
2. After downloading the installer file, double-click the downloaded file to install the software.

3. Follow the on-screen instructions until you see this screen:

4. If your product is already connected to a network, select **Yes: Network connection** and click **OK**. You see a screen like this:

5. Make sure your product is selected, and click **OK**.

   A message appears when the installation is complete.

6. If your product is not connected to a network, select **No: USB connection** and click **OK**. Connect a USB cable to your product's USB port, and connect the other end of the cable to your computer.

   A message appears when the installation is complete.

Parent topic: Enabling PCL or PostScript Printing

Installing the PostScript (PS3) Printer Software - Windows

If you did not install the standard Epson printer software or Epson Universal Print Driver, you need to install the PostScript (PS3) printer software before you can adjust the print settings and print to your network printer.

Note: Make sure your product is turned on and connected to the same network as your computer before installing the printer software.

1. To download the **Drivers and Utilities Combo Package - PS3 PostScript** file, visit epson.com/support (U.S.), epson.ca/support (Canada), or latin.epson.com/support (Latin America) and select your product.
2. After downloading the installer file, double-click the downloaded file to install the software.
3. Click **OK**.
4. Click **Accept**.
5. Click **Install**.
6. Click **Next** and follow the on-screen instructions.

Parent topic: Enabling PCL or PostScript Printing

Installing the PostScript (PS3) Printer Software - Mac

If you did not install the standard Epson printer software, you need to install the PostScript (PS3) printer software before you can adjust the print settings and print to your network printer.

Note: Make sure your product is turned on and connected to the same network as your computer before installing the printer software.

1. To download the **Drivers and Utilities Combo Package - PS3 PostScript** file, visit epson.com/support (U.S), epson.ca/support (Canada), or latin.epson.com/support (Latin America) and select your product.
2. After downloading the installer file, double-click the downloaded file to install the software.
3. Double-click **EPSON**.
4. Click **Continue** on the next two screens.
5. Click **Agree**.
6. Click **Install**.
7. If necessary, enter the administrator password.
8. Click **Start** and follow the on-screen instructions.

Parent topic: Enabling PCL or PostScript Printing

Selecting PDL (Page Description Language) Settings

You can select settings for PCL and PostScript printing using the control panel on the product.

Note: These settings can be locked by an administrator. If you cannot access these settings, contact your administrator for assistance.

1. Press the ⌂ home button, if necessary.
2. Select **Settings** > **General Settings** > **Printer Settings** > **PDL Print Configuration**.
3. Select one of the available options, then select the PDL print configuration options you want to use.
4. When you are finished, press the ⌂ home button to exit.

PDL Print Configuration Options

Parent topic: Enabling PCL or PostScript Printing

PDL Print Configuration Options

Select the **PDL Print Configuration** options you want to use for PCL or PostScript printing.

Common Settings menu

Option	Available settings	Description
Paper Size	Various sizes	Sets the default paper size for PCL or PostScript printing
Paper Type	Various paper types	Sets the default paper type for PCL or PostScript printing
Orientation	**Portrait**	Sets the default orientation for PCL or PostScript printing
	Landscape	
Quality	**Draft**	Sets the quality for PCL or PostScript printing
	Standard	
	Best	
Ink Save Mode	**On/Off**	Saves ink by reducing print density
Print Order	**Last Page on Top**	Starts printing from the first page of a file
	First Page on Top	Starts printing from the last page of a file
Number of Copies	1 to 999	Selects the number of copies to print
Binding Margin	**Left Edge**	Specifies the binding edge for double-sided documents
	Top Edge	
Auto Paper Ejection	**On/Off**	Ejects paper automatically when printing is stopped during a print job
2-Sided Printing	**On/Off**	Selects duplex printing

PCL Menu

Option	Available settings	Description
Font Source	**Resident**	Uses a font preinstalled on the printer
	Download	Uses a font you have downloaded
Font Number	1 to 111	Selects the default font number for the default font source

Option	Available settings	Description
Pitch	0.44 to 99.99 cpi	Selects the default font pitch if the font is scalable and fixed-pitch (availability depends on font source and number settings)
Height	4.00 to 999.75 pt	Selects the default font height if the font is scalable and proportional (availability depends on font source and number settings)
Symbol Set	Various	Selects the default symbol set. If the selected font is not available for the selected symbol set, the font source and number are replaced with **IBM-US** (the default setting).
Form	5 to 128 lines	Sets the number of lines for the selected paper size and orientation. Changes the line spacing (VMI) stored in the printer. Later changes in page size or orientation cause changes in the **Form** value based on the stored VMI.
CR Function	**CR**	Selects the line feed command when printing with a driver from a specific operating system
	CR+LF	
LF Function	**LF**	
	CR+LF	
Paper Source Assign	**4**	Makes the paper source select command compatible with HP LaserJet 4

Loading Paper

Before you print, load paper for the type of printing you will do.

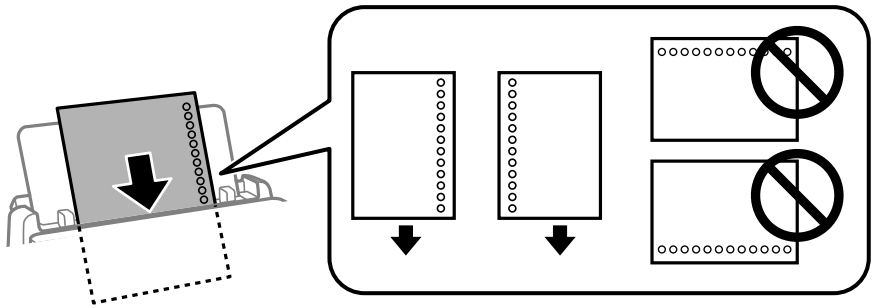

Note: Load only plain paper when printing with the PCL or PostScript (PS3) printer software.

Loading Paper in the Paper Cassettes and Rear Paper Tray
Paper Loading Capacity
Double-sided Printing Capacity
Compatible Epson Papers
Paper or Media Type Settings - Printing Software
Selecting the Paper Settings for Each Source - Control Panel
Selecting Default Paper Settings - Administrator

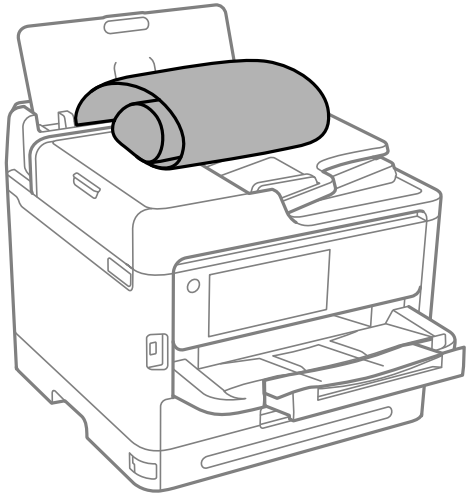

Loading Paper in the Paper Cassettes and Rear Paper Tray

You can load paper up to Legal (8.5 × 14 inches [216 × 356 mm]) in the paper cassettes and the rear paper tray.

1. To view animated instructions on how to load paper in the rear paper tray or paper cassettes, select the ⓘ help icon and select **How To** > **Load Paper**. Select a paper source and paper type.
2. If you are loading pre-punched paper, glossy paper, envelopes, or long paper in the rear paper tray, do one of the following:
   - Load one sheet of pre-punched paper, short edge first, as shown. Adjust the print position to avoid printing over the holes. Automatic 2-sided printing is not available for pre-punched paper.

- Load sheets of paper with their glossy or printable side visible.
- Load up to 10 envelopes, short edge first with the flap facing down and to the left
- Load long paper by allowing the paper to roll over as shown. Select the user-defined setting as the paper size setting.

3. Set the paper size and type on the LCD.

   Note: If you do not want to display the paper settings screen when you load paper, set the **Settings** > **General Settings** > **Printer Settings** > **Paper Source Settings** > **Paper Setup Auto Display** setting to **Off**.

Always follow these paper loading guidelines:

- Load only the recommended number of sheets.
- Load paper short edge first, no matter which way your document faces.
- Load letterhead or pre-printed paper top edge first.
- Do not load paper above the arrow mark inside the edge guides.
- Check the paper package for any additional loading instructions.

Caution: Do not load the following papers; they may cause paper jams, smears on the printout, or damage to the printer.

- Papers that are wavy or damp
- Papers that have not dried after printing on one side
- Papers that are wadded or curled
- Papers that are torn, cut, or folded
- Papers that are too thick or thin
- Pre-printed papers printed by other inkjet printers, thermal transfer printers, page printers, or copiers
- Papers that are perforated
- Papers that have stickers
- Papers held together with tape, staples, or paper clips
- Envelopes with adhesive surfaces or windows

Placing Originals on the Product

Follow the instructions here to place your original documents or photos on the product.

Caution: Do not place anything on top of your product or use its cover as a writing surface to avoid damaging it.

Placing Originals in the Automatic Document Feeder
Placing Originals on the Scanner Glass

Placing Originals in the Automatic Document Feeder

You can place single- or multi-page original documents in the Automatic Document Feeder (ADF). You can also use the ADF to scan both sides of a 2-sided document. Make sure the originals meet the Automatic Document Feeder specifications before loading them.

Caution: Do not load the following types of originals in the ADF, or they may be damaged or may damage the scanner. Use the scanner glass for these types:

- Ripped, curled, folded, deteriorated, or wrinkled originals
- Originals with holes
- Originals containing staples or paper clips
- Originals with carbon paper backing
- Originals with labels, stickers, or sticky notes
- Originals that are bound
- Originals that are cut irregularly or not cut at a right angle
- Photos or valuable artwork
- Thermal paper
- Transparencies
- Fabric or other non-paper originals
- Originals with uneven surfaces, such as embossed documents
- Originals with wet ink

Note: When originals are placed in the ADF and on the scanner glass, priority is given to the originals in the ADF.

Note: Do not load originals above the line under the triangle symbol on the ADF edge guide. Do not load originals while scanning.

1. Follow the on-screen instructions.

Placing Originals on the Scanner Glass

You can place originals up to this size on the scanner glass: Letter (8.5 × 11 inches [216 × 279 mm]) or A4 (8.3 × 11.7 inches [210 × 297 mm]).

Note: When originals are placed in the ADF and on the scanner glass, priority is given to the originals in the ADF.

1. Press the ⓘ help button and select **How To** > **Place Originals** > **Scanner Glass**.
2. Follow the onscreen instructions.

   Caution: Be careful not to trap your hands or fingers when opening or closing the document cover. Do not push down on the document cover or scanner glass or you may damage the product.

   Note: If there is any dust or dirt on the scanner glass, the scanning range may expand to include it, so the image of the original may be displaced or reduced. Use a soft, dry, clean cloth to remove any dust and dirt on the scanner glass before scanning. When placing bulky originals such as books, prevent exterior light from shining directly onto the scanner glass.

   Note: The edges of your original may be cropped by 0.06 inch (1.5 mm) from the edge of the scanner glass. Manually position your original away from the edges to prevent cropping.

Remove your originals after scanning. If you leave the originals on the scanner glass for a long time, they may stick to the glass surface.

Copying

See the information here to copy documents or photos using your product.

Note: Copies may not be exactly the same size as your originals.

Copying Documents or Photos
Copying Options

Copying Documents or Photos

You can copy documents or photos onto various sizes and types of paper, including Epson special papers.

1. Place your original document or photo on the scanner glass, or place multi-page documents in the ADF.
2. Load the paper you want to print on.
3. Press the ⌂ home button, if necessary.
4. Select **Copy**.
5. To print more than one copy, press a number key on the product's control panel, or select **Copies** and use the displayed keypad to enter the number of copies.
6. Change any of the displayed settings as necessary.
7. Select **Advanced** to view and change additional copy settings, if necessary.
8. Select **Preview** to preview your copy on the LCD screen.
9. Select **Presets** to save your copy settings.

   Note: Presets can be locked by an administrator. If you can't access or change this setting, contact your administrator for assistance.

10. When you are ready to copy, press the **Copy** icon.

    Note: To cancel printing, press the ⊽ cancel button or select **Cancel**.

Printing from a Computer

Before printing from your computer, make sure you have set up your product and installed its software as described on the *Start Here* sheet.

Note: If you have an Internet connection, it is a good idea to check for updates to your product software on Epson's support website. If you see a Software Update screen, select **Enable automatic checking** and click **OK**. The update scans your system to see if you have the latest product software. Follow the on-screen instructions. You can also check for updates using Epson Software Updater in the Epson software folder on your computer.

Selecting Basic Print Settings - Windows

Select the basic settings for the document or photo you want to print.

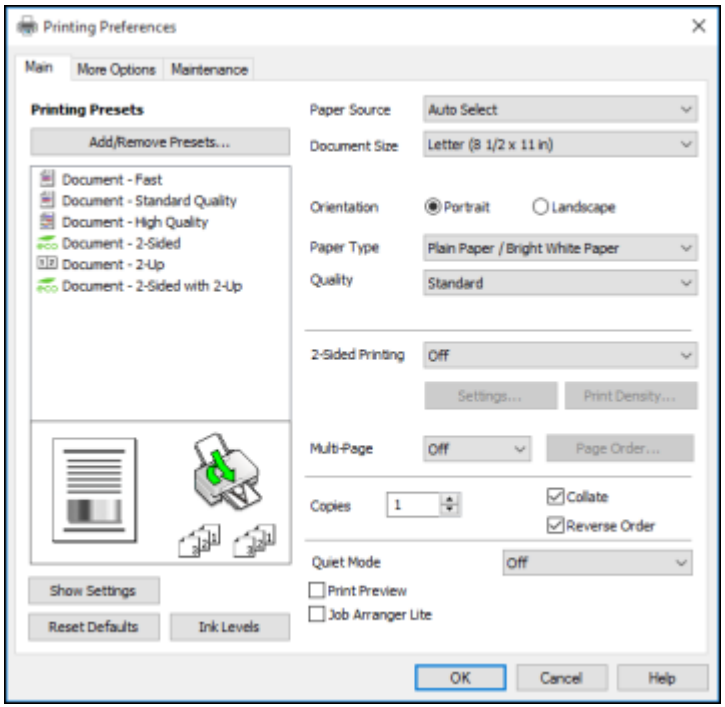

1. Open a photo or document for printing.
2. Select the print command in your application.

   Note: You may need to select a print icon on your screen, the **Print** option in the File menu, or another command. See your application's help utility for details.

3. If necessary, select your product name as the printer you want to use.

   Note: You may also need to select **Properties** or **Preferences** to view your print settings.

You see the Main tab of your printer settings window:

4. For the **Paper Source** setting, select where you loaded the paper you want to print on.
5. Select the size of the paper you loaded as the Document Size setting.

   Note: You can also select the **User-Defined** setting to create a custom paper size.

6. Select the orientation of your document.

   Note: If you are printing an envelope, select **Landscape**.

7. Select the type of paper you loaded as the Paper Type setting.

   Note: The setting may not exactly match the name of your paper. Check the paper type settings list for details.

8. Select the **Quality** setting that matches the print quality you want to use.
9. To print on both sides of the paper, select the **2-Sided Printing** setting and select the options you want.
10. To print multiple pages on one sheet of paper, or print one image on multiple sheets of paper, select one of the settings in the Multi-Page menu and select the printing options you want.
11. To print multiple copies and arrange their print order, select the **Copies** options.
12. To preview your job before printing, select **Print Preview**.
13. To save your print job as a project that can be modified and combined with other print jobs, select **Job Arranger Lite**.
14. To reduce noise during printing when you select **Plain Paper/Bright White Paper**, select **On** in the Quiet Mode menu.

    Note: Enabling **Quiet Mode** may reduce printing speed.

Selecting Double-sided Printing Settings - Windows

You can print on both sides of the paper by selecting one of the 2-Sided Printing options on the Main tab.

Note: Some options may be pre-selected or unavailable, depending on other settings you have chosen or if you are accessing the product over a network.

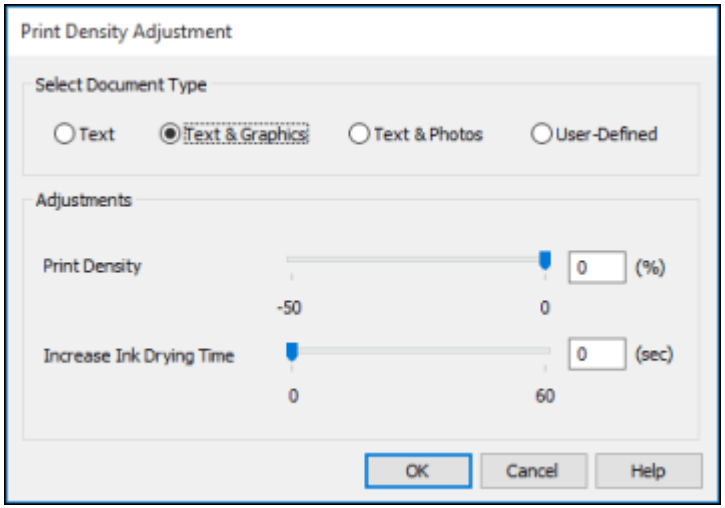

1. Select one of the following options for **2-Sided Printing**:
   - **Auto (Long-edge binding)** to print your double-sided print job by automatically flipping the paper on the long edge.
   - **Auto (Short-edge binding)** to print your double-sided print job by automatically flipping the paper on the short edge.
2. Click the **Settings** button.

   You see this window:

3. Select the double-sided printing options you want to use.
4. Click **OK** to return to the Main tab.
5. Click the **Print Density** button.

   You see this window:

6. Select the type of document you are printing as the Document Type setting. The software automatically sets the Adjustments options for that document type.
7. If necessary, select the Adjustments options you want to use.
8. Click **OK** to return to the Main tab.
9. Print a test copy of your double-sided document to test the selected settings.
10. Follow any instructions displayed on the screen during printing.

Related references

Double-sided Printing Capacity

Double-sided Printing Options - Windows

You can select any of the available options on the 2-Sided Printing Settings window to set up your double-sided print job.

Binding Edge Options
Select a setting that orients double-sided print binding in the desired direction.

Binding Margin Options
Select options that define a wider margin to allow for binding.

Start Page
Selects whether printing starts on the front or back page.

Create Folded Booklet Options
Select the **Booklet** checkbox and a binding option to print double-sided pages as a booklet.

Parent topic: Selecting Double-sided Printing Settings - Windows

Print Density Adjustments - Windows

You can select any of the available options on the Print Density Adjustment window to adjust the print quality of your double-sided print job.

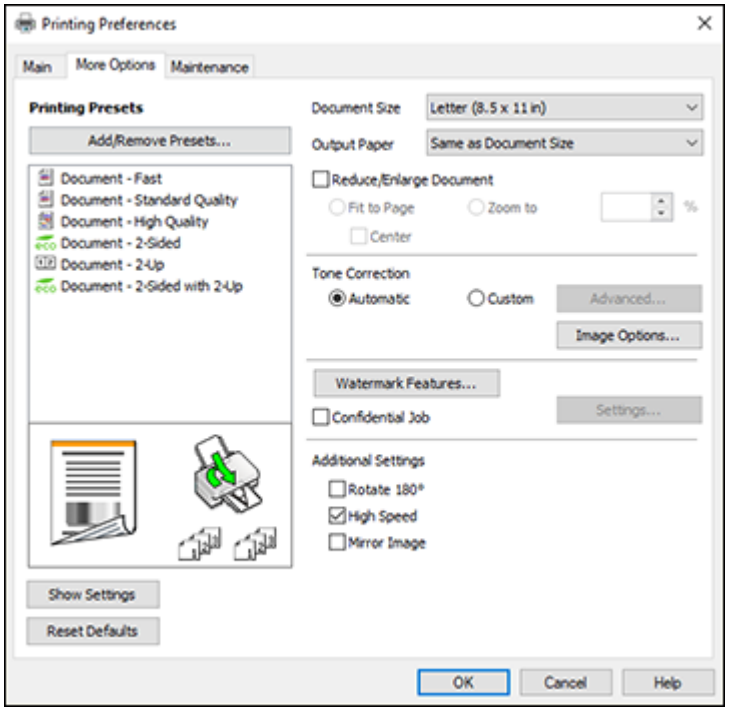

Print Density
Sets the level of ink coverage for double-sided printing.

Increase Ink Drying Time
Sets the amount of time required for drying ink after printing on one side of the paper before printing the other side in double-sided printing to prevent ink smearing.

Parent topic: Selecting Double-sided Printing Settings - Windows

Selecting Additional Layout and Print Options - Windows

You can select a variety of additional layout and printing options for your document or photo on the **More Options** tab.

1. To change the size of your printed document or photo, select the **Reduce/Enlarge Document** checkbox and select one of these sizing options:
   - Select the **Fit to Page** option to size your image to fit the paper you loaded. Select the size of your document or photo as the Document Size setting, and the size of your paper as the Output Paper setting. If you want to center your image on the paper, select the **Center** option.
   - Select the **Zoom to** option to reduce or enlarge your document or photo by a specific percentage. Select the percentage in the **%** menu.
2. Select one of the following Tone Correction options:
   - Select **Automatic** to automatically adjust the brightness and contrast for your image.

- Select **Custom** and click the **Advanced** button to manually adjust the tone correction settings or turn off color management in your printer software.
- Select **Image Options** to access additional settings for improving printed images.

3. To add the following features, click the **Watermark Features** button:
   - **Anti-Copy Pattern**: adds a watermark that only appears when your printout is copied
   - **Watermark**: adds a visible watermark to your printout

     Note: Click the **Add/Delete** button to create your own watermark, and click the **Settings** button to customize the watermark.

   - **Header/Footer**: adds information such as the date and time to the top or bottom of your printout

     Note: Click the **Settings** button to customize the text and location of the header or footer.

4. To add a password to your print job, select the **Confidential Job** checkbox, then enter a password. Confidential jobs are stored in the product's memory without being printed. To print the job, enter the password for the confidential job on the product's control panel.

   Note: Confidential print jobs are cleared from the product's memory after printing.

5. Select any of the Additional Settings options to customize your print.

Custom Color Correction Options - Windows

Custom Color Correction Options - Windows

You can select any of the available options in the Color Correction window to customize the image colors for your print job.

Color Controls
Lets you select a **Color Mode** setting, individual settings for **Brightness**, **Contrast**, **Saturation**, and **Density**, and individual color tones. Depending on the selected color mode, you can also adjust the midtone density using the **Gamma** setting.

Fix Photo
Improves the color, contrast, and sharpness of flawed photos.

Note: Fix Photo uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject's face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off **Fix Photo** to retain the special color effects.

No Color Adjustment
Turns off color management in your printer software so you can manage color using only your application software.

Parent topic: Selecting Additional Layout and Print Options - Windows

Image Options and Additional Settings - Windows

You can select any of the Image Options and Additional Settings to customize your print. Some options may be pre-selected or unavailable, depending on other settings you have chosen.

Image Options

Emphasize Text
Adjusts the weight of printed text to increase readability.

Emphasize Thin Lines
Adjusts the weight of printed lines to increase visibility.

Edge Smoothing
Smooths jagged edges in low-resolution images such as screen captures or images from the Web.

Emphasize Light Text and Lines
Adjusts the weight of light text and printed lines to increase visibility.

Additional Settings Options

Rotate 180º
Prints the image rotated 180º from its original orientation.

Bidirectional Printing
Prints in both directions (right-to-left and left-to-right), speeding up printing, but may reduce print quality.

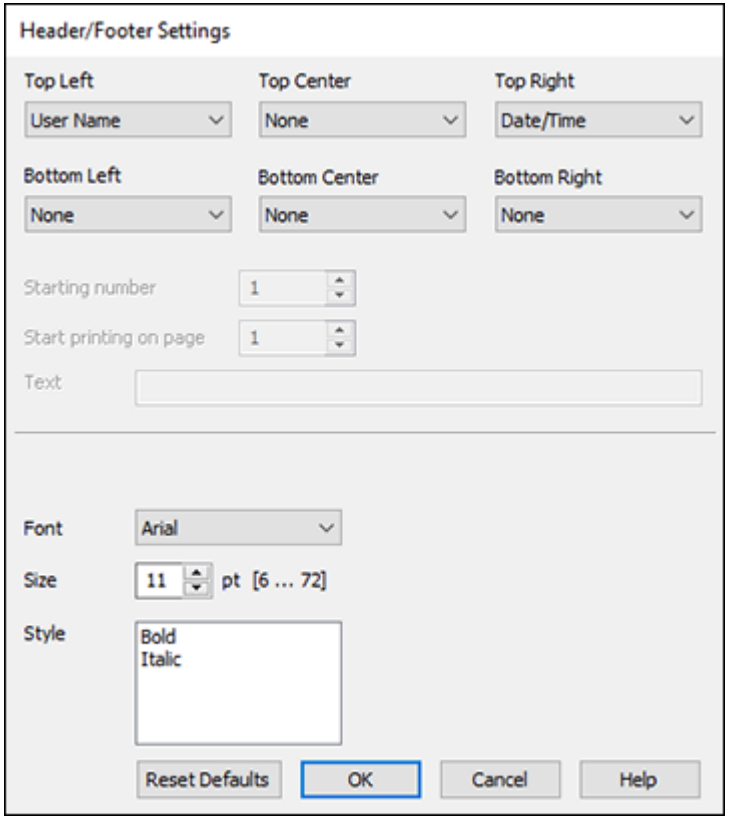

Mirror Image
Flips the printed image left to right.

Parent topic: Selecting Additional Layout and Print Options - Windows

Header/Footer Settings - Windows

You can select any of the Header/Footer Settings options to add headers or footers when you print. The items are available to print at the top or bottom of your pages, in either the left, right, or center of the page.

Note: These settings are not saved with your document.

You can select to print the following information:

- User Name
- Computer Name
- Date

- Date/Time
- Document Name
- Collate Number
- Page Number
- Text

You can also adjust the text settings for the printed information.

Note: The user name, computer name, date, and time come from the Windows Control Panel on your computer.

Parent topic: Selecting Additional Layout and Print Options - Windows

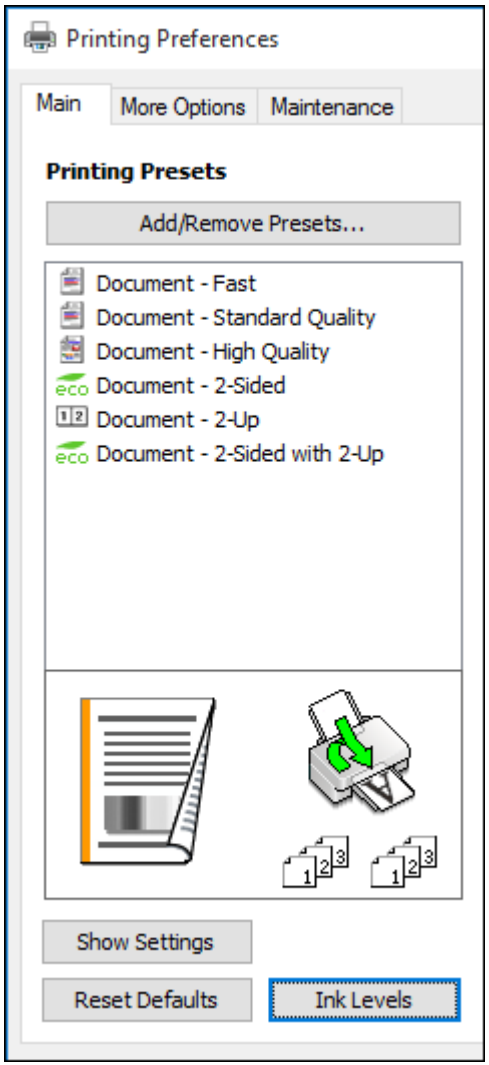

Selecting a Printing Preset - Windows

For quick access to common groups of print settings, you can select a printing preset on the **Main** or **More Options** tab.

Note: You can create your own preset by clicking the **Add/Remove Presets** button.

1. Click the **Main** or **More Options** tab.

You see the available **Printing Presets** on the left:

2. Place your cursor over one of the **Printing Presets** to view its list of settings.
3. Click on a preset to change its settings or delete it, or use any of the available options on the screen to control your printing presets.

4. To choose a preset for printing, select it.
5. Click **OK**.

Parent topic: Printing with the Standard Epson Printer Software - Windows

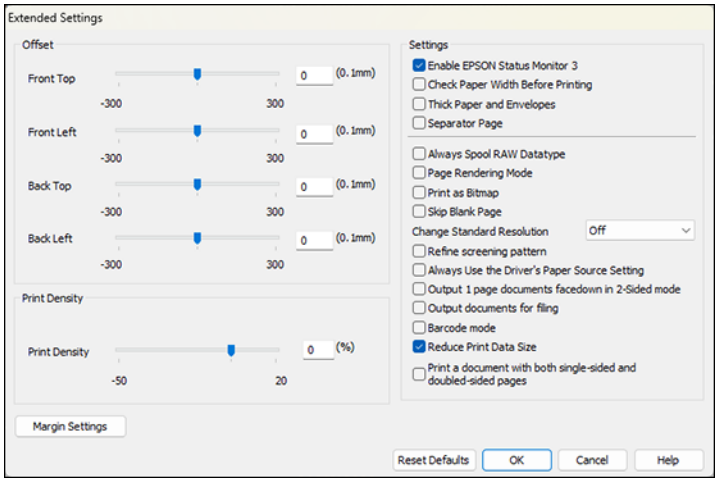

Selecting Extended Settings - Windows

You can select additional settings that apply to all the print jobs you send to your product.

1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click .
2. Select **Printer Settings**.
3. Click the **Maintenance** tab.

   You see the maintenance options:
4. Click the **Extended Settings** button.

   You see this window:

5. Select any of the extended settings to customize your print.
6. Click **OK** to close the Extended Settings window.
7. Click **OK** to close the printer software window.

Extended Settings - Windows

Parent topic: Printing with the Standard Epson Printer Software - Windows

Extended Settings - Windows

You can select these settings on the Extended Settings window.

Enable EPSON Status Monitor 3
Enables product monitoring for ink and paper supplies and other issues.

Check Paper Width Before Printing
Prevents printing beyond the edges of the paper if the paper size setting is incorrect; may reduce print speed.

Thick Paper and Envelopes
Prevents ink from smearing when you print on envelopes or other thick paper.

Separator Page
Before each document, prints a separator page containing the title, user, date, and time.

Always Spool RAW Datatype
Increases print speed and may solve other printing problems.

Page Rendering Mode
Increases print speed when printing is extremely slow or the print head stops during printing.

Print as Bitmap
Increases print speed when printing is extremely slow or the print head stops during printing, and other settings do not help.

Skip Blank Page
Ensures that your product does not print pages that contain no text or images.

Change Standard Resolution
Reduces the resolution of print data to correct printing problems.

Refine screening pattern
Prints graphics with a finer screening pattern.

Always Use the Driver's Paper Source Setting
Prints using the paper source setting in the printer driver, rather than the setting in your application.

Output 1 page documents facedown in 2-Sided mode
Outputs single-sided pages in a 2-sided print job facedown instead of faceup.

Output documents for filing
Outputs all landscape, portrait, 1-sided, and 2-sided documents in the same orientation for easier filing.

Barcode mode
Reduces bleeding when printing barcodes on plain paper, letterhead paper, recycled paper, preprinted paper, envelopes, and thick paper.

Reduce Print Data Size
Increases print data compression to improve print speed. Not recommended when printing fine patterns.

Print a document with both single-sided and double-sided pages
Prints an entire document that contains both single- and double-sided pages.

Locking Printer Settings - Windows

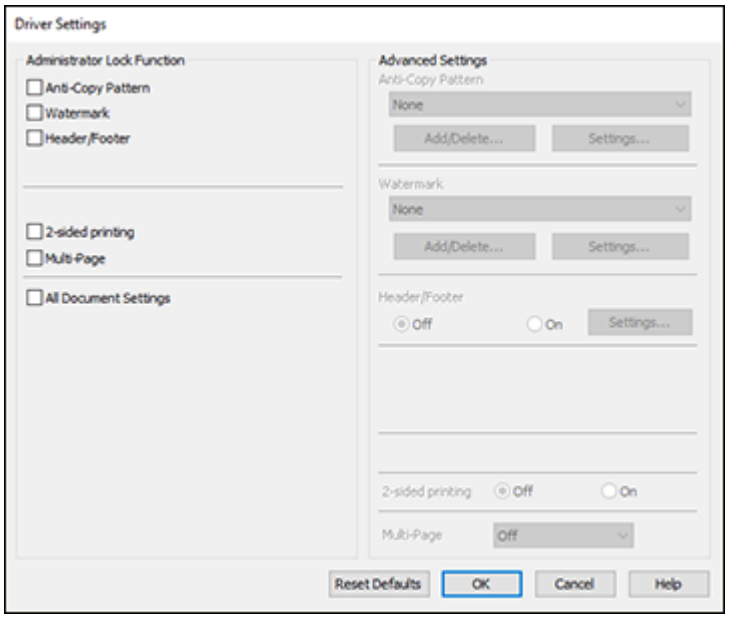

Windows administrators can lock access to some printer settings to prevent unauthorized changes.

1. Do one of the following:
   - **Windows 11:** Click , search for **Settings** and select it. Select **Bluetooth & devices** > **Printers & scanners**. Select your product name and select **Printer properties**.
   - **Windows 10:** Click  and select  (Settings) > **Devices** > **Printers & scanners**. Select your product name and select **Manage** > **Printer properties**.
   - **Windows 8.x:** Navigate to the **Apps** screen and select **Control Panel** > **Hardware and Sound** > **Devices and Printers**. Right-click your product and select **Printer properties**.
   - **Windows 7:** Click  and select **Devices and Printers**. Right-click your product and select **Printer properties**.
   - **Windows Vista:** Click  and select **Control Panel**. Click **Printer** under **Hardware and Sound**, then right-click your product and select **Properties**.
2. Click the **Optional Settings** tab.

   Note: You can prevent access to the **Optional Settings** tab by changing the user or group permissions in the **Security** tab.

3. Click **Driver Settings**.

You see this window:

4. Select the checkbox for each setting you want to lock. To lock all print settings, select **All Document Settings**.
5. Under **Advanced Settings**, select the setting option you want to use for each locked setting.
6. Click **OK**.

Locked Setting Options

Parent topic: Printing with the Standard Epson Printer Software - Windows

Locked Setting Options

Select the options you want to use for any locked print settings.

Setting	Options	Description
Anti-Copy Pattern	Various data items	Lets you select the data to use for the pattern or prohibit anti-copy patterns
	Add/Delete	Lets you add or delete a customized anti-copy pattern
	Settings	Lets you select the arrangement, size, and other settings for the custom anti-copy pattern
Watermark	Various text watermarks	Lets you select the text for the watermark or prohibit watermarks
	Add/Delete	Lets you add or delete a customized text or image-based watermark
	Settings	Lets you select the size, position, and other watermark settings
Header/Footer	**Off**	Prohibits headers or footers
	On	Allows headers and footers
	Settings	Lets you select the text and position for printing headers and footers
2-sided printing	**Off**	Allows printing on one side of the paper only
	On	Allows printing on both sides of the paper
Multi-Page	**Off**	Prohibits multi-page settings
	2-Up	Allows printing of 2 pages on one sheet of paper
	4-Up	Allows printing of 4 pages on one sheet of paper
	6-Up	Allows printing of 6 pages on one sheet of paper
	8-Up	Allows printing of 8 pages on one sheet of paper
	9-Up	Allows printing of 9 pages on one sheet of paper
	16-Up	Allows printing of 16 pages on one sheet of paper
All Document Settings	—	Lets you lock all print settings

Entering a User ID and Password for Printing

If you enabled Access Control on the product, you must enter a user ID and password in the printer driver to be able to print.

Note: If you do not know the user ID or password, contact your administrator for assistance.

1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click . Select **Printer Settings** and click the **Maintenance** tab.

2. Click the **Printer and Option Information** button.
3. Select the **Save Access Control settings** checkbox.
4. Click the **Settings** button.
5. Enter your user name and password.

6. Click **OK**.

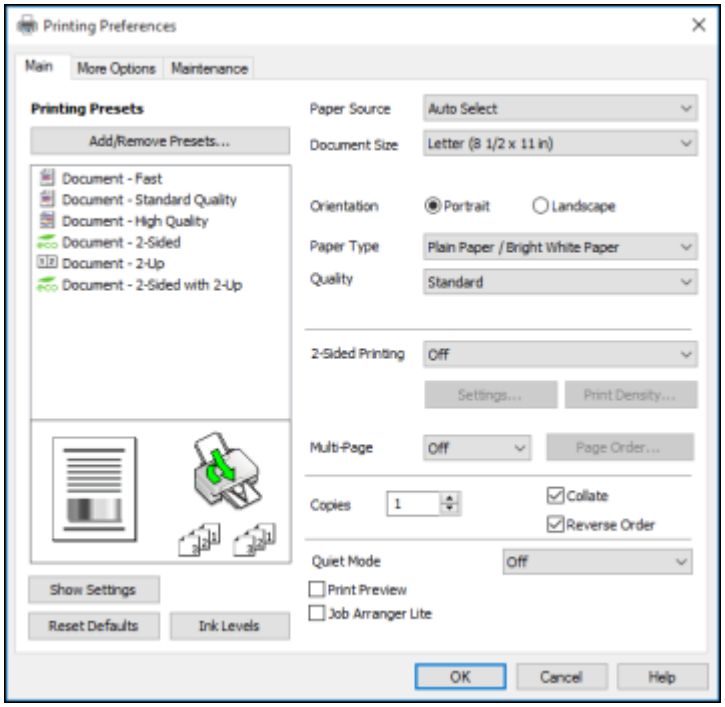

Parent topic: Printing with the Standard Epson Printer Software - Windows

Selecting Default Print Settings - Windows

When you change your print settings in a program, the changes apply only while you are printing in that program session. If you want to change the print settings you use in all your Windows programs, you can select new default print settings.

1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click .
2. Select **Printer Settings**.

   You see the printer settings window:

3. Select the print settings you want to use as defaults in all your Windows programs.

4. Click **OK**.

These settings are now the defaults selected for printing. You can still change them as needed for printing in any program session.

Changing the Language of the Printer Software Screens

Parent topic: Printing with the Standard Epson Printer Software - Windows

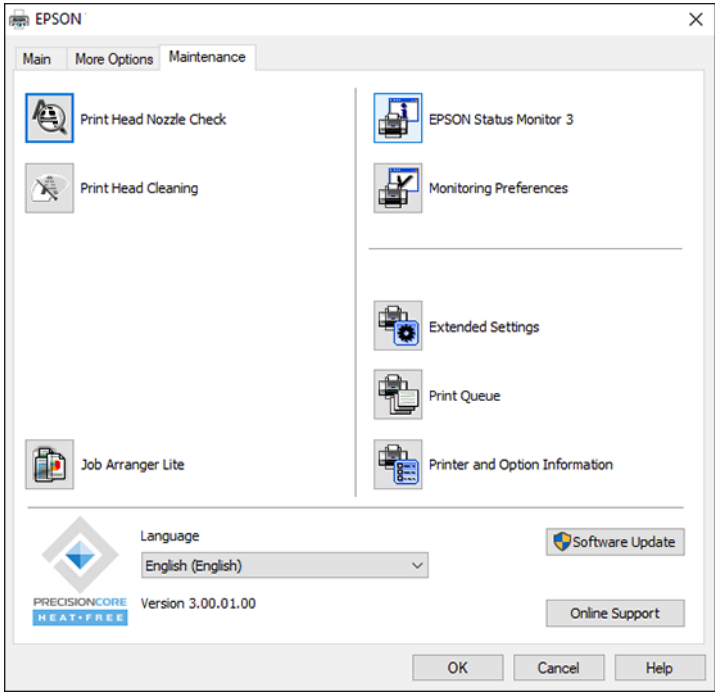

Changing the Language of the Printer Software Screens

You can change the language used on the Windows printer software screens.

1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click .
2. Select **Printer Settings**.

   You see the printer settings window.
3. Click the **Maintenance** tab.

   You see the maintenance options:

4. Select the language you want to use as the **Language** setting.
5. Click **OK** to close the printer software window.

The printer software screens appear in the language you selected the next time you access them.

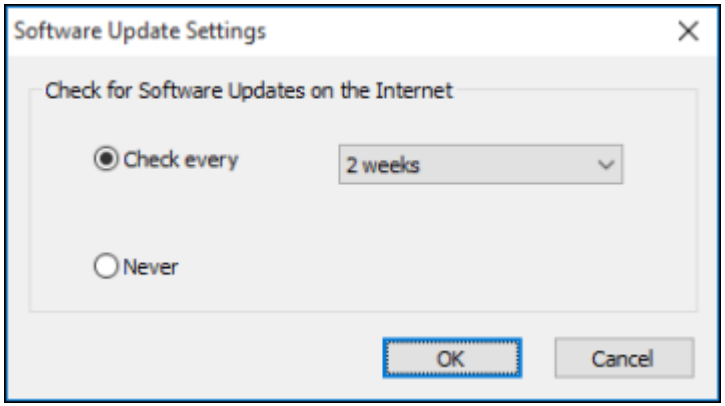

Parent topic: Selecting Default Print Settings - Windows

Changing Automatic Update Options

Your printer software for Windows automatically checks for updates to the product software. You can change how often the software checks for updates or disable this feature.

1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click .
2. Select **Software Update Settings**.

   You see this window:

3. Do one of the following:
   - To change how often the software checks for updates, select a setting in the **Check every** menu.
   - To disable the automatic update feature, select the **Never** option.
4. Click **OK** to exit.

Note: If you choose to disable the automatic update feature, you can check for updates manually.

Selecting Default Print Settings - PCL Driver - Windows

When you change your print settings in a program, the changes apply only while you are printing in that program session. If you want to change the print settings you use in all your Windows programs, you can select new default print settings.

1. Do one of the following:

   - **Windows 11:** Click , search for **Settings** and select it. Select **Bluetooth & devices** > **Printers & scanners**. Right-click on your product, select the PCL option, and select **Printer properties**.
   - **Windows 10:** Click  and select  (Settings) > **Devices** > **Printers & scanners**. Right-click on your product, select the PCL option, and select **Manage** > **Printing preferences**.
   - **Windows 8.x:** Navigate to the **Apps** screen and select **Control Panel** > **Hardware and Sound** > **Devices and Printers**. Right-click on your product, select the PCL option, and select **Printing preferences**.

- **Windows 7:** Click and select **Devices and Printers**. Right-click on your product, select the PCL option, and select **Printing preferences**.

You see the printer settings window:

Note: For more information about a setting, right-click it and select **Help**.

2. Select the print settings you want to use as defaults in all your Windows programs.
3. Click **OK**.

These settings are now the defaults selected for printing. You can still change them as needed for printing in any program session.

Locking Printer Settings - PCL Driver - Windows

Administrators can lock some printer settings to prevent unauthorized changes.

1. Do one of the following:
   - **Windows 11:** Click , search for **Settings** and select it. Select **Bluetooth & devices** > **Printers & scanners**. Right-click on your product, select the PCL option, and select **Printer properties**.
   - **Windows 10:** Click and select (Settings) > **Devices** > **Printers & scanners**. Right-click on your product, select the PCL option, and select **Manage** > **Printer properties**.
   - **Windows 8.x:** Navigate to the **Apps** screen and select **Control Panel** > **Hardware and Sound** > **Devices and Printers**. Right-click on your product, select the PCL option, and select **Printer properties**.
   - **Windows 7:** Click and select **Devices and Printers**. Right-click on your product, select the PCL option, and select **Printer properties**.
2. Click the **Optional Settings** tab.
3. Click **Driver Settings**.

   You see this window:

4. Select the checkbox for the settings you want to lock. To lock all print settings, select **All Document Settings**.
5. Under **Advanced Settings**, select the setting option you want to use for each locked setting.
6. Click **OK**.

Printing with the PostScript (PS3) Printer Software - Windows

You can print with the PostScript (PS3) printer software using any Windows printing program, as described in these sections.

Selecting Basic Print Settings - PostScript Printer Software - Windows
Selecting Default Print Settings - PostScript Printer Software - Windows

Parent topic: Printing from a Computer

Selecting Basic Print Settings - PostScript Printer Software - Windows

Select the basic settings for the document or photo you want to print.

The PostScript printer software supports plain paper printing on these paper and envelope sizes:

- Letter (8.5 × 11 inches [216 × 279 mm])
- A4 (8.3 × 11.7 inches [210 × 297 mm])
- Legal (8.5 × 14 inches [216 × 356 mm])
- A5 (5.8 × 8.2 inches [148 × 210 mm])
- B5 (7.2 × 10.1 inches [182 × 257 mm])
- A6 (4.1 × 5.8 inches [105 × 148 mm])
- B6 (5 × 7.2 inches [128 × 182 mm])
- Executive (7.25 × 10.5 inches [184 × 267 mm])
- 8.5 × 13 inches (216 × 330 mm)
- No. 10 (4.1 × 9.5 inches [105 × 241 mm])

1. Open a photo or document for printing.
2. Select the print command in your application.

   Note: You may need to select a print icon on your screen, the **Print** option in the **File** menu, or another command. See your application's help utility for details.

3. If necessary, select your product name as the printer you want to use, and then click the **Preferences** button.

   You see the **Paper/Quality** tab of your printer settings window:

4. Select the **Paper Source** that matches where you loaded the paper you want to print on.
5. Select **Plain** as the **Media** setting.
6. Click the **Layout** tab.

   You see this window:

7. Select the orientation of your document.
8. To print on both sides of the paper, select one of the **Print on Both Sides** settings.
9. To change the printing order of the pages, select one of the **Page Order** settings.
10. To print multiple pages on one sheet of paper, adjust the **Pages per Sheet** setting.
11. To create a folded booklet out of your photo or document, select the **Booklet** option.

Parent topic: Printing from a Computer

Selecting Basic Print Settings - PostScript Printer Software - Mac

Select the basic settings for the document or photo you want to print.

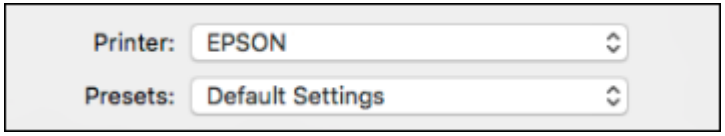

The PostScript printer software supports plain paper printing on these paper and envelope sizes:

- A4 (8.3 × 11.7 inches [210 × 297 mm])
- Letter (8.5 × 11 inches [216 × 279 mm])
- No. 10 (4.1 × 9.5 inches [105 × 241 mm])
- A5 (5.8 × 8.2 inches [148 × 210 mm])
- B5 (7.2 × 10.1 inches [182 × 257 mm])
- A6 (4.1 × 5.8 inches [105 × 148 mm])
- B6 (5 × 7.2 inches [128 × 182 mm])
- Executive (7.25 × 10.5 inches [184 × 267 mm])
- Legal (8.5 × 14 inches [216 × 356 mm])
- 8.5 × 13 inches (216 × 330 mm)

1. Open a photo or document for printing.
2. Select the print command in your application.

   Note: You may need to select a print icon on your screen, the **Print** option in the **File** menu, or another command. See your application's help utility for details.

3. Select your product as the **Printer** setting.

4. If necessary, click the arrow next to the Printer setting or the **Show Details** button to expand the print window.

You see the expanded printer settings window for your product:

Note: The print window may look different, depending on the Mac OS version and the application you are using.

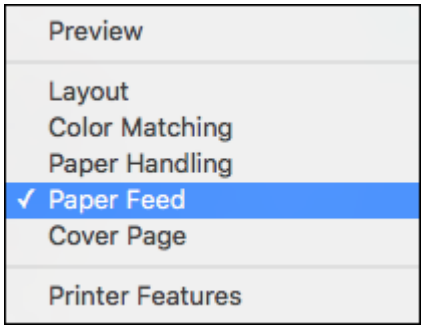

5. Select the **Two-Sided**, **Copies**, and **Pages** settings as necessary.

   Note: If you do not see these settings in the print window, check for them in your application before printing.

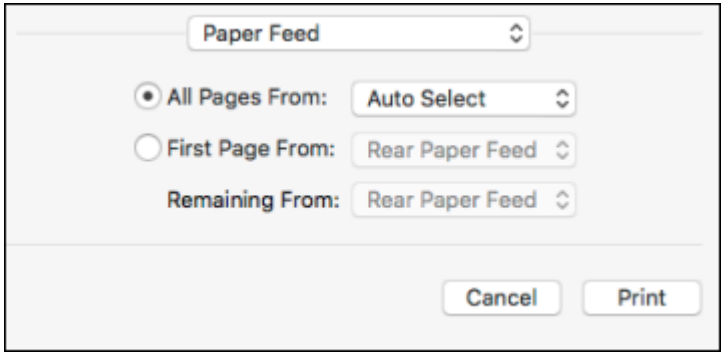

6. Select the page setup options: **Paper Size** and **Orientation**.

   Note: If you do not see these settings in the print window, check for them in your application before printing. They may be accessible by selecting **Page Setup** from the File menu.

7. Select any application-specific settings that appear on the screen, such as those shown in the image above for the Preview application.
8. Select **Paper Feed** from the pop-up menu.

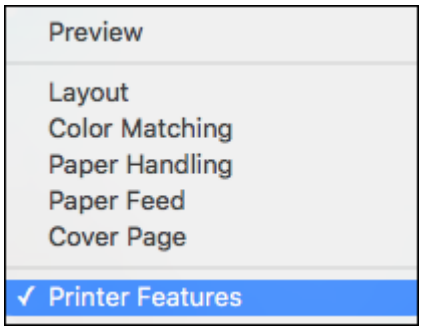

You see these settings:

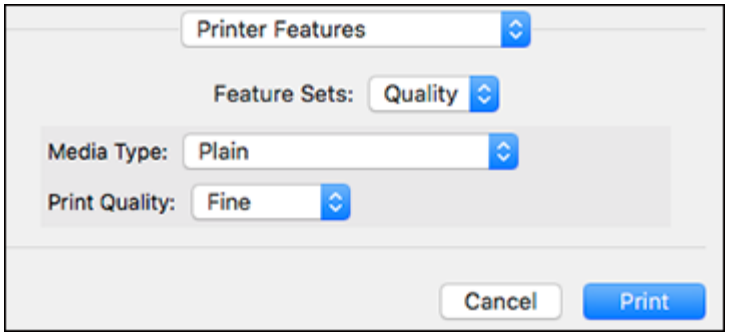

9. Select **All Pages From** or **First Page From** and select the paper source you want to print from.

10. Select **Printer Features** from the pop-up menu.

You see these settings:

11. Select **Plain** as the **MediaType** setting.
12. Select one of the following **Print Quality** options:
    - For fast printing with reduced quality, select **Fast**.
    - For printing text and graphics with good quality and print speed, select **Fine**.
    - For the best printing with reduced speed, select **Maximum**.
13. Select any of the following from the pop-up menu as necessary:
    - Select **Layout** to adjust a variety of layout options for your document or photo.
    - Select **Paper Handling** to adjust the size of the image as you print it.

- Select **Color Matching** to fine-tune the colors in your printout. For monochrome printers, this adjusts the tone and brightness of your printout.

Starting a Scan Using the Product Control Panel

You can scan an image to a variety of destinations using your product's control panel.

1. Make sure you installed the product software and connected the product to your computer or network.

   Note: Restart your computer after installing the product software to enable scanning from the control panel.

2. Place your original on the product for scanning.

   Note: To scan a double-sided or multi-page document, place your originals in the ADF.

3. Press the ⌂ home button, if necessary.
4. Select **Scan**.
5. Select one of the following **Scan to** options:
   - **Network Folder/FTP** saves your scanned file to a specified folder on a network.

- **Email** lets you send scanned files through a pre-configured email server.
- **Computer** lets you scan to a connected computer using Document Capture Pro (Windows) or Document Capture (Mac).
- **Memory Device** saves your scanned file on a USB device and lets you select the file format, quality, and other settings.
- **Cloud** sends your scanned files to a destination that you have registered with Epson Connect.
- **WSD** lets you manage network scanning in Windows 10, Windows 8.x, Windows 7, or Windows Vista (English only). To use this feature, you must first set up a WSD (Web Services for Devices) port on your Windows 7 or Windows Vista computer (the port is set up automatically on Windows 10 and Windows 8.x).

6. Follow the instructions in the links below to complete your scan.

Scanning to Email

You can scan an original and email the scanned file using your product's control panel. You need to have a preconfigured email server before you can scan to email. You can enter email addresses directly on the product's control panel or select them from the **Recipient** tab. Make sure the date and time are set correctly so the time stamps on your emails are accurate.

1. Place your original on the product for scanning.

   Note: To scan a double-sided or multi-page document, place all of the pages in the ADF.

2. Press the ⌂ home button, if necessary.

3. Select **Scan**.
4. Select **Email**.
5. Do one of the following:
   - Select an email address from any of the displayed frequent contacts.
   - Select **Keyboard** to use the on-screen keyboard to enter the email address for the recipient(s) and select **OK**.
   - Select **Contacts** and choose an email address from the list.
   - Select **History** to choose an email address from your recent scan history.
6. Select **Scan Settings**.
7. Select **File Format** to choose the file format for your scan.
8. Scroll down to change the **Subject** and **File Name**, if necessary.
9. Select any additional scan settings as necessary.
10. Select **Presets** to save your scan settings.

    Note: Presets can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

11. Select  **Send**.

    Your product scans your original and emails the scanned file.

Placing Originals on the Product

Scanning to a Connected Computer

You can scan an original and save it to a connected computer using your product's control panel. The computer must be on the same network as the product and must have the Document Capture Pro Server software installed. The product must also be configured for Document Capture Pro Server.

You can save the scanned file as a PDF file. You can also set up custom scan settings using Document Capture Pro (Windows) or Document Capture (Mac) and automatically scan using those settings on your product control panel.

1. Place your original on the product for scanning.

   Note: To scan a multi-page document, place all of the pages in the ADF.

2. Press the home button, if necessary.
3. Select **Scan**.
4. Select **Computer**.
5. Select **Select Computer** to choose a computer to scan to, and select it when it appears.

   Note: The computer you want to scan to must be on the same network as the product or connected to the product with a USB cable.

   The **Select Job** screen appears.
6. Select one of the scan job options.

   Note: The default scan job is **Scan to PDF**. Any additional scan job options must be added in Document Capture Pro (Windows) or Document Capture (Mac).

7. Select  **Save**.

   Document Capture Pro (Windows) or Document Capture (Mac) scans the original to the connected computer.

Parent topic: Starting a Scan Using the Product Control Panel

Scanning to a Memory Device

You can scan an original and save the scanned image to a external USB device connected to your product.

1. Insert an external USB device into the product's USB port.
2. Place your original on the product for scanning.

   Note: To scan a double-sided or multi-page document, place all of the pages in the ADF.

3. Press the home button, if necessary.
4. Select **Scan**.
5. Select **Memory Device**.
6. Select the settings as necessary.
7. Select **Presets** to save your scan settings.

   Note: Presets can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

8. Select  **Save**.

   Your product scans your original and saves the scanned file to the connected memory device.

Parent topic: Starting a Scan Using the Product Control Panel

Setting Up a WSD Port (Windows 7/Windows Vista)

You can scan to a networked Windows computer using WSD (Web Services for Devices). You must first set up a WSD port on your Windows 7 or Windows Vista system (the port is set up automatically on Windows 11, Windows 10 and Windows 8.x).

Before you set up a WSD port, make sure you installed your product software, and connected your product and computer to the same network.

1. Turn on your product.
2. Print a network status sheet so you can identify the network name and model name for your product on the network.
3. Click  or **Start** and select **Computer**.
4. On the left side of the window, select **Network**.
5. Locate your product on the Network screen, right-click it, and select **Install**.
6. When you see the User Account Control screen, click **Continue**.

   Note: If you see an Uninstall screen, click **Uninstall** and repeat these steps as necessary.

7. When you see the message **Your device is ready to use** in the Windows taskbar, click the message.
8. On the Driver Software Installation screen, make sure your product is listed as **Ready to use**. Then click **Close**.
9. Do one of the following:
   - **Windows 7**: Click  and select **Devices and Printers**.
   - **Windows Vista**: Click **Start** and select **Control Panel** > **Hardware and Sound** > **Printers**.

10. Make sure that an icon appears for your product's name on the network.

When you use WSD, select your product name to scan over the network.

Setting Up and Scanning to a Network Folder or FTP Server

Before you can scan to a network folder on your computer or on an FTP server, you need to create a shared folder and optionally register its location to your product's Contacts list. Select the links below as necessary to create and register the folder, and to scan to it over the network.

Creating a Shared Network Folder
Registering Contacts for Network Folder or FTP Scanning - Web Config
Registering Contacts for Email, Network, or FTP Scanning - Control Panel
Scanning to a Network Folder or FTP Server

Parent topic: Starting a Scan

Creating a Shared Network Folder

You can create a shared network folder on your computer or an FTP site and register its location to your product's Contacts list.

Note: If you are creating a shared network folder on a Mac, see your Mac documentation for instructions on creating the folder. The instructions here are for Windows.

First make sure you connected your product and computer to the same network.

Note: If you are running a Home version of the Windows operating system, you cannot create a shared folder on your Windows desktop or in the Documents or Pictures folder unless you have created a Home Group Configuration for sharing. You can, however, create a shared folder in the root of the C: drive on your system.

If you want to scan to a folder on an FTP server, contact the FTP server administrator for the server address and authentication access to a shared folder on the server.

1. If you are scanning to a network folder on your computer, do one of the following to check the format of your computer name:
   - **Windows 11, Windows 10, or Windows 8.x**: Hold down the Windows key on your keyboard and press the **X** key. Select **System** from the list that appears. Check the Computer Name or Device Name listed for your computer on the System window.
   - **Windows 7**: Click , right-click **Computer**, and select **Properties**. Check the Computer Name listed for your computer on the System window.

   Note: The settings in these steps may vary, depending on your version of Windows. See Windows Help for details on your operating system.

2. If the computer's name uses any characters that are not alphanumeric (letters or numbers), do one of the following to change the computer's name:
   - **Windows 11, Windows 10, or Windows 8.x**: Select **Rename this PC** and follow the on-screen prompts.
   - **Windows 7**: Select **Change Settings**, change the computer's name, and click **OK**. (See Windows Help for instructions, if necessary.)

   Note: You need to be logged into Windows as an administrator to change the computer's name. After changing the name, restart your computer.

3. Start File Explorer or Windows Explorer.
4. Create a folder on the Windows desktop with a folder name of 12 characters or less; otherwise, your product may not be able to access the folder.

   Note: You need to be logged into Windows as an administrator to access the desktop folder and the document folder under each User folder.

5. Right-click the folder you created and select **Properties**.
6. On the **General** tab, deselect the **Read-only** checkbox to allow users to access the folder over the network.
7. Select the **Sharing** tab and click the **Advanced Sharing** button.

   Note: You need to be logged into Windows as an administrator to select the **Advanced Sharing** button.

8. On the Advanced Sharing screen, select the **Share this folder** checkbox.
9. Click the **Permissions** button and select the following on the Share Permissions tab:
   - Select **Everyone** under Group or user names.
   - Select the checkbox in the **Allow** column for the **Change** setting.
10. Click **OK** to save the settings, then click **OK** again to close the Advanced Sharing window.
11. Select the **Security** tab and check that the Group or user names list at the top includes the current computer user and the administrators who can now access the folder.
12. Select the **Sharing** tab again and write down the **Network Path** listed under Network File and Folder Sharing at the top. This is the path you will register to your product's Contacts list so you can select it for network scanning.
13. Click **OK** or **Close**.

Now you can register the folder path to your product's Contacts list.

Parent topic: Setting Up and Scanning to a Network Folder or FTP Server

Registering Contacts for Network Folder or FTP Scanning - Web Config

You can register a list of contacts for scanning to a network folder or FTP server using Web Config and your computer's internet browser.

Before you begin, print a network status sheet and locate the IP address for your product on the sheet.

1. Start an internet browser on a computer that is using the same network as your product.

2. Type your product's IP address into the address bar and press **Enter**.
3. Click **Continue to this website (not recommended)**.
4. Click the **Scan/Copy** tab.
5. Click **Contacts**.
6. Select an empty number you want to use for the contact you are adding and click **Edit**.
7. Enter the following information for the contact:
   - **Name**: The name to display in your product's contact list.
   - **Index Word**: Enter a word to identify this entry when searching for it (up to 30 characters). This field is optional.
   - **Type**: Select **Network Folder (SMB)** or **FTP**.
   - **Assign to Frequent Use**: If you want to identify the contact as a frequently used address, select **On**. This makes it quicker to select the contact when you scan.
   - **Save to**: The network path to the shared folder.

     Enter the folder path name in one of the following formats depending on the **Type** setting you selected:

     - **SMB**: host_name\folder
     - **FTP**: host_name/folder_name
   - **Secure Connection**: For FTP locations, select the secure connection type.
   - **User Name** and **Password**: Enter only if you have set up a password on your computer.
   - **Connection Mode**: For FTP locations, select **Passive Mode** if there is a firewall between the product and FTP server.
   - **Port Number**: For FTP locations, enter the port number.
   - **Certificate Validation**: For FTP locations, choose to enable or disable an imported certificate.
8. Click **Apply**.

   After a moment, you see a message telling you that contact registration is complete.
9. Close your web browser.

Parent topic: Setting Up and Scanning to a Network Folder or FTP Server

Registering Contacts for Email, Network, or FTP Scanning - Control Panel

You can create a list of contacts for scanning to email or to a network folder or FTP.

Note: Contacts can be locked by an administrator. If you cannot access or change contacts, contact your administrator for assistance. You can create up to 200 contacts and contact groups combined (including fax contacts).

1. Press the ⌂ home button, if necessary.
2. Select **Settings** > **Contacts Manager** > **Register/Delete**.
3. Select **Add Entry**.
4. Select **Add Contact**.
5. Do one of the following:
   - To create a contact for scanning to fax, select **Fax**.
   - To create a contact for scanning to email, select **Email**.
   - To create a location for scanning to a network folder or FTP, select **Network Folder/FTP**.
6. Select the number you want to use for the contact you are adding.
7. Select the **Name** field. Use the on-screen keyboard to enter the contact name (up to 30 characters) and select **OK**.
8. Select the **Index Word** field. Use the on-screen keyboard to enter a word to use when searching for an entry (up to 30 characters) and select **OK**. (This field is optional.)
9. Do one of the following:
   - For a fax contact, select the **Enter Fax Number** field. Use the displayed keyboard to enter the fax number and select **OK**.

     Select any other fax settings as necessary.
   - For an email contact, select the **Email Address (Required)** field. Use the on-screen keyboard to enter the address and select **OK**.
   - For a network folder or FTP location, select the **Communication Mode** field and select an option. Then select the **Location (Required)** field, use the on-screen keyboard to enter the location, and select **OK**. Enter other information if necessary.

     Enter the folder path name for the location setting in one of the following formats depending on the **Communication Mode** setting you selected:

     - **SMB**: \\host name\folder
     - **FTP**: ftp://host name/folder name
10. Select **OK**.

Note: If you need to edit or delete scanning contacts, the procedures are the same as for fax contacts.

Parent topic: Setting Up and Scanning to a Network Folder or FTP Server

Scanning to a Network Folder or FTP Server

You can scan an image and save it to a network folder using your product's control panel. You can either enter the folder path directly on the product's control panel or select a folder from the **Destination** tab.

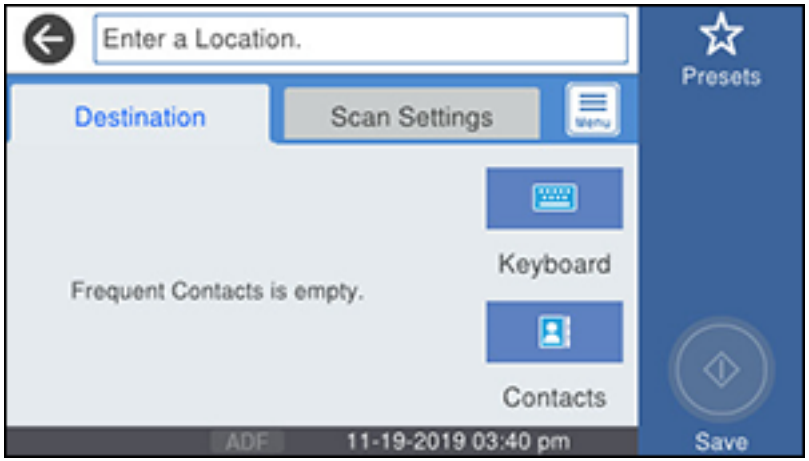

Note: Make sure the date and time are set correctly before using this feature.

1. Place your original on the product for scanning.

   Note: To scan a double-sided or multi-page document, place your originals in the ADF.

2. Press the home button, if necessary.
3. Select **Scan**.
4. Select **Network Folder/FTP**.

   You see a screen like this:

5. Do one of the following:
   - Choose a saved location on the **Destination** tab.

- Select **Keyboard**, select the **Communication Mode** field, and select **Network Folder (SMB)** or **FTP**. Then select the **Location (Required)** field, enter the folder location, and select **OK**. Enter other information as necessary.

  Enter the folder path name for the location setting in one of the following formats depending on the **Communication Mode** setting you selected:

  - **SMB**: \\host name\folder
  - **FTP**: ftp://host name/folder name
  - Select an email address from any displayed frequent contacts.

6. Select **Scan Settings**.
7. Select **File Format** to choose the file format for your scan.
8. Scroll down to select **File Name** and change it if necessary.
9. Select any additional scan settings as necessary.
10. Select **Presets** to save your scan settings.

    Note: Presets can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

11. Select  **Save**.

    Your product scans your original and saves it in the selected location.

Scanning in Epson Scan 2

Epson Scan 2 gives you access to basic and advanced scanning features. You can scan your document and save the scanned image in various file formats in your operating system's Documents or My Documents folder, or open it in your scanning program. You can preview the scanned image and select or change settings as necessary.

Note: If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

1. Start Epson Scan 2.

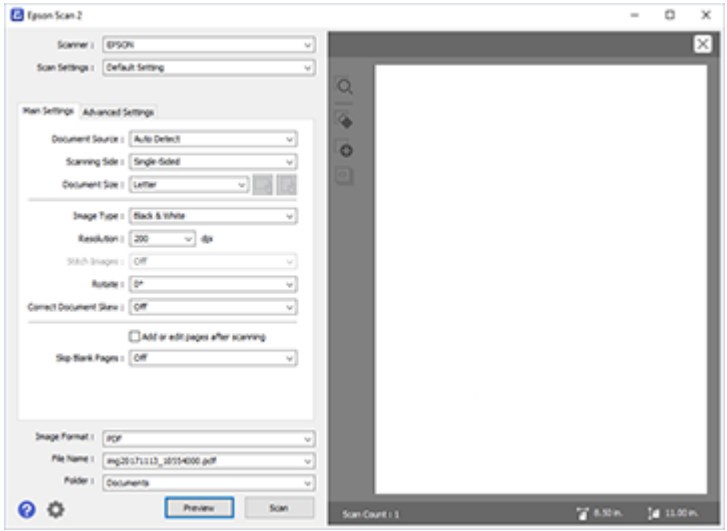

You see this window:

2. Select the **Document Source** setting that matches where you placed your original, or select **Auto Detect** to have Epson Scan 2 automatically detect the source.
3. Select the **Scanning Side** setting if you are scanning from the ADF.
4. Select the **Document Size** setting that matches the size of your original. You can select **Customize** to enter a custom size, if necessary.

5. Select the image type of your original and how you want it scanned as the **Image Type** setting.
6. Select the **Resolution** setting you want to use for your scan.
7. Select the **Rotate** setting to rotate the scanned image.
8. Select the **Correct Document Skew** setting to correct skewed originals, image contents, or both.
9. Click the **Preview** button.

   Epson Scan 2 previews your original and displays the results in the Epson Scan 2 window.

10. Reinsert your original into the ADF, if necessary.
11. Select any of the additional settings that you want to use on the Main Settings tab.
12. Click the **Advanced Settings** tab and select any settings that you want to use.
13. Select the format in which you want to save your scanned file as the **Image Format** setting. If necessary, select **Options** and select any desired format options.
14. Enter the file name for your scanned file in the **File Name** field. If necessary, select **Settings** to modify the file name settings.
15. Select the location in which you want to save your scanned file as the **Folder** setting. If necessary, select **Select** to create a new folder.
16. Click **Scan**.

The product scans your original and saves the scanned file in the location you specified.

Additional Scanning Settings - Main Settings Tab

You can select these additional scanning settings on the Epson Scan 2 Main Settings tab. Not all adjustment settings may be available, depending on other settings you have chosen.

Stitch Images
When scanning double-sided originals, lets you lay out images from both sides of the original onto one scanned page.

Rotate
Rotates the original image clockwise to the desired angle before scanning it. Select **Auto** to allow your product to automatically rotate the image based on the orientation of the text (may take longer to scan).

Correct Document Skew
Corrects skewed originals, image contents, or both.

Add or edit pages after scanning
Lets you add, remove, or edit the pages in a scan, including rotating pages and changing the page order.

Note: To save multiple pages in a single file, you must select a file format that supports multiple pages such as **PDF** or **Multi-TIFF**. If you select another file format, each scanned image or page is saved as a separate file.

Skip Blank Pages
If the scanner detects marks from the other side of a blank page and adds the marks to the scanned image, adjust this setting to prevent this.

Parent topic: Scanning in Epson Scan 2

Additional Scanning Settings - Advanced Settings Tab

You can select these additional scanning settings on the Epson Scan 2 Advanced Settings tab. Not all adjustment settings may be available, depending on other settings you have chosen.

Remove Background
Removes the background of the originals.

Text Enhancement
Sharpens the appearance of letters in text documents.

Auto Area Segmentation
Makes black and white images clearer and text recognition more accurate by separating the text from the graphics.

Threshold
Adjusts the level at which black areas in text and line art are delineated, improving text recognition in OCR (Optical Character Recognition) programs.

Color Enhance
Enhances the shades of the color you select in the scanned image. This setting is available only if you select **Grayscale** or **Black & White** as the Image Type setting.

Brightness
Adjusts the overall lightness and darkness of the scanned image.

Contrast
Adjusts the difference between the light and dark areas of the overall scanned image.

Gamma
Adjusts the midtone density of the scanned image.

Descreening
Removes the ripple pattern that might appear in subtly shaded image areas, such as skin tones. This option improves results when scanning magazines or newspapers. (The results of descreening do not appear in the preview image, only in your scanned image.)

Edge Fill
Corrects shadowing around the edges of the image by filling the shadows with black or white.

Dual Image Output
Scans the original image twice using different output settings (Windows only).

Watermark
Adds a watermark to a scanned image.

Parent topic: Scanning in Epson Scan 2

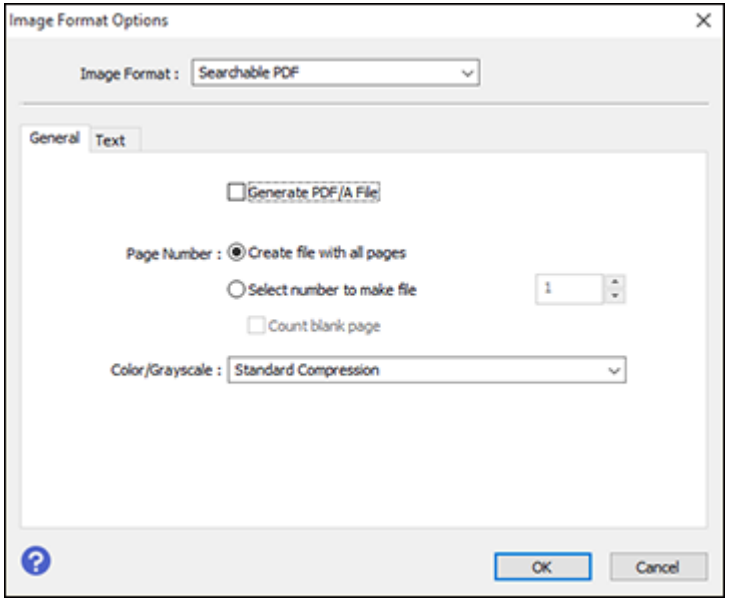

Saving Scanned Documents as a Searchable PDF Using Epson Scan 2

You can scan a document and save the text in a searchable PDF. In a searchable PDF, text is recognized using Optical Character Recognition (OCR) and then embedded in the scanned original.

Note: The required Epson Scan 2 OCR Component is installed automatically when you install your product software as instructed on the *Start Here* sheet. If you install your scanner software programs individually, be sure to also install this component if you want to perform OCR.

1. Load your original in the product for scanning.
2. Start Epson Scan 2.
3. Select your scan settings.
4. Click **Preview** and adjust the area you want to scan, if necessary.
5. If you are using the ADF, reload the ejected original.
6. Select **Searchable PDF** as the Image Format setting.
7. Select **Options** from the Image Format list.

   You see this window:

8. Select any of the options on the General tab.
9. Select the **Text** tab.
10. Make sure the language used in the document text is selected as the **Text Language** setting.
11. Select the **Security** tab if you want to add a password to the PDF or protect printing or editing properties.
12. Click **OK**.
13. Confirm the **File Name** setting and select a **Folder** setting for your document.
14. Click **Scan**.

    The scanned image is saved as a searchable PDF.

Image Format Options

You can select different image formats and related options. For details on available options, click the **?** icon on the Epson Scan 2 Image Format Options window. Not all image formats have options.

BITMAP (*.bmp)
A standard image file format for most Windows programs.

JPEG (*.jpg)
An image format that lets you highly compress image data. However, the higher the compression, the lower the image quality. (The TIFF format is recommended when you need to modify or retouch your scanned image.)

PNG (*.png)
An image format that does not lose quality during editing.

TIFF (*.tif)
A file format created for exchanging data between many programs, such as graphic and DTP software.

Multi-TIFF (*.tif)
A TIFF file format when multiple pages are saved to the same file, allowing you to edit the images using a compatible program.

PDF (*.pdf)
A document format that is readable by Windows and Mac systems using Adobe Reader, Acrobat, or other programs. You can save multi-page documents in one PDF file.

Searchable PDF (*.pdf)
A document format that is readable by Windows and Mac systems using Adobe Reader, Acrobat, or other programs. You can save multi-page documents in one PDF file. Recognized text in the scanned document can be searched.

Parent topic: Scanning in Epson Scan 2

Scan Resolution Guidelines

The **Resolution** setting, measured in dpi (dots per inch), controls the amount of detail captured in your scans. Increasing the resolution raises the amount of detail captured but comes with the following disadvantages:

- Larger file sizes
- It takes longer to scan your originals, send/receive your scans by email or fax, and to print your scans
- The image may become too large to fit on your display or print on paper

If you plan to enlarge a scanned image so you can print it at a larger size, you may need to increase the resolution from the default resolution set by Epson Scan 2. Follow these guidelines to determine the resolution setting you need:

- You will scan the image at its original size but enlarge it later in an image-editing program.

  Increase the Epson Scan 2 Resolution setting in your scan. Increase the resolution by the same amount you will increase the image size to retain a high image quality. For example, if the resolution is 300 dpi (dots per inch) and you will double the image size later, change the Resolution setting to 600 dpi.

- You will scan the image at 100% or a smaller size.

  Select the Epson Scan 2 Resolution setting based on how you will use the scanned image:

  - Email/view on a computer screen/post on the web: 96 to 200 dpi
  - Print/fax/convert to editable text (OCR)/create searchable PDF: 200 to 300 dpi

Adding and Assigning Scan Jobs with Document Capture Pro - Windows

You can add scan jobs that contain specific scan settings and use the jobs when you scan from your product control panel or the Job Scan option in Document Capture Pro. You can save up to 30 scan jobs.

Note: Settings may vary depending on the software version you are using. Click the **Help** icon in Document Capture Pro at any time for more information.

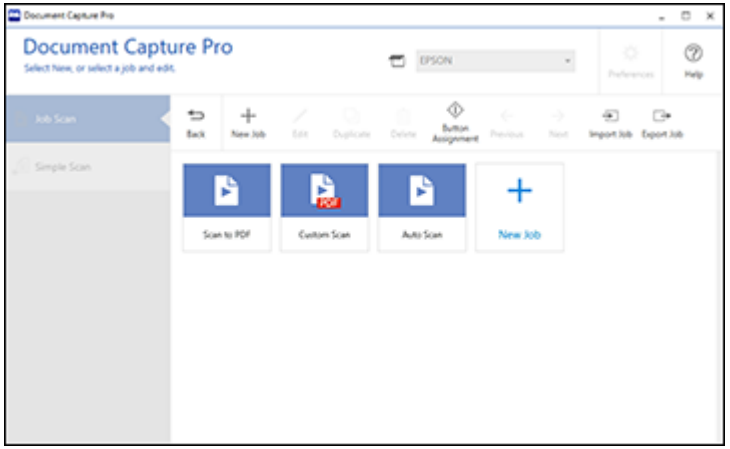

1. Do one of the following to start Document Capture Pro:
   - **Windows 11**: Click , then search for **Document Capture Pro** and select it.
   - **Windows 10**: Click  and select **Epson Software** > **Document Capture Pro**.
   - **Windows 8.x**: Navigate to the **Apps** screen and select **Document Capture Pro**.
   - **Windows (other versions)**: Click  or **Start**, and select **All Programs** or **Programs**. Select **Epson Software** > **Document Capture Pro**.

   You see the Document Capture Pro window.
2. Select the **Job Scan** tab.

You see a window like this:

3. Click the **Job Settings** button.
   You see a window like this:

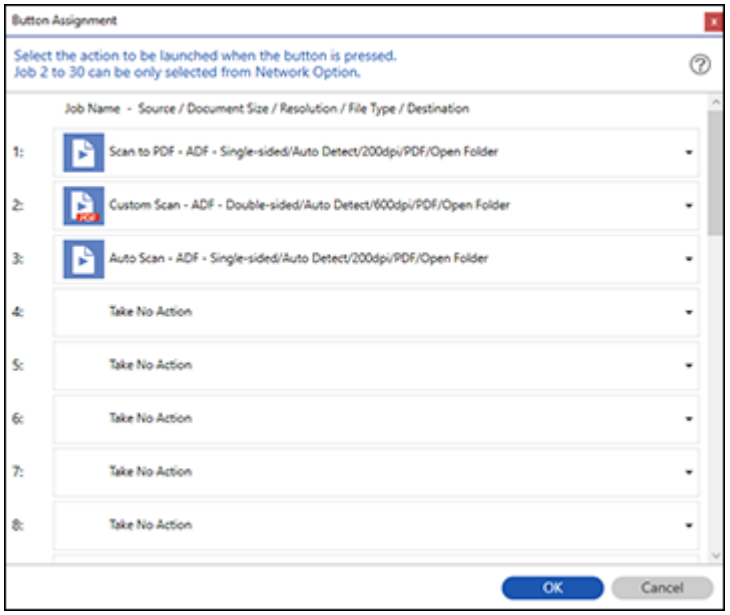

4. To add a scan job, click the **New Job** icon.

5. Enter a name for the new job, and select any settings as necessary from the following options:
   - **Scan**: select the size, color, or resolution
   - **Save**: select the file name, file type, or destination folder
   - **Index**: enable the index setting and choose output options for an index file
   - **Send**: select the destination for the scanned file, or choose to email or print the file
   - **Confirm/Test**: select the job button icon and color, choose display settings, and run a test scan if necessary
6. Click **Save** when you are finished.

   The new job appears in the Job Scan window.
7. To assign a scan job to the product control panel, click the **Button Assignment** icon.

   You see a screen like this:

8. Select the jobs that you want to assign to the product control panel using any of the pull-down menus.

   Note: The number of pull-down menus available may vary, depending on your product and any connected options.

9. Click **OK**, then click **Back**.

   You can now use the added scan jobs when you scan from the product control panel.

Parent topic: Scanning with Job Scan in Document Capture Pro - Windows

Scanning Two Originals onto One Sheet (Stitching Images) - Windows

You can scan both sides of a double-sided or folded original in Document Capture Pro and combine them into a single image with the Epson Scan 2 Stitch Images setting (not available for all products).

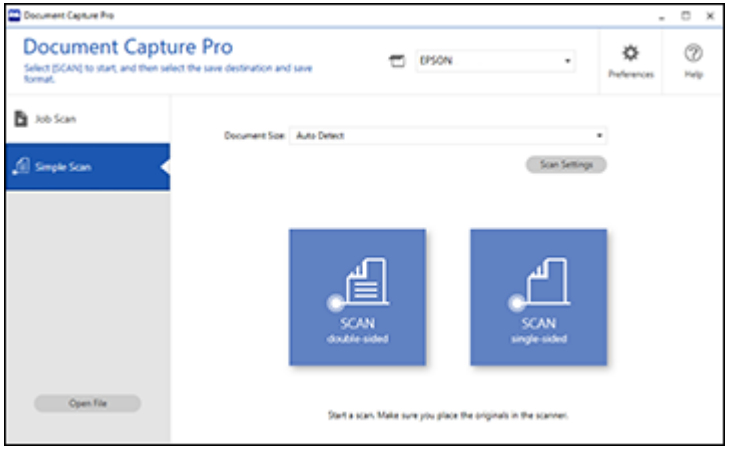

Note: Settings may vary depending on the software version you are using. Click the **Help** icon in Document Capture Pro at any time for more information.

1. Load your original in the product.

   Note: If an optional carrier sheet is included with your product, use it when scanning a folded original or damage to the original may occur. Place the original into the carrier sheet with the folded edge against the right side of the carrier sheet. Make sure to insert the carrier sheet into your product with the white edge facing down.

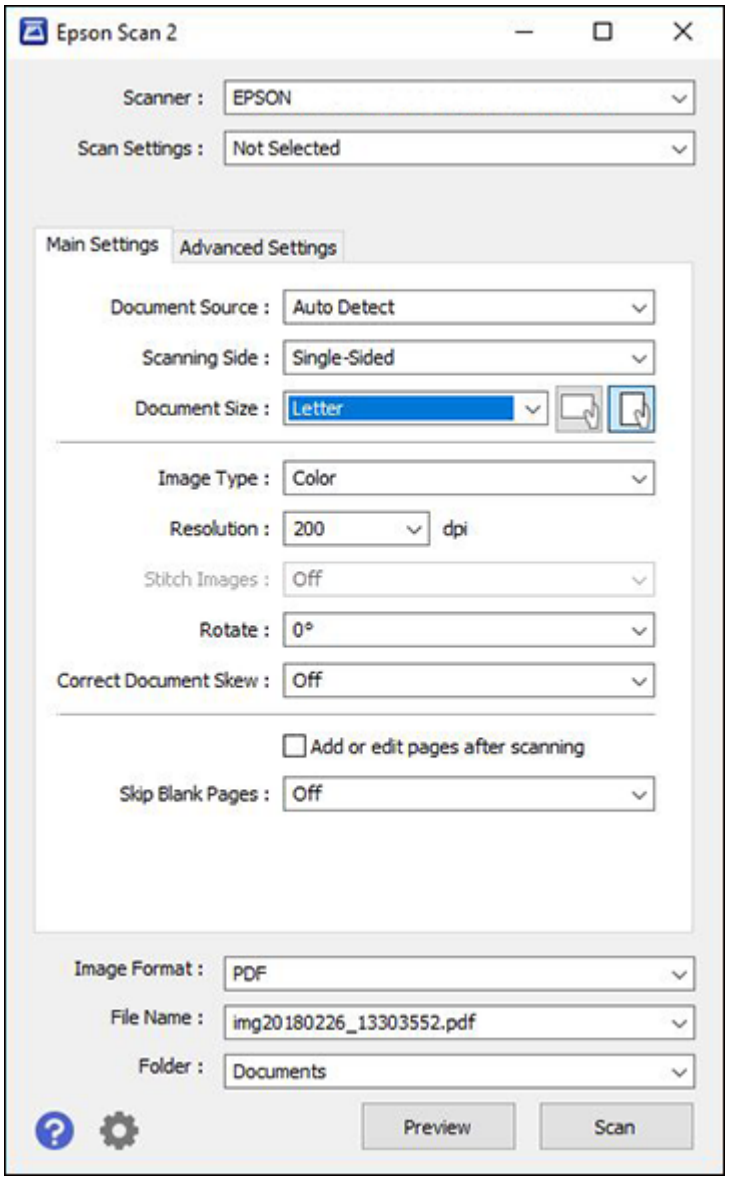

2. Do one of the following to start Document Capture Pro:
   - **Windows 11**: Click , then search for **Document Capture Pro** and select it.
   - **Windows 10**: Click  and select **Epson Software** > **Document Capture Pro**.
   - **Windows 8.x**: Navigate to the **Apps** screen and select **Document Capture Pro**.
   - **Windows (other versions)**: Click  or **Start** and select **All Programs** or **Programs**. Select **Epson Software** > **Document Capture Pro**.
3. Select the **Simple Scan** tab.

You see a window like this:

4. Click **Scan Settings** > **Detailed Settings**.

You see an Epson Scan 2 window like this:

5. Select **Double-Sided** as the **Scanning Side** setting.
6. Select the original document size or **Auto Detect** as the **Document Size** setting.
7. Select one of the following as the **Stitch Images** setting:
   - **Top & Bottom**: Places the scanned images one above the other.
   - **Left & Right**: Places the scanned images side by side.
8. Select the **Advanced Settings** tab and verify that the **Edge Fill** setting is set to **None**.
9. Click **Save**.
10. Click **OK**.
11. Click **SCAN double-sided**.

    Your product scans the original and the image appears in the Edit Scanned Results window.

    Note: If the scanned images are not stitched together in the correct orientation, click **Scanning Side** on the Epson Scan 2 window, select **Settings**, set the Binding Edge to **Left** or **Top**, and rescan the document.

12. Review and edit the scanned pages as necessary and click **Next** when you are finished.
13. Select a destination and any settings as necessary and click **Complete**.

Printing Fax Reports

Connecting a Telephone or Answering Machine

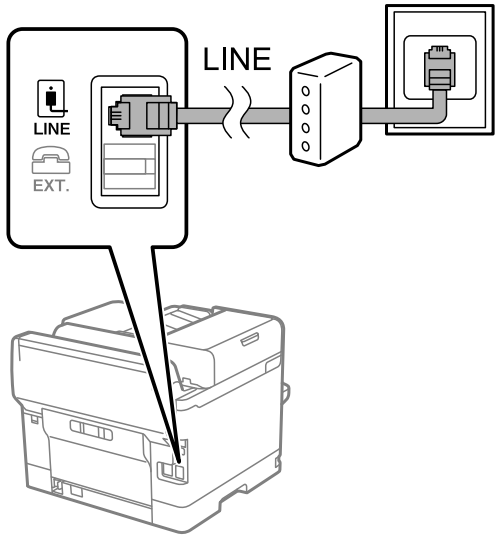

You must connect your product to a telephone wall jack to send or receive faxes. If you want to use the same telephone line to receive calls, you can connect a telephone or answering machine to your product using an additional phone cable.

Note: If you do not connect a telephone to your product, make sure Receive Mode is set to **Auto**. Otherwise, you cannot receive faxes.

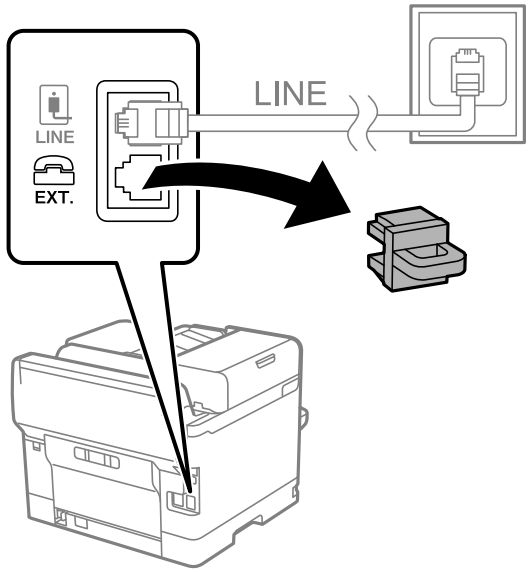

1. Connect a phone cable to your telephone wall jack and to the **LINE** port on your product.

Note: If you have a DSL or ISDN connection, you must connect the appropriate DSL filter, or ISDN terminal adapter or router to the wall jack to be able to use the line for faxing or voice calls using your product. Contact your DSL or ISDN provider for the necessary equipment.

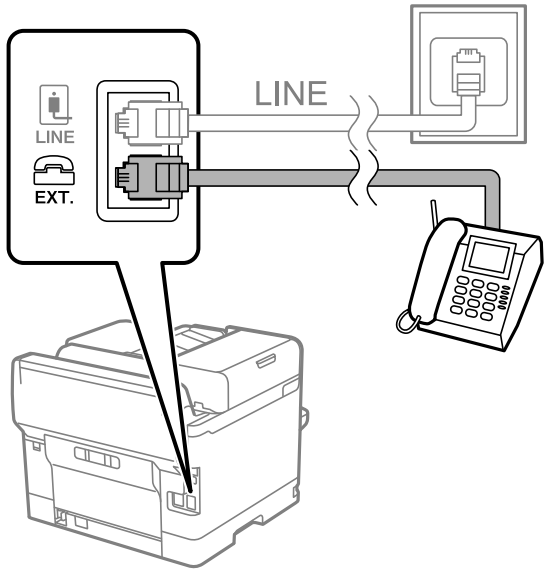

2. If you are connecting a telephone or answering machine to your product using a second phone cable, remove the cap from the **EXT** port on your product.

Note: If your telephone has a fax function, disable the fax function before connecting it. If you are not able to completely disable the fax function on your telephone, you may not be able to use it as an external telephone.

3. Connect a second phone cable to your telephone or answering machine and to the **EXT** port on your product.

Note: If you connect an answering machine and Receive Mode is set to **Auto**, set the number of rings before your product answers a call to a number that is higher than your answering machine's setting for the number of rings.

Make sure to connect the telephone to the **EXT** port on your product. If you split the telephone line between your telephone and the product, they will not work correctly.

You see a screen like this:

3. Select **Proceed**.
4. On the Fax Header screen, use the displayed keypad to enter the sender name for your fax source, such as your name or a business name. You can enter up to 40 characters. Select **OK** when you are done.
5. On the Your Phone Number screen, use the displayed keypad to enter your fax number, up to 20 characters. Select **OK** when you are done.

   Note: The name and phone number in the fax header identifies the source of the faxes you send.

6. On the Distinctive Ring Setting screen, do one of the following:
   - If you have subscribed to a distinctive ring service from your telephone company, select **Proceed**. Select the ring pattern to be used for incoming faxes or select **All**. Go to the next step.
   - If you do not have a distinctive ring service, select **Skip** and go to step 9.

   Note: Distinctive ring services allows you to have several phone numbers on one phone line. Each number is assigned a different ring pattern. You can use one number for voice calls and another for fax calls. Select the ring pattern assigned to fax calls in the DRD Setting. If you select a ring pattern other than **All**, Receive Mode is automatically set to **Auto**.

7. On the Receive Mode Setting screen, do one of the following:
   - If you have connected an external telephone or answering machine to the product, select **Yes** and go to the next step.
   - If you did not connect an external telephone or answering machine, select **No** and go to step 9. (Receive Mode is automatically set to **Auto**; otherwise you cannot receive faxes.)
8. On the next Receive Mode Setting screen, select **Yes** to receive faxes automatically or select **No** to receive faxes manually.

   Note: If you connect an external answering machine and select to receive faxes automatically, make sure the **Rings to Answer** setting is correct. If you select to receive faxes manually, you need to answer every call and operate the product's control panel or your phone to receive faxes.

9. On the Proceed screen, confirm the displayed settings and select **Proceed**, or press the back arrow to change the settings.
10. On the Run Check Fax Connection screen, select **Start Checking** and follow the on-screen instructions to check the fax connection and print a report of the check result. If there are any errors reported, try the solutions on the report and run the check again.

If the Select Line Type screen appears, select the correct line type.

If the Dial Tone Detection screen appears, select **Disable**. However, disabling the dial tone detection function may drop the first digit of a fax number and send the fax to the wrong number.

Parent topic: Setting Up Basic Fax Features

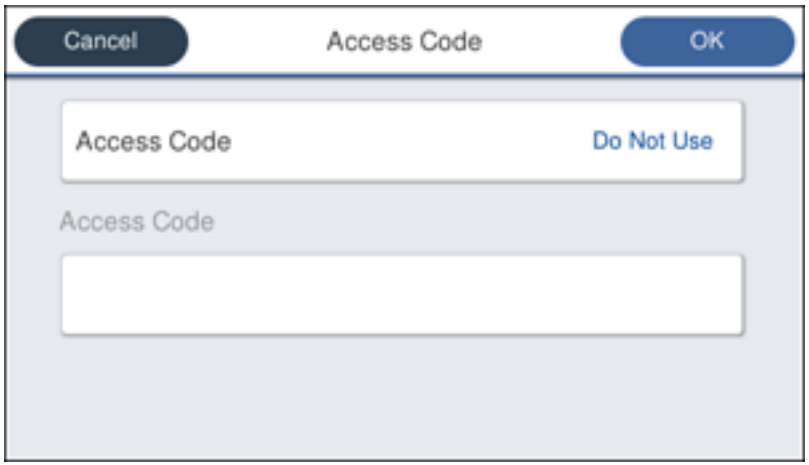

Selecting the Line Type

If you connect the product to a PBX phone system or terminal adapter, you must change the product's line type. PBX (Private Branch Exchange) is used in office environments where an external access code such as "9" must be dialed to call an outside line. The default Line Type setting is PSTN (Public Switched Telephone Network), which is a standard home phone line.

Note: This setting can be locked by an administrator. If you can't access or change this setting, contact your administrator for assistance.

1. Press the ⌂ home button, if necessary.
2. Select **Settings** > **General Settings** > **Fax Settings** > **Basic Settings** > **Line Type** > **PBX**.

You see a screen like this:

3. Select **Access Code**.
4. Select **Use**.
5. Select the Access Code field.
6. Use the displayed keypad to enter the access code, such as 9, and select **OK**.

Parent topic: Setting Up Basic Fax Features

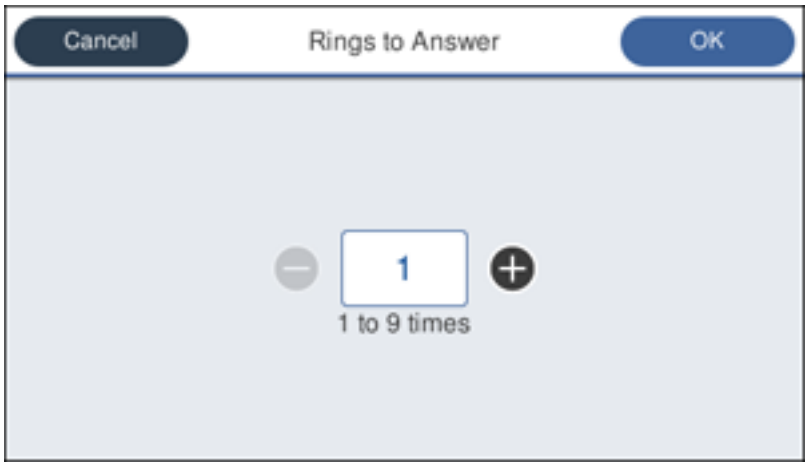

Setting the Number of Rings to Answer

If you connect an external answering machine and select to receive faxes automatically, make sure the Rings to Answer setting is correct. The number of rings should be higher than the number of rings your answering machine is set to for answering a call.

Note: This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the ⌂ home button, if necessary.
2. Select **Settings** > **General Settings** > **Fax Settings** > **Basic Settings** > **Rings to Answer**.

You see a screen like this:

3. Select the number of rings and select **OK**. Make sure to select a number higher than the number of rings your answering machine is set to for answering a call.

Note: An answering machine picks up every call faster than the product, but the product can detect fax tones and start receiving faxes. If you answer the phone and hear a fax tone, check that the product has started receiving the fax, then hang up the phone.

Parent topic: Setting Up Basic Fax Features

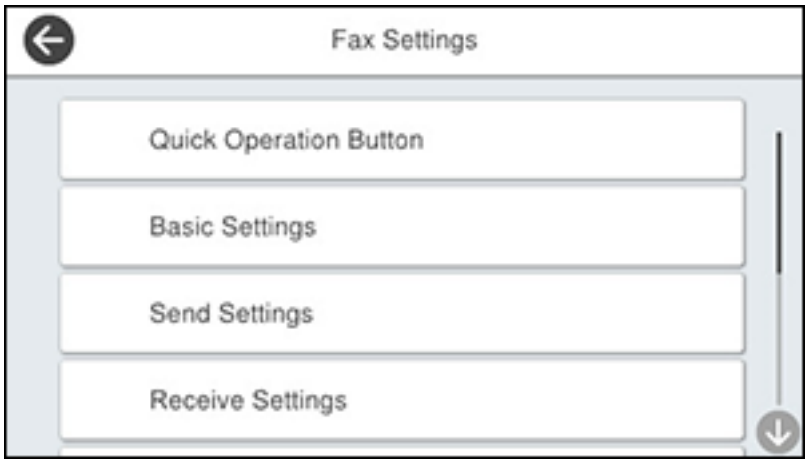

Selecting Advanced Fax Settings

You can select a variety of advanced fax settings.

Note: These settings can be locked by an administrator. If you cannot access or change these setting, contact your administrator for assistance.

1. Press the ⌂ home button, if necessary.
2. Select **Settings** > **General Settings** > **Fax Settings**.

You see a screen like this:

3. Select the group of settings you want to change.

Basic Settings - Fax
Send Settings - Fax
Receive Settings - Fax
Report Settings - Fax
Security Settings - Fax

Parent topic: Setting Up Fax Features

Basic Settings - Fax

Set the basic options you want to use for incoming and outgoing faxes.

Note: If the optional fax board is installed on your product, the **Expansion Line Settings** menu appears. You can select certain settings below for each added line.

Setting	Options	Description
Fax Speed	**Fast(33,600bps)**	Sets the speed at which you send and receive faxes.
	Medium(14,400bps)	
	Slow(9,600bps)	

Setting	Options	Description
ECM	**On**	Turns on Error Correction Mode (ECM) to automatically correct errors in sent or received fax data.
	Off	Turns off Error Correction Mode (ECM); color faxes cannot be sent or received.
Dial Tone Detection	**On**	Automatically dials the number you enter for faxing when the product detects a dial tone.
	Off	Turns off automatic dial tone detection, which may be necessary if the product is connected to a PBX (Private Branch Exchange) or a TA (Terminal Adapter). However, turning this setting off may cause the product to drop the first digit of a fax number.
Line Type	**PSTN**	Selects a standard phone line (Public Switched Telephone Network).
	PBX	Selects Private Branch Exchange, the type of phone line used in office environments where an access code such as 9 must be used to call an outside line.
Header	**Your Phone Number**	Select to enter the header information and your phone number for inclusion on outgoing faxes.
	Fax Header	
Receive Mode	**Manual**	Lets you confirm whether an incoming fax should be printed; a telephone must be connected to the product
	Auto	Automatically receives and prints faxes.
DRD	**All**	If you are using a Distinctive Ring Service on your phone line, your telephone company can assign two or more phone numbers to the same line and assign different ring patterns to each. If you use this service, select the number of rings for your fax number so your product can receive faxes on the correct number of rings. Select **All** for phones lines that do not use this service.
	Single	
	Double	
	Triple	
	Double&Triple	

Setting	Options	Description
Rings to Answer	1 to 9	Sets the number of rings before your product receives a fax. If Receive Mode is set to **Auto** and an answering machine is connected to the product, make sure this setting is set higher than the number of rings your answering machine is set to answer a call.
Remote Receive	**Off**	Lets you start receiving faxes using your phone instead of operating the product (if the Receive Mode is set to **Auto**). When you select **On**, you must also set a **Start Code**. If you are using a cordless handset with its base connected to the product, you can start receiving the fax by entering the code using the handset.
	On	
	Start Code	
Rejection Fax	Various	Lets you automatically reject faxes from blocked numbers, with blank headers, or from unrecognized contacts.
Save/Forward File Format	**PDF**	Saves or forwards a fax as a PDF file. You can also set a password for opening the PDF or allowing printing and editing permissions.
	TIFF	Saves or forwards a fax as a TIFF file.
Cloud Destination List	Various	Allows user to register up to five addresses at a cloud service recognized by Epson Connect. Received faxes may be forwarded to the selected cloud service. To use this feature, the printer must be registered with Epson Connect.

Send Settings - Fax

Set the send options you want to use for outgoing faxes.

Setting	Options	Description
Quick memory send	—	Sends the outgoing fax as soon as the first page is finished scanning.
Batch Send	**Off**	Sorts outgoing faxes by recipient in the product's memory, and then sends them as a batch. Up to five documents (200 pages total) can be sent at one time.
	On	
Save Failure Data	**Off**	Saves faxes that failed to be sent in the product's memory. You can resend the faxes from the product's **Job/Status** menu. When you select **On**, you can select a time period to store the saved faxes.
	On	
Wait Time for Next Original	**Off**	Sets a time in between sending the next fax
	On	
Fax Preview Display Time	**Off**	Sets a time for previewing the scanned document on the LCD screen before it is sent
	On	
Allow Backup	**Allowed**	Allows you to back up sent faxes. Select **Fax** > **Fax Settings** > **Backup** to view backed up faxes.
	Not Allowed	

Parent topic: Selecting Advanced Fax Settings

Receive Settings - Fax

Set the save/forward or print options you want to use for incoming faxes.

Save/Forward Settings

Setting	Options	Description
Unconditional Save/Forward	**Save to Inbox**	Saves received faxes in printer's inbox
	Save to Computer	Converts received faxes to PDFs and saves them on a computer connected to the printer
	Save to Memory Device	Converts received faxes to PDFs and saves them on an external memory device connected to the printer
	Forward	Forwards received faxes to another fax machine, or converts them to PDFs and forwards them to a shared folder on a network or an email address. Forwarded faxes are deleted from the printer.
	Email Notifications	Sends an email notification after a fax is received, printed, saved, or forwarded
Conditional Save/Forward	—	Sets up conditions to save, forward, or print received faxes. Select **Enable** to enable a condition. Select the arrow icon to enter conditions and other settings.
Common Settings	**Inbox Settings**	Sets up what happens when the fax memory is full, or sets up a password for the inbox. You cannot set a password if the **Options when memory is full** setting has been set to **Receive and print faxes**.
	Email Subject to Forward	Specifies a subject when forwarding a fax to an email address
	Box Document Delete Settings	Select **On** to automatically delete received faxes after a set period of time

Print Settings

Setting	Options	Description
Auto Reduction	**On**	Select to reduce the size of large received faxes to fit on the paper size in the selected paper source.
	Off	Select to print large incoming faxes at their original size on multiple sheets, if necessary.

Setting	Options	Description
Split Page Settings	**Delete Print Data After Split**	Select how to split large incoming faxes across multiple sheets when using the **Auto Reduction** option.
	Overlap When Split	
Acting Print	**On (Split to Pages)**	Select to split large incoming faxes across multiple sheets.
	On (Reduce to Fit)	Select to reduce the size of large received faxes to fit on the paper size in the selected paper source.
	Off	Select to print large incoming faxes at their original size on multiple sheets, if necessary.
Auto Rotation	**On**	If you have loaded A5-size paper, select **On** to rotate landscape-oriented incoming faxes so that they print correctly on the paper.
	Off	
Add Reception Information	**On**	Select **On** to include the date, time, the sender's information, and a page number in the header of your incoming faxes.
	Off	
2-Sided	**On**	Select **On** to print incoming faxes double sided. You can also select the **Binding Margin**.
	Off	
Print Start Timing	**All Pages Received**	Select to print incoming faxes after the product receives all of the pages of the document.
	First Page Received	Select to print incoming faxes as soon as the product receives the first page of the document.
Collation Stack	**On**	Select **On** to print incoming faxes so that the pages are stacked in the correct page order. (When the product is low on memory, this option may not be available.)
	Off	
Print Suspend Time	**Off**	Select **On** to set a time period to stop automatic printing of faxes or reports and save received faxes in the product’s memory. (Make sure there is enough free memory before using this function.)
	On	
	Time to Stop	
	Time to Restart	

Setting	Options	Description
Quiet Mode	**On**	Select **On** to reduce noise during printing (printing speed may be reduced).
	Off	

Parent topic: Selecting Advanced Fax Settings

Report Settings - Fax

Set the options you want for fax reports.

Setting	Options	Description
Forwarding Report	**Print on Error**	Prints a report after forwarding a received document only if an error occurs
	Print	Prints a report after forwarding a received document
	Do Not Print	Does not print a report after forwarding a received document
Backup Error Report	**On**	Select **On** to print a report when a backup error for sending faxes occurs
	Off	
Fax Log Auto Print	**Off**	Does not print a fax log
	On(Every 100)	Prints a fax log after every 100 fax jobs are completed
	On(Time)	Prints a fax log at a specified time. If the number of completed fax jobs exceeds 30, the fax log prints before the specified time.
Reception Report	**Print on Error**	Prints a report after receiving a fax only if an error occurs
	Print	Prints a report after receiving a fax
	Do Not Print	Does not print a report after receiving a fax

Setting	Options	Description
Attach Fax Image to Report	**Off**	Does not include an image on the Transmission Report
	On(Large Image)	Prints a Transmission Report that includes the upper part of the first page of the sent document
	On(Small Image)	Prints a Transmission Report that includes a reduced size of the entire first page of the sent document
Fax Log Layout	**Combine Send and Receive**	Prints a Transmission Report and a Reception Report on the same sheet when you print a fax log
	Separate Send and Receive	Prints a Transmission Report and a Reception Report on separate sheets when you print a fax log
Report Format	**Simple**	Prints a simple fax report
	Detail	Prints a fax report that includes error codes
Fax Log Output Method	**Print**	Prints fax reports
	Save to Memory Device	Saves fax reports to an inserted memory device. Select **Create a folder to save fax data** to create a folder on the inserted memory device.
	Forward	Forwards fax reports to a specified destination

Parent topic: Selecting Advanced Fax Settings

Security Settings - Fax

Set the security options you want to use for fax data.

Setting	Options	Description
Direct Dialing Restrictions	**Off**	Does not restrict dialed fax numbers.
	On	Allows faxing only to numbers stored in the contacts list or history.
	Enter Twice	Requires you to enter fax numbers twice to prevent errors.
Broadcasting Restrictions	**Off**	Select **On** to allow only one fax number to be entered as the recipient
	On	

Setting	Options	Description
Confirm Address List	**Off**	Selects whether or not to display a recipient confirmation screen before a fax is sent.
	On	
Backup Data Auto Clear	**Off**	Automatically erases sent or received fax data from your product's memory.
	On	
Clear Backup Data	—	Deletes all sent or received fax data remaining in your product's memory; run this function if you are giving away or disposing of your product.

Setting Up the Fax Utility - Windows

You can set up the FAX Utility for Windows for use with your product.

Note: Before using the FAX Utility for Windows, make sure you have set up the fax features on your product using the product control panel. Also first confirm that you can send and receive faxes using the control panel.

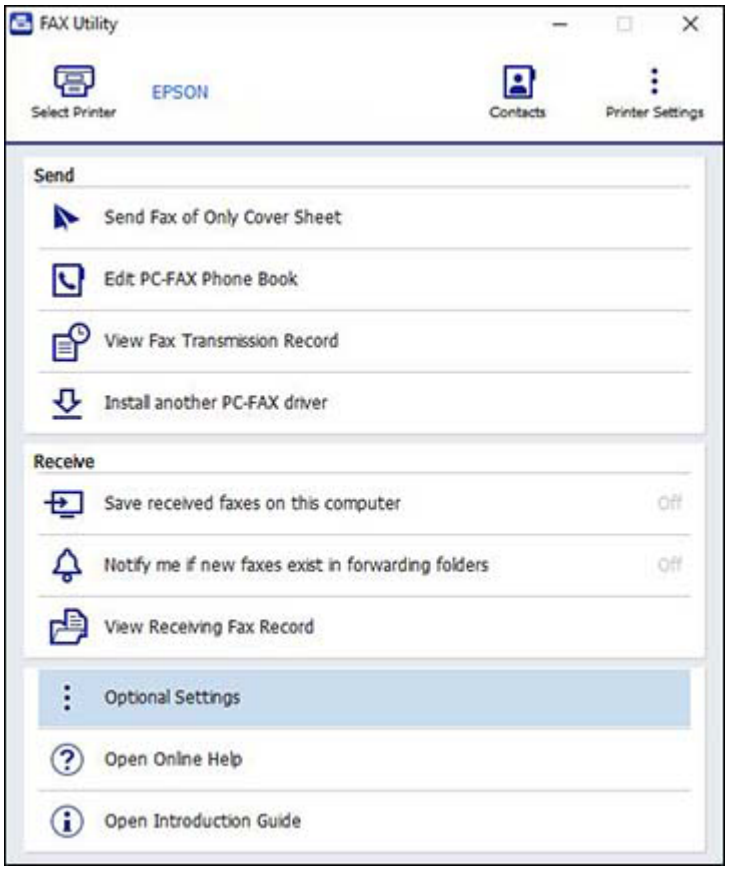

1. Do one of the following:
   - **Windows 11:** Click , then search for **EPSON Software** and select it.
   - **Windows 10:** Click and select **EPSON Software**.
   - **Windows 8.x**: Navigate to the **Apps** screen.
   - **Windows (other versions)**: Click or **Start** > **Programs** or **All Programs** > **EPSON Software**.
2. Select **FAX Utility**.

The first time you use the FAX Utility, you see this introduction window:

3. Read about the FAX Utility and click **Return to the main window** at the bottom of the window.

You see this window:

4. Click **Select Printer** and follow the on-screen instructions to transfer your product's fax settings to the FAX Utility.

   Note: For detailed information, click **Help** or **Open Online Help**.

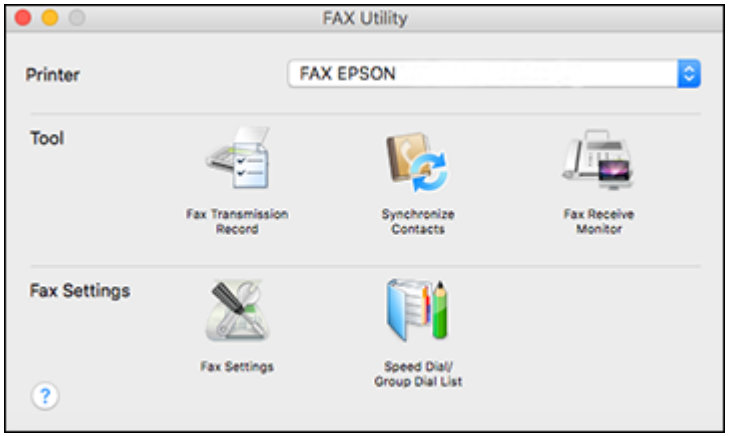

Parent topic: Setting Up Fax Features

Setting Up Fax Features Using the Fax Utility - Mac

You can set up your fax header and select your fax settings using the FAX Utility for Mac.

1. In the Apple menu or the Dock, select **System Preferences**. Select **Print & Fax**, **Print & Scan**, or **Printers & Scanners**, select the **FAX** option for your product, and select **Options & Supplies**. Select **Utility** and select **Open Printer Utility**.
2. Double-click **FAX Utility**, if necessary.

   You see a window like this:

3. Select your **FAX** product in the Printer list.
4. Select **Fax Settings**.
5. Follow the prompts that appear on the screen to enter your fax header information and select your fax settings.

   Note: For detailed information, select the FAX Utility **?** icon.

Creating a Contact

You can create a list of contacts to save frequently used fax numbers.

Note: You can create up to 200 contacts and contact groups combined.

1. Press the ⌂ home button, if necessary.
2. Select **Fax**.
3. Select **Contacts**. Enter the administrator password, if necessary.
4. Select the  icon.
5. Select **Add Contact**.
6. Select the registry number you want to use for the contact you are adding.
7. Select the **Name** field, use the displayed keyboard to enter the contact name (up to 30 characters), and select **OK**.
8. Select the **Index Word** field, use the displayed keyboard to enter a word to use when searching for an entry (up to 30 characters), and select **OK**.

   Note: This field is automatically populated after you enter the name. This field is optional.

9. Select the **Fax Number** field, and use the numeric keypad on the LCD screen or the buttons on the product to enter the fax number. You can enter up to 64 characters. Select **OK** when you are done.

   Note: If necessary, enter an outside line access code (such as **9**) at the beginning of the fax number. If the access code has been set up in the **Line Type** setting, enter the **#** pound sign instead of the code.

10. Set the **Fax Speed**, **Subaddress**, and **Password** settings, if necessary.
11. Select **OK**.

Parent topic: Setting Up Contacts and Contact Groups

Editing or Deleting a Contact

You can edit or delete any of the contacts on your list.

1. Press the home button, if necessary.
2. Select **Fax**.
3. Select **Contacts**. Enter the administrator password, if necessary.
4. Select the icon next to the contact you want to edit or delete.
5. Do one of the following:
   - To delete the contact, select **Delete** and select **Yes** on the confirmation screen.
   - To edit the contact, select **Edit**, select the item you want to change, enter the correct information, and select **OK**. When you are finished editing, select **OK**.

Parent topic: Setting Up Contacts and Contact Groups

Creating a Contact Group

You can create a group of contacts so that you can easily send faxes to multiple recipients.

Note: You can create up to 200 contacts and contact groups combined.

1. Press the home button, if necessary.
2. Select **Fax**.
3. Select **Contacts**. Enter the administrator password, if necessary.
4. Select the icon.
5. Select **Add Group**.
6. Select the registry number you want to use for the group you are adding.
7. Select the **Group Name** field, use the displayed keyboard to enter the group name (up to 30 characters), and select **OK**.

8. Select the **Index Word** field, use the displayed keyboard to enter a word to use when searching for a group (up to 30 characters), and select **OK**.

   Note: This field is automatically populated after you enter the group name. This field is optional.

9. Select **Contact(s) Added to the Group**.

   You see your contacts list.

10. Select each contact you want to include in your group.

    Each selected contact is highlighted.

11. Select **Close**.
12. Select **OK**.

Parent topic: Setting Up Contacts and Contact Groups

Editing or Deleting a Contact Group

You can edit an existing contact group to add or delete entries. You can also delete the entire contact group.

1. Press the ⌂ home button, if necessary.
2. Select **Fax**.
3. Select **Contacts**. Enter the administrator password, if necessary.
4. Select the  icon next to the group you want to edit or delete.
5. To edit the group, select **Edit**.
6. Select **Contact(s) Added to the Group**.

   You see a list of the contacts in your group.

7. Select the contact you want to add or delete.

   Each selected contact is highlighted.

8. Select **Close**.
9. Select **OK**.

Parent topic: Sending Faxes

Sending a Fax Using the Keypad, Contact List, or History

You can send a fax from your product control panel by entering the fax number, or selecting the number from either the contact list or fax history.

Note: You can send a black-and-white fax to up to 200 recipients at a time, or send a color fax to one recipient at a time. If your recipient's fax machine does not print in color, your fax is automatically sent in black-and-white.

Note: The product can queue up to 50 black-and-white fax jobs. You can check or cancel fax jobs in the queue using the **Job/Status** menu.

1. Place your original on the product for faxing.
2. Press the ⌂ home button, if necessary.
3. Select **Fax**.

   Note: To fax a double-sided document, place your document in the ADF and turn on the **ADF 2-Sided** setting. (You cannot fax double-sided documents in color.)

4. Do one of the following to select fax recipients:
   - Select **Keypad** and enter a fax number. Select **OK** when done. To add another fax number, repeat the same steps. You can also use the numeric keypad on the control panel to enter a fax number.

     Note: If direct dialing has been restricted, you can only select the number from the contact list or fax history. If necessary, enter an outside line access code (such as 9) at the beginning of the fax number. If the access code has been set up in the **Line Type** setting, enter the **#** pound sign instead of the code. If your fax number requires a brief pause, select the  icon to insert a pause symbol (–).

   - Select **Contacts** to display the contact list. Select one or more contacts (select the contact again to deselect it). You can also select the **Search for Contacts** field to search for recipients by name, index name, or entry number. Select **Close** when you are finished.
   - Select **Recent** to display the sent fax history.

   Note: To delete entered recipients, select the **Select Recipient** field, select the recipient you want to delete, and select **Remove**.

5. If you need to change any fax settings, select **Fax Settings** and select your settings.
6. If you want to preview your fax in black-and-white on the LCD, press the  **Preview** icon. (If the preview looks incorrect, select **Cancel**, reposition the document or change the fax settings, and repeat this step.)

   Note: If you do not touch the preview screen for 20 seconds, your product sends the fax automatically. You cannot preview images when the Direct Send setting is turned on.

7. If you want to save your fax settings for later use, select **Presets** and add a new entry.
8. Select the  **Send** icon.

   Note: To cancel faxing, select the ⊽ cancel button. You can also cancel the job or check the job status from the **Job/Status** menu.

   Your product scans your original and prompts you to place additional pages, if necessary.

After scanning your originals, your product dials the number and sends the fax.

Note: Your product does not save sent color faxes to its memory. If the **Save Failure Data** option is enabled, faxes that failed to be sent are stored to the product's memory and you can resend them from the **Job/Status** menu.

Dialing Fax Numbers from a Connected Telephone

If you have connected a telephone to the **EXT** port on your product, you can send a fax by dialing the fax number from the connected telephone. If the recipient's phone number and fax number are the same, you can speak to the recipient before sending the fax.

1. Place your original on the product for faxing.
2. Press the home button, if necessary.
3. Dial the fax number from the connected telephone. Speak to the recipient if necessary.

   Note: If you are using a pre-paid calling card, enter the number and password required to use the card before entering the destination fax number.

4. Select **Fax** on the LCD screen.
5. Select **Fax Settings** and select any settings as necessary.

   Note: Your product now communicates with the recipient's fax machine. Do not hang up the telephone.

6. When you hear a fax tone, select the  **Send** icon to start sending the fax.

   Note: If your recipient's fax machine does not print in color, your fax is automatically sent in black-and-white.

7. Hang up the telephone.

Sending Faxes Using the Fax Utility - Windows

You can send a fax from a printing program in Windows. You can fax up to 100 pages at a time, including a cover sheet.

1. Open the file you want to fax and select the print command.

You see a window like this:

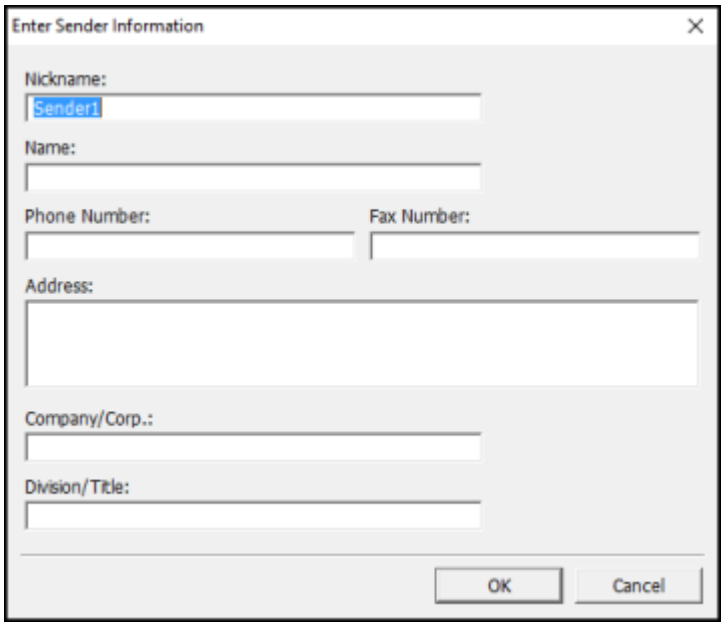

2. Select your product with the **FAX** option as the printer.
3. To change the Paper Size, Orientation, Color, Image Quality, or Character Density settings, click the **Preferences** or **Properties** button.

   Note: If you see a **Setup**, **Printer**, or **Options** button, click it. Then click **Preferences** or **Properties** on the next screen. For more information about selecting fax print settings, click **Help**.

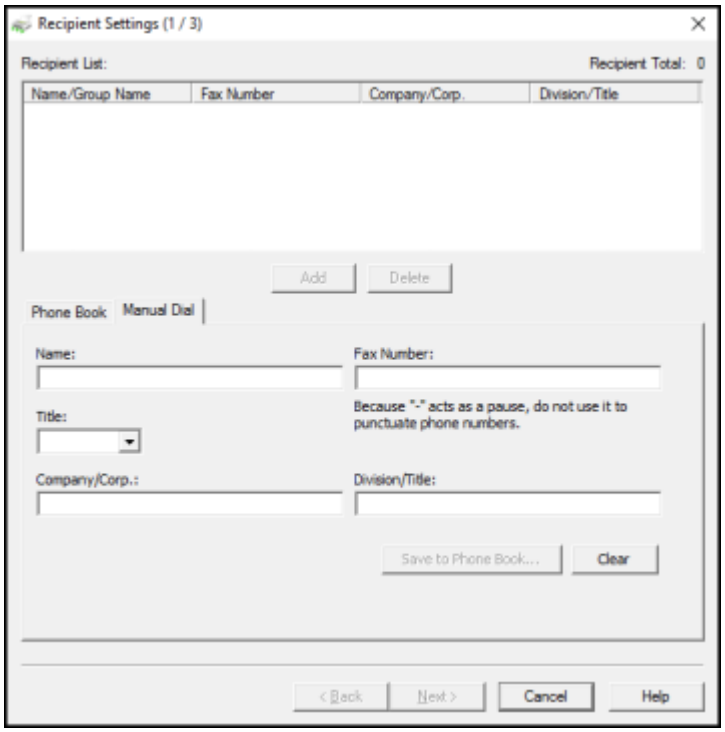

4. Select the Page Range as necessary. (Leave the Number of copies set to **1**.)
5. Click **Print** or **OK**.

If you’re faxing for the first time, you see a window like this one:

6. Enter your sender information so that recipients can identify the origin of the fax. Then click **OK** to save the sender information.

You see a window like this:

7. Enter the recipient's name and fax number or select a recipient from the phone book, then click **Next**.

   Note: For detailed instructions on using the Epson FAX Utility, click **Help**.

8. Select a cover sheet and enter a subject and message, then click **Next**.
9. Click **Send** to transmit your fax.

Sending Faxes Using the Fax Utility - Mac

You can send a fax from a Mac printing program using the FAX Utility. You can fax up to 100 pages at a time, including a cover sheet.

1. Open the file you want to fax.
2. Select the print command in your application.

   Note: You may need to select a print icon on your screen, the **Print** option in the **File** menu, or another command. See your application's help utility for details.

   Note: The print window may look different, depending on the Mac OS version and the application you are using.

3. Select your product **FAX** option as the **Printer** setting.
4. If necessary, click the arrow next to the Printer setting or the **Show Details** button to expand the print window.
5. Select the number of pages you are faxing as the **Pages** setting.

   Note: Leave the **Copies** setting set to **1**.

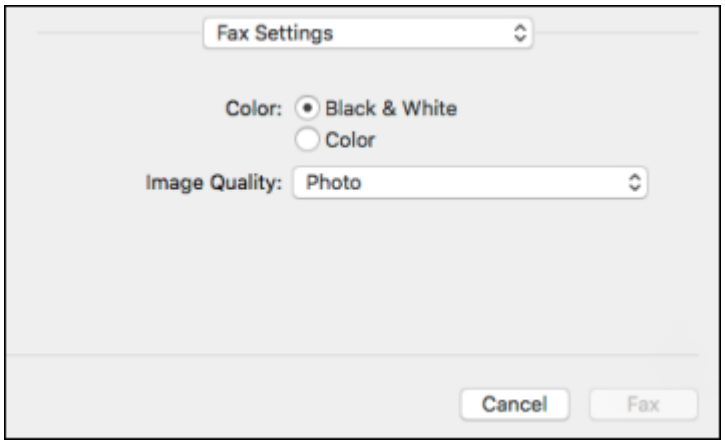

6. Select **Recipient Settings** from the pop-up menu.

You see this window:

7. Do one of the following to choose your recipient:
   - Select a name or group from the **Recipient List**.
   - Enter a name, company, and fax number and click the **+** button.
   - Click the icon and select a recipient from your address book.
8. Select **Fax Settings** from the pop-up menu.

You see this window:

9. Select the **Color** and **Image Quality** settings you want to use for your fax.
10. Click **Fax**.

Receiving a Fax by Polling

Parent topic: Faxing

Fax Reception

If you connected a telephone to your product so you can use the same phone line for faxes and voice calls, you can also set your product to receive faxes manually. This allows you to check for a fax tone using the telephone and press a button on your product to receive the fax.

Make sure to load paper in your product and select your fax settings before receiving a fax.

Note: If you run out of paper during fax printing, load more paper and press the button indicated on your product's LCD screen to continue.

Parent topic: Receiving Faxes

Receiving Faxes Automatically

To receive faxes automatically, make sure Receive Mode is set to **Auto** (the default setting for the product).

To change the Receive Mode if necessary, select **Settings** > **General Settings** > **Fax Settings** > **Basic Settings** > **Receive Mode**.

If an answering machine is connected, make sure the product's **Rings to Answer** setting is set higher than the number of rings your answering machine is set to answer a call. For example, if the answering machine is set to pick up on the fourth ring, set the product to pick up on the fifth ring or later.

Receiving Faxes Automatically

Forwarding Received Faxes

You can forward received faxes to another fax machine, or convert the faxes into PDF documents and forward them to a shared folder on the network or to an email address. Forwarded faxes are deleted from the product's memory. Before using this feature, make sure the date and time are set correctly, the forwarding destination is set up in the contact list, and the email server settings are configured.

1. Press the home button, if necessary.
2. Select **Settings** > **General Settings** > **Fax Settings** > **Receive Settings** > **Save/Forward Settings** > **Unconditional Save/Foward** > **Forward** > **Yes**.

   Note: If you want to print the fax automatically before forwarding it, select **Yes and Print**.

3. Select **Add Entry** and select the forwarding destinations from the contacts list.
4. When you are finished selecting your forwarding destinations, select **Close**.
5. Confirm the displayed forwarding destinations and select **Close**.
6. Select an **Options When Forwarding Failed** option to choose whether you want to print the faxes or save them in the printer's inbox if forwarding received faxes fails.

Parent topic: Receiving Faxes

Receiving a Fax by Polling

You can use polling to receive a fax from another fax machine (such as a fax information service).

Note: You cannot use polling to receive a fax from a fax information service that uses audio guidance.

1. Press the home button, if necessary.
2. Select **Fax**.
3. Select the  icon.
4. Select **Extended Fax**.

5. Set **Polling Receive** to **On**.
6. Select **Close**.
7. Select **Close**.
8. Enter the fax number you expect to receive the fax from.
9. Select the  **Polling** icon to start receiving the fax.

Parent topic: Receiving Faxes

Checking Fax Status

You can check the status of current fax jobs, or faxes that have been received or sent on the product control panel.

1. Press the **Job/Status** button. Select the **Job/Status** tab if necessary.
2. Do one of the following:
   - To check the status of current fax jobs, select the fax job you want to check.
   - To check the history of faxes that have been sent, received, or saved, select **Log** and select the job you want to check.

   Note: If you see a numbered icon above the icon on your product's LCD screen or the **Received Fax** light is flashing, received faxes have been temporarily saved to the product's memory.

Parent topic: Faxing

Viewing a Fax on the LCD Screen (Using the Fax Box)

You can save received faxes in your product's memory and view them on the LCD screen.

Note: The Inbox can be locked by an administrator. If you cannot access the Inbox, contact your administrator for assistance.

1. Press the home button, if necessary.
2. Select **Settings** > **General Settings** > **Fax Settings** > **Receive Settings** > **Save/Forward Settings** > **Unconditional Save/Forward**.
3. Set **Save to Inbox** to **On**.

4. Press the home button.
5. Select **Fax Box**.
6. Do one of the following:
   - Select **Inbox/Confidential** to view received documents.
   - Select **Stored Documents** to view saved documents that have not been sent when **Store Fax Data** is set to **On**.
   - Select **Polling Send/Board** to view documents that are stored for fax polling.
7. Select the fax you want to view.

   You see the fax displayed on the screen.
8. Select the  icon.
9. Select one of the printing or deleting options, and follow the on-screen instructions.

Note: Delete faxes after you print or view them to prevent the product's memory from filling up. When the memory is full, you can only forward or print incoming faxes.

Parent topic: Faxing

Printing Fax Reports

You can print several types of fax reports whenever necessary. You can also print the fax log printed automatically by turning on **Fax Log Auto Print**.

1. Press the home button, if necessary.
2. Select **Fax**.
3. Select the  icon.
4. Select **Fax Report**.
5. Select the fax report you want to print.

Printing JPEG Photos
Printing TIFF and PDF Files

Parent topic: Using External USB Devices with Your Product

Printing JPEG Photos

You can select JPEG photos for printing as you view them on the LCD screen.

1. Press the ⌂ home button, if necessary.
2. Select **Memory Device**.
3. Select **JPEG**.

   Note: If you have more than 999 JPEG images on your device, the images are divided into groups, and you must first select the group you want to display.

4. Do one of the following to select your photos:
   - In **Tile View**, select the thumbnail images of the photos you want to print.
   - In **Single View**, select the thumbnail image of the photo you want to print, then press the left or right arrow buttons to scroll through and select additional photos, or select **Tile View** to return to the thumbnail image view and select additional photos.
   - To select all photos, select the  menu icon and select **Select All Images**.

5. Select **Proceed to Print**.
6. To change the print settings, select **Basic Settings** and select the necessary settings.
7. To adjust the photos (adjustments modify only your printed copies, not the original files), select **Advanced** and make the necessary adjustments.
8. Use the numeric keypad on the control panel or select **Copies** on the LCD screen and use the numeric keypad on the screen to select the number of copies (up to 99).
9. When you are ready to print, select the  **Print** icon.

   Note: To cancel printing, select the ⊘ cancel button or select **Cancel** on the LCD screen, then select **Cancel** again to confirm.

Replacing the Ink Supply Unit (Ink Pack), Maintenance Box, and Cassette Rollers

When the ink pack is expended, or the maintenance box and cassette rollers are at the end of their service life, you need to replace them. The maintenance box stores ink that gets flushed from the system during print head cleaning.

Note: Please dispose of your used Epson branded ink packs and maintenance boxes responsibly and in accordance with local requirements. If you would like to return your used ink packs and maintenance boxes to Epson for proper disposal, please go to epson.com/recycle for more information.

Ink Pack Safety Instructions
Check Ink and Maintenance Box Status
Purchase Epson Ink Packs and Maintenance Boxes
Removing and Installing the Ink Pack
Replacing the Maintenance Box
Replacing the Paper Feed Rollers
Resetting the Roller Counter on the LCD Screen

Ink Pack Safety Instructions

- Keep ink packs and maintenance boxes out of the reach of children and do not drink the ink.
- Be careful when you handle used ink packs; there may be ink remaining around the ink supply port. If ink gets on your skin, wash it off with soap and water. If it gets in your eyes, flush them immediately with water. If discomfort or vision problems continue after a thorough flushing, see a doctor immediately. If ink gets in your mouth, see a doctor right away.
- Do not put your hand inside the product or touch the ink pack during printing.
- Install a new ink pack immediately after removing the expended one. Leaving the ink pack uninstalled can dry out the print head and may prevent the product from printing.
- If you need to remove an ink pack temporarily, make sure you protect the ink pack from dirt and dust. Store the ink pack in the same environment as the printer. Because the ink supply port is equipped with a valve designed to contain the release of excess ink, there is no need to supply your own covers or plugs.
- Do not remove or tear the label on the ink pack; this can cause leakage.

- Do not remove the transparent seal from the ink supply area. This may cause the ink pack to become unusable.
- Do not touch the green IC chip on the side of the handle. This may prevent normal operation.
- Do not shake ink packs too vigorously; otherwise ink may leak.
- Do not drop or knock the ink pack against hard objects; otherwise ink may leak.
- Use an ink pack before the date printed on its package.
- Do not disassemble an ink pack or a maintenance box. Ink may get in your eyes or on your skin.
- Store ink packs in a cool, dark place.
- After bringing an ink pack inside from a cold storage site, allow it to warm up at room temperature for at least 12 hours before using it.
- Store ink packs with the bottom facing down.
- To help protect your print head, a variable ink safety reserve remains in the ink supply unit when your printer notifies you to replace the ink pack. The yields quoted for you do not include this reserve.
- You cannot use the ink pack supplied with the product as a replacement ink pack. It must be used for initial setup.

Parent topic: Replacing the Ink Supply Unit (Ink Pack), Maintenance Box, and Cassette Rollers

Check Ink and Maintenance Box Status

Your product and its software will let you know when ink is low or expended, or when the maintenance box needs to be replaced.

Note: When using the PCL or PostScript (PS3) printer software with the product, you can check ink and maintenance box status by using the product buttons or the utilities included with the standard Epson printer software. To download the standard Epson printer software, visit epson.com/support (U.S.), epson.ca/support (Canada), or latin.epson.com/support (Latin America) and select your product.

Purchase Epson Ink Packs and Maintenance Boxes

U.S. and Canada:

You can purchase genuine Epson ink, maintenance boxes, and paper at epson.com (U.S. sales) or epson.ca (Canadian sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada.

Latin America:

You can purchase genuine Epson ink, maintenance boxes, and paper from an Epson authorized reseller. To find the nearest reseller, visit latin.epson.com or call your nearest Epson sales office.

Note: Your printer is designed to work only with genuine Epson-brand ink packs. Other brands of ink packs and ink supplies are not compatible and, even if described as compatible, may not function properly or at all. Epson periodically provides firmware updates to address issues of security, performance, minor bug fixes and ensure the printer functions as designed. These updates may affect the functionality of third-party ink. Non-Epson branded or altered Epson ink packs that functioned prior to a firmware update may not continue to function.

The included initial ink pack is designed for reliable printer setup and cannot be used as a replacement ink pack or resold. After setup, the remaining ink is available for printing. Yields are based on ISO 24711 in default mode, printing continuously. Yields vary due to print images, settings, and temperatures. Printing infrequently reduces yields. Your ink pack must be installed with ink for printing and printer maintenance. For print quality, some ink remains in the replaced ink pack.

Removing and Installing the Ink Pack

If the ink pack is low or expended, a message appears on your product and on your computer screen. Make sure you have your replacement ink pack handy before you begin. You must install the new ink pack immediately after removing the old one.

Caution: Make sure you follow all safety precautions when handling the ink pack. See the link below for more information.

1. Select **How To**.
2. Follow the on-screen instructions to replace the expended ink pack.

Parent topic: Replacing the Ink Supply Unit (Ink Pack), Maintenance Box, and Cassette Rollers

Related concepts

Purchase Epson Ink Packs and Maintenance Boxes

Replacing the Maintenance Box

If the maintenance box is full, a message appears on your product's LCD screen. Follow the steps on the LCD screen to replace the maintenance box. Make sure you have a new maintenance box before you begin.

Note: When the maintenance box is full, you cannot print or clean the print head until it is replaced. However, you can perform non-printing functions such as scanning.

Note: If necessary, select the ? icon on the LCD, then select **How To** > **Replace Maintenance Box** and press the **OK** button to view the instructions.

Note: In some print cycles a small amount of surplus ink may be collected in the maintenance box. To prevent ink leakage from the maintenance box, the product is designed to stop printing when the absorbing capacity of the maintenance box has reached its limit. Whether and how often this is required will vary according to the number of pages you print, the type of material you print on and the number of cleaning cycles that the printer performs.

Note the following precautions when replacing the maintenance box:

- Do not remove the maintenance box or its cover except when replacing the maintenance box; otherwise, ink may leak.
- Do not touch the green chip on the side of the maintenance box.
- Do not tilt the maintenance box after removing it or ink may leak.
- Do not touch the openings in the maintenance box or you may get ink on you.
- Do not drop the maintenance box or subject it to strong shocks.
- If you cannot replace the cover, the maintenance box may not be installed correctly. Remove and reinstall the maintenance box.
- Do not store the maintenance box in high or freezing temperatures.
- Do not replace the maintenance box during printing; otherwise, ink may leak.
- Keep the maintenance box out of direct sunlight.

Replacing the Paper Feed Rollers

When the paper feed rollers in the paper cassettes need to be replaced, you see a message on the LCD screen. (These are also referred to as "pickup rollers".)

There are different paper feed rollers for the internal paper cassette (Paper Cassette 1) and the optional paper cassettes available for the printer. Make sure you install the correct paper feed rollers for the paper cassette.

- For Paper Cassette 1, use the "Paper Feed Roller for Cassette A" (C12C938261)
- For Paper Cassettes 2 through 4, use the "Paper Feed Roller for Cassette B" (C12C938281)

Refer to the instructions in the paper feed roller packaging when replacing the paper feed rollers. There are also replacement videos available on your product's support page.

Reset the maintenance roller counter for the paper cassette to keep track of roller usage.

Adjusting Print Quality

If your print quality declines, you may need to run a utility to clean or align the print head.

Note: If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

Note: When using the PCL or PostScript (PS3) printer software with the product, you can clean and align the print head and run a nozzle check by using the printer buttons or the utilities included with the standard Epson printer software. To download the standard Epson printer software, visit epson.com/support (U.S.), epson.ca/support (Canada), or latin.epson.com/support (Latin America) and select your product.

If running these utilities does not solve the problem, you may need to replace the ink pack.

Print Head Maintenance

Cleaning the Translucent Film
Checking the Number of Sheets on the LCD Screen

Print Head Maintenance

If your printouts become too light, or you see dark or light bands across them, you may need to clean the print head nozzles. Cleaning uses ink, so clean the nozzles only if print quality declines.

You can check for clogged nozzles before you clean them so you don't clean them unnecessarily.

Note: You cannot clean the print head if ink is expended, and may not be able to clean it when ink is low.

Checking the Nozzles Using a Computer Utility
Parent topic: Print Head Maintenance

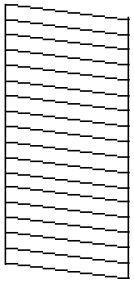

Checking the Nozzles Using the Product Control Panel

You can check the print head nozzles using the control panel on your product.

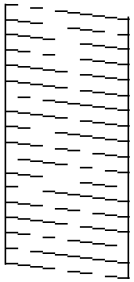

1. Make sure there are no errors on the LCD screen.
2. Load a few sheets of plain paper in the product.
3. Press the ⌂ home button, if necessary.
4. Select **Maintenance** >**Print Head Nozzle Check** .
5. Select **Print** and press the **OK** button.

   The nozzle pattern prints.
6. Check the printed pattern to see if there are gaps in the lines.

   Print head is clean

   Print head needs cleaning

7. Do one of the following:
   - If there are no gaps, select **O**.
   - If there are gaps or the pattern is faint, select **X**.
8. Follow the instructions on the screen to clean the print head, check the nozzles, and repeat the process as necessary.

   Caution: Never turn off the product or open the front cover during a cleaning cycle or you may not be able to print.

If you don't see any improvement after cleaning the print head up to 3 times, wait at least 12 hours without printing. Then try cleaning the print head again. If quality still does not improve, contact Epson support.

Loading Paper in the Paper Cassettes and Rear Paper Tray

Cleaning the Translucent Film

If the print quality has not improved after aligning the print head and cleaning the paper path, the translucent film inside the product may be smeared with ink.

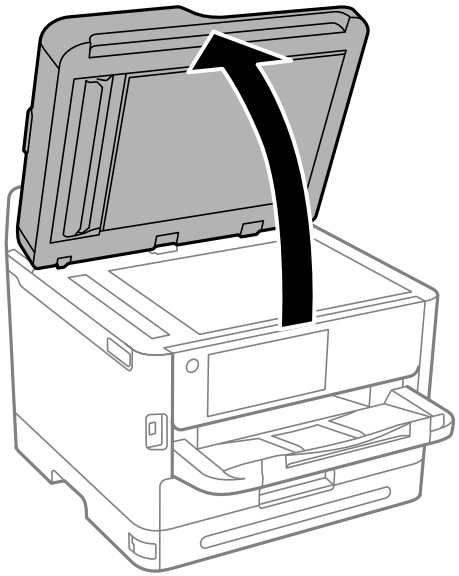

To clean the printer head path, use the following:

- Several cotton swabs
- ¼ cup (59 ml) water containing 2 to 3 drops of mild dish detergent
- A small flashlight

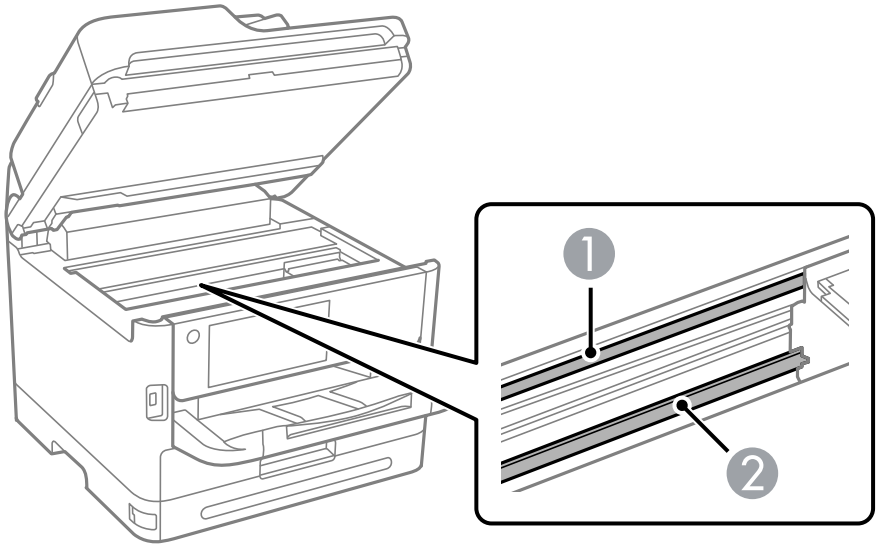

Caution: Do not use any other liquid to clean the translucent film or you may damage your product.

1. Turn off the product.
2. Unplug the power cable.
3. Disconnect any connected cables.

4. Open the printer cover.

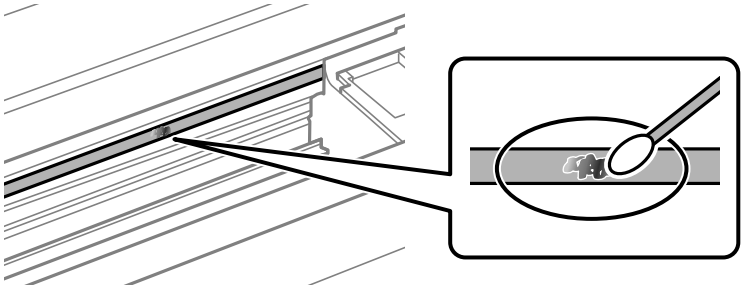

5. Using the flashlight, check the translucent film shown here for ink smears.

1	Translucent film
2	Print head rail

Caution: Do not touch the print head rail or you may not be able to print. Do not wipe off the grease on the rail.

6. Moisten a cotton swab with the water and detergent mixture and squeeze out any excess moisture, then lightly wipe the ink off the translucent film.

Caution: Do not press too hard on the film or you may dislocate the anchor springs and damage your product.

7. Use a new, dry cotton swab to dry the translucent film.
8. Repeat steps 6 and 7 as necessary to clean all ink smears.
9. When the translucent film is dry and free of any fibers, close the printer cover.
10. Reconnect any disconnected cables, plug in the power cord, and turn on the product.

Cleaning and Transporting Your Product

See these sections if you need to clean or transport your product.

Cleaning Your Product
Cleaning the Scanner Glass
Cleaning the Automatic Document Feeder
Transporting Your Product

Cleaning Your Product

To keep your product working at its best, you should clean it several times a year.

Close the output tray and paper support when you are not using the product to protect it from dust.

Caution: Do not use a hard brush, alcohol, or paint thinner to clean the product or you may damage it. Do not use oil or other lubricants inside the product or let water get inside it.

1. Turn off the product.
2. Unplug the power cable.
3. Disconnect any connected cables.
4. Remove all the paper.
5. Clean the scanner glass with a soft, lint-free cloth (microfiber is recommended), moistened with a little glass cleaner.

   Caution: Do not spray glass cleaner directly on the glass and do not press the glass surface with any force.

6. Clean the outer case and control panel with a soft, dry cloth. Do not use liquid or chemical cleansers.

Parent topic: Cleaning and Transporting Your Product

Cleaning the Scanner Glass

You can clean the scanner glass if your copies or scanned images are smeared.

Caution: Do not use a hard brush, alcohol, or paint thinner to clean the product or you may damage it. Do not use oil or other lubricants inside the product or let water get inside it.

Warning: Do not trap your fingers when opening or closing the document cover or you may be injured.

1. Open the document cover.
2. Use a soft, dry, clean cloth to clean the surface of the scanner glass.

   Note: If the glass is stained with grease or dirt, use a small amount of glass cleaner on a soft, dry cloth to remove it. Wipe off all remaining liquid after removing the dirt.

   Caution: Do not spray glass cleaner directly on the glass and do not press the glass surface with any force. Be careful not to scratch or damage the glass; this can affect scan quality.

3. Close the document cover.

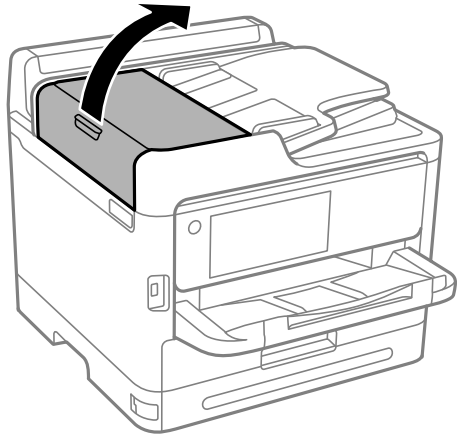

Parent topic: Cleaning and Transporting Your Product

Cleaning the Automatic Document Feeder

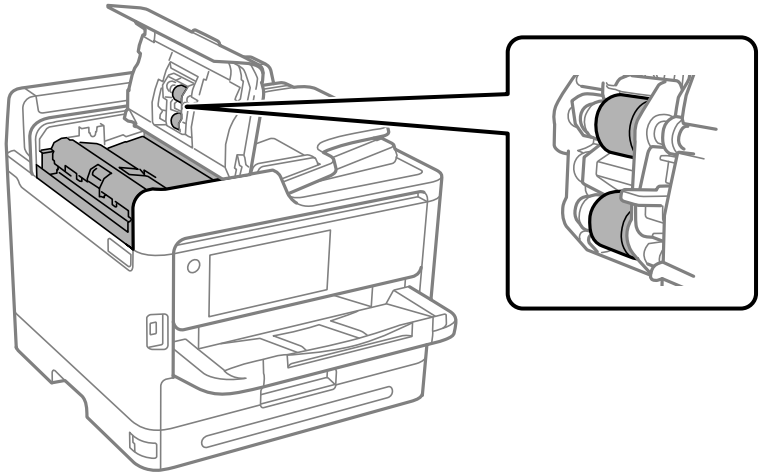

You can clean the ADF if you see lines or streaks in your copies or scanned images.

Caution: Do not use a hard brush, alcohol, or paint thinner to clean the product or you may damage it. Do not use oil or other lubricants inside the product or let water get inside it.

1. Open the ADF cover.

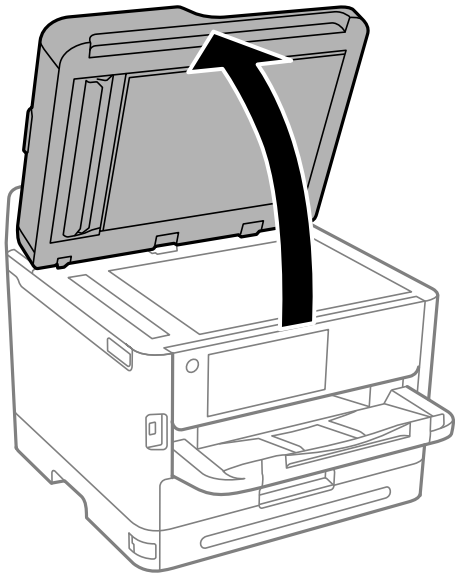

2. Use a soft, lint-free cloth (microfiber is recommended) moistened with a little water to clean the rollers and the interior of the ADF.

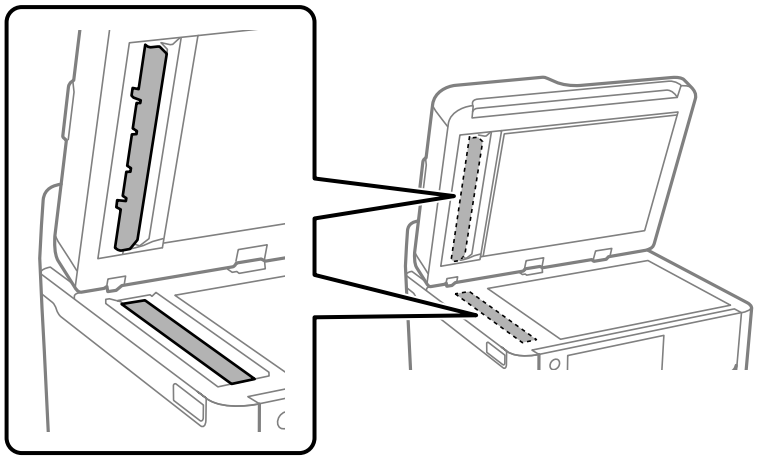

Caution: Do not use a dry cloth; you may damage the ADF rollers. Do not use the ADF until the rollers have dried.

3. Close the ADF cover and open the document cover.

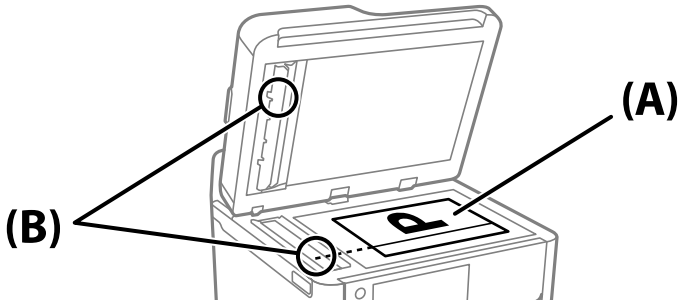

4. Clean the areas indicated in the image:

Caution: Do not spray glass cleaner directly on the glass and do not press the glass surface with any force. Be careful not to scratch or damage the glass; this can affect scan quality.

Note: If the glass is stained with grease or dirt, use a small amount of glass cleaner on a soft, dry cloth to remove it. Wipe off all remaining liquid after removing the dirt.

If a black line appears when copying from the ADF, location B in the following image may be dirty. Place the marked copy (A) on the scanner glass and clean the portion of the glass that lines up with the black line. Clean the same location on the underside of the ADF as well.

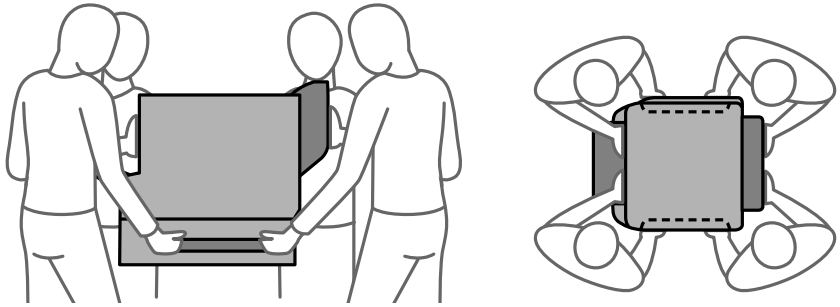

Parent topic: Cleaning and Transporting Your Product

Transporting Your Product

If you need to store your product or transport it a long distance, prepare it for transportation as described here.

Caution: During transportation and storage, follow these guidelines:

- Because the product is heavy, four or more people should lift and carry it using the hand positions shown:

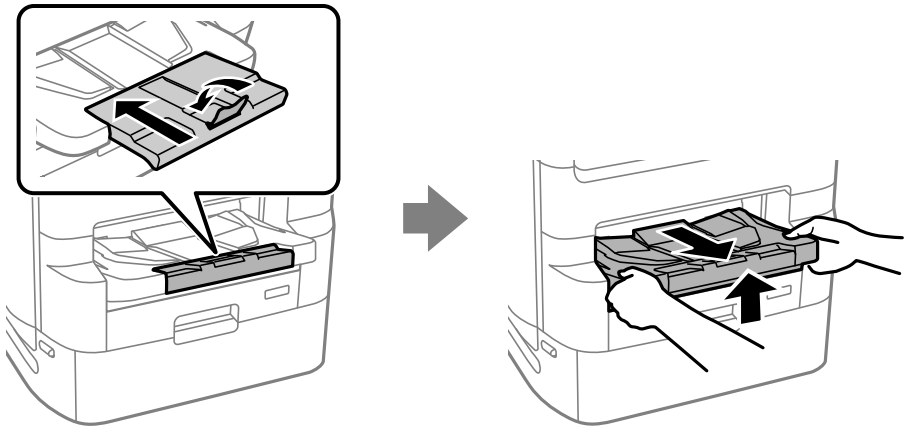

- Avoid tilting the product, positioning it vertically, or turning it upside down; otherwise ink may leak.
- Leave the ink pack installed; otherwise the print head can dry out.
- Leave the maintenance box installed; otherwise ink may leak.

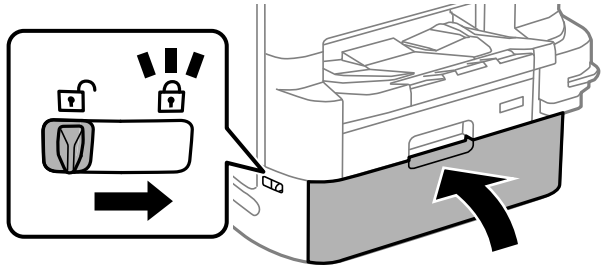

Note: Before storing your product for a long period, replace low, expended, or expired ink to help prevent the print head from drying out. Store your product in a cool, dry place.

1. Turn off the product.
2. Remove all the paper from the product.
3. Unplug the power cable.
4. Disconnect any connected cables.

5. Close the paper stopper on the output tray, if necessary, and push in the output tray. Lift and remove the output tray from the product. Store it separately.

6. Close the ink pack tray cover and lock it.

7. If the optional printer stand and paper cassettes are installed, uninstall and remove them before lifting the product.
8. Place the product in its original packing materials, if possible, or use equivalent materials with cushioning around the product. Make sure the box adequately protects the product control panel.

Keep the product level during transportation.

Network Settings

The following network settings are available under the **Network** tab in the Web Config interface.

Basic

Setting	Description
Device Name	Displays the Device Name. You can enter a new name to change the name of the device.
Location	Displays a user-entered location for the printer
Obtain IP Address	Sets the IP Address; if set to **Manual**, enter the information in the appropriate fields
Set using BOOTP	Enables IP addressing using BOOTP
Set using Automatic Private IP Addressing (APIPA)	Enables IP addressing using APIPA
IP Address	Displays the IP address. If you are manually entering the IP address, enter it in the format xxx.xxx.xxx.xxx (where xxx is a number between 0 and 255). Make sure the address is unique and does not conflict with any other device on your network.
Subnet Mask	Displays the subnet mask. If you are manually entering the subnet mask, enter it in the format xxx.xxx.xxx.xxx (where xxx is a number between 0 and 255).

Setting	Description
Default Gateway	Displays the default gateway address. If you are manually setting the default gateway, enter it in the format xxx.xxx.xxx.xxx (where xxx is a number between 0 and 255).
DNS Server Setting	Selects the DNS server setting. If the **Obtain IP Address** setting is set to **Manual**, this setting is also set to **Manual**.
Primary DNS Server	Enter the address of the primary DNS server in the format xxx.xxx.xxx.xxx (where xxx is a number between 0 and 255).
Secondary DNS Server	Enter the address of the secondary DNS server in the format xxx.xxx.xxx.xxx (where xxx is a number between 0 and 255).
DNS Host Name Setting	Sets the DNS Host Name selection method.
DNS Host Name	Displays the current DNS Host Name.
DNS Domain Name Setting	Sets the DNS Domain Name selection method
DNS Domain Name	Specifies the DNS domain name. The name must conform to the following format: • Enter between 2 and 249 characters using only the characters "A-Z", "a-z", "0-9", hyphen "-", and a period "." • The first character cannot be a "0-9", hyphen "-", or a period "." • The last character cannot be a hyphen "-" or a period "." • Each label in the domain name must be between 1 and 63 characters and separated by a period. • The total number of characters in the host and domain name must not exceed 251.
Register the network interface address to DNS	Allows you to register the host and domain names through a DHCP server that supports Dynamic DNS
Proxy Server Setting	Enables the use of a proxy server
Proxy Server	Specifies the name of the proxy server in either IPv4 or FQDN format
Proxy Server Port Number	Specifies the port number for the proxy server (between 1 and 65535)

Setting	Description
Proxy Server User Name	Specifies the user name for the proxy server (0-255 ASCII characters [0x20-0x7E])
Proxy Server Password	Specifies the password for the proxy server (0-255 ASCII characters [0x20-0x7E])
IPv6 Setting	Enables the use of IPv6 addressing
IPv6 Privacy Extension	Enables the use of private IPv6 addresses
IPv6 DHCP Server Setting	Enables the use of a IPv6 DHCP server
IPv6 Address	Specifies the IPv6 address. The address must conform to the following format: • xxxx: xxxx: xxxx: xxxx: xxxx: xxxx: xxxx: xxxx / prefix • xxxx is a hexadecimal number from 1 to 4 digits, and the prefix is a decimal number from 1 to 128. • If there are consecutive blocks where xxxx is all zeros, it can be omitted as ::. (Only one block can be omitted.)
IPv6 Address Default Gateway	Specifies the IPv6 address of the default gateway. The address must conform to the following format: • xxxx: xxxx: xxxx: xxxx: xxxx: xxxx: xxxx: xxxx • xxxx is a hexadecimal number from 1 to 4 digits • If there are consecutive blocks where xxxx is all zeros, it can be omitted as ::. (Only one block can be omitted.)
IPv6 Link-Local Address	Displays the valid IPv6 Link-Local Address
IPv6 Stateful Address	Displays the valid IPv6 Stateful Address
IPv6 Stateless Address 1	Displays the valid IPv6 Stateless Address 1
IPv6 Stateless Address 2	Displays the valid IPv6 Stateless Address 2
IPv6 Stateless Address 3	Displays the valid IPv6 Stateless Address 3

Setting	Description
IPv6 Primary DNS Server	Specifies the address for the IPv6 primary DNS server. The address must conform to the following format: • xxxx: xxxx: xxxx: xxxx: xxxx: xxxx: xxxx: xxxx • xxxx is a hexadecimal number from 1 to 4 digits • If there are consecutive blocks where xxxx is all zeros, it can be omitted as ::. (Only one block can be omitted)
IPv6 Secondary DNS Server	Specifies the address for the IPv6 secondary DNS server. The address must conform to the following format: • xxxx: xxxx: xxxx: xxxx: xxxx: xxxx: xxxx: xxxx • xxxx is a hexadecimal number from 1 to 4 digits • If there are consecutive blocks where xxxx is all zeros, it can be omitted as ::. (Only one block can be omitted.)
IEEE802.11k/v	Enables the use of IEEE802.11k/v network environments
IEEE802.11r	Enables the use of IEEE802.11r network environments

Wired LAN

Setting	Description
Link Speed and Duplex	Selects the communication mode for the wired connection
IEEE 802.3az	Enables the use of IEEE 802.3az network environments

Wi-Fi Direct

Setting	Description
Wi-Fi Direct	Enables the product's Wi-Fi Direct network
SSID	You can change part of the SSID for the product.
Password	Specifies the password for the Wi-Fi Direct network. **Note:** Changing the password will disconnect any devices currently connected to the network.

Setting	Description
Frequency Range	Selects the frequency range used by the Wi-Fi Direct network.
IP Address	Specifies the IP address for the Wi-Fi Direct network. If set to **Manual**, enter the IP address in the provided fields.

Sender's Email Address	Enter the sender's email address from 1 to 255 characters long in ASCII; do not use a period (.) as the first character or use these characters: ( ) < > [ ] ;
SMTP Server Address	Enter the SMTP server address from 1 to 255 characters long using A-Z, a-z, 0-9, and "-" in IPv4 or FQDN format
SMTP Server Port Number	Enter the SMTP server port number between 1 and 65535
POP3 Server Address	Enter the POP server address from 1 to 255 characters long using A-Z, a-z, 0-9, and "-" in IPv4 or FQDN format
POP3 Server Port Number	Enter the POP server port number between 1 and 65535

Parent topic: Configuring an Email Server

Sending Email Notifications

You can set up email notifications that will be sent when an event occurs on the product. You can register up to five destinations.

Note: You must have configured a mail server before setting up notifications.

1. Enter the IP address of the product in a web browser and log into Web Config as an administrator.

2. Select the **Device Management** tab, then select **Email Notification**.
3. Set the contents of the email subject line by selecting items from the drop-down menus.

   Note: You cannot select the same item in both menus. If the Location setting is longer than 32 bytes, it will be truncated in the Subject line.

4. Enter up to five email addresses to receive the notification emails, and select the language of the notification email.
5. In the Notification Settings area, select one or more email addresses to receive a notification for each event.
6. Click **OK** to apply the settings.

Note: To clear the email notification settings, select **Restore Default Settings**. This clears all email notification settings, not just the changes made in the current session.

Adjusting Power Saving Settings

The product can automatically enter sleep mode or turn off after it has not been used for a while. You can set the delay before the product enters sleep mode or turns off.

1. Log in to the Web Config interface as an administrator.
2. Select the **Device Management** tab, then select the **Power Saving** setting.
3. Set **Sleep Timer** to the number of minutes before the product enters a low-power mode.
4. Select **Power Off Timer** to set the amount to time of inactivity before the product turns off.

   Note: If you are using a printer with the fax feature enabled, select **None**.

Note: You can also configure the power saving settings using the control panel by selecting **Settings** > **General Settings** > **Basic Settings** and selecting the feature you want to change.

Accessing the Web Config Utility

Exporting Settings Using Web Config

You can export your product's settings and optionally encrypt the settings file with a password.

1. Log in to the Web Config interface as an administrator.
2. Select the **Device Management** tab, then select **Export and Import Setting Value**.
3. Select **Export**.
4. Select the settings you want to export.

   Note: If you select a parent category, the child categories are also selected. By default, items that are unique on the network, such as IP address, cannot be selected. If you want to export these items, select **Enable to select the individual settings of device**. It is recommended that you export only unique items when replacing a product on the network, otherwise you may encounter conflicts on the network.

5. Enter an encryption password, if desired.
6. Click **Export** and save the file.

Parent topic: Importing and Exporting Product Settings

Importing Settings Using Web Config

You can import settings to your product that you have exported previously. If encryption was used when the settings were exported, obtain the necessary password before you import.

1. Log in to the Web Config interface as an administrator.
2. Select the **Device Management** tab, then select **Export and Import Setting Value**.
3. Select **Import**.
4. Click **Browse** and select the exported settings file.
5. If necessary, enter the decryption password.
6. Click **Next**.
7. Select the settings to import and click **Next**.
8. Click **OK**.

The selected settings are imported to the product.

Parent topic: Importing and Exporting Product Settings

Updating Firmware Using Web Config

If your product is connected to the Internet, you can update the product firmware using Web Config.

1. Access Web Config and select **Device Management** > **Firmware Update**.
2. Click **Start** to check for the latest firmware.
3. If there is a firmware update, click **Start** to begin the update.

   Note: Make sure the product is not in use and clear any errors on the LCD screen before starting the update. You can also schedule a firmware update by selecting **Automatic Firmware Update** from the menu.

Synchronizing the Date and Time with a Time Server

You can synchronize the product with an NTP time server to set the date and time on the product.

Note: If you are using a CA certificate or Kerberos authentication, it is recommended to use a time server to set the date and time.

1. Log in to the Web Config interface as an administrator.

2. Select the **Device Management** tab, then select the **Date and Time** > **Time Server** setting.
3. Set **Use Time Server** to **Use**.
4. Enter the time server address in **Time Server Address**. You can use the IPv4, IPv6, or FQDN format for the address. You are limited to 252 characters.
5. Enter an update interval (up to 10080 minutes) in **Update Interval (min)**.
6. Click **OK** to update the settings.

Connecting an Authentication Device

You can connect an authentication device such as an IC card reader using a USB cable, and check the functionality of the reader using the Web Config interface.

1. Remove the sticker covering the service port on the rear of the product.

2. Connect the card reader's USB cable to the service port on the product.

3. Access Web Config and log in using the administrator name and password.
4. Select **Device Management** > **Card Reader**.
5. Set the card reader parameters as necessary.
6. Select **Check** to verify the connection status of the authentication device.

   Note: To confirm that the authentication device can recognize an authentication card, hold the card over the reader while you select **Check**.

7. Click **Next**.
8. Click **OK** to confirm the settings.

Parent topic: Configuring Security Settings

Restricting Features Available for Users

Follow the instructions in these sections to restrict users from using certain product features and create an administrator password to lock the restrictions using the Web Config software.

User Feature Restriction

Configuring User Feature Restrictions

Parent topic: Configuring Security Settings

User Feature Restriction

You can restrict available product features for individual users, with different features available to each user. This requires users to log into the product control panel with their user name and password before they can use control panel features.

With Windows, you can also restrict printing and scanning from the product software. This requires users to log into the printing or scanning software, and allows the software to authenticate the users before printing or scanning proceeds. For instructions on setting up software restrictions, see the help utility in the printing or scanning software.

Parent topic: Restricting Features Available for Users

Configuring User Feature Restrictions

You can create up to 10 user accounts and restrict access to control panel features separately for each one.

Note: If you are using an authentication system, it uses the number one user account. If you create other user accounts, use the number two to number 10 user accounts.

1. Access Web Config and select the **Product Security** tab.
2. Select the **Enables Access Control** checkbox.
3. If you have configured the product for an LDAP server or IEEE 802.1x network, you can deselect the **Allows printing and scanning without authentication information from a computer** checkbox to prevent the product from receiving jobs sent from these sources:
   - The default operating system driver
   - A PCL or PostScript printer driver
   - Web services such as Epson Connect
   - Smartphones and other mobile devices
4. Click **OK**.
5. Select **User Settings**.
6. Click **Add**.
7. Enter a name for a user in the User Name field following the guidelines on the screen. Use ASCII (0x20-0x7E) characters.
8. Enter a password for the user in the Password field following the guidelines on the screen.

   Note: If you need to reset a password, leave the password field blank.

9. Select the checkbox for each function you want the user to be able to perform, and deselect the checkbox for each function you want to restrict access to.
10. Click **Apply**.

    Note: When you edit a completed user account, you see a **Delete** option. Click it to delete a user, if necessary.

Note: You can import and export a list of user features using EpsonNet Config. See the help utility in the software for instructions.

Parent topic: Restricting Features Available for Users

Disabling the External Interface

You can restrict the ability to connect from a computer using a USB connection or accessing a connected USB device or memory card.

Note: Depending on your product features, not all of the options listed below may be available.

1. Access Web Config and select **Product Security** > **External Interface**.
2. Select **Memory Device** and do one of the following:
   - Select **Disable** to prevent access to a USB device or memory card.
   - Select **Enable** to allow access to a USB device or memory card.
3. Select **PC Connection via USB** and do one of the following:
   - Select **Disable** to prevent a computer from connecting to the product over a USB connection.
   - Select **Enable** to allow a computer to connect to the product over a USB connection.
4. Click **OK** to save your setting.

Setting Up Password Encryption

You can set up password encryption to protect confidential information stored in the product.

1. Log in to the Web Config interface as an administrator.

2. Select the **Product Security** tab and select **Password Encryption**.
3. Select **On** and select **OK**.

   A message appears about restarting the product. Select **OK**.
4. Turn the product off and then on again to apply the password encryption setting.

   Note: The product may take longer than usual to turn on. This is normal.

Parent topic: Configuring Security Settings

Working with Audit Logs

You can enable the Audit Log feature or export audit log data using the Web Config interface. Audit logs can be used to track security issues or identify improper usage.

1. Log in to the Web Config interface as an administrator.
2. Select the **Product Security** tab, then select the **Audit Log** setting.
3. Select **ON** to enable the audit log feature.
4. Select **Export** to export the audit log data to a CSV file, or select **Delete** to delete all audit logs.

Parent topic: Configuring Security Settings

Restricting PDL File Operations

You can protect files from unauthorized PDL operations using the Web Config interface.

1. Log in to the Web Config interface as an administrator.
2. Select the **Product Security** tab, then select the **File Operations from PDL** setting.
3. Select **Allowed** or **Not Allowed** to enable or disable PDL file operations and select **OK** to apply your setting.

Parent topic: Configuring Security Settings

Enabling Program Verification on Start Up

You can check whether unauthorized third parties have tampered with the program when the product starts up using the Web Config interface.

1. Log in to the Web Config interface as an administrator.
2. Select the **Product Security** tab, then select the **Program Verification on Start Up** setting.
3. Select **ON** and then select **OK** to apply the setting.

Configuring Protocols and Services in Web Config

You can enable or disable protocols using Web Config.

1. Access Web Config, select **Network Security**, and select **Protocol**.
2. Select or deselect the checkbox next to the service name to enable or disable a protocol.
3. Configure any other available protocol settings.
4. Click **Next**.
5. Click **OK**.
6. Select and configure services and protocol settings as necessary.

After the protocols restart, the changes are applied.

Protocol Settings

Parent topic: Using Your Product on a Secure Network

Protocol Settings

Protocols

Name	Description
Bonjour	Bonjour is used to search for devices and AirPrint
iBeacon	Enable the iBeacon setting to search for the product from iBeacon-enabled devices

Name	Description
SLP	SLP is used for push-scanning and network searching in EpsonNet Config
WSD	Add WSD devices, or print and scan from the WSD port
LLTD	Displays the product on the Windows network map
LLMNR	Use name resolution without NetBIOS even if you cannot use DNS
LPR	Print from to the LPR port
RAW(Port9100)	Print from the RAW port (Port 9100)
IPP	Print over the Internet, including AirPrint
FTP	Print over FTP
SNMPv1/v2c	Remotely set up and monitor your product
SNMPv3	Remotely set up and monitor your product with the SNMPv3 protocol

Bonjour Settings

Setting	Options/Description
Use Bonjour	Search for or use devices through Bonjour
Bonjour Name	Displays the Bonjour name
Bonjour Service Name	Displays the Bonjour service name
Location	Displays the Bonjour location name
Top Priority Protocol	Selects the protocol that is the top priority for Bonjour printing
Wide-Area Bonjour	Enables the Wide-Area Bonjour protocol; register all products on the DNS server to locate them over the segment

iBeacon Settings

Setting	Options/Description
Enable iBeacon Transmission	Enable the iBeacon transmission function

SLP Settings

Setting	Options/Description
Enable SLP	Enable the SLP function to use the Push Scan function and network searching in EpsonNet Config

WSD Settings

Setting	Options/Description
Enable WSD	Enable adding devices using WSD, and printing and scanning from the WSD port
Printing Timeout (sec)	Enter the communication timeout value for WSD printing between 3 and 3,600 seconds
Scanning Timeout (sec)	Enter the communication timeout value for WSD scanning between 3 and 3,600 seconds
Device Name	Displays the WSD device name
Location	Displays the WSD location name

LLTD Settings

Setting	Options/Description
Enable LLTD	Enable LLTD to display the product in the Windows network map
Device Name	Displays the LLTD device name

LLMNR Settings

Setting	Options/Description
Enable LLMNR	Enable LLMNR to use name resolution without NetBIOS, even if you cannot use DNS

LPR Settings

Setting	Options/Description
Allow LPR Port Printing	Allow printing from the LPR port
Printing Timeout (sec)	Enter the timeout value for LPR printing between 0 and 3,600 seconds

RAW (Port9100) Settings

Setting	Options/Description
Allow RAW (Port9100) Printing	Allow printing from the RAW port (Port 9100)
Printing Timeout (sec)	Enter the timeout value for RAW port (Port 9100) printing between 0 and 3,600 seconds

RAW (Custom Port) Settings

Setting	Options/Description
Allow RAW (Custom Port) Printing	Allow printing from the RAW port (custom port)
Port Number	Enter the port number for RAW printing between 1024 and 65535 (except 9100, 1865, and 2968)
Printing Timeout (sec)	Enter the timeout value for RAW port (custom port) printing between 0 and 3,600 seconds

IPP Settings

Setting	Options/Description
Enable IPP	Enable IPP communication for products that support IPP are displayed (you cannot use AirPrint if disabled)
Allow Non-secure Communication	Allow the printer to communicate without any security measures (IPP)
Communication Timeout (sec)	Enter the timeout value for IPP printing between 0 and 3,600 seconds

Setting	Options/Description
URL(Network)	Displays IPP URLs (http and https) when the product is connected using wired LAN or Wi-Fi (the URL is a combined value of the product's IP address, Port number, and IPP printer name)
URL(Wi-Fi Direct)	Displays IPP URLs (http and https) when the product is connected using Wi-Fi Direct (the URL is a combined value of the product's IP address, Port number, and IPP printer name)
Printer Name	Displays the IPP printer name
Location	Displays the IPP location

FTP Settings

Setting	Options/Description
Enable FTP Server	Enable FTP printing for products that support FTP printing
Communication Timeout (sec)	Enter the timeout value for FTP communication between 0 and 3,600 seconds

SNMPv1/v2c Settings

Setting	Options/Description
Enable SNMPv1/v2c	Enable SNMPv1/v2c for products that support SNMPv3
Access Authority	Set the access authority when SNMPv1/v2c is enabled to **Read Only or Read/Write**
Community Name (Read Only)	Enter 0 to 32 ASCII characters
Community Name (Read/Write)	Enter 0 to 32 ASCII characters
Allow access from Epson tools	Allow information to be written from Epson tools such as Epson Device Admin

SNMPv3 Settings

Setting	Options/Description
Enable SNMPv3	Enable SNMPv3 for products that support SNMPv3

Setting	Options/Description
User Name	Enter 1 to 32 characters
Authentication Settings	Select an algorithm and set a password for authentication
Encryption Settings	Select an algorithm and set a password for encryption
Context Name	Enter 1 to 32 characters in Unicode (UTF-8)

Configuring SSL/TLS Communication

Follow the instructions in these sections to configure SSL/TLS communication using Web Config.

Configuring SSL/TLS Settings
Configuring a Server Certificate for the Product

Parent topic: Using Your Product on a Secure Network

Configuring SSL/TLS Settings

If your product supports HTTPS, you can configure SSL/TLS to encrypt communications with your product.

1. Access Web Config and select **Network Security** tab.
2. Select **SSL/TLS** and select **Basic**.
3. Select one of the options for the **Encryption Strength** setting.
4. Select **Enable** or **Disable** for the **Redirect HTTP to HTTPS** setting as necessary.
5. If necessary, enable a TLS version.
6. Click **Next**.

   You see a confirmation message.
7. Click **OK**.

Parent topic: Configuring SSL/TLS Communication

Configuring a Server Certificate for the Product

You can configure a server certificate for your product.

1. Access Web Config and select the **Network Security** tab.
2. Under **SSL/TLS**, select **Certificate**.

3. Select one of the following options:
   - **CA-signed Certificate**: Select **Import** if you have obtained a CA-signed certificate. Choose the file to import and click **OK**.
   - **Self-signed Certificate**: Select **Update** if you have not obtained a CA (Certificate Authority)-signed certificate and want the product to generate a self-signed certificate.
4. Click **Next**.

   You see a confirmation message.
5. Click **OK**.

Parent topic: Configuring SSL/TLS Communication

Configuring IPsec/IP Filtering

Follow the instructions in these sections to configure IPsec/IP traffic filtering using Web Config.

About IPsec/IP Filtering
Configuring the Default IPsec/IP Filtering Policy
Configuring the Group IPsec/IP Filtering Policies
IPsec/IP Filtering Policy Settings
IPsec/IP Filtering Configuration Examples
Configuring an IPsec/IP Filtering Certificate

Parent topic: Using Your Product on a Secure Network

About IPsec/IP Filtering

You can filter traffic to the product over the network based on IP address, service, and port by configuring a default policy that applies to every user or group connecting to the product. For control of individual users or user groups, you can configure group policies.

Note: IPsec is supported only by computers running Windows Vista or later, or Windows Server 2008 or later.

Parent topic: Configuring IPsec/IP Filtering

Configuring the Default IPsec/IP Filtering Policy

You can configure the default policy for IPsec/IP traffic filtering using Web Config.

1. Access Web Config and select the **Network Security** tab.
2. Under **IPsec/IP Filtering**, select **Basic**.

3. Select **Enable** to enable IPsec/IP filtering.
4. Select the filtering options you want to use for the default policy.
5. Click **Next**.

   You see a confirmation message.
6. Click **OK**.

Parent topic: Configuring IPsec/IP Filtering

Configuring the Group IPsec/IP Filtering Policies

You can configure group policies for IPsec/IP traffic filtering using Web Config.

1. Access Web Config and select the **Network Security** tab.
2. Under **IPsec/IP Filtering**, select **Basic**.
3. Click a tab number for the policy number you want to configure.
4. Select the **Enable this Group Policy** checkbox.
5. Select the filtering options you want to use for this group policy.
6. Click **Next**.

   You see a confirmation message.
7. Click **OK**.
8. If you want to configure additional group policies, click the next tab number and repeat the configuration steps as necessary.

Parent topic: Configuring IPsec/IP Filtering

IPsec/IP Filtering Policy Settings

Default Policy Settings

Setting	Options/Description
Access Control	**Permit Access** to permit IP packets to pass through **Refuse Access** to prevent IP packets from passing through **IPsec** to permit IPsec packets to pass through
IKE Version	Select the version of the Internet Key Exchange (IKE) protocol that matches your network environment

Setting	Options/Description
Authentication Method	Select an authentication method, or select **Certificate** if you have imported a CA-signed certificate
Pre-Shared Key	If necessary, enter a pre-shared key between 1 and 127 characters long
Confirm Pre-Shared Key	Confirm the pre-shared key you entered
ID Type	If you selected **IKEv2** as the **IKE Version** setting, select the ID type from the list.
ID	If you selected **IKEv2** as the **IKE Version** setting, enter the necessary ID information
Encapsulation	If you selected **IPsec** as the **Access Control** option, select one of these encapsulation modes: **Transport Mode**: if you are using the product on the same LAN; IP packets of layer 4 or later are encrypted **Tunnel Mode**: if you are using the product on an Internet-capable network, such as IPsec-VPN; the header and data of IP packets are encrypted
Remote Gateway(Tunnel Mode)	If you selected **Tunnel Mode** as the **Encapsulation** option, enter a gateway address between 1 and 39 characters long
Security Protocol	If you selected **IPsec** as the **Access Control** option, select one of these security protocols: **ESP**: to ensure the integrity of authentication and data, and encrypt data **AH**: to ensure the integrity of authentication and data; if data encryption is prohibited, you can use IPsec
Algorithm Settings	Select the encryption algorithm settings for the security protocol you selected

Group Policy Settings

Setting	Options/Description
Access Control	**Permit Access** to permit IP packets to pass through **Refuse Access** to prevent IP packets from passing through **IPsec** to permit IPsec packets to pass through
Local Address(Printer)	Select an IPv4 or IPv6 address that matches your network environment; if the IP address is assigned automatically, select **Use auto-obtained IPv4 address**
Remote Address(Host)	Enter the device's IP address (between 0 and 43 characters long) to control access, or leave blank to control all addresses; if the IP address is assigned automatically, such as by DHCP, the connection may be unavailable, so configure a static address instead
Method of Choosing Port	Select the method you want to used for specifying ports
Service Name	If you selected **Service Name** as the **Method of Choosing Port** option, select a service name option here; see the next table for more information
Transport Protocol	If you selected **Port Number** as the **Method of Choosing Port** option, select one of these encapsulation modes: **Any Protocol** **TCP** **UDP** **ICMPv4** See the Group Policy Guidelines table for more information.
Local Port	If you selected **Port Number** as the **Method of Choosing Port** option, and **TCP** or **UDP** for the **Transport Protocol** option, enter the port numbers that control receiving packets (up to 10 ports), separated by commas, for example **25,80,143,5220**; leave this setting blank to control all ports; see the next table for more information

Setting	Options/Description
Remote Port	If you selected **Port Number** as the **Method of Choosing Port** option, and **TCP** or **UDP** for the **Transport Protocol** option, enter the port numbers that control sending packets (up to 10 ports), separated by commas, for example **25,80,143,5220**; leave this setting blank to control all ports; see the next table for more information
IKE Version	Select **IKEv1** or **IKEv2** depending on the device that the product is connected to
Authentication Method	If you selected **IPsec** as the **Access Control** option, select an authentication method here
Pre-Shared Key	If you selected **Pre-Shared Key** as the **Authentication Method** option, enter a pre-shared key between 1 and 127 characters long here and in the **Confirm Pre-Shared Key** field
ID Type	If you selected **IKEv2** as the **IKE Version** setting, select the ID type from the list
ID	If you selected **IKEv2** as the **IKE Version** setting, enter the necessary ID information
Encapsulation	If you selected **IPsec** as the **Access Control** option, select one of these encapsulation modes: **Transport Mode**: if you are using the product on the same LAN; IP packets of layer 4 or later are encrypted **Tunnel Mode**: if you are using the product on an Internet-capable network, such as IPsec-VPN; the header and data of IP packets are encrypted
Remote Gateway(Tunnel Mode)	If you selected **Tunnel Mode** as the **Encapsulation** option, enter a gateway address between 1 and 39 characters long

Setting	Options/Description
Security Protocol	If you selected **IPsec** as the **Access Control** option, select one of these security protocols: **ESP**: to ensure the integrity of authentication and data, and encrypt data **AH**: to ensure the integrity of authentication and data; if data encryption is prohibited, you can use IPsec
Algorithm Settings	Select the encryption algorithm settings for the security protocol you selected

Combinations of Local Address (Printer) and Remote Address (Host) on Group Policy

Setting of Remote Address (Host)	Settng of Local Address (Printer)		
	IPv4	**IPv6**[*2]	**Any addresses**[*3]
IPv4[*1]	Yes	—	Yes
IPv6[*1] [*2]	—	Yes	Yes
Blank	Yes	Yes	Yes

[*1]: If you selected **IPsec** as the **Access Control** option, you cannot specify a prefix length

[*2]: If you selected **IPsec** as the **Access Control** option, you can select a link-local address (fe80::), but the group policy will be disabled.

[*3]: You cannot use IPv6 link-local addresses.

Group Policy Guidelines

Service name	Protocol type	Local/Remote port number	Controls these operations
Any	—	—	All services
ENPC	UDP	3289/Any port	Searching for a product from applications such as printer or scanner drivers, or EpsonNet Config

Service name	Protocol type	Local/Remote port number	Controls these operations
SNMP	UDP	161/Any port	Acquiring and configuring MIB from applications such as printer or scanner drivers, or EpsonNet Config
LPR	TCP	515/Any port	Forwarding LPR data
RAW (Port9100)	TCP	9100/any port	Forwarding RAW data
IPP/IPPS	TCP	631/Any port	Forwarding AirPrint data (IPP/IPPS printing)
WSD	TCP	Any port/5357	Controlling WSD
WS-Discovery	UDP	3702/Any port	Searching for a product from WSD
Network Scan	TCP	1865/Any port	Forwarding scan data from Document Capture Pro
Network Push Scan	TCP	Any port/2968	Acquiring job information on push scanning from Document Capture Pro
Network Push Scan Discovery	UDP	2968/Any port	Searching for a computer during push scanning from Document Capture Pro
FTP Data (Local)	TCP	20/Any port	Forwarding FTP printing data to FTP server
FTP Control (Local)	TCP	21/Any port	Controlling FTP printing to FTP server
FTP Data (Remote)	TCP	Any port/20	Forwarding scan data and received fax data to FTP client; controls only an FTP server that uses remote port 20
FTP Control (Remote)	TCP	Any port/21	Forwarding scan data and received fax data to FTP client
CIFS (Local)*	TCP	445/Any port	Sharing a network folder on CIFS server
CIFS (Remote)*	TCP	Any port/445	Forwarding scan data and received fax data to a folder on CIFS server

Service name	Protocol type	Local/Remote port number	Controls these operations
NetBIOS Name Service (Local)	UDP	137/Any port	Sharing a network folder on CIFS server
NetBIOS Datagram Service (Local)	UDP	138/Any port	
NetBIOS Session Service (Local)	TCP	139/Any port	
NetBIOS Name Service (Remote)	UDP	Any port/137	Forwarding scan data and received fax data to a folder on CIFS server
NetBIOS Datagram (Remote)	UDP	Any port/138	
NetBIOS Session Service (Remote)	TCP	Any port/139	
HTTP (Local)	TCP	80/Any port	Forwarding Web Config and WSD data to a HTTP or HTTPS server
HTTPS (Local)	TCP	443/Any port	
HTTP (Remote)	TCP	Any port/80	Communicating with Epson Connect, firmware update, and root certificate update on a HTTP or HTTPS client
HTTPS (Remote)	TCP	Any port/443	

* To control forwarding of scan and received fax data, share a network folder, or receive fax data from PC-Fax, select **Port Number** as the **Method of Choosing Port** option and specify the port numbers for CIFS and NetBIOS.

Parent topic: Configuring IPsec/IP Filtering

IPsec/IP Filtering Configuration Examples

You can configure IPsec and IP filtering in a variety of ways, as shown in the examples here.

Receiving IPsec Packets Only

Use this example only for configuring a default policy.

- **IPsec/IP Filtering**: **Enable**
- **Access Control**: **IPsec**
- **Authentication Method**: **Pre-Shared Key**

- **Pre-Shared Key**: Enter a key up to 127 characters long

Receiving Printing Data and Printer Settings

Use this example to allow communication of printing data and printer settings from specified services.

Default policy:

- **IPsec/IP Filtering**: **Enable**
- **Access Control**: **Refuse Access**

Group policy:

- **Access Control**: **Permit Access**
- **Remote Address(Host)**: Client IP address
- **Method of Choosing Port**: **Service Name**
- **Service Name**: Select **ENPC**, **SNMP**, **HTTP (Local)**, **HTTPS (Local)**, and **RAW (Port9100)**

Receiving Access from Only a Specified Address for Product Access

In these examples, the client will be able to access and configure the product in any policy configuration.

Default policy:

- **IPsec/IP Filtering**: **Enable**
- **Access Control**: **Refuse Access**

Group policy:

- **Access Control**: **Permit Access**
- **Remote Address (Host)**: Administrator's client IP address

Parent topic: Configuring IPsec/IP Filtering

Configuring an IPsec/IP Filtering Certificate

You can configure a certificate for IPsec/IP traffic filtering using Web Config.

1. Access Web Config and select the **Network Security** tab.
2. Under **IPsec/IP Filtering**, select **Client Certificate**.
3. Click **Import** to add a new client certificate and enter any necessary settings.
4. Click **OK**.

Parent topic: Configuring IPsec/IP Filtering

Connecting the Product to an IEEE 802.1X Network

Follow the instructions in these sections to connect the product to an IEEE 802.1X network using Web Config.

Configuring an IEEE 802.1X Network
IEEE 802.1X Network Settings
Configuring a Certificate for an IEEE 802.1X Network
IEEE 802.1X Network Status

Parent topic: Using Your Product on a Secure Network

Configuring an IEEE 802.1X Network

If your product supports IEEE 802.1X, you can use it on a network with authentication provided by a RADIUS server with a hub as an authenticator using Web Config.

1. Access Web Config and select the **Network Security** tab.
2. Under **IEEE802.1X**, select **Basic**.
3. Select **Enable** as the **IEEE802.1X (Wired LAN)** setting.
4. To use the product on a Wi-Fi network, enable your product's Wi-Fi settings.

   The status of the connection is shown as the **IEEE802.1X (Wi-Fi)** setting.

   Note: You can share the network settings for Ethernet and Wi-Fi networking.

5. Select the IEEE 802.1X setting options you want to use.
6. Click **Next**.

   You see a confirmation message.
7. Click **OK**.

Parent topic: Connecting the Product to an IEEE 802.1X Network

IEEE 802.1X Network Settings

You can configure these IEEE 802.1X network settings in Web Config.

Setting	Options/Description
IEEE802.1X (Wired LAN)	Enable or disable settings (**IEEE802.1X** > **Basic**)
IEEE802.1X (Wi-Fi)	Displays the IEEE802.1X (Wi-Fi) connection status

Setting	Options/Description
Connection Method	Displays the current network connection method
EAP Type	Select one of these authentication methods for connections between the product and a RADIUS server: **EAP-TLS** or **PEAP-TLS**: You must obtain and import a CA-signed certificate **PEAP/MSCHAPv2** or **EAP-TTLS**: You must configure a password
User ID	Enter an ID between 1 and 128 ASCII characters for authentication on a RADIUS server
Password	Enter a password between 1 and 128 ASCII characters for authentication of the product. If you are using Windows as a RADIUS server, enter up to 127 ASCII characters.
Confirm Password	Enter the authentication password again
Server ID	Enter a server ID between 1 and 128 ASCII characters for authentication on a specified RADIUS server; server ID is verified in the subject/subjectAltName field of a server certificate sent from the RADIUS server
Certificate Validation	Select a valid certificate regardless of the authentication method; import the certificate using the **CA Certificate** option
Anonymous Name	If you selected **EAP-TTLS**, **PEAP-TLS** or **PEAP/MSCHAPv2** as the **Authentication Method** setting, you can configure an anonymous name between 1 and 128 ASCII characters instead of a user ID for phase 1 of a PEAP authentication
Encryption Strength	Select one of the following encryption strengths: **High** for AES256/3DES **Middle** for AES256/3DES/AES128/RC4

Parent topic: Connecting the Product to an IEEE 802.1X Network

Configuring a Certificate for an IEEE 802.1X Network

If your product supports IEEE 802.1X, you can configure a certificate for the network using Web Config.

1. Access Web Config and select the **Network Security** tab.

2. Under **IEEE802.1X**, select **Client Certificate**.
3. Click **Import** to add a new client certificate.
4. Click **OK**.

Parent topic: Connecting the Product to an IEEE 802.1X Network

IEEE 802.1X Network Status

You can check the status of the IEEE 802.1X network settings by printing a status sheet from your product.

The network status sheet displays the information in this table for IEEE 802.1X networks.

Status ID	Status description
Disable	IEEE 802.1X is disabled
EAP Success	IEEE 802.1X authentication is confirmed and the network connection is available
Authenticating	IEEE 802.1X authentication in progress
Config Error	Authentication failed because the user ID was not set
Client Certificate Error	Authentication failed because the client certificate is out of date
Timeout Error	Authentication failed because there is no answer from the RADIUS server and/or authenticator
User ID Error	Authentication failed because the product's user ID and/or certificate protocol is incorrect
Server ID Error	Authentication failed because the server ID on the server certificate and the server's ID do not match
Server Certificate Error	Authentication failed because the server certificate is out of date or the chain of the server certificate is incorrect
CA Certificate Error	Authentication failed because the CA certificate is incorrect, not imported, or out of date
EAP Failure	Authentication failed because the client certificate is incorrect (EAP-TLS or PEAP-TLS), or the user ID or password is incorrect (PEAP/MSCHAPv2)

Parent topic: Connecting the Product to an IEEE 802.1X Network

Using a Digital Certificate

Follow the instructions in these sections to configure and use digital certificates using Web Config.

About Digital Certification
Obtaining and Importing a CA-signed Certificate
CSR Setup Settings
CSR Import Settings
Deleting a CA-signed Certificate
Updating a Self-signed Certificate
Importing a CA Certificate
Deleting a CA Certificate

Parent topic: Using Your Product on a Secure Network

About Digital Certification

You can configure the following digital certificates for your network using Web Config:

CA-signed Certificate
You can ensure secure communications using a CA-signed certificate for each security feature. The certificates must be signed by and obtained from a CA (Certificate Authority).

CA Certificate
A CA certificate indicates that a third party has verified the identity of a server. You need to obtain a CA certificate for server authentication from a CA that issues it.

Self-signed Certificate
A self-signed certificate is issued and signed by the product itself. You can use the certificate for only SSL/TLS communication, however security is unreliable and you may see a security alert in the browser during use.

Parent topic: Using a Digital Certificate

Obtaining and Importing a CA-signed Certificate

You can obtain a CA-signed certificate by creating a CSR (Certificate Signing Request) using Web Config and submitting it to a certificate authority. The CSR created in Web Config is in PEM/DER format. You can import one CSR created from Web Config at a time.

1. Access Web Config and select **Network Security**.
2. Select one of the available network security options and select a certificate option.
3. In the CSR section, select **Generate**.
4. Select the CSR setting options you want to use.

5. Click **OK**.

   You see a completion message.
6. Select **Network Security**, select your network security option, and select **Certificate** again.
7. In the CSR section, click the **Download** option that matches the format specified by your certificate authority to download the CSR.

   Caution: Do not generate another CSR or you may not be able to import a CA-signed certificate.
8. Submit the CSR to the certificate authority following the format guidelines provided by that authority.
9. Save the issued CA-signed certificate to a computer connected to the product.

   Before proceeding, make sure the time and date settings are correct on your product.
10. In the CA Certificate section, click **Import**.
11. Select the format of the certificate as the **Server Certificate** setting.
12. Select the certificate import settings as necessary for the format and the source from which you obtained it.
13. Click **OK**.

    You see a confirmation message.
14. Click **Confirm** to verify the certificate information.

Parent topic: Using a Digital Certificate

CSR Setup Settings
CSR Import Settings

CSR Setup Settings

You can select these settings when setting up a CSR in Web Config.

Note: The available key length and abbreviations vary by certificate authority, so follow the rules of that authority when entering information in the CSR.

Setting	Options/Description
Key Length	Select a key length for the CSR

Setting	Options/Description
Common Name	Enter a name or static IP address from 1 to 128 characters long; for example, **Reception printer** or **https://10.152.12.225**
Organization, **Organizational Unit**, **Locality**, **State/Province**	Enter information in each field as necessary, from 0 to 64 characters long in ASCII; separate any multiple names with commas
Country	Enter a two-digit country code number as specified by the ISO-3166 standard
Sender's Email Address	Enter the sender's email address for the mail server setting

Parent topic: Using a Digital Certificate

CSR Import Settings

You can configure these settings when importing a CSR in Web Config.

Note: The import setting requirements vary by certificate format and how you obtained the certificate.

Certificate format	Setting descriptions
PEM/DER format obtained from Web Config	**Private Key**: Do not configure because the product contains a private key **Password**: Do not configure **CA Certificate 1/CA Certificate 2**: Optional
PEM/DER format obtained from a computer	**Private Key**: Configure a private key **Password**: Do not configure **CA Certificate 1/CA Certificate 2**: Optional
PKCS#12 format obtained from a computer	**Private Key**: Do not configure **Password**: Optional **CA Certificate 1/CA Certificate 2**: Do not configure

CA-signed Certificate Import Settings

Setting	Description
Server Certificate or **Client Certificate**	Select the certificate format. For an SSL/TLS connection, the Server Certificate is displayed. For an IPsec/IP Filtering, IEEE802.1x, or S/MIME connection, the Client Certificate is displayed. **Note:** Depending on your product, not all connection types may be available.
Private Key	If you obtain a certificate of the PEM/DER format by using a CSR created from a computer, specify a private key file that matches the certificate.
Password	If the file format is **Certificate with Private Key (PKCS#12)**, enter the password for encrypting the private key that is set when you obtain the certificate.
CA Certificate 1	If your certificate's format is **Certificate (PEM/DER)**, import a certificate from a certificate authority that issues a CA-signed Certificate to be used as the server certificate. Specify a file if necessary.
CA Certificate 2	If your certificate's format is **Certificate (PEM/DER)**, import a certificate from the same certificate authority that issued CA Certificate 1. Specify a file if necessary.

Parent topic: Using a Digital Certificate

Deleting a CA-signed Certificate

You can delete an imported CA-signed certificate with Web Config when the certificate expires or if you have no more need for an encrypted connection.

Note: If you obtained a CA-signed certificate from Web Config, you cannot import a deleted certificate; you must obtain and import a new certificate.

1. Access Web Config and select **Network Security**.

2. Select one of the following network security options and corresponding certificate:
   - **SSL/TLS** and select **Certificate**
   - **IPsec/IP Filtering** and select **Client Certificate**
   - **IEEE802.1X** and select **Client Certificate**
3. Click **Delete**.

   You see a completion message.
4. Click **OK**.

Parent topic: Using a Digital Certificate

Updating a Self-signed Certificate

If your product supports the HTTPS server feature, you can update a self-signed certificate using Web Config.

1. Access Web Config and select **Network Security**, select **SSL/TLS**, and select **Certificate**.
2. Click **Update**.
3. Enter an identifier for your product from 1 to 128 characters long in the **Common Name** field.

   Note: You can add up to 5 IPv4 addresses, IPv6 addresses, host names, or FQDNs; separated by commas. The first value is assigned to the Common Name field, and the rest are added to the Alias field of the certificate subject. You cannot enter a space before or after a comma.
4. Select a validity period for the certificate as the **Certificate Validity (year)** setting.
5. Click **Next**.

   You see a completion message.
6. Click **OK**.
7. Click **Confirm** to verify the certificate information.

Parent topic: Using a Digital Certificate

Importing a CA Certificate

You can import a CA certificate using Web Config.

1. Access Web Config and select **Network Security**.
2. Select **CA Certificate**.
3. Select **Import**.

4. Select the CA certificate you want to import.
5. Click **OK**.

When you see the **CA Certificate** page and the imported certificate is displayed, the import is finished.

Parent topic: Using a Digital Certificate

Deleting a CA Certificate

You can delete an imported CA certificate with Web Config when the certificate expires or if you have no more need for an encrypted connection.

1. Access Web Config and select **Network Security Settings**.
2. Select **CA Certificate**.
3. Locate the certificate you want to remove and click the **Delete** button next to it.
4. Click **OK** to confirm the deletion.
5. Click **Reboot Network**, and then check that the deleted CA Certificate is not listed on the updated screen.

Parent topic: Using a Digital Certificate

Setting Up Universal Print (Microsoft)

You can set up your product for use with Universal Print if you are using Microsoft 365 and Azure Active Directory.

Note: This feature is supported on Windows 10 2004 (20H1) or later. Visit the Microsoft website for more information.

1. Access Web Config and select the **Network** tab.
2. Select **Universal Print**.
3. Select **Register**.
4. Follow the on-screen instructions to register your product.

Parent topic: Administering Your Product

Using Epson Device Admin Configuration Software

With Windows, you can discover and monitor remote devices, and configure network settings in a batch operation. See the Epson Device Admin help for instructions.

To install Epson Device Admin, download the software from the support page at epson.com/support (U.S.), epson.ca/support (Canada), or latin.epson.com/support (Latin America) and follow the on-screen instructions.

Product Status Messages

You can often diagnose problems with your product by checking the messages and status icons on its LCD screen. You can also check for errors by pressing the **Job/Status** button and selecting **Printer Status**.

Note: If the screen is dark, press the screen to wake the product from sleep mode.

LCD screen message	Condition/solution
Printer error. Turn the power off and on again. If the problem persists, contact Epson support.	Turn the product off and then back on again. If the error persists, check for and remove any jammed paper or protective materials from the product. If the error still persists, contact Epson for support. If you see any of the following error codes, make sure you have not exceeded the loading capacity for any paper source: • 000181 • 000184
Printer error. Contact Epson support. Non-printing features are available.	The product may be damaged, but features such as scanning are still available. Contact Epson for support.
Printer error. For details, see your documentation.	The product may be damaged. Contact Epson for support.
Paper out in XX. Load Paper. Paper Size: XX/Paper Type: XX	Load the size and type of paper in the paper source indicated.
Too many paper cassette units are installed. Turn the power off and uninstall the extra units. See your documentation for details.	You can install up to three optional paper cassette units. Remove any extra units.
Unsupported Paper Cassette Units have been installed. Turn the power off and uninstall. For details, see your documentation.	Unsupported optional paper cassette units are installed. Remove the unsupported units.
Cannot print because XX is out of order. You can print from another cassette.	Turn the product off and then back on again. Reinsert the indicated paper cassette. If the error persists, contact Epson for support.
The pickup roller in XX is nearing the end of its service life.	The paper cassette rollers need to be replaced periodically for optimal performance. (Paper may not feed correctly from the paper cassette when the roller is near the end of its service life.) Contact Epson for support.
The pickup roller in XX has reached the end of its service life. Replace it and reset the maintenance roller counter.	Replace the paper cassette roller indicated and reset the counter. Contact Epson for support.

LCD screen message	Condition/solution
You need to replace Ink Supply Unit(s).	Replace the indicated ink packs.
Paper Setup Auto Display is set to Off. Some features may not be available. For details, see your documentation.	AirPrint is not available when the **Paper Setup Auto Display** setting is disabled. Change **Paper Setup Auto Display** to **On**.
No dial tone is detected.	Make sure the phone cable is connected correctly and the phone line works. If you connected the product to a PBX (Private Branch Exchange) phone line or Terminal Adapter, change the **Line Type** setting to **PBX**. If you still cannot send a fax, turn off the **Dial Tone Detection** setting. (Turning off the Dial Tone Detection setting may cause the product to drop the first digit of a fax number.)
Failed to receive faxes because the fax data capacity is full. Touch the Job/Status at the bottom of the Home Screen for details.	Press the **Job/Status** button and select **Printer Status** and resolve any printer errors that prevented faxes from printing. Make sure the product is connected to a computer or that a USB device is connected to the product.
The combination of the IP address and the subnet mask is invalid. See your documentation for more details.	There is a problem with the network connection to your product. Set up your product on the network again.
To use cloud services, update the root certificate from the Epson Web Config utility.	Access the Web Config utility and update the cloud service root certificate.
Check that the printer driver is installed on the computer and that the port settings for the printer are correct.	Make sure the printer port is correctly configured. In Windows, make sure the port is set to a **USBXXX** setting for a USB connection or **EpsonNet Print Port** for a network connection.
Paper feed error. Remove C1, make sure there is no jammed paper remaining in the printer, and reload the paper.	Even if you cannot feed the paper, check the position of the pickup roller lock. If the position is wrong, push the pickup roller lock with your finger to correct the position. See the pickup roller replacement videos on the Epson support site for instructions.
Recovery Mode Update Firmware	An error has occurred during firmware updating. Connect your product using a USB cable and try downloading the Firmware Update from the Epson support site. If you still need help, contact Epson for support.

Job Status Error Codes

If a job does not complete successfully, you can check the error code for the reason. Press the **Job/Status** button, select the **Job/Status** tab, and select **Log**. Select the incomplete job to display the error code and additional information.

Code	Condition/solution
001	The product was turned off by a power failure.
101	Memory is full. Reduce the size of the print job.
102	Collated printing has failed due to a lack of available memory. Clear fonts and macros from the product's memory using the **PDL Font, Macro** option on the **Settings** > **General Settings** > **System Administration** > **Clear Internal Memory Data** menu, reduce the size of the print job, or print one copy at a time.
103	Print quality was decreased due to a lack of available memory. If the quality of the printout is unacceptable, try simplifying the page by reducing the number of graphics or the number and size of the fonts.
104	Reverse printing has failed due to a lack of available memory. Clear fonts and macros from the product's memory using the **PDL Font, Macro** option on the **Settings** > **General Settings** > **System Administration** > **Clear Internal Memory Data** menu or reduce the data size of the print job.

Code	Condition/solution
106	Cannot print from the computer due to access control settings. Contact your product administrator.
107	User authentication failed and the job has been canceled. Contact your product administrator.
108	Confidential job data was deleted when the product was turned off.
109	The received fax was already deleted.
110	The job was printed 1-sided because the loaded paper does not support 2-sided printing.
111	Available memory is running low. Reduce the size of the print job.
120	Cannot communicate with a server using an open platform. Check the server or network for errors.
201	The product's memory is full. You can send pages individually, or print received faxes and delete them to free up memory space.
202	The line was disconnected by the recipient's fax machine. Wait a moment, then try again.
203	The product cannot detect a dial tone. Make sure the phone cable is connected correctly and the phone line works. If you connected the product to a PBX (Private Branch Exchange) phone line or Terminal Adapter, change the **Line Type** setting to **PBX**. If you still cannot send a fax, turn off the **Dial Tone Detection** setting. (Turning off the Dial Tone Detection setting may cause the product to drop the first digit of a fax number.)
204	The recipient's fax machine is busy. Wait a moment, then try again.
205	The recipient's fax machine does not answer. Wait a moment, then try again.
206	The phone cable is incorrectly connected to the product's **LINE** and **EXT** ports. Connect the phone cable correctly.
207	The phone cable is not connected. Connect the phone cable.
208	The fax could not be sent to some of the specified recipients. Print a fax log to check which recipients failed to receive the fax. If the **Save Failure Data** setting is turned on, you can resend a fax from Job Status in the **Job/Status** menu.
301 401	There is not enough storage space available to save the data in the external memory device. Clear space on the device or use a different device.

Code	Condition/solution
302 402	The external memory device is write-protected. Disable write protection.
303	No folder is available for saving the scanned file. Create a folder or use a different memory device.
304 404	The external memory device has been removed. Reinsert the device.
305 405	An error occurred while saving data to an external memory device. Reinsert the memory device or use a different device.
306	The product's memory is full. Wait until current jobs are finished processing.
311 321 411 421	A DNS error has occurred. Check the DNS settings for the server, computer, or access point. DNS settings for the server can be checked from the DNS Server option in the Setup menu.
312 412	An authentication error has occurred. Check the **Server Settings** in the **Settings** menu.
313 413	A communication error has occurred. Check the network connection or **Server Settings** in the **Settings** menu.
314	The data size exceeds the maximum size for the attached files. Increase the **Attached File Max Size** setting in the scan settings or lower the file size of the scanned image.
315 327	The memory is full. Retry after other ongoing jobs have finished.
316	A mail encryption error occurred. Make sure the encryption certificate setting and the product's time setting are correct. Contact your product administrator.
317	A mail signature error occurred. Make sure the signing certificate setting and the product's time setting are correct. Contact your product administrator.
322	An authentication error occurred. Check the **Location** settings.
323	A communication error has occurred. Check the **Location** settings or the network connection.

Code	Condition/solution
324	A file with the same name already exists in the specified folder. Delete the duplicate file or change the file name prefix in **File Settings**.
325 326	There is not enough storage space available in the specified folder. Increase the storage space in the specified folder, delete unnecessary files, or lower the file size of the scanned image.
328	The destination was wrong or the destination does not exist. Check the **Location** settings.
330	An FTPS/FTPS secure connection error occurred. Check the location in the destination settings. Run Epson Web Config and update the root certificate or the CA certificate. Contact your product administrator.
331	A communication error occurred while acquiring the destination list. Make sure the product is connected to the network correctly.
332	There is not enough space available for saving the scanned files in the specified folder. Delete unnecessary files from the specified folder.
333	The destination could not be found because the destination information was uploaded to the server before sending the scanned data. Select the destination again.
334	An error occurred while sending the scanned data.
341	A communication error has occurred. Make sure the product is connected to the computer or network correctly. Make sure you have installed Document Capture Pro or Document Capture. Make sure the Event Manager program is not being blocked by your firewall or security software.
350	An FTPS/HTTPS certificate error occurred. Check the product's date and time settings are correct. Run Epson Web Config and update the root certificate or the CA certificate. Contact your product administrator.
422	An authentication error has occurred. Make sure the settings are correct for the folder selected in **Save/Forward Settings** in the **Settings** menu.
423	A communication error has occurred. It is also possible that a file with the same name is open or the file is a read-only file. Check the network connection, make sure the settings are correct for the folder selected in the in **Save/Forward Settings** in the **Settings** menu, close the duplicate file, or disable read-only protection.

Code	Condition/solution
425	There is not enough storage space available in the forwarding destination folder. Increase the storage space in the destination folder.
428	The destination was wrong or the destination does not exist. Make sure the settings are correct for the folder selected in **Save/Forward Settings** in the **Settings** menu.

Running a Product Check

Running a product check helps you determine if your product is operating properly.

1. Disconnect any interface cables connected to your product.
2. Load plain paper in the product.
3. Press the ⌂ home button, if necessary.
4. Select **Settings** > **Maintenance** > **Print Head Nozzle Check**.

You see a screen like this:

5. Select **Start**.

   The nozzle pattern prints.

6. Do one of the following, depending on the results of the product check:
   - If the page prints and the nozzle check pattern is complete, the product is operating properly. Any operation problem you may have could be caused by your computer, cable, software, or selected settings. Check the other solutions in this book or try uninstalling and reinstalling your printer software.
   - If the page prints but the nozzle check pattern has gaps, clean the print head.
   - If the page does not print, the product may have a problem. Check the other solutions in this manual. If they do not work, contact Epson.

Parent topic: Solving Problems

Resetting Control Panel Defaults

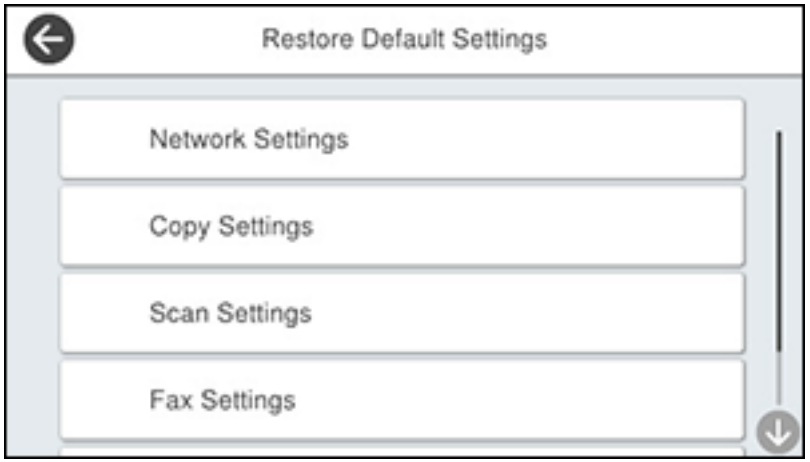

If you have a problem with settings on the product control panel, you can reset them to their factory defaults. You can choose which settings to reset or reset them all.

Note: This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the home button, if necessary.
2. Select **Settings** > **General Settings** > **System Administration** > **Restore Default Settings**.

   Note: You may need to enter the administrator password.

   You see a screen like this:

3. Select one of these options:
   - **Network Settings**: Resets all network settings
   - **Copy Settings**: Resets all settings for copying
   - **Scan Settings**: Resets all settings for scanning
   - **Fax Settings**: Resets all settings for faxing
   - **Clear All Data and Settings**: Resets all control panel settings including the contacts list

   You see a confirmation screen.
4. Select **Yes** to reset the selected settings. (Select **No** if you want to cancel the operation.)

Parent topic: Solving Problems

Product Does Not Turn On or Off

If you cannot turn the product on or off, try these solutions:

- If you cannot turn on your product, make sure the power cord is securely connected and hold down the power button a little longer.
- If you cannot turn off your product, hold down the power button a little longer. If you still cannot turn off your product, unplug the power cord, plug the power cord back in, then turn your product on and off again using the power button.

Parent topic: Solving Setup Problems

Noise After Ink Installation

If you hear noises from your product after installing ink, check the following:

- The first time you install the ink pack, the product must charge its print head. Wait until charging finishes before you turn off the product, or it may charge improperly and use excess ink the next time you turn it on.
- If the product's print head stops moving or making noise, and the charging process has not finished after approximately 5 minutes, turn off your product. Turn it back on and check to see if charging is still in progress. If it is still in progress, contact Epson for help.

Parent topic: Solving Setup Problems

Software Installation Problems

If you have problems while installing your product software, try these solutions:

- Make sure your product is turned on and any necessary cables are securely connected at both ends. If you still have problems installing software, disconnect the cable and carefully follow the instructions on the *Start Here* sheet. Also make sure your system meets the requirements for your operating system.
- Close any other programs, including screen savers and virus protection software, and install your product software again.
- In Windows, make sure your product is selected as the default printer and the correct port is shown in the printer properties.

- For Mac, make sure your product is shown in the printer list. Click **System Preferences** or **System Settings** > **Printers & Scanners** or **Print & Fax**. If the printer name is not displayed, add the printer.
- If you see any error message or your software does not install correctly in Windows, you may not have software installation privileges. Contact your system administrator.
- If you are printing over a network, make sure your product is set up properly on the network.
- If the USB cable is not recognized, try using a different USB cable.

Product Cannot Connect to a Wireless Router or Access Point

If your product has trouble finding or connecting to a wireless router or access point, try these solutions:

- If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi icon on your product's LCD screen is not lit or does not appear, make sure you select one of the WPS options from the product control panel within 2 minutes of pressing the WPS button on your router.
- Make sure to place your product within contact range of your 2.4 GHz router or access point. Avoid placing your product near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.

  Note: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

- Make sure to place your product within contact range of your router or access point. Avoid placing your product near a microwave oven, cordless phone, or large metal object, such as a filing cabinet.

  Note for Latin America: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

- Verify that your router or access point is operating correctly by connecting to it from your computer or another device.
- Print a network connection report and check the codes and messages on the report to help determine the cause of the problem.
- You may need to disable the firewall and any anti-virus software on your wireless router or access point.
- Try restarting your router following the instructions in your router documentation.

  Note: If you are reading these instructions online, you will lose your Internet connection when you restart your router.

- Check to see if access restrictions, such as MAC address filtering, are set on the router or access point. If access restrictions are set, add your product's MAC address to your router's address list. To

obtain your product's MAC address, print a network status sheet. Then follow the instructions in your router or access point documentation to add the address to the list.

- If your router or access point does not broadcast its network name (SSID), follow the instructions that came with your product to enter your wireless network name manually.
- If your router or access point has security enabled, determine the kind of security it is using and any required password or passphrase for connection. Then make sure to enter the exact WEP key or WPA passphrase correctly.
- Check if your computer is restricting the available wireless channels. If so, verify that your wireless access point is using one of the usable channels and change to a usable channel, if necessary.
- If the IP address assigned to the product is 169.254.XXX.XXX and the subnet mask is 255.255.0.0, the IP address may not be assigned correctly. Check the IP address and the subnet mask assigned to the product. Restart the wireless router or reset the network settings for the product.
- If you cannot connect your product to a device using Wi-Fi Direct, you may have exceeded the maximum number of devices connected to your product (8). Print a network status sheet or access Web Config on the browser for your device and check the number of connected devices. If 8 devices are already connected, disconnect a device by deleting the product's SSID from the Wi-Fi screen of that device. If fewer than 8 devices are connected, check the accuracy of your other network settings, move your device closer to your product, and try connecting again.
- If you are using a Wi-Fi Direct connection that suddenly disconnects, the Wi-Fi Direct password on your device may have been changed. If necessary, delete the existing **DIRECT-xxxxxxxx** connection settings from your device and enter a new password. See your device documentation for instructions.

Network Software Cannot Find Product on a Network

If EpsonNet Setup cannot find your product on a network, try these solutions:

- Make sure your product is turned on and connected to your network. Verify the connection using your product control panel.
- Check if your network name (SSID) contains non-ASCII characters. Your product cannot display non-ASCII characters.

- Print a network connection report and check the codes and messages on the report to help determine the cause of the problem.
- Make sure your product is not connected to a guest network.
- If necessary, reinstall your product software and try running EpsonNet Setup again:
  1. Reset your product's network settings to their factory defaults.
  2. **Windows only:** Uninstall your product software.
  3. Restart your router following the instructions in your router documentation.

     Note: If you are reading these instructions online, you will lose your Internet connection when you restart your router, so note the next step before restarting it.

  4. Download your product software from the Epson website using the instructions on the *Start Here* sheet.
- If you have replaced your router, reinstall your product software to connect to the new router.

  Note: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

- If you have replaced your router, reinstall your product software to connect to the new router.

  Note for Latin America: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

- Check to see if your wireless router or access point has an enabled Privacy Separator function that is preventing detection of your device over the network. See your router or access point documentation for instructions on disabling the Privacy Separator function.

Printing a Network Connection Report

Restoring Default Product Settings

Wireless Network Connection is Unstable on a Mac

If you connected a device to a USB 3.0 port on your Mac, you may experience wireless network interference between your product and your Mac.

If you cannot connect to your product over the wireless network or the connection becomes unstable, move the device connected to your Mac USB 3.0 port further away from your Mac.

Parent topic: Solving Network Problems

USB 3.0 Connection is Unstable When Using a USB 2.0 Cable

If you receive a communication error or experience an unstable connection when using a SuperSpeed USB port on your computer with a USB 2.0 cable, try these solutions:

- Use a USB 3.0 cable.
- Connect to a Hi-Speed USB port on your computer, if available.
- Connect to another SuperSpeed USB port on your computer, if available.

Parent topic: Solving Network Problems

Product Does Not Appear in Mac Printer Window

If your product does not appear in the Mac printer window, try these solutions:

- Turn your product off, wait 30 seconds, then turn it back on again.
- If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi icon on your product's LCD screen is not lit, make sure you select one of the WPS options from the product control panel within 2 minutes of pressing the WPS button on your router.

Parent topic: Solving Network Problems

Cannot Print Over a Network

If you cannot print over a network, try these solutions:

- Make sure that your product is turned on.
- Make sure you install your product's network software as described in your product documentation.

- Print a network status sheet and verify that the network settings are correct. If the network status is **Disconnected**, check any cable connections and turn your product off and then on again.
- Print a network connection report and check the codes and messages on the report to help determine the cause of the problem.
- If you are using TCP/IP, make sure the product's IP address is set correctly for your network. If your network does not assign IP addresses using DHCP, set the IP address manually. If the IP address assigned to the printer is 169.254.xxx.xxx and the subnet mask is 255.255.0.0, the IP address may not be assigned correctly. Restart your wireless router or reset the printer's network settings.
- Make sure your computer and product are both using the same wireless network.
- If network printing is slow, print a network status sheet and check the signal strength. If it is poor, place your product closer to your router or access point. Avoid placing your product near a microwave oven, cordless phone, or large metal object, such as a filing cabinet.

  Note for Latin America: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

- Try restarting your router following the instructions in your router documentation.

  Note: If you are reading these instructions online, you will lose your Internet connection when you restart your router.

- Check if there are any paused print jobs.
- Check if the selected printer port is correct.
- Check to see if your wireless router or access point has an enabled Privacy Separator function that is preventing printing from a device over the network. See your router or access point documentation for instructions on disabling the Privacy Separator function.
- If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi icon on your product's LCD screen is not lit, make sure you select one of the WPS options from the product control panel within 2 minutes of pressing the WPS button on your router.
- Check your wired LAN router or access point to see if the LED for the port to which your product is connected is on or flashing. If the link LED is off, try the following:
  - Make sure the Ethernet cable is securely connected to your product and to your router, access point, switch, or hub.

- Try connecting your product to a different port or a different router, access point, switch, or hub.
- Try connecting with a different Ethernet cable.
- Try printing to your product from another computer on the network.

- If you are connecting the product via EpsonNet Setup and the Wi-Fi icon does not appear lit on the LCD screen, make sure your product software was installed correctly. If necessary, reinstall your software.

Cannot Scan Over a Network

If you have problems scanning over a network, try these solutions:

- If you cannot scan from your product control panel, make sure you restarted your computer after installing the product software. Make sure the Event Manager program is not being blocked by your firewall or security software.

  Note for Latin America: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

- If you are scanning a large original at a high resolution, a network communication error may occur. Try scanning again at a lower resolution.
- If network communication was interrupted while starting Epson Scan 2, exit Epson Scan 2, wait a few seconds, and restart it. If Epson Scan 2 cannot restart, turn off your product, turn it back on, and try restarting Epson Scan 2 again.
- Check the scanner setting and reset the connection if necessary using Epson Scan 2 Utility:

  Windows 11: Click , then search for **Epson Scan 2 Utility** and select it. Make sure your product is selected. If necessary, select the **Other** tab and click **Reset**.

Windows 10: Click and select **EPSON** > **Epson Scan 2 Utility**. Make sure your product is selected. If necessary, select the **Other** tab and click **Reset**.

Windows 8.x: Navigate to the **Apps** screen, select **EPSON**, and select **Epson Scan 2 Utility**. Make sure your product is selected. If necessary, select the **Other** tab and click **Reset**.

Windows (other versions): Click or **Start** > **All Programs** or **Programs** > **EPSON** > **Epson Scan 2** > **Epson Scan 2 Utility**. Make sure your product is selected. If necessary, select the **Other** tab and click **Reset**.

Mac: Open the **Applications** folder, click **Epson Software**, and click **Epson Scan 2 Utility**. Make sure your product is selected. If necessary, select the **Other** tab and click **Reset**.

- You may need to disable the firewall and any anti-virus software on your wireless router or access point.

Digital Certificate Warning Messages

If you see a warning message when using a digital certificate, check for solutions in this table.

Message	Solution
Enter a Server Certificate.	Select a certificate file and click **Import**.
CA Certificate 1 is not entered.	Import CA certificate 1 before importing additional certificates.
Invalid value below.	Remove any unsupported characters in the file path and password.
Invalid date and time.	Set the date and time on the product using Web Config, EpsonNet Config, or the product control panel.
Invalid password	Enter the password that matches the password set for the CA certificate.

Message	Solution
Invalid file	Try the following: • Import only certificate files in X509 format sent by a trusted certificate authority. • Make sure the file size is 5KB or less and is not corrupted or fabricated. • Make sure the chain in the certificate is valid; check the certificate authority's website.
Cannot use the Server Certificates that include more than three CA certificates.	Import certificate files in PKCS#12 format that contains one or two CA certificates, or convert each certificate to PRM format and import them again.
The certificate has expired. Check if the certificate is valid, or check the date and time on your printer.	Make sure the product time and date are set correctly and, if the certificate is out of date, obtain and import a new certificate.
Private key is required.	Do one of the following to pair a private key with the certificate: • For PEM/DER format certificates obtained from a CSR using a computer, specify the private key file. • For PKCS#12 format certificates obtained from a CSR using a computer, create a file containing the private key. If you re-imported a PEM/DER format certificate obtained from a CSR using Web Config, you can only import it once. You must obtain and import a new certificate.
Setup failed.	Make sure the computer and product are connected, and the certificate file is not corrupted, then import the certificate file again.

Solving Copy Quality Problems

Check these sections if your copies have a quality problem.

Copies Have Incorrect or Faint Colors
Position, Size, or Margins of Copies are Incorrect

Parent topic: Solving Problems

Copies Have Incorrect or Faint Colors

If your copies have incorrect, uneven, smeared, or faint colors, try these solutions:

- Run a print head nozzle check to see if any of the nozzles are clogged. Then clean the print head, if necessary.
- Do not press too hard on the original when you copy from the scanner glass.
- Clean the scanner glass with a soft, dry, lint-free cloth or use a small amount of glass cleaner on the cloth, if necessary. Paper towels are not recommended.

  Caution: Do not spray glass cleaner directly on the scanner glass.

- Clean the ADF.
- Wipe any dirt or dust off of your originals.
- Make sure your paper is not curled.
- When copying on thick paper, select a **Thick Paper** setting from the control panel (**Settings** > **General Settings** > **Printer Settings** > **Thick Paper**). When this setting is enabled, copy quality may decline and copy speed may decrease.
- If the back of the original appears in your printout, place a piece of black paper on the back of the original and copy it again. You can also try lowering the **Density** setting.

Position, Size, or Margins of Copies are Incorrect

If the position, size, or margins of your copies are incorrect, try these solutions:

- When placing originals in the ADF, make sure the edge guides are against the edges of the paper.
- When placing originals on the scanner glass, make sure the original is placed correctly for scanning. Align the corner of the original with the corner indicated by the symbol on the scanner glass. If necessary, move the original away from the edges of the scanner glass slightly.

- If the original is folded or wrinkled, use the scanner glass. Flatten any folds or wrinkles in the original and try using another sheet or card to keep the original in contact with the scanner glass.
- Clean the scanner glass and ADF.
- Make sure the paper is loaded in the correct direction.
- Select the appropriate copy size and paper size settings on the LCD screen.

Paper Jams Inside the Product
Paper Ejection Problems

Parent topic: Solving Problems

Paper Feeding Problems

If you have problems feeding paper, try these solutions:

- If paper does not feed for printing, remove it from the paper tray or cassette. Reload it, then adjust the edge guides. Make sure the paper stack is not above the tab on the edge guides inside the cassette or paper tray.
- Place the product on a flat surface and operate it in the recommended environmental conditions.
- Be sure to insert the paper cassette all the way into your product.
- If multiple pages feed at once, remove the paper, fan the edges to separate the sheets, and reload it.
- Do not load more than the recommended number of sheets. For plain paper, do not load paper above the arrow mark on the edge guides.
- Make sure your paper meets the specifications for your product.

- If paper jams when you print on both sides of the paper, try loading fewer sheets.
- Make sure the paper size and paper type settings are correct for the paper source.
- Run the paper guide cleaning utility to clean the paper path.
- If you installed an optional paper cassette unit, be sure to enable the cassette unit in the printing software.
- For best results, follow these guidelines:
  - Use new, smooth, high-quality paper that is not curled, creased, old, too thin, or too thick.
  - Load paper in the cassette printable side down.
  - Load paper in the paper tray printable side up.
  - Do not load binder paper with holes in the cassette.
  - Follow any special loading instructions that came with the paper.

Paper Jams Inside the Product

If you see a message that paper has jammed in the product, follow the on-screen instructions to locate and remove the jammed paper.

Take the following precautions when removing jammed paper from the product:

- Remove the jammed paper carefully. Using too much force may damage the product.
- Unless specifically instructed, avoid tilting the product, placing it on its side, or turning it upside down, as ink may spill.

Warning: Never touch the buttons on the control panel while your hand is inside the product. If the product starts operating, it may cause an injury. Do not touch any protruding parts inside the product.

Parent topic: Solving Paper Problems

Paper Ejection Problems

If you have problems with paper ejecting properly, try these solutions:

- If paper does not eject fully, you may have set the wrong paper size. Cancel printing to eject the paper. Select the correct paper size when you reprint.
- If paper is wrinkled when it ejects, it may be damp or too thin. Load new paper and be sure to select the correct paper type setting when you reprint.
- If you are using letterhead paper, select the appropriate paper type setting.
- Clean the roller inside the printer to remove any dust on the paper path.

Solving Problems Printing from a Computer

Check these sections if you have problems while printing from your computer.

Note: When printing using AirPrint, the available print settings are different from those covered in this manual. See the Apple website for details.

Note: For problems while printing with the Epson Universal Print Driver or PostScript (PS3) printer software, see the sections covering that software in this manual.

Nothing Prints
Product Icon Does Not Appear in Windows Taskbar
Printing is Slow

Parent topic: Solving Problems

Nothing Prints

If you have sent a print job and nothing prints, try these solutions:

- Make sure your product is turned on and connected to your computer.
- Make sure any interface cables are connected securely at both ends.
- Make sure the interface specifications match the specifications for the printer and the computer.
- Make sure there are no errors or paper jams in the product.
- There may a problem with the printer's status. Click **EPSON Status Monitor 3** on the printer driver's Maintenance tab, and then check the printer status. If EPSON Status Monitor 3 is disabled, click **Extended Settings** on the Maintenance tab, and then select **Enable EPSON Status Monitor 3**.
- If you connected your product to a USB hub, make sure it is a first-tier hub. If it still does not print, connect your product directly to your computer instead of the hub.
- If the printer cannot print using a USB connection, disconnect the USB cable from the computer, right-click on the printer icon displayed on the computer, and select **Remove Device**. Then connect the USB cable to the computer and try a test print.
- If your computer is connected using a USB cable, try a different USB port on your computer or a different cable.
- Make sure the printer status is not offline or pending.
- Make sure you are using the Epson printer driver for your product or the available functions are limited.
- Run a product check to see if a test page prints. If the test page prints, check to see if your product software is installed correctly.

- Make sure your system meets the requirements for your operating system. If you are printing a high-resolution image, you may need more than the minimum requirements. Print the image at a lower resolution or if necessary, increase your system's memory.
- In Windows, make sure your product is selected as the default printer and the printer port setting matches the printer connection port.
- In Windows, delete all jobs from the Windows Spooler. Click **Print Queue** on the Maintenance tab in the printer settings window, and cancel any stalled print jobs.
- In Windows, do one of the following to open the Epson Printer Connection Checker and follow the on-screen instructions to check the connection status:
  - **Windows 11**: Click , then search for **Epson Printer Connection Checker** and select it.
  - **Windows 10**: Click  and select **Epson Software** > **Epson Printer Connection Checker**.
  - **Windows 8.x**: Navigate to the **Apps** screen and select the **Epson Printer Connection Checker** icon.
  - **Windows 7**: Click  and select **All Programs** > **Epson Software** > **Epson Printer Connection Checker**.
- On a Mac, make sure the printer is added to the printer list and the printer is not paused.
- Make sure your product is selected as the printer in your printing program.
- In Windows, the product may not print if a large number of print jobs are sent. Try selecting **Print directly to the printer** on the Advanced tab in the printer properties.
- Make sure EPSON Status Monitor 3 is enabled to perform manual 2-sided printing (Windows). Manual 2-sided printing may not be available when the printer is accessed over a network or is used as a shared printer.
- You can try to clear the problem by updating the product software to the latest version. If the problem persists, try uninstalling and reinstalling the printer driver.

Running a Product Check

Product Icon Does Not Appear in Windows Taskbar

If you do not see your product icon in the Windows taskbar, first try restarting your computer. If that does not work, try this solution:

1. Do one of the following:
   - **Windows 11:** Click , search for **Settings** and select it. Select **Bluetooth & devices** > **Printers & scanners**. Select your product name and select **Printing preferences**.
   - **Windows 10:** Click  and select  (Settings) > **Devices** > **Printers & scanners**. Select your product name and select **Manage** > **Printing preferences**.
   - **Windows 8.x**: Navigate to the **Apps** screen and select **Control Panel** > **Hardware and Sound** > **Devices and Printers**. Right-click your product name, select **Printing Preferences**, and select your product name again if necessary.
   - **Windows 7**: Click  and select **Devices and Printers**. Right-click your product name, select **Printing Preferences**, and select your product name again if necessary.
2. Click the **Maintenance** tab.
3. Click the **Extended Settings** button.
4. Select **Enable EPSON Status Monitor 3** and click **OK**.
5. Click the **Monitoring Preferences** button.
6. Click the checkbox for the option that adds the shortcut icon to the taskbar.
7. Click **OK** to close the open program windows.

Parent topic: Solving Problems Printing from a Computer

Printing is Slow

If printing becomes slow, try these solutions:

- Make sure your system meets the requirements for your operating system. If you are printing a high-resolution image, you may need more than the minimum requirements. If necessary, increase your system's memory.
- If you are using Windows 7, close the **Devices and Printers** window before you print.
- On a Mac, make sure you download and install the Epson printer driver.
- Make sure **Quiet Mode** is turned off.
- Clear space on your hard drive or run a defragmentation utility to free up existing space.

- Close any programs you are not using when you print.
- If your product is connected to a USB hub, connect it directly to your computer instead.
- If printing becomes slower after printing continuously for a long time, the product may have automatically slowed down to protect the print mechanism from overheating or becoming damaged. Let the product rest with the power on for 30 minutes, then try printing again.
- If you are printing over a wireless network, factors such as interference, network traffic, or weak signal strength may affect your printing speed.

  Note for Latin America: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

- If you are using the Windows PostScript printer software, try selecting **Fast** as the **Print Quality** setting on the Advanced tab of the printer software.

For the fastest printing, select the following settings in your product software:

- Make sure the paper type setting matches the type of paper you loaded.
- Turn on any high speed settings in your product software.
- Select a lower print quality setting.
- Make sure the ink drying time has not been increased for double-sided printing.
- **Windows**: Click the **Maintenance** or **Utility** tab, select **Extended Settings** or **Speed and Progress**, and select the following settings:
  - **Always Spool RAW Datatype**
  - **Page Rendering Mode**
  - **Print as Bitmap**
- **Windows**: Select **Printing preferences**, click the **More Options** tab, and make sure the **Bidirectional printing** setting is enabled.
- **Mac**: Select **System Preferences** or **System Settings**, select **Printers & Scanners**, and select your product. Select **Options & Supplies**, select **Options** (or **Driver**), and enable the **Bidirectional printing** setting.
- Enable the bidirectional setting on the product control panel.

If printing is still slow and you are using Windows 7 or Windows Vista, try the following:

1. Click and select **Computer** or **My Computer**. Double-click the **C:** drive and open these folders: **ProgramData > EPSON > PRINTER**.

   Note: If you do not see the ProgramData folder, open the **Organize** menu and select **Folder and search options**. In the window that appears, click the **View** tab, select **Show hidden files, folders, and drives** in the Advanced settings list, and click **OK**.

2. Right-click the **EPAUDF01.AUD** file and select **Delete**.
3. Restart your computer and try printing again.

Solving Page Layout and Content Problems

Check these sections if you have problems with the layout or content of your printed pages.

Note: When printing using AirPrint, the available print settings are different from those covered in this manual. See the Apple website for details.

Inverted Image
Too Many Copies Print
Blank Pages Print
Incorrect Margins on Printout
Incorrect Characters Print
Incorrect Image Size or Position
Slanted Printout

Parent topic: Solving Problems

Inverted Image

If your printed image is inverted unexpectedly, try these solutions:

- Turn off any mirror or inversion settings in your printing application.

- Turn off the **Mirror Image**, **Flip horizontally**, or **Reverse page orientation** settings in your printer software. (This option has different names, depending on your operating system version.)

Parent topic: Solving Page Layout and Content Problems

Related tasks

Selecting Additional Layout and Print Options - Windows

Selecting Print Layout Options - Mac

Too Many Copies Print

Make sure that the **Copies** setting in your printing program or printer software is not set for multiple copies.

Parent topic: Solving Page Layout and Content Problems

Blank Pages Print

If blank pages print unexpectedly, try these solutions:

- Make sure you selected the correct paper size settings in your printing program and printer software.
- If a blank page exists in a document you are printing and you want to skip printing it, select the **Skip Blank Page** setting in your printer software, if available.
- Run a print head nozzle check to see if any of the nozzles are clogged. Then clean the print head, if necessary.
- Make sure your product is selected as the printer in your printing program.
- Make sure your product is on a flat surface and operating in the recommended environmental conditions or multiple sheets of paper may be fed at the same time.

Incorrect Margins on Printout

If your printed page has incorrect margins, try these solutions:

- Make sure you selected the correct paper size settings in your printing program and printer software.
- Make sure you selected the correct margins for your paper size in your printing program.
- Make sure your paper is positioned correctly for feeding into the product.
- Load paper in the correct direction and slide the edge guides against the edges of the paper.

You can use the preview option in your printer software to check your margins before you print.

Incorrect Characters Print

If incorrect characters appear in your prints, try these solutions before reprinting:

- Make sure any cables are securely connected at both ends.
- In Windows, delete all jobs from the Windows Spooler. Click **Print Queue** on the Maintenance tab in the printer settings window, and cancel any stalled print jobs.
- On a Mac, cancel any paused print jobs.
- If your product is connected to a USB hub, connect it directly to your computer instead.
- If incorrect characters still appear in your prints, try connecting your product using a different cable.
- If your computer entered sleep mode the last time you printed, the next print job after your computer exits sleep mode may contain garbled characters. Print your document again.
- Make sure you are using the printer software for this product. Check the product name at the top of the driver window.
- If you are using the PostScript printer software, EPS files created in binary format may not print correctly. Try creating the file in ASCII format instead.

- If you are using the Windows PostScript printer software, the product cannot print binary data if it is connected to the computer using a USB cable. Try selecting **ASCII** or **TBCP** as the **Output Protocol** setting on the Device Settings tab in the printer properties.
- If you are using the Windows PostScript printer software, select the appropriate substitution fonts on the Device Settings tab in the printer properties.

Incorrect Image Size or Position

If your printed image is the wrong size or in the wrong position, try these solutions:

- Make sure you selected the correct paper size and layout settings in your printing program and printer software.
- Make sure you selected the correct paper size on the control panel.
- Make sure your paper is positioned correctly for feeding into the printer.
- Slide the edge guides against the edges of the paper.
- Clean the scanner glass and document cover.
- If the edges of a copy are cropped, slightly move the original away from the edges of the scanner glass.
- Make sure you selected the correct margins for your paper size in your printing program.
- Be sure to select the appropriate original size setting for your original in the copy settings.

You can use the preview option in your printer software to check your margins before you print.

Placing Originals on the Scanner Glass

Slanted Printout

If your printouts are slanted, try these solutions:

- Make sure the paper is loaded in the correct direction.
- Make sure your paper meets the specifications for your product.
- Do not load more than the recommended number of sheets.
- Slide the edge guides against the edges of the paper.
- Make sure the paper type setting matches the type of paper you loaded.
- Select a higher print quality setting in your printer software.
- Turn off any high speed settings in your product software.
- Align the print head.
- Adjust the print quality.
- If aligning the print head did not improve the quality, disable the **Bidirectional Printing** setting.
- Make sure the product is not printing while tilted or at an angle.

Note: When printing using AirPrint, the available print settings are different from those covered in this manual. See the Apple website for details.

White or Dark Lines in Printout
Blurry or Smeared Printout
Faint Printout or Printout Has Gaps
Grainy Printout

Parent topic: Solving Problems

White or Dark Lines in Printout

If you notice white or dark lines in your prints (also called banding), try these solutions before you reprint:

- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- Make sure the paper type setting matches the type of paper you loaded.
- Make sure you loaded the printable side of the paper correctly for your product.
- Turn off any high speed settings in your product software.
- Align the print head. If print quality does not improve after aligning the print head, disable the bidirectional (high speed) setting.
- Adjust the print quality in the product software.
- If you are copying from the ADF, copy from the scanner glass instead or use a higher quality setting.
- Clean any dust or dirt from your originals.
- Clean the ADF.
- When vertical banding appears or the paper is smeared, clean the paper path.
- You may need to replace the ink pack.

Blurry or Smeared Printout

If your printouts are blurry or smeared, try these solutions:

- Make sure your paper is not damp, curled, old, or loaded incorrectly in your product.
- Slide the edge guides to the edges of the paper.
- Use a support sheet with special paper, or load special paper one sheet at a time.
- Make sure your paper meets the specifications for your product.
- Use Epson papers to ensure proper saturation and absorption of genuine Epson inks.
- Do not load more than the recommended number of sheets. For plain paper, do not load above the line indicated by the triangle symbol on the edge guide.
- Make sure the paper type setting in your product software matches the type of paper you loaded.
- Make sure you loaded the printable side of the paper correctly for your product.
- If you are printing on thick paper or envelopes, turn on the **Thick Paper** setting from the control panel or select **Thick Paper and Envelopes** in the Extended Settings of the printer software. (Turning this setting on will decrease print speed.)
- When manually printing 2-sided, make sure the ink is completely dry before loading the paper.
- Remove each sheet from the output tray as it is printed.
- Avoid handling printouts on glossy paper right after printing to allow the ink to set.
- Turn off any high speed settings in your product software.
- When vertical banding appears or the paper is smeared, clean the paper path.
- If you printed on the wrong side of photo paper, clean the paper path.
- If you print on both sides of a sheet of paper, smudges may appear on the reverse side of heavily saturated or dark images. If one side of a sheet will contain a lighter image or text, print that side first. Adjust the density and/or ink drying time settings.
- Lower the copy density setting on the product control panel.
- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- Align the print head.

- Adjust the print quality in the product software.
- Clean the paper path.
- Clean the paper rollers.
- Do not press too hard on the original or the document cover when you are scanning originals on the scanner glass.
- Clean the scanner glass.
- If you are copying from the ADF, place your originals on the scanner glass instead.
- Clean the ADF.
- Clean the originals.

Note: Your product will not operate properly while tilted at an angle. Place it on a flat, stable surface that extends beyond the base of the product in all directions.

Cleaning the Paper Guide

Faint Printout or Printout Has Gaps

If your printouts are faint or have gaps, try these solutions:

- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- The ink pack may be old or low on ink, and you may need to replace it.
- Make sure the paper type setting matches the type of paper you loaded.
- Make sure your paper is not damp, curled, old, or loaded incorrectly in your product.

- When copying, increase the **Density** setting on the product control panel.
- Align the print head.
- Adjust the print quality in the product software.
- Clean the paper path.
- Clean the paper rollers.

Parent topic: Solving Print Quality Problems

Grainy Printout

If your printouts are grainy, try these solutions:

- Make sure you loaded the printable side of the paper correctly for your product.
- Select a higher print quality setting and turn off any high speed settings in your product software.
- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- Align the print head.
- Adjust the print quality in the product software.
- If a cross-hatch pattern appears in the copied image, change the **Reduce/Enlarge** setting. If a cross-hatch pattern still appears, place the original at a slightly different angle.
- You may need to increase the image resolution or print a smaller size; see your software documentation.

  Note: Images from the Internet may be low resolution and not result in a high quality printout.

- If you enlarged the image size in an image-editing program, you need to increase the image resolution setting to retain a high image quality. Increase the image resolution by the same amount you increase the image size. For example, if the image resolution is 300 dpi (dots per inch) and you will double the image size for printing, change the resolution setting to 600 dpi.

  Note: Higher resolution settings result in larger file sizes, which take longer to process and print. Consider the limitations of your computer system when selecting a resolution, and select the lowest possible resolution that produces acceptable quality to keep file sizes manageable.

Solving Scanning Problems

Check these solutions if you have problems scanning with your product.

Scanning Software Does Not Operate Correctly

Cannot Start Epson Scan 2

Parent topic: Solving Problems

Scanning Software Does Not Operate Correctly

If your scanning software does not operate correctly, try these solutions:

- Make sure your computer has adequate memory and meets the system requirements for your operating system.
- Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart your scanning software.
- If you upgraded your operating system but did not reinstall your scanning software, try reinstalling it.
- In Windows, make sure your product is listed as a valid device in the **Scanners and Cameras** control panel.

Parent topic: Solving Scanning Problems

Cannot Start Epson Scan 2

If you cannot start Epson Scan 2, try these solutions:

- Make sure your product is turned on and any interface cables are securely connected at both ends.
- If your product is connected to a USB hub, connect it directly to your computer instead.
- If you are scanning with the ADF, check that the document cover and ADF cover are closed.
- Make sure Epson Scan 2 is selected as your scanning program.
- Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart Epson Scan 2.
- Check the connection setting and test the connection using Epson Scan 2 Utility:

  Windows 11: Click , search for **Epson Scan 2 Utility** and select it. Make sure the correct product is selected. If necessary, select the **Other** tab and click **Reset**.

  Windows 10: Click  and select **EPSON** > **Epson Scan 2 Utility**. Make sure the correct product is selected. If necessary, select the **Other** tab and click **Reset**.

Windows 8.x: Navigate to the **Apps** screen and select **Epson Scan 2 Utility**. Make sure the correct product is selected. If necessary, select the **Other** tab and click **Reset**.

Windows (other versions): Click  or **Start** > **All Programs** or **Programs** > **EPSON** > **Epson Scan 2** > **Epson Scan 2 Utility**. Make sure the correct product is selected. If necessary, select the **Other** tab and click **Reset**.

Mac: Open the **Applications** folder, click **Epson Software**, and click **Epson Scan 2 Utility**. Make sure the correct product is selected. If necessary, select the **Other** tab and click **Reset**.

- Make sure you do not have multiple versions of Epson Scan 2 installed. If you do, uninstall both versions and install one version.
- If you upgraded your operating system but did not reinstall Epson Scan 2, try reinstalling it.
- If the user restriction feature (Access Control) is enabled, a user ID and password are required to scan. If you do not know the user ID or password, contact your administrator for assistance.

Solving Scanned Image Quality Problems

Check these sections if a scanned image on your computer screen has a quality problem.

Image Consists of a Few Dots Only
Line of Dots Appears in All Scanned Images
Straight Lines in an Image Appear Crooked
Scanned Image Quality Problems
Image Colors are Patchy at the Edges
Ripple Patterns Appear in an Image
Scanned Image Edges are Cropped

Parent topic: Solving Problems

Image Consists of a Few Dots Only

If your scanned image consists only of a few dots, try these solutions:

- Make sure you placed your original for scanning facing the correct way.
- If the **Image Type** setting is **Black & White**, adjust the **Threshold** and scan again.

- Remove any lint or dirt from your original.
- Clean the scanner glass.
- Do not press on the original or the document cover with too much force.

Parent topic: Solving Scanned Image Quality Problems

Related tasks

Cleaning the Scanner Glass

Line of Dots Appears in All Scanned Images

If a line of dots appears in all your scanned images, try these solutions:

- Clean the scanner glass with a soft, dry, lint-free cloth or use a small amount of glass cleaner on the cloth, if necessary. Paper towels are not recommended.

  Caution: Do not spray glass cleaner directly on the scanner glass.

- Make sure any interface cables are securely connected at both ends.
- Remove any dust or dirt that may have adhered to your original.

If you are scanning from the ADF, make sure the ADF edge guides fit against the loaded originals. You can also try cleaning the ADF and scanning again.

Placing Originals on the Product

Scanned Image Quality Problems

If you encounter quality problems with your scanned image, try these solutions:

Image is Distorted or Blurry

- Make sure your original is not wrinkled or warped. This may prevent the original from laying flat on the scanner glass.
- Do not move your original or your product during scanning.
- Clean the scanner glass and the ADF and remove any dirt or dust on your originals.
- Your product will not operate properly while tilted at an angle. Place your product on a flat, stable surface that extends beyond its base in all directions.
- Adjust these Epson Scan 2 settings (if available) and try scanning again:
  - Make sure you select the correct **Image Type** for your original.
  - Increase the **Resolution** setting.
  - If the **Image Type** setting is **Black & White**, adjust the **Threshold** setting.
  - If the **Image Type** setting is **Color** or **Grayscale**, select the **Unsharp Mask** setting.
  - If the **Image Type** setting is **Black & White**, select **Text Enhancement**. If the **Image Type** setting is **Color** or **Grayscale**, change the **Text Enhancement** setting to **High**.

Image is Too Dark

- Make sure you select the correct **Image Type** for your original.
- If the **Image Type** is set to **Color** or **Grayscale**, adjust the **Brightness** setting.
- Check the brightness and contrast settings of your computer monitor.

Back of Original Image Appears in Scanned Image

- Place a piece of black paper on the back of the original and scan it again.
- Lower the copy density setting.

- Adjust these Epson Scan 2 settings (if available) and try scanning again:
  - Make sure you select the correct **Image Type** for your original.
  - Select the **Advanced Settings** tab and adjust the **Brightness** setting.
  - Select **Text Enhancement**.

Scanned Image Colors Do Not Match Original Colors

Printed colors can never exactly match the colors on your computer monitor because printers and monitors use different color systems: monitors use RGB (red, green, and blue) and printers typically use CMYK (cyan, magenta, yellow, and black).

Check the color matching and color management capabilities of your computer, display adapter, and the software you are using to see if they are affecting the palette of colors you see on your screen.

Remove any dust or dirt from your originals and clean the scanner glass. Do not press with too much force on the original or document cover.

To adjust the colors in your scanned image, adjust these Epson Scan 2 settings (if available) and try scanning again:

- If the **Image Type** setting is **Auto**, **Color** or **Grayscale**, adjust the **Contrast** setting.
- If the **Image Type** setting is **Black & White** or **Grayscale**, adjust the **Color Enhance** setting.

Image Colors are Patchy at the Edges

If you are scanning a thick or warped original, cover its edges with paper to block external light as you scan it.

Parent topic: Solving Scanned Image Quality Problems

Ripple Patterns Appear in an Image

You may see a ripple pattern (called a moiré) in scanned images of printed documents. This is caused by interference from differing pitches in the scanner's screen and your original's halftone screen. To reduce this effect, adjust these Epson Scan 2 settings (if available) and try scanning again:

- Select the **Descreening** setting on the Advanced Settings tab.
- Select a lower **Resolution** setting.
- Place the original at a slightly different angle.

Solving Faxing Problems

Check these solutions if you have problems faxing with your product.

Cannot Send or Receive Faxes
Cannot Receive Faxes with a Telephone Connected to Your Product
Fax Memory Full Error Appears
Fax Quality is Poor
Sent Fax is Received in an Incorrect Size
Received Fax is Not Printed

Parent topic: Solving Problems

Cannot Send or Receive Faxes

If you cannot send or receive faxes, try these solutions:

- If an error code is displayed on the control panel, try the solutions suggested in the error code list.
- If you are faxing from a computer, use the Epson FAX Utility to send your fax.
- Make sure the recipient's fax machine is turned on and working.
- Make sure the recipient's fax number is correct and entered correctly.
- Make sure paper is loaded correctly in your product.
- Make sure you have set up your header information and have not blocked your caller ID. Otherwise, your faxes might be rejected by the recipient's fax machine.
- If user restriction has been enabled, you may need to enter a user name and password. Contact your administrator for assistance.
- If you did not connect a telephone to your product, set the Receive Mode setting to **Auto** so you can receive faxes automatically.
- Check that the cable connecting your telephone wall jack to your product's **LINE** port is secure.
- Print a fax connection report using your product control panel or fax software to help diagnose the problem.
- Verify that the telephone wall jack works by connecting a phone to it and testing it.
- If there is no dial tone and you connected the product to a PBX (Private Branch Exchange) phone line or Terminal Adapter, change the **Line Type** setting to **PBX**. If you still cannot send a fax, turn off the product's dial tone detection setting. (Turning off the dial tone setting may cause the product to drop the first digit of a fax number.)
- Check the **Line Type** setting and set it to **PBX**. If your phone system requires an external access code to reach an outside line, register the code to the product and add a **#** (hash) to the beginning of the phone number when dialing.
- If you connected your product to a DSL phone line, you must connect a DSL filter to the phone jack to enable faxing over the line. Contact your DSL provider for the necessary filter.
- If you are connected to a DSL phone line, connect the product directly to a telephone wall jack and send a fax. If it works, the problem may be caused by the DSL filter. Contact your DSL provider.
- If your telephone line has static, turn off your product's error correction mode fax communication setting and try faxing again.
- Make sure you installed the FAX driver for your product and that it is not paused.

- The data being sent may be too large. Try faxing the originals in batches, by using a connected phone, or by selecting **On Hook**. If you are faxing in monochrome, enable the **Direct Send** setting (**Fax** > **Fax Settings** > **Fax Send Settings**).
- Try lowering your product's fax speed setting.
- If a communication error occurs, change the **Fax Speed** setting to **Slow(9,600bps)** on the control panel.
- Make sure the error correction mode (ECM) setting is turned on if you are trying to send or receive a color fax.
- If your telephone line uses call waiting and you have trouble receiving faxes, turn off call waiting to prevent disruption of incoming faxes.
- If you have subscribed to a call forwarding service, the product may not be able to receive faxes. Contact your service provider for assistance.
- If the recipient fax machine does not answer your call within 50 seconds after the product has finished dialing, add pauses after the fax number to send the fax.
- When sending faxes using the subaddress feature, ask the recipient if their fax machine can receive faxes using this feature. Check that the subaddress and password are correct, and that they match with the recipient subaddress and password. Check this when receiving faxes as well.
- Check if the sender's fax number is registered to the **Rejection Number List**
- If you cannot send faxes at a specified time, make sure the date and time are set correctly on the product.
- If you are receiving faxes using the Epson FAX Utility, check that your product is registered as a fax product in your operating system:

  Windows: Make sure the product appears in **Devices and Printers**, **Printer**, or **Printers and Other Hardware**. If the product does not appear, uninstall and re-install the Epson FAX Utility.

  Mac: Select **System Preferences** or **System Settings** > **Printers & Scanners** (or **Print & Scan** or **Print & Fax**) and make sure your product appears. If your product does not appear, click **+** and add your product. If the product does appear, double-click it and make sure it is not paused.

Note: Do not turn the product off while it is receiving a fax. Otherwise, the fax transmission will be lost.

Note: If your product is connected to a VoIP (Voice over Internet Protocol) phone line, keep in mind that fax machines are designed to work over analog phone lines. Epson cannot guarantee that fax transmission will work when using VoIP.

If your phone line includes voice mail answering services, calls or faxes may be inadvertently received by your voice mail service.

Cannot Receive Faxes with a Telephone Connected to Your Product

If you cannot receive faxes when a telephone is connected to your product, try these solutions:

- Make sure your telephone is connected to your product's **EXT** port.
- Make sure the Receive Mode is set to **Manual**.

Note: When answering a call that is a fax, wait until the product's LCD screen displays a message that a connection has been made before you hang up.

Parent topic: Solving Faxing Problems

Related tasks

Receiving Faxes Manually
Connecting a Telephone or Answering Machine

Fax Memory Full Error Appears

If you see an error message telling you that the product's fax memory is full, try these solutions:

- If you set the product to save received faxes in the product's memory or inbox, delete any faxes you have already read.

  Note: Your product can store up to 200 faxes before its inbox is full.

- If you set the product to save received faxes on a computer, turn on the selected computer. Once the faxes are saved on the computer, they are deleted from the product's memory.
- If you set the product to save received faxes on a USB device, connect the selected USB device containing the save fax folder to the product. Once the faxes are saved on the USB device, they are deleted from the product's memory.

  Note: Make sure the USB device has enough available memory and is not write protected.

- If the memory is full, try the following:
  - Send a monochrome fax using the direct sending feature
  - Send your fax using the on hook feature
  - Send your faxes in smaller batches
- If the product cannot print a received fax due to a product error, such as a paper jam, the memory full error may appear. Clear any product errors, then ask the sender to resend the fax.

Forwarding Received Faxes

Fax Quality is Poor

If you receive a poor quality fax, try these solutions:

- Try enabling the error correction mode (ECM) setting.
- Contact the fax sender and ask them to send the fax in a higher resolution.
- Try reprinting the received fax.

If the sent fax quality is poor, try these solutions:

- Clean the scanner glass.
- Clean the ADF.
- Try changing the resolution or density setting on the control panel.
- Do not press on the document cover or the original with too much force.
- Remove any dust or dirt from the originals.

- Try changing the original type setting on the control panel.
- If you are sending a monochrome fax to a single recipient, try sending the fax using the **Direct Send** feature.

  Note: If you send a high-resolution monochrome fax without using the **Direct Send** feature, the product may automatically lower the resolution.

- Try enabling the error correction mode (ECM) setting.
- If the back of the original appears in your sent fax, place a piece of black paper on the back of the original and fax it again.

Sent Fax is Received in an Incorrect Size

If your recipient receives a fax in an incorrect size, try these solutions:

- Make sure the original is placed correctly against the alignment marks.
- If the edge of the scanned image is missing, move the original away from the edge of the scanner glass.
- Clean any dust or dirt from the originals.
- If you are sending a fax using the scanner glass, make sure your original is placed correctly and that the correct paper size is selected on the control panel.
- Clean the scanner glass and document cover.

Placing Originals on the Product

Received Fax is Not Printed

If a received fax is not printed, try these solutions:

- Make sure the product is free of errors. The product cannot print received faxes if an error has occurred with the product, such as a paper jam.
- If the product has been set to save received faxes in the product's memory or inbox, received faxes are not automatically printed. Check the **Fax Output** setting on the product control panel and change it, if necessary.
- If the product has been set to save received faxes in the product's memory or inbox, received faxes are not automatically printed. Check the **Receive Settings** options on the product control panel and change them, if necessary.

Cannot Save Files on a USB Device

If you cannot save files on a USB device connected to your product, try these solutions:

- To save faxes on a USB device, create a folder in the **Fax Output** settings on the product control panel.
- To save faxes on a USB device, create a folder using the unconditional save/forward settings on the product control panel.
- Make sure the device is not write-protected.
- Make sure the device has enough available space.
- Make sure memory devices are enabled on your product.
- Make sure the device is compatible with the product.

Uninstall Your Product Software

If you have a problem that requires you to uninstall and re-install your software, follow the instructions for your operating system.

Uninstalling Product Software - Windows

Uninstalling Product Software - Mac

Parent topic: Solving Problems

Uninstalling Product Software - Windows

You can uninstall and then re-install your product software to solve certain problems.

1. Turn off the product.
2. Disconnect any interface cables.
3. Do one of the following:

   - **Windows 11**: Click , then search for **Settings** and select it. Select **Apps** or **System** > **Apps & features**. Then select the program you want to uninstall and select **Uninstall**.
   - **Windows 10**: Click  and select  (Settings) > **Apps** or **System** > **Apps & features**. Then select the program you want to uninstall and select **Uninstall**.
   - **Windows 8.x**: Navigate to the **Apps** screen and select **Control Panel** > **Programs** > **Programs and Features**. Select the uninstall option for your Epson product, then select **Uninstall/Change**.

     Note: If you see a **User Account Control** window, click **Yes** or **Continue**.

     Select your product again, if necessary, then select **OK**, and click **Yes** to confirm the uninstallation.
   - **Windows (other versions)**: Click  or **Start**, and select **All Programs** or **Programs**. Select **EPSON**, select your product, then click **EPSON Printer Software Uninstall**.

     Note: If you see a **User Account Control** window, click **Yes** or **Continue**.

     In the next window, select your product and click **OK**. Then follow any on-screen instructions.

4. Do one of the following to uninstall Epson Scan 2, then follow any on-screen instructions:
   - **Windows 11/Windows 10**: Select **Epson Scan 2** and click **Uninstall**.
   - **Windows 8.x/Windows 7/Windows Vista:** Select **Epson Scan** and click **Uninstall/Change**.
5. Restart your computer, then see the *Start Here* sheet to re-install your software.

Note: If you find that re-installing your product software does not solve a problem, contact Epson.

Parent topic: Uninstall Your Product Software

Uninstalling Product Software - Mac

In most cases, you do not need to uninstall your product software before re-installing it. However, you can download the Uninstaller utility from the Epson support website to uninstall your product software as described here.

Note: If you find that re-installing your product software does not solve a problem, contact Epson.

1. To download the Uninstaller utility, visit epson.com/support (U.S.), epson.ca/support (Canada), or latin.epson.com/support (Latin America) and select your product.
2. Click **Downloads**.
3. Select your operating system, click **Utilities**, locate the Uninstaller utility, and click **Download**.
4. Run the file you downloaded.
5. Double-click the **Uninstaller** icon.
6. In the Epson Uninstaller screen, select the checkbox for each software program you want to uninstall.
7. Click **Uninstall**.
8. Follow the on-screen instructions to uninstall the software.
9. Reinstall your product software.

Note: If you uninstall the printer driver and your product name remains in the **Print & Fax**, **Print & Scan**, or **Printers & Scanners** window, select your product name and click the **–** (remove) icon to remove it.

Where to Get Help (U.S. and Canada)

If you need to contact Epson for technical support services, use the following support options.

Internet Support

Visit Epson's support website at epson.com/support (U.S.), epson.ca/support (Canada), or latin.epson.com/support (Latin America) and select your product for solutions to common problems. You can download drivers and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.

Speak to a Support Representative

Before you call Epson for support, please have the following information ready:

- Product name
- Product serial number (located on a label on the product)
- Proof of purchase (such as a store receipt) and date of purchase
- Computer configuration
- Description of the problem

Then call:

- U.S. and Canada (English): (800) 241-5786, 7 a.m. to 4 p.m., Pacific Time, Monday through Friday
- Canada (French): (905) 709-3839, 7 a.m. to 4 p.m., Pacific Time, Monday through Friday

Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Purchase Supplies and Accessories

You can purchase genuine Epson ink and paper at epson.com (U.S. sales), epson.ca (Canadian sales), or latin.epson.com (Latin American sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada.

Parent topic: Solving Problems

Where to Get Help (Latin America)

If you need additional help with your Epson product, contact Epson.

Epson provides these technical support services:

Internet Support

Visit Epson's support website at latin.epson.com/support for solutions to common problems. You can download drivers and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.

Resolution	**Monochrome** Standard: 203 pixels per inch × 98 lines per inch (8 pixels per mm × 3.85 lines per mm) Fine: 203 pixels per inch × 196 lines per inch (8 pixels per mm × 7.7 lines per mm) Super Fine: 203 pixels per inch × 392 lines per inch (8 pixels per mm × 15.4 lines per mm) Ultra Fine: 406 pixels per inch × 392 lines per inch (16 pixels per mm × 15.4 lines per mm) **Color** 200 × 200 dpi
Compression method	Monochrome: MH/MR/MMR Color: JPEG
Communication standards	G3, Super G3
Sending paper size	Scanner Glass: Letter, A4 ADF: Letter, A4, Legal
Transmission speed (Actual speed depends on the document, recipient's device, and phone line status)	Approx. 3 seconds (transmitting a standard A4 ITU-T chart No. 1 with Standard MMR encryption at a speed of 33.6 kbps)
Contacts	Number of contacts: up to 200 Number of groups: up to 199
Page memory	Up to 550 pages (when an ITU-T No. 1 chart is received in monochrome draft mode)
Redial	2 times (with 1 minute interval); may differ depending on your country or region
Interface	RJ-11 Phone Line RJ-11 Telephone set connection

Parent topic: Technical Specifications

Ink Pack Specifications

Note: Your printer is designed to work only with genuine Epson-brand ink packs. Other brands of ink packs and ink supplies are not compatible and, even if described as compatible, may not function properly or at all. Epson periodically provides firmware updates to address issues of security, performance, minor bug fixes and ensure the printer functions as designed. These updates may affect the functionality of third-party ink. Non-Epson branded or altered Epson ink packs that functioned prior to a firmware update may not continue to function.

The included initial ink pack is designed for reliable printer setup and cannot be used as a replacement ink pack or resold. After setup, the remaining ink is available for printing. Yields are based on ISO 24711 in default mode, printing continuously. Yields vary due to print images, settings, and temperatures. Printing infrequently reduces yields. Your ink pack must be installed with ink for printing and printer maintenance. For print quality, some ink remains in the replaced ink pack.

Color	Black
Temperature	Storage: –22 to 104 °F (–30 to 40 °C)
	1 month at 104 °F (40 °C)
	Ink may freeze at 32 °F (0 °C) or lower)
	Ink thaws and is usable after 5 hours at 77 °F (25 °C)

Safety and Approvals Specifications

United States	Safety: UL60950-1
	EMC: FCC part 15 Subpart B Class B
Canada	Safety: CAN/CSA C22.2 No. 60950-1
	EMC: CAN ICES-3 (B)/NMB-3 (B)

This equipment contains the following wireless module:

- Manufacturer: Seiko Epson Corporation
- Type: J26H005

This product conforms to Part 15 of FCC Rules and RSS-210 of the IC Rules. Epson cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the product. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

This equipment complies with FCC/IC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65 and RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment should be installed and operated so that the radiator is kept at least 7.9 inches (20 cm) or more away from a person's body (excluding extremities: hands, wrists, feet and ankles).

General Printer Safety Instructions
Wireless Connection Safety Instructions
Telephone Equipment Safety Instructions
LCD Screen Safety Instructions

Parent topic: Notices

General Printer Safety Instructions

- Be sure to follow all warnings and instructions marked on the printer.
- Use only the type of power source indicated on the printer's label.
- Use only the power cord that comes with the printer. Use of another cord may cause fires or shock. Do not use the cord with any other equipment.
- Make sure the AC power cord meets the relevant local safety standard.
- Place the printer near a wall outlet where the plug can be easily unplugged.
- Avoid plugging the printer into an outlet on the same circuit as a photo copier or air control system that regularly switches on and off, or on an outlet controlled by a wall switch or timer.
- Do not let the power cord become damaged or frayed.

- If you use an extension cord with the printer, make sure the total ampere rating of the devices plugged into the extension cord does not exceed the cord's ampere rating. Also, make sure the total ampere rating of all devices plugged into the wall outlet does not exceed the wall outlet's ampere rating.
- Always turn off the printer using the power button, and wait until the power light stops flashing before unplugging the printer or cutting off power to the electrical outlet.
- Place the printer on a flat, stable surface that extends beyond its base in all directions. It will not operate properly if it is tilted or at an angle.
- Keep your product at least 8.7 inches (22 cm) away from cardiac pacemakers to prevent your product's radio waves from affecting the operation of the pacemaker.
- Leave enough space above the printer to fully raise the printer cover.
- Leave enough space in front of the printer for the paper to be fully ejected.
- Avoid locations that are subject to rapid changes in heat or humidity, shocks or vibrations, or dust.
- Do not place the printer near a radiator or heating vent or in direct sunlight.
- Leave enough room around the printer for sufficient ventilation. Do not block or cover openings in the case or insert objects through the slots.
- The power-supply cords should be placed to avoid abrasions, cuts, fraying, crimping, and kinking. Do not place objects on top of the power-supply cords and do not allow the power-supply cords to be stepped on or run over. Be particularly careful to keep all the power-supply cords straight at the ends.
- Keep the printer away from potential sources of electromagnetic interference, such as loudspeakers or the base units of cordless telephones.
- When connecting the printer to a computer or other device with a cable, ensure the correct orientation of the connectors. Each connector has only one correct orientation. Inserting a connector in the wrong orientation may damage both devices connected by the cable.
- Do not insert objects through the slots on the printer.
- Do not put your hand inside the printer while it is printing.
- Do not trap your fingers when closing the scanner unit.
- Do not touch the flat white cable inside the printer.
- Do not move the print head by hand; this may damage the printer.
- Do not spill liquid on the printer and do not handle the printer with wet hands.
- Do not use aerosol products that contain flammable gases inside or around the printer. Doing so may cause fire.
- Except as specifically explained in your documentation, do not attempt to service the printer yourself.

- Unplug the printer and refer servicing to qualified service personnel under the following conditions: if the power cord or plug is damaged; if liquid has entered the product; if the product has been dropped or the case damaged; if the product does not operate normally or exhibits a distinct change in performance. Adjust only those controls that are covered by the operating instructions.
- If damage occurs to the plug, replace the cord set or consult a qualified electrician. If there are fuses in the plug, make sure you replace them with fuses of the correct size and rating.
- Unplug the power cord from the electrical outlet if you are not going to use the printer for an extended period.

Wireless Connection Safety Instructions

Radio waves from this product may adversely affect the operation of medical equipment or automatically controlled devices, such as pacemakers, automatic doors or fire alarms. When using this product near such devices or inside a medical facility, follow the directions from authorized staff members at the facility, and follow all posted warnings and directions on the device to avoid causing an accident.

Do not connect this product to the internet directly. Connect it to a network protected by a router or firewall.

Telephone Equipment Safety Instructions

When using telephone equipment, you should always follow basic safety precautions to reduce the risk of fire, electric shock, and personal injury, including the following:

- Do not use the Epson product near water.
- Avoid using a telephone during an electrical storm. There may be a remote risk of electric shock from lightning.
- Do not use a telephone to report a gas leak in the vicinity of the leak.

Caution: To reduce the risk of fire, use only a No. 26 AWG or larger telecommunication line cord.

LCD Screen Safety Instructions

- Use only a dry, soft cloth to clean the LCD screen. Do not use liquid or chemical cleansers.

- If the LCD screen is damaged, contact Epson. If the liquid crystal solution gets on your hands, wash them thoroughly with soap and water. If the liquid crystal solution gets into your eyes, flush them immediately with water. If discomfort or vision problems remain after a thorough flushing, see a doctor immediately.
- Do not press too hard on the LCD screen or subject it to heavy impacts.
- Do not use a pointy or sharp object, such as a pen or your fingernail, to operate the LCD screen.
- If the LCD screen chips or cracks, do not touch or attempt to remove the broken pieces; contact Epson for support.
- Do not subject your product to sudden changes in temperature or humidity; this may cause condensation to develop inside the LCD screen and degrade its performance.
- The LCD screen may contain a few small bright or dark spots, and may display uneven brightness. These are normal and do not indicate that the screen is damaged in any way.

FCC Compliance Statement

For United States Users

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

WARNING

The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification or Declaration of this device and may cause interference levels which exceed the limits established by the FCC for this equipment. It is the responsibility of the user to obtain and use a shielded equipment interface cable with this device. If this equipment has more than one interface connector, do

not leave cables connected to unused interfaces. Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

Binding Arbitration and Class Waiver

1. DISPUTES, BINDING INDIVIDUAL ARBITRATION, AND WAIVER OF CLASS ACTIONS AND CLASS ARBITRATIONS

1.1 **Disputes**. The terms of this Section 1 shall apply to all Disputes between you and Epson. The term "Dispute" is meant to have the broadest meaning permissible under law and includes any dispute, claim, controversy or action between you and Epson arising out of or relating to this Agreement, Epson branded products (hardware and including any related software), or other transaction involving you and Epson, whether in contract, warranty, misrepresentation, fraud, tort, intentional tort, statute, regulation, ordinance, or any other legal or equitable basis. "DISPUTE" DOES NOT INCLUDE IP CLAIMS, or more specifically, a claim or cause of action for (a) trademark infringement or dilution, (b) patent infringement, (c) copyright infringement or misuse, or (d) trade secret misappropriation (an "IP Claim"). You and Epson also agree, notwithstanding Section 1.6,that a court, not an arbitrator, may decide if a claim or cause of action is for an IP Claim.

1.2 **Binding Arbitration**. You and Epson agree that all Disputes shall be resolved by binding arbitration according to this Agreement. **ARBITRATION MEANS THAT YOU WAIVE YOUR RIGHT TO A JUDGE OR JURY IN A COURT PROCEEDING AND YOUR GROUNDS FOR APPEAL ARE LIMITED**. Pursuant to this Agreement, binding arbitration shall be administered by JAMS, a nationally recognized arbitration authority, pursuant to its code of procedures then in effect for consumer related disputes, but excluding any rules that permit joinder or class actions in arbitration (for more detail on procedure, see Section 1.6 below). You and Epson understand and agree that (a) the Federal Arbitration Act (9 U.S.C. §1, et seq.) governs the interpretation and enforcement of this Section 1, (b) this Agreement memorializes a transaction in interstate commerce, and (c) this Section 1 shall survive termination of this Agreement.

1.3 **Pre-Arbitration Steps and Notice**. Before submitting a claim for arbitration, you and Epson agree to try, for sixty (60) days, to resolve any Dispute informally. If Epson and you do not reach an agreement to resolve the Dispute within the sixty (60) days), you or Epson may commence an arbitration. Notice to Epson must be addressed to: Epson America, Inc., ATTN: Legal Department, 3131 Katella Ave., Los Alamitos, CA 90720 (the "Epson Address"). The Dispute Notice to you will be sent to the most recent address Epson has in its records for you. For this reason, it is important to notify us if your address changes by emailing us at EAILegal@ea.epson.com or writing us at the Epson Address above. Notice of

the Dispute shall include the sender's name, address and contact information, the facts giving rise to the Dispute, and the relief requested (the "Dispute Notice"). Following receipt of the Dispute Notice, Epson and you agree to act in good faith to resolve the Dispute before commencing arbitration.

1.4 **Small Claims Court**. Notwithstanding the foregoing, you may bring an individual action in the small claims court of your state or municipality if the action is within that court's jurisdiction and is pending only in that court.

1.5 **WAIVER OF CLASS ACTIONS AND CLASS ARBITRATIONS. YOU AND EPSON AGREE THAT EACH PARTY MAY BRING DISPUTES AGAINST THE OTHER PARTY ONLY IN AN INDIVIDUAL CAPACITY, AND NOT AS A PLAINTIFF OR CLASS MEMBER IN ANY CLASS OR REPRESENTATIVE PROCEEDING, INCLUDING WITHOUT LIMITATION FEDERAL OR STATE CLASS ACTIONS, OR CLASS ARBITRATIONS. CLASS ACTION LAWSUITS, CLASS-WIDE ARBITRATIONS, PRIVATE ATTORNEY-GENERAL ACTIONS, AND ANY OTHER PROCEEDING WHERE SOMEONE ACTS IN A REPRESENTATIVE CAPACITY ARE NOT ALLOWED. ACCORDINGLY, UNDER THE ARBITRATION PROCEDURES OUTLINED IN THIS SECTION, AN ARBITRATOR SHALL NOT COMBINE OR CONSOLIDATE MORE THAN ONE PARTY'S CLAIMS WITHOUT THE WRITTEN CONSENT OF ALL AFFECTED PARTIES TO AN ARBITRATION PROCEEDING.**

1.6 **Arbitration Procedure**. If you or Epson commences arbitration, the arbitration shall be governed by the rules of JAMS that are in effect when the arbitration is filed, excluding any rules that permit arbitration on a class or representative basis (the "JAMS Rules"), available at http://www.jamsadr.com or by calling 1-800-352-5267, and under the rules set forth in this Agreement. All Disputes shall be resolved by a single neutral arbitrator, and both parties shall have a reasonable opportunity to participate in the selection of the arbitrator. The arbitrator is bound by the terms of this Agreement. The arbitrator, and not any federal, state or local court or agency, shall have exclusive authority to resolve all disputes arising out of or relating to the interpretation, applicability, enforceability or formation of this Agreement, including any claim that all or any part of this Agreement is void or voidable. Notwithstanding this broad delegation of authority to the arbitrator, a court may determine the limited question of whether a claim or cause of action is for an IP Claim, which is excluded from the definition of "Disputes" in Section 1.1 above. The arbitrator shall be empowered to grant whatever relief would be available in a court under law or in equity. The arbitrator may award you the same damages as a court could, and may award declaratory or injunctive relief only in favor of the individual party seeking relief and only to the extent necessary to provide relief warranted by that party's individual claim. In some instances, the costs of arbitration can exceed the costs of litigation and the right to discovery may be more limited in arbitration than in court. The arbitrator's award is binding and may be entered as a judgment in any court of competent jurisdiction.

You may choose to engage in arbitration hearings by telephone. Arbitration hearings not conducted by telephone shall take place in a location reasonably accessible from your primary residence, or in Orange County, California, at your option.

a) Initiation of Arbitration Proceeding. If either you or Epson decides to arbitrate a Dispute, both parties agree to the following procedure:

(i) Write a Demand for Arbitration. The demand must include a description of the Dispute and the amount of damages sought to be recovered. You can find a copy of a Demand for Arbitration at http://www.jamsadr.com ("Demand for Arbitration").

(ii) Send three copies of the Demand for Arbitration, plus the appropriate filing fee, to: JAMS, 500 North State College Blvd., Suite 600 Orange, CA 92868, U.S.A.

(iii) Send one copy of the Demand for Arbitration to the other party (same address as the Dispute Notice), or as otherwise agreed by the parties.

b) Hearing Format. During the arbitration, the amount of any settlement offer made shall not be disclosed to the arbitrator until after the arbitrator determines the amount, if any, to which you or Epson is entitled. The discovery or exchange of non-privileged information relevant to the Dispute may be allowed during the arbitration.

c) Arbitration Fees. Epson shall pay, or (if applicable) reimburse you for, all JAMS filings and arbitrator fees for any arbitration commenced (by you or Epson) pursuant to provisions of this Agreement.

d) Award in Your Favor. For Disputes in which you or Epson seeks $75,000 or less in damages exclusive of attorney's fees and costs, if the arbitrator's decision results in an award to you in an amount greater than Epson's last written offer, if any, to settle the Dispute, Epson will: (i) pay you $1,000 or the amount of the award, whichever is greater; (ii) pay you twice the amount of your reasonable attorney's fees, if any; and (iii) reimburse you for any expenses (including expert witness fees and costs) that your attorney reasonably accrues for investigating, preparing, and pursuing the Dispute in arbitration. Except as agreed upon by you and Epson in writing, the arbitrator shall determine the amount of fees, costs, and expenses to be paid by Epson pursuant to this Section 1.6d).

e) Attorney's Fees. Epson will not seek its attorney's fees and expenses for any arbitration commenced involving a Dispute under this Agreement. Your right to attorney's fees and expenses under Section 1.6d) above does not limit your rights to attorney's fees and expenses under applicable law; notwithstanding the foregoing, the arbitrator may not award duplicative awards of attorney's fees and expenses.

1.7 **Opt-out. You may elect to opt-out (exclude yourself) from the final, binding, individual arbitration procedure and waiver of class and representative proceedings specified in this Agreement by sending a written letter to the Epson Address within thirty (30) days of your assent to this Agreement (including without limitation the purchase, download, installation of the Software or other applicable use of Epson Hardware, products and services) that specifies (i) your name, (ii) your mailing address, and (iii) your request to be excluded from the final, binding individual arbitration procedure and waiver of class and representative proceedings specified in this Section 1. In the event that you opt-out consistent with the procedure set forth above, all other terms shall continue to apply, including the requirement to provide notice prior to litigation.**

1.8 **Amendments to Section 1**. Notwithstanding any provision in this Agreement to the contrary, you and Epson agree that if Epson makes any future amendments to the dispute resolution procedure and class action waiver provisions (other than a change to Epson's address) in this Agreement, Epson will obtain your affirmative assent to the applicable amendment. If you do not affirmatively assent to the applicable amendment, you are agreeing that you will arbitrate any Dispute between the parties in accordance with the language of this Section 1 (or resolve disputes as provided for in Section 1.7, if you timely elected to opt-out when you first assented to this Agreement).

1.9 **Severability**. If any provision in this Section 1 is found to be unenforceable, that provision shall be severed with the remainder of this Agreement remaining in full force and effect. **The foregoing shall not apply to the prohibition against class or representative actions as provided in Section 1.5. This means that if Section 1.5 is found to be unenforceable, the entire Section 1 (but only Section 1) shall be null and void.**
