Assembly Steps

HOW TO ASSEMBLE THE REAR DERAILLEUR

01

Parts And Tools

Rear Derailleur	Rear Axle	Allen wrench
		

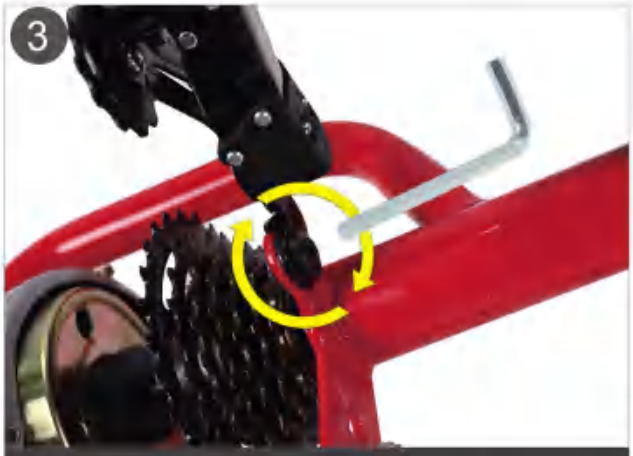

Assembly Steps

1. screw hole of the rear axle.

2. Put the bolt of the rear derailleur into the hole of the rear axle.

3. Tighten with a Allen wrench.

4. Finished

HOW TO ASSEMBLE THE REAR WHEELS

02

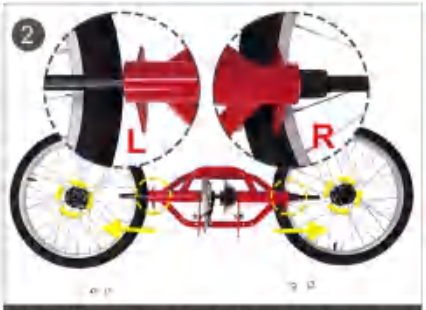

Parts And Tools

Assembly Parts	Rear Wheels	Nut caps	Wrench
			

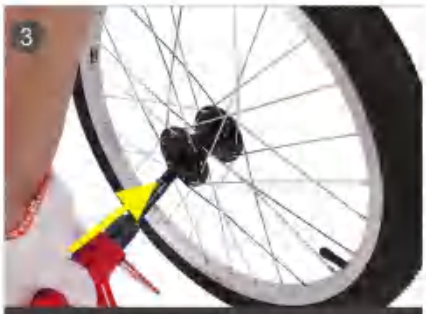

Assembly Steps

1. Differentiate the left or right wheel according to the shape of the screw hole.

2. Differentiate the left or right of the rear axle According to the rear axle's ends shapes.

3. Insert axle right end into the right wheel.

4. Put the gasket , nut and tighten with a wrench.

5. Put the metal tube on axle left end.

6.Follow Step 3.

7.Follow Step 4.

8. Cover the rear axle nut caps.

9. Finished

HOW TO ASSEMBLE THE REAR AXLE

03

Parts And Tools

Assembly Parts	Frame	Wrench	Wrench
			

Assembly Steps

1.Loosen the screws.

2.Connect the rear axle and frame, as shown.

3.Assemble rear axle and frame.

4.Display

5.Tighten the screws.

6.Tighten the nuts.

7.All screws and nuts are tightened.

8.Finished.

HOW TO ASSEMBLE THE CHAIN

04

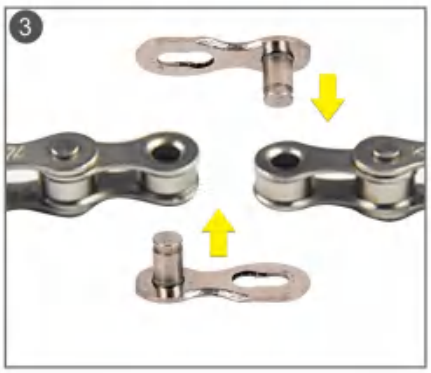

Parts And Tools

Assembly Parts	Chain	Chain magic buckle
		

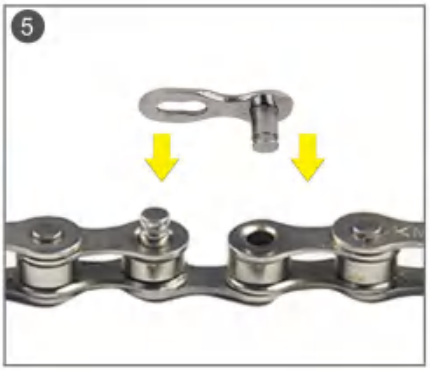

Assembly Steps

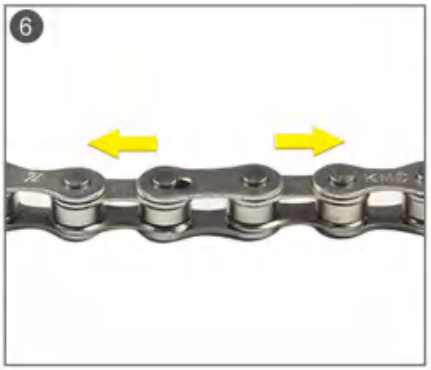

HOW TO ASSEMBLE THE CHAIN COVER

05

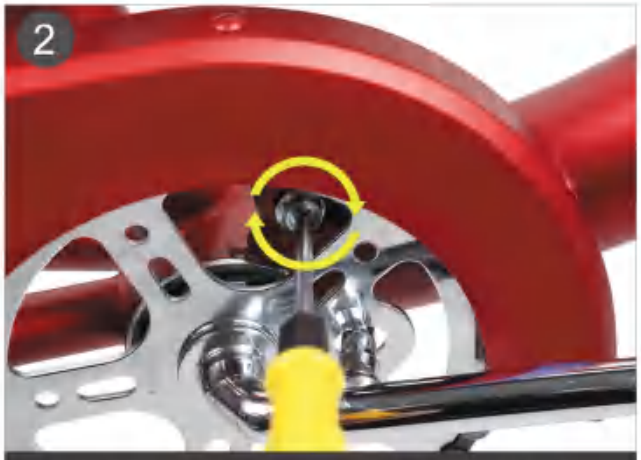

Parts And Tools

Assembly Parts	Chain Cover	Screwdriver
		

Assembly Steps

1. Locate the two screw holes on the frame.

2. Put on the chain cover and tighten the screws with a screwdriver

3. Tighten the second screw

4. Finished

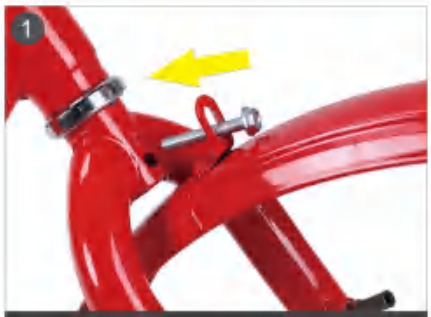

HOW TO ASSEMBLE THE FRONT WHEEL

06

Parts And Tools

Fork	Front Fender	Front Wheel	Tools
			

Assembly Steps

1.Assemble the front fender.

2.Tighten the screw.

3.Assemble front wheel and frame.

4.Assemble the washer.

5.Assemble the fender holder.

6.Tighten the screw.

7. Finished

HOW TO ASSEMBLE THE BELL AND REFLECTORS

07

Parts And Tools

Bell	Front & Rear Reflector	Wheel Reflector	Screwdriver
			

Assembly Steps

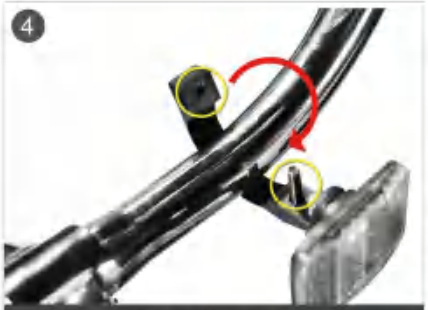

1.Attach the bell on the handlebar.

2. Tighten the screw.

3. Assemble the front reflector.

4. Tighten the screw.

5. Finished.

6. Attach reflectors on rear fenders.

7.Tighten reflector with screw.

8. Attach the reflectors on the wheel.

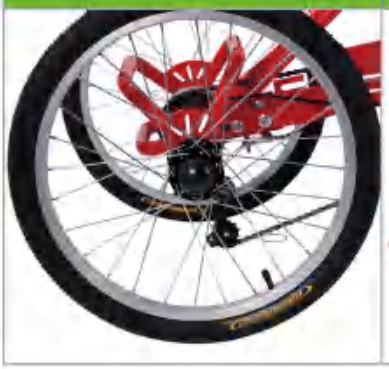

9.Follow step 8.

HOW TO ASSEMBLE THE REAR FENDER

08

Parts And Tools

Rear Axle	Rear Fender	Screwdriver
		

Assembly Steps

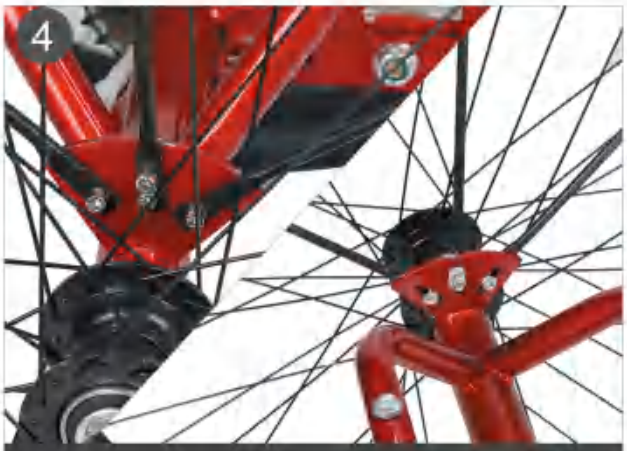

1.Notice the circled hole on the rear axle.

2.Prepare fenders and holders.

3. Tighten the screws.

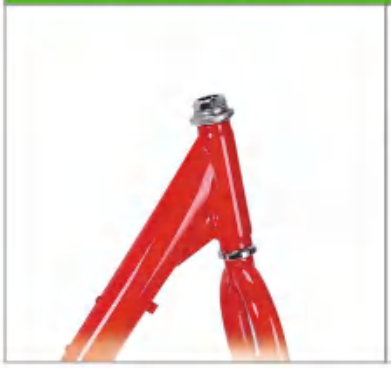

4. Finished.

HOW TO ASSEMBLE THE HANDLEBAR

09

Parts And Tools

Handlebar Tube	Handlebar	Screwdriver
		

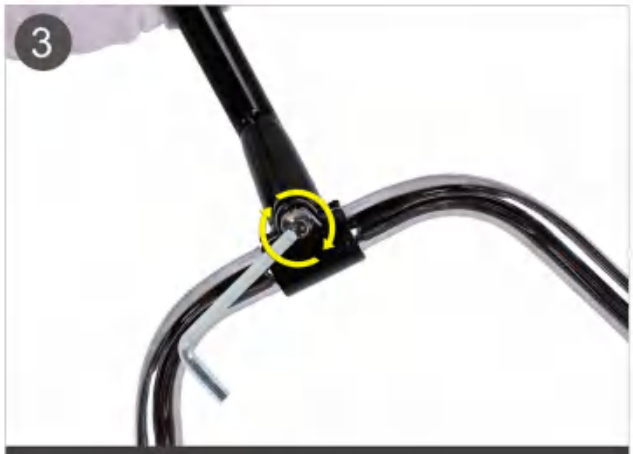

Assembly Steps

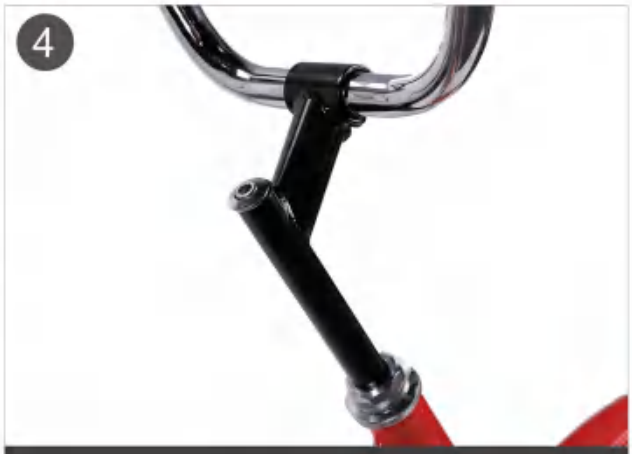

1. Insert the stem into the Handlebar Tube.

2. Adjust the height of handlebar and tighten the screw.

3. Tighten the screw.

4. Finished

HOW TO ASSEMBLE THE SADDLE

10

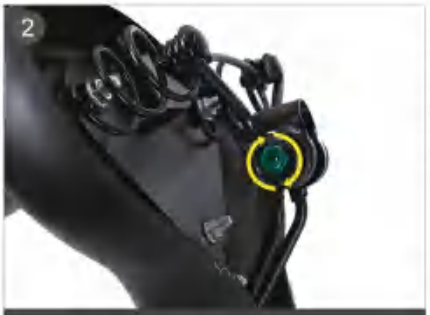

Parts And Tools

Saddle Tube	Saddle Post	Saddle	Wrench
			

Assembly Steps

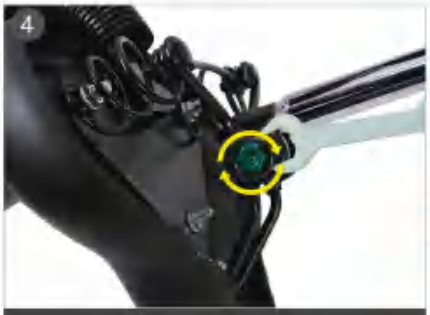

1.Need to put the saddle post into the circled hole.

2. Loosen the screw.

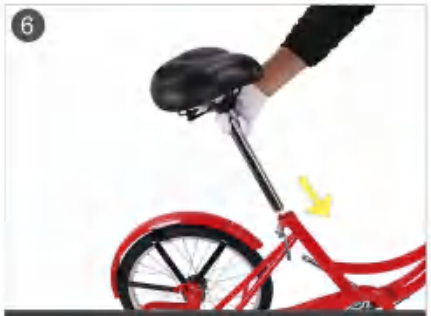

3. Insert saddle post.

4. Tighten the screw.

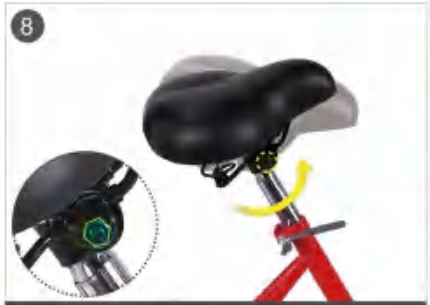

5. Loose the saddle post clamp.

6. Insert the saddle.

7. Adjust the height of the saddle.

8. Adjust the angle of the saddle.

9. Tighten the saddle post clamp.

HOW TO ASSEMBLE THE PEDALS

11

Parts And Tools

Crank	Pedals
	

Assembly Steps

1.Differentiate the pedals.

2.Tighten pedals.

3.Follow step 2.

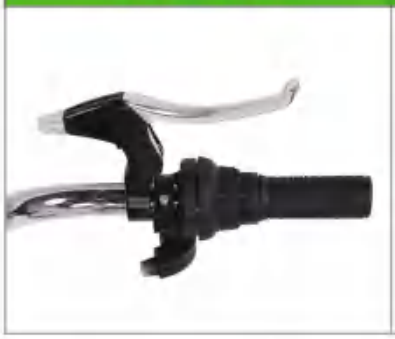

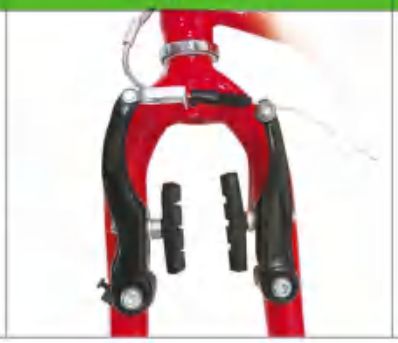

4.Finished

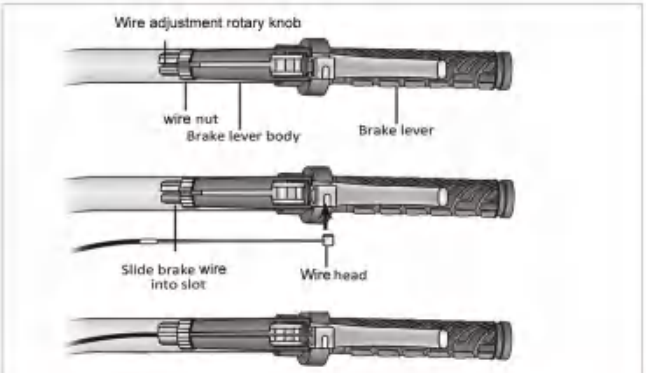

HOW TO ASSEMBLE THE FRONT BRAKE

12

Parts And Tools

Left Brake Lever	Front Brake	Allen wrench
		

Assembly Steps

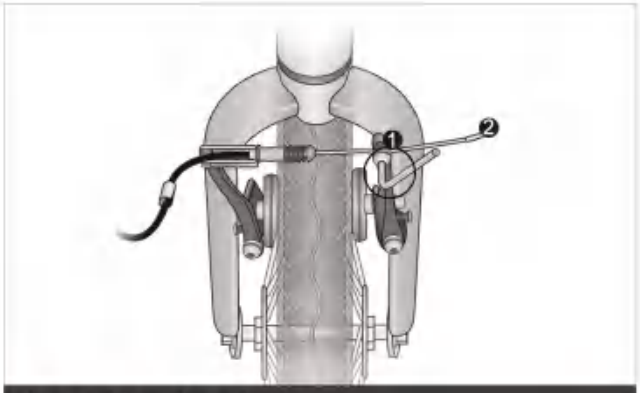

Connect the Brake wire to the Brake Lever

① Rotate all parts of the brake until all the slots are in a straight line.

② Squeeze the brake lever.

③ Take the brake wire into the slots the brake.

④ Pull the wire and rotate all parts of the brake to make sure the wire doesn't fall out.

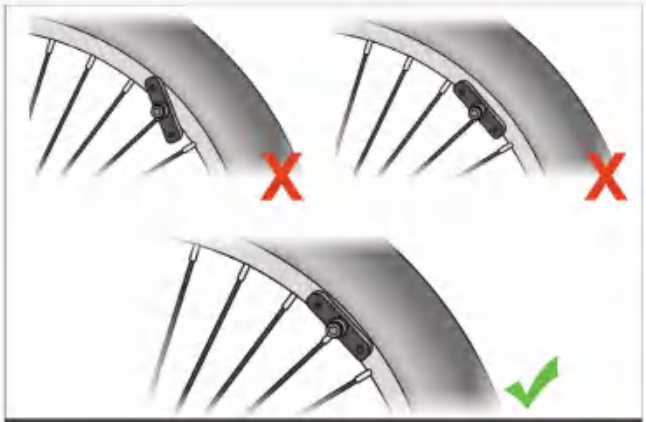

Assemble a front brake

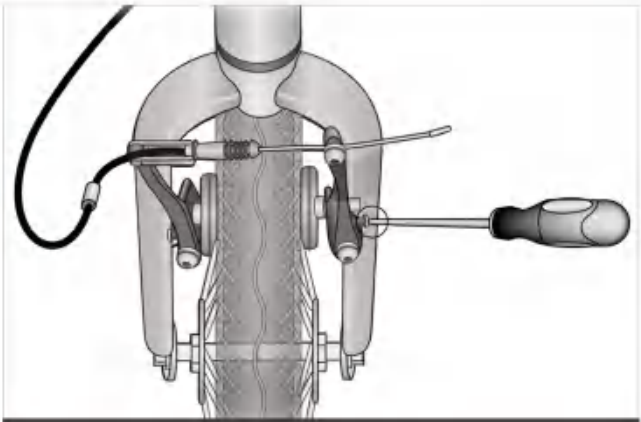

① Loosen the screw.

② Insert brake wire and adjust the length of remainder.

③ Tighten the screw NO.1.

Adjust the brake pads to the correct position

Tighten the screw.

HOW TO ASSEMBLE THE SHIFTER CABLE

13

Parts And Tools

Shifter	Shifter Tubes	Rear Derailleur
		

Assembly Steps

1.Insert a shifter wire into a shifter tube.

2.Insert the derailleur cabel into the shift lever and fix it.

3.Run the shifter wire through the holes on the frame.

4.Insert the shifter wire through the hole of derailleur.

HOW TO ASSEMBLE THE SHIFTER CABLE

5.Bear down the shifter wire with the sheet.

6.Adjust front shifter to 7th speed when assemble the derailleur.

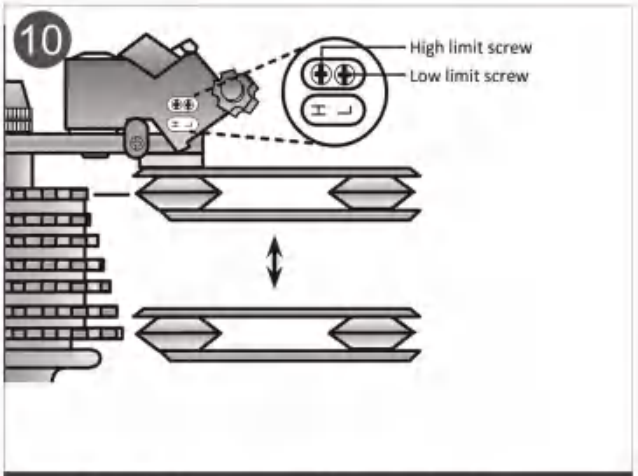

7.Adjust the chain to the smallest gear when assemble the derailleur.

8.Straighten the shifter wire and tighten the screw.

9.Adjust the derailleur by adjusting screws.

10.Rectify derailleur position by adjusting screws.

HOW TO ASSEMBLE THE REAR BRAKE

14

Parts And Tools

Rear Brake Wire	Right Brake Lever	Rear Brake	Wrench
			

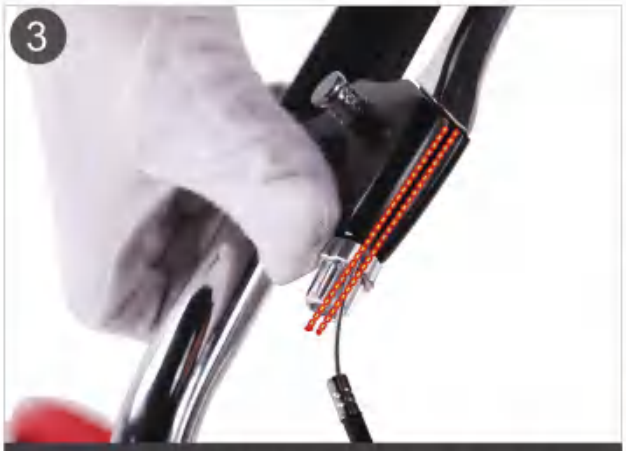

Assembly Steps

1.Squeeze the brake lever.

2. Put the wire tip into the hole of the lever.

3. Rotate all parts of the brake until all the slots are in a straight line.

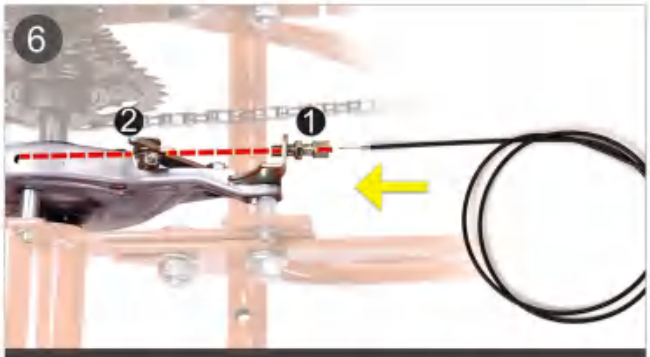

4. Pull the wire and rotate all parts of the brake to make sure the wire doesn't fall out.

HOW TO ASSEMBLE THE REAR BRAKE

14

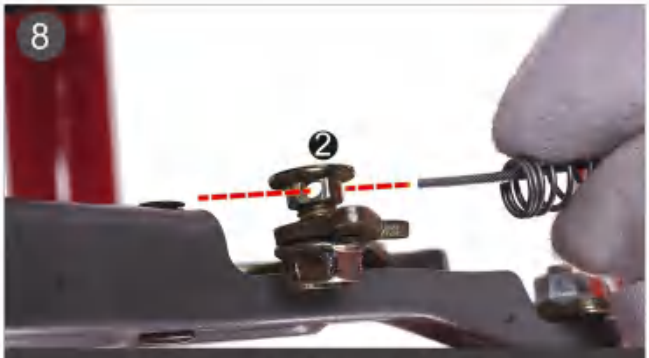

5. Insert the brake tube into the brake lever.

6.Run the wire through hole NO.1.

7.Put on the brake spring.

8.Run the wire through hole NO.2.

9. Tighten the screw.

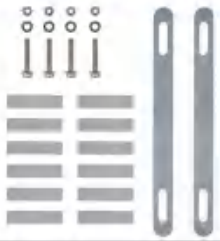

10.Finished.

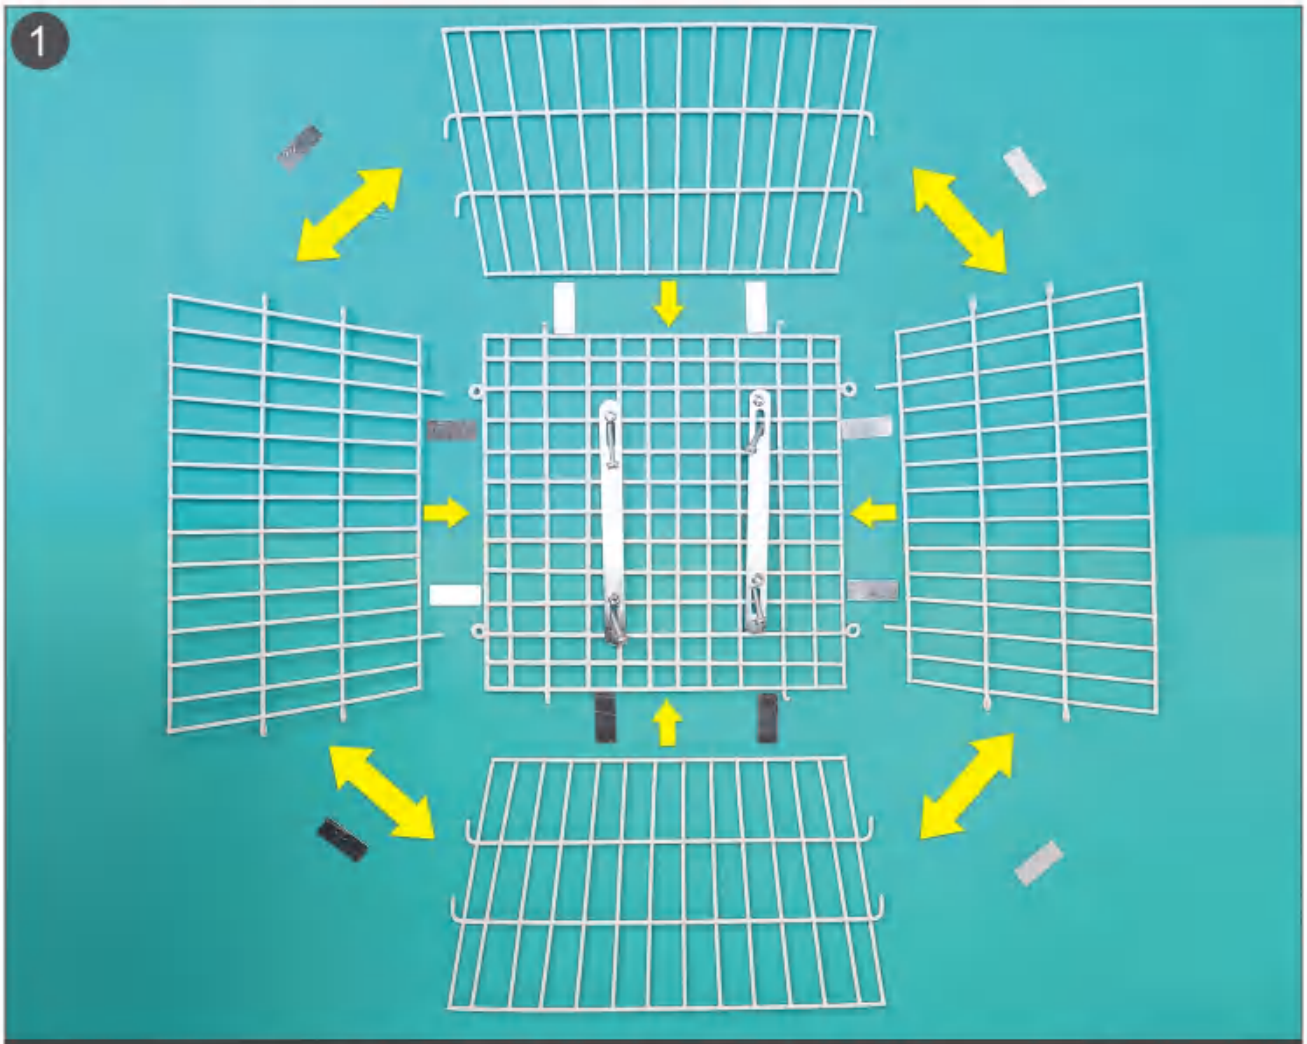

HOW TO ASSEMBLE THE REAR BASKET

15

Parts And Tools

Rear Axle	Basket	Basket parts	Screwdriver
			

Assembly Steps

1.Assemble the basket as indicated in the picture and secure with metal sheets.

HOW TO ASSEMBLE THE REAR BASKET

15

2.Basket pieces method.

3. Secure with metal sheets.

4.Finished.

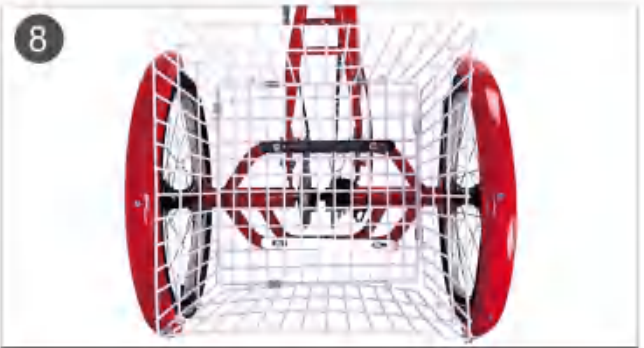

5.Four holes for fixing basket.

6.Put the basket.

7. Tighten screws.

8. Finished.

9. Finished.

Waring&Safety

❷ Safety

SAFETY SIGNAL WORDS

The following safety signal words indicate a safety message. The symbol alerts you to potential hazards. Failure to follow the warning may result in damage to property, injury, or death.

This manual contains many Warnings and Cautions concerning the consequences of failure to follow safety warnings. Because any fall can result in serious injury or even death, we do not repeat the warning of possible injury or death whenever the risk of falling is mentioned.

⚠ WARNING!

Indicates a hazard or unsafe practice that will result in severe injury or death. Failure to read, understand and follow the safety information in this manual may result in serious injury or death.

⚠ CAUTION!

Indicates a hazard or unsafe practice that could result in minor injury.

NOTICE

Indicates a hazard unrelated to personal injury, such as property damage.

USER RESPONSIBILITY

⚠ WARNING!

Do not install any kind of power plant or internal combustion engine to a bicycle. Adapting a bicycle in this manner poses an extreme safety risk to rider and could result in loss of control or death.

All persons assembling, using, and maintaining the bicycle must read and understand the safety warnings and operating instructions in this manual before using the bicycle.

It is the responsibility of the user, or in the case of a child rider, an adult, to ensure the bicycle is properly maintained and in proper operating condition. Doing so will reduce the risk of injury. Always conduct regular maintenance and inspection of your bicycle. Complete the Safety Checklist at the end of this section before each use.

A responsible adult must always supervise the use of the bicycle by a child. You must ensure:

- The child is wearing the proper protective attire and approved bicycle helmet.
- The child is seated securely and the bicycle is properly fitted to the child.
- The child understands applicable laws and common sense rules of safe responsible bicycling.

Quick-release Levers

⚠ WARNING!

Improper setup or maintenance of the quick-release levers may result in an unexpected movement, loss of control, and serious injury or death. Before riding always check that the quick-release lever is firmly locked in place and the seat does not move.

Wheels

❶ Some bicycles will come equipped with quick-release levers for the front wheel. The wheels must be securely locked. Ensure the wheel quick-release lever is firmly locked in place. **Figure 1.3**

Seat Post

❷ Ensure the seat post's ***minimum insertion marks*** are **not** visible above the quick-release seat clamp and the clamp is locked in place.

Note: See ***Section 4: Adjusting the Seat Height*** if adjustments are needed.

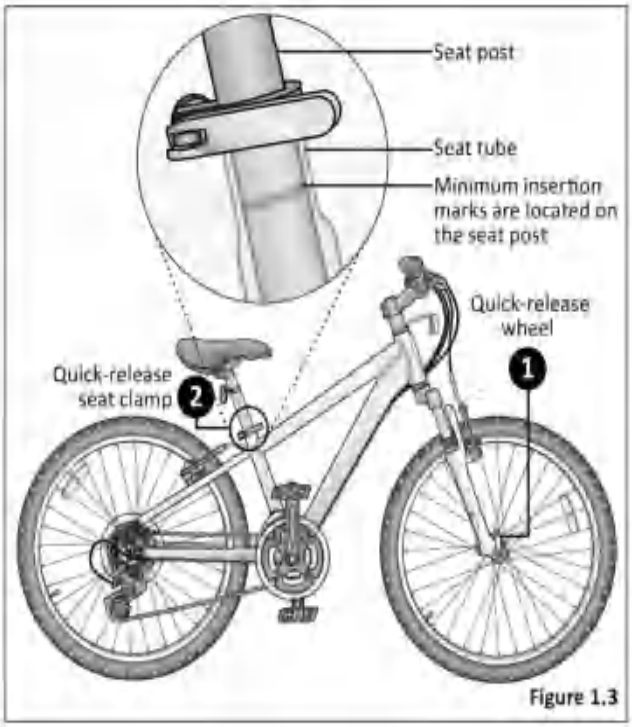

Figure 1.3

PERSONAL SAFETY

⚠ WARNING!

Riding a bicycle without protective gear, clothing, or a helmet may result in serious injury or death. Always wear protective gear, clothing, and helmet when riding the bicycle. Ensure protective gear does not interfere with steering, braking, and pedaling.

Protective Gear and Clothing

Always wear: Figure 1.4

- Colors that are easily seen and, if possible, reflective clothing.
- Clothing appropriate for the weather conditions.
- Use of protective gear such as pads for the knees and elbows is highly recommended for children.
- A properly fitted, ASTM or SNELL approved, bicycle helmet shall be worn at all times by riders of the bicycle.

Do not wear:

- Loose clothing parts, strings, or jewelry that may become entangled with moving parts on the bicycle or interfere with handling of the bicycle.
- Pants with loose pant legs. If necessary, always tuck pant legs into a sock or use a leg band to avoid the clothing becoming caught in the drive chain.
- Shoes with untied shoe laces.

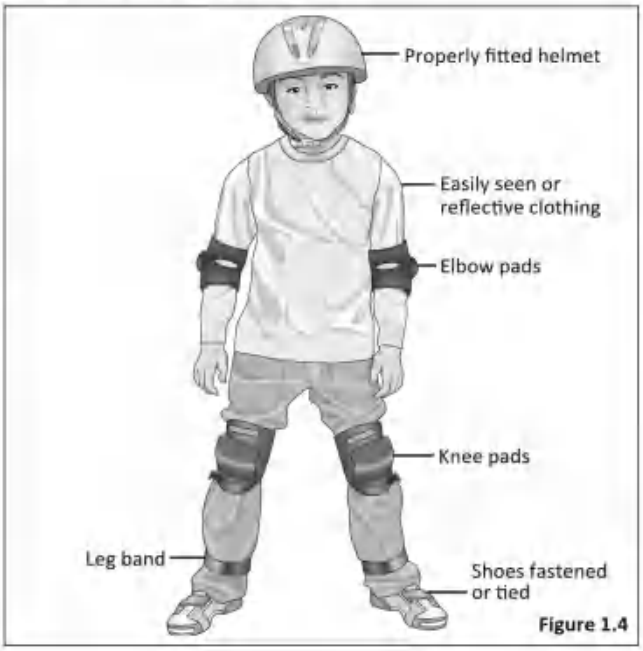

Figure 1.4

Helmet Use

Important! Many states and provinces have passed helmet laws. Make sure you know your state's helmet laws. It is your job to enforce these rules with your children. Even if your state/province does not have a children's helmet law, it is recommended that everyone wear a helmet when cycling. When riding with a child carrier seat or trailer, children must wear a helmet.
It is strongly advised that a properly fitting, ASTM or SNELL approved, bicycle safety helmet be worn at all times when riding your bicycle. In addition, if you are carrying a passenger in a child safety seat, they must also be wearing a helmet.

The correct helmet should: Figure 1.5

- Be comfortable
- Have good ventilation
- Fit correctly
- Cover forehead

Incorrect helmet position: Figure 1.6

- Helmet ***does not*** cover the forehead

Figure 1.5

Figure 1.6

Reflectors

⚠ WARNING!

Missing, damaged, or dirty reflectors will affect the ability of others to see and recognize you as a moving bicyclist, increasing the risk of being hit, serious injury or death. Always check the reflectors are in place and make sure they are clean, straight, unbroken and securely mounted before riding the bicycle.

Important! Federal regulations require every bicycle over 16 inches to be equipped with front, rear, wheel, and pedal reflectors. Many states require specific safety devices. It is your responsibility to familiarize yourself with the laws of the state where you ride and to comply with all applicable laws, including properly equipping yourself and your bike as the law requires. Bicycles under 16 inches are considered "sidewalk bicycles" and may not be fitted with reflectors. These bicycles should **not** be ridden on streets, at night or unsupervised by an adult.

Check and confirm the front and rear reflectors are in the correct position: **Figure 1.7**

- **Front Reflector:** Should aim forward (when viewed from above) and be mounted so it is within 5 degrees of vertical.
- **Rear Reflector:** Should aim straight back (when viewed from above) and be mounted so it is within 5 degrees of vertical.

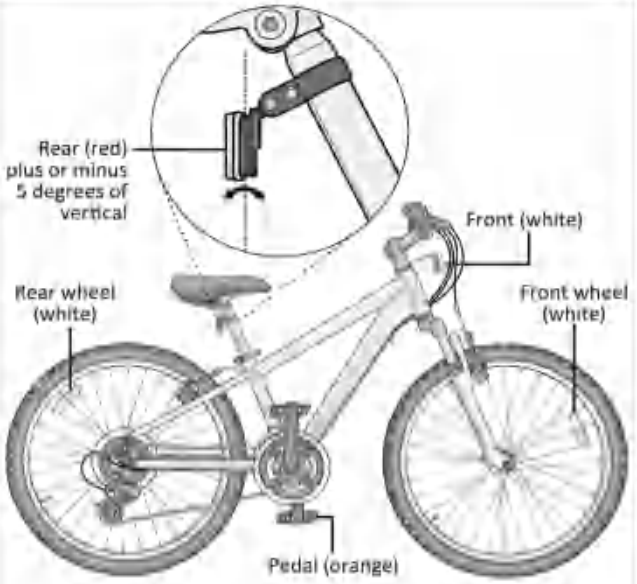

Figure 1.7

RIDING SAFETY

⚠ WARNING!

Riding the bicycle in unsafe conditions (i.e. at night), in an unsafe manner, or disregarding traffic laws may result in an unexpected movement, loss of control, and serious injury or death.

General Safety

- Familiarize yourself with all the bicycle's features before riding. Practice gear shifts, braking, and the use of toe clips and straps, if installed.
- Always ride defensively in a predictable, straight line. Never ride against traffic.
- Expect the unexpected (e.g., opening car doors or cars backing out of concealed driveways).
- Take extra care at intersections and when preparing to pass other vehicles.
- Maintain a comfortable stopping distance from all other riders, vehicles and objects. Safe braking distances and forces are subject to the prevailing weather conditions. Do not lock up the brakes. When braking, always apply the rear brake first, then the front. The front brake is more powerful and if it is not correctly applied, you may lose control and fall.
- Always use the correct hand signals to indicate turning or stopping.
- Obey the traffic laws (e.g., stopping at a red light or stop sign, giving way to pedestrians).
- Wear proper riding attire, reflective if possible, and avoid open toe shoes.
- Do not use items that may restrict your hearing and vision.
- Do not carry packages or passengers that will interfere with your visibility or control of the bicycle.

Road Conditions

- Be aware of road conditions. Concentrate on the path ahead. Avoid pot holes, gravel, wet road markings, oil, curbs, speed bumps, drain grates and other obstacles.
- Cross train tracks at a 90 degree angle or walk your bicycle across.

Wet Weather

- When riding in wet weather always wear reflective clothing and use safety lights to enhance visibility.
- Exercise extreme caution when riding in wet conditions.
- Ride at a slower speed. Turn corners gradually and avoid sudden braking.
- Brake earlier, it will take a longer distance to stop.
- Pot holes and slippery surfaces such as line markings and train tracks all become more hazardous when wet.

2 Safety

SAFETY SIGNAL WORDS

The following safety signal words indicate a safety message. The symbol alerts you to potential hazards. Failure to follow the warning may result in damage to property, injury, or death.

This manual contains many Warnings and Cautions concerning the consequences of failure to follow safety warnings. Because any fall can result in serious injury or even death, we do not repeat the warning of possible injury or death whenever the risk of falling is mentioned.

⚠ WARNING!

Indicates a hazard or unsafe practice that will result in severe injury or death. Failure to read, understand and follow the safety information in this manual may result in serious injury or death.

⚠ CAUTION!

Indicates a hazard or unsafe practice that could result in minor injury.

NOTICE

Indicates a hazard unrelated to personal injury, such as property damage.

USER RESPONSIBILITY

⚠ WARNING!

Do not install any kind of power plant or internal combustion engine to a bicycle. Adapting a bicycle in this manner poses an extreme safety risk to rider and could result in loss of control or death.

All persons assembling, using, and maintaining the bicycle must read and understand the safety warnings and operating instructions in this manual before using the bicycle.

It is the responsibility of the user, or in the case of a child rider, an adult, to ensure the bicycle is properly maintained and in proper operating condition. Doing so will reduce the risk of injury. Always conduct regular maintenance and inspection of your bicycle. Complete the Safety Checklist at the end of this section before each use.

A responsible adult must always supervise the use of the bicycle by a child. You must ensure:

- The child is wearing the proper protective attire and approved bicycle helmet.
- The child is seated securely and the bicycle is properly fitted to the child.
- The child understands applicable laws and common sense rules of safe responsible bicycling.

Quick-release Levers

⚠ WARNING!

Improper setup or maintenance of the quick-release levers may result in an unexpected movement, loss of control, and serious injury or death. Before riding always check that the quick-release lever is firmly locked in place and the seat does not move.

Wheels

1. Some bicycles will come equipped with quick-release levers for the front wheel. The wheels must be securely locked. Ensure the wheel quick-release lever is firmly locked in place. **Figure 1.3**

Seat Post

2. Ensure the seat post's ***minimum insertion marks*** are **not** visible above the quick-release seat clamp and the clamp is locked in place.

   Note: See ***Section 4: Adjusting the Seat Height*** if adjustments are needed.

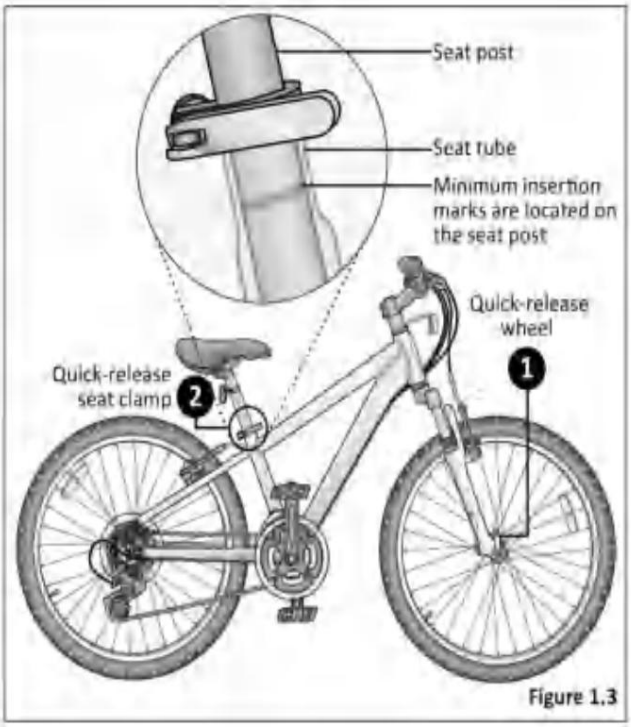

Figure 1.3

Machine Translated by Google

PERSONAL SAFETY

⚠ WARNING!

Riding a bicycle without protective gear, clothing, or a helmet may result in serious injury or death. Always wear protective gear, clothing, and helmet when riding the bicycle. Ensure protective gear does not interfere with steering, braking, and pedaling.

Protective Gear and Clothing

Always wear: Figure 1.4

- Colors that are easily seen and, if possible, reflective clothing.
- Clothing appropriate for the weather conditions.
- Use of protective gear such as pads for the knees and elbows is highly recommended for children.
- A properly fitted, ASTM or SNELL approved, bicycle helmet shall be worn at all times by riders of the bicycle.

Do not wear:

- Loose clothing parts, strings, or jewelry that may become entangled with moving parts on the bicycle or interfere with handling of the bicycle.
- Pants with loose pant legs. If necessary, always tuck pant legs into a sock or use a leg band to avoid the clothing becoming caught in the drive chain.
- Shoes with untied shoe laces.

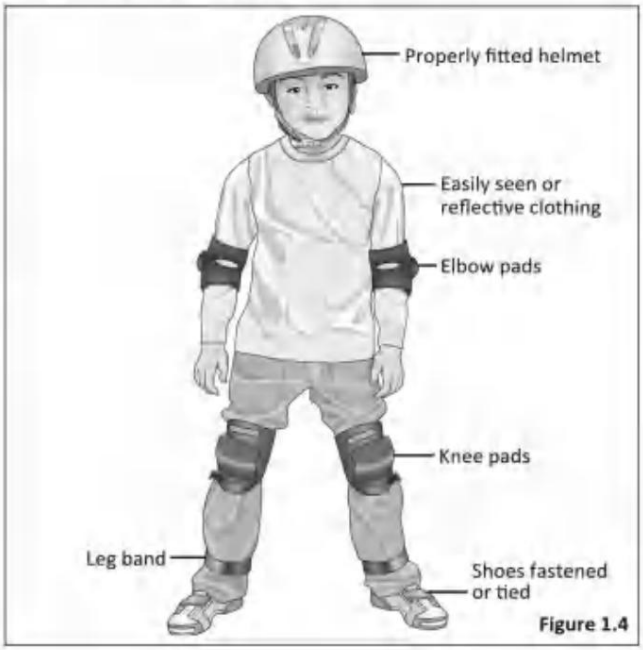

Figure 1.4

Helmet Use

Important! Many states and provinces have passed helmet laws. Make sure you know your state's helmet laws. It is your job to enforce these rules with your children. Even if your state/province does not have a children's helmet law, it is recommended that everyone wear a helmet when cycling. When riding with a child carrier seat or trailer, children must wear a helmet.
It is strongly advised that a properly fitting, ASTM or SNELL approved, bicycle safety helmet be worn at all times when riding your bicycle. In addition, if you are carrying a passenger in a child safety seat, they must also be wearing a helmet.

The correct helmet should: Figure 1.5

- Be comfortable
- Have good ventilation
- Fit correctly
- Cover forehead

Incorrect helmet position: Figure 1.6

- Helmet ***does not*** cover the forehead

Figure 1.5

Figure 1.6

Machine Translated by Google

Reflectors

⚠ WARNING!

Missing, damaged, or dirty reflectors will affect the ability of others to see and recognize you as a moving bicyclist, increasing the risk of being hit, serious injury or death. Always check the reflectors are in place and make sure they are clean, straight, unbroken and securely mounted before riding the bicycle.

Important! Federal regulations require every bicycle over 16 inches to be equipped with front, rear, wheel, and pedal reflectors. Many states require specific safety devices. It is your responsibility to familiarize yourself with the laws of the state where you ride and to comply with all applicable laws, including properly equipping yourself and your bike as the law requires. Bicycles under 16 inches are considered "sidewalk bicycles" and may not be fitted with reflectors. These bicycles should **not** be ridden on streets, at night or unsupervised by an adult.

Check and confirm the front and rear reflectors are in the correct position: **Figure 1.7**

- **Front Reflector:** Should aim forward (when viewed from above) and be mounted so it is within 5 degrees of vertical.
- **Rear Reflector:** Should aim straight back (when viewed from above) and be mounted so it is within 5 degrees of vertical.

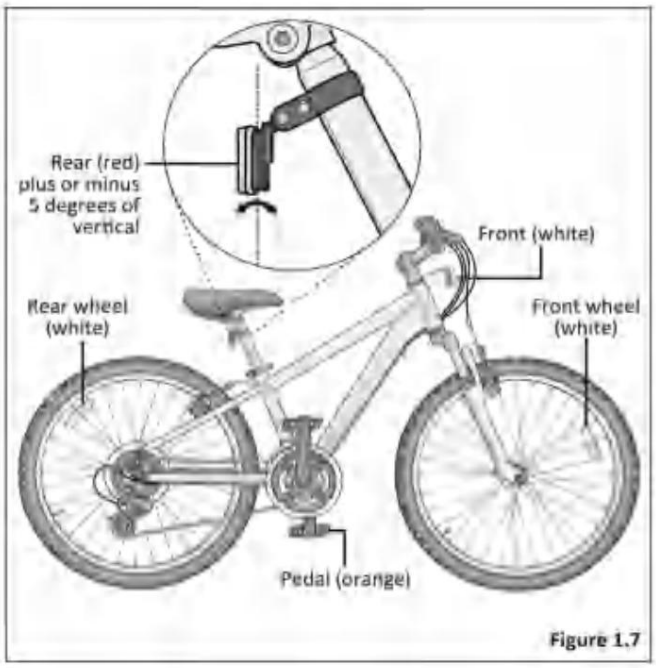

Figure 1.7

RIDING SAFETY

⚠ WARNING!

Riding the bicycle in unsafe conditions (i.e. at night), in an unsafe manner, or disregarding traffic laws may result in an unexpected movement, loss of control, and serious injury or death.

General Safety

- Familiarize yourself with all the bicycle's features before riding. Practice gear shifts, braking, and the use of toe clips and straps, if installed.
- Always ride defensively in a predictable, straight line. Never ride against traffic.
- Expect the unexpected (e.g., opening car doors or cars backing out of concealed driveways).
- Take extra care at intersections and when preparing to pass other vehicles.
- Maintain a comfortable stopping distance from all other riders, vehicles and objects. Safe braking distances and forces are subject to the prevailing weather conditions. Do not lock up the brakes. When braking, always apply the rear brake first, then the front. The front brake is more powerful and if it is not correctly applied, you may lose control and fall.
- Always use the correct hand signals to indicate turning or stopping.
- Obey the traffic laws (e.g., stopping at a red light or stop sign, giving way to pedestrians).
- Wear proper riding attire, reflective if possible, and avoid open toe shoes.
- Do not use items that may restrict your hearing and vision.
- Do not carry packages or passengers that will interfere with your visibility or control of the bicycle.

Road Conditions

- Be aware of road conditions. Concentrate on the path ahead. Avoid pot holes, gravel, wet road markings, oil, curbs, speed bumps, drain grates and other obstacles.
- Cross train tracks at a 90 degree angle or walk your bicycle across.

Wet Weather

- When riding in wet weather always wear reflective clothing and use safety lights to enhance visibility.
- Exercise extreme caution when riding in wet conditions.
- Ride at a slower speed. Turn corners gradually and avoid sudden braking.
- Brake earlier, it will take a longer distance to stop.
- Pot holes and slippery surfaces such as line markings and train tracks all become more hazardous when wet.

HOW TO ASSEMBLE THE REAR DERAILLEUR

01

Parts And Tools

Rear Derailleur	Rear Axle	Allen wrench
		

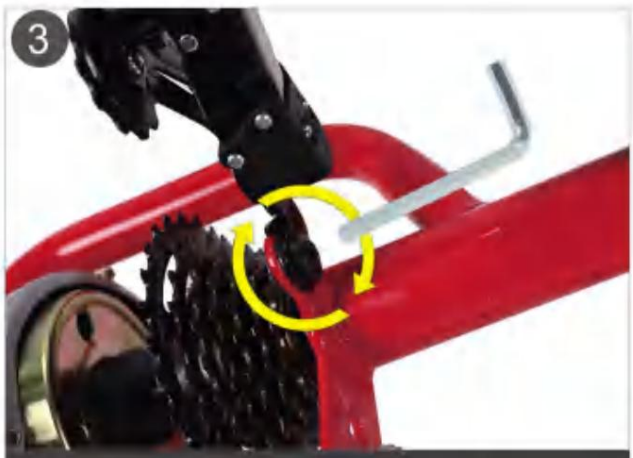

Assembly Steps

1. screw hole of the rear axle.

2. Put the bolt of the rear derailleur into the hole of the rear axle.

3. Tighten with a Allen wrench.

4. Finished

Machine Translated by Google

HOW TO ASSEMBLE THE REAR WHEELS

02

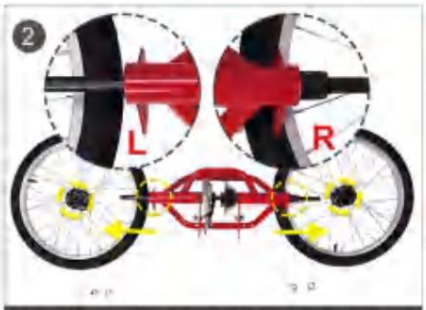

Parts And Tools

Assembly Parts	Rear Wheels	Nut caps	Wrench
			

Assembly Steps

1. Differentiate the left or right wheel according to the shape of the screw hole.

2. Differentiate the left or right of the rear axle According to the rear axle's ends shapes.

3. Insert axle right end into the right wheel.

4. Put the gasket , nut and tighten with a wrench.

5. Put the metal tube on axle left end.

6.Follow Step 3.

7.Follow Step 4.

8. Cover the rear axle nut caps.

9. Finished

Machine Translated by Google

HOW TO ASSEMBLE THE REAR AXLE

03

Parts And Tools

Assembly Parts	Frame	Wrench	Wrench
			

Assembly Steps

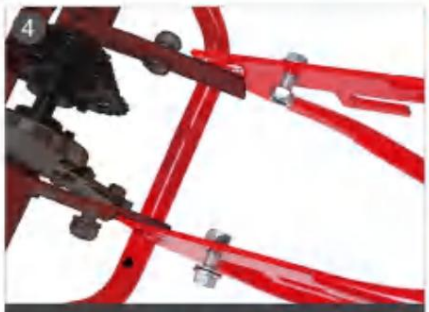

1.Loosen the screws.

2.Connect the rear axle and frame, as shown.

3.Assemble rear axle and frame.

4.Display

5.Tighten the screws.

6.Tighten the nuts.

7.All screws and nuts are tightened.

8.Finished.

HOW TO ASSEMBLE THE FRONT BRAKE

12

Parts And Tools

Left Brake Lever	Front Brake	Allen wrench
		

Assembly Steps

Connect the Brake wire to the Brake Lever

① Rotate all parts of the brake until all the slots are in a straight line.

② Squeeze the brake lever.

③ Take the brake wire into the slots the brake.

④ Pull the wire and rotate all parts of the brake to make sure the wire doesn't fall out.

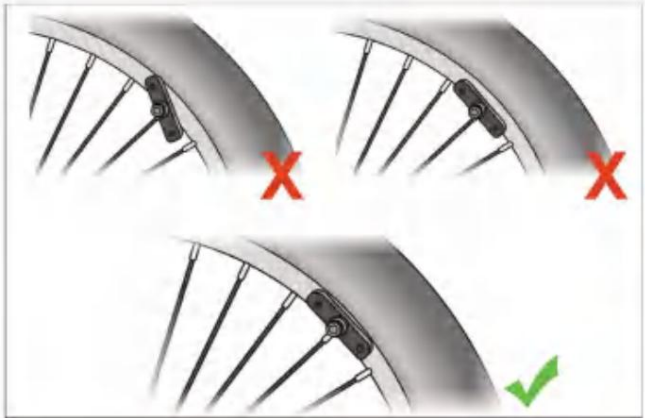

Assemble a front brake

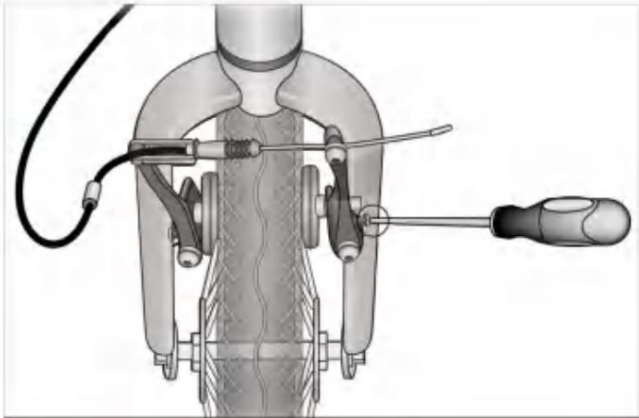

① Loosen the screw.

② Insert brake wire and adjust the length of remainder.

③ Tighten the screw NO.1.

Adjust the brake pads to the correct position

Tighten the screw.

Machine Translated by Google

HOW TO ASSEMBLE THE SHIFTER CABLE

13

Parts And Tools

Shifter	Shifter Tubes	Rear Derailleur
		

Assembly Steps

1.Insert a shifter wire into a shifter tube.

2.Insert the derailleur cabel into the shift lever and fix it.

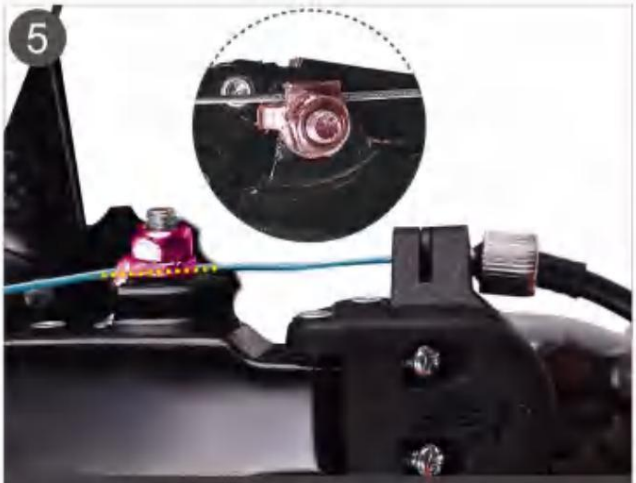

3.Run the shifter wire through the holes on the frame.

4.Insert the shifter wire through the hole of derailleur.

Machine Translated by Google

HOW TO ASSEMBLE THE SHIFTER CABLE

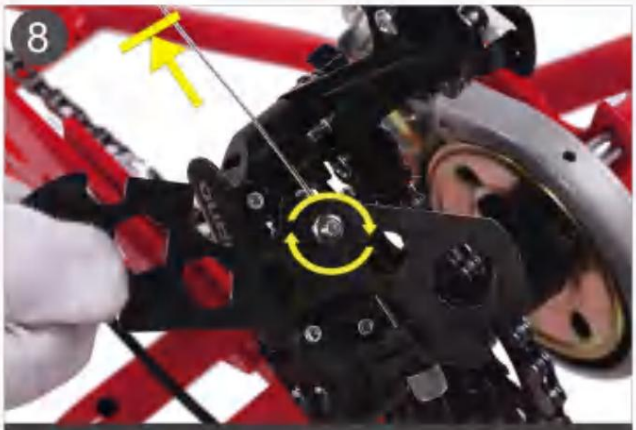

5.Bear down the shifter wire with the sheet.

6.Adjust front shifter to 7th speed when assemble the derailleur.

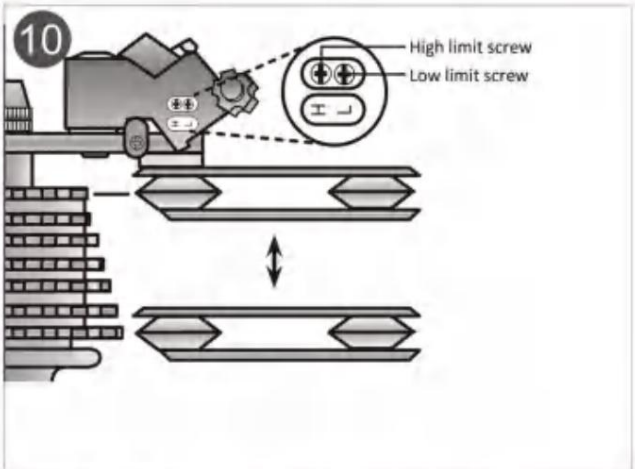

7.Adjust the chain to the smallest gear when assemble the derailleur.

8.Straighten the shifter wire and tighten the screw.

9.Adjust the derailleur by adjusting screws.

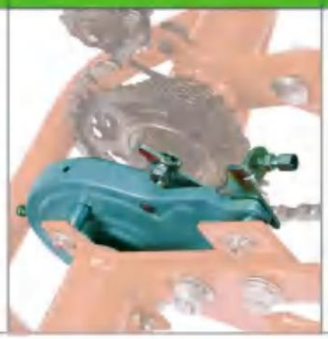

10.Rectify derailleur position by adjusting screws.

Warnung & Sicherheit

2 Safety

SAFETY SIGNAL WORDS

The following safety signal words indicate a safety message. The symbol alerts you to potential hazards. Failure to follow the warning may result in damage to property, injury, or death.

This manual contains many Warnings and Cautions concerning the consequences of failure to follow safety warnings. Because any fall can result in serious injury or even death, we do not repeat the warning of possible injury or death whenever the risk of falling is mentioned.

⚠ WARNING!

Indicates a hazard or unsafe practice that will result in severe injury or death. Failure to read, understand and follow the safety information in this manual may result in serious injury or death.

⚠ CAUTION!

Indicates a hazard or unsafe practice that could result in minor injury.

NOTICE

Indicates a hazard unrelated to personal injury, such as property damage.

USER RESPONSIBILITY

⚠ WARNING!

Do not install any kind of power plant or internal combustion engine to a bicycle. Adapting a bicycle in this manner poses an extreme safety risk to rider and could result in loss of control or death.

All persons assembling, using, and maintaining the bicycle must read and understand the safety warnings and operating instructions in this manual before using the bicycle.

It is the responsibility of the user, or in the case of a child rider, an adult, to ensure the bicycle is properly maintained and in proper operating condition. Doing so will reduce the risk of injury. Always conduct regular maintenance and inspection of your bicycle. Complete the Safety Checklist at the end of this section before each use.

A responsible adult must always supervise the use of the bicycle by a child. You must ensure:

- The child is wearing the proper protective attire and approved bicycle helmet.
- The child is seated securely and the bicycle is properly fitted to the child.
- The child understands applicable laws and common sense rules of safe responsible bicycling.

Quick-release Levers

⚠ WARNING!

Improper setup or maintenance of the quick-release levers may result in an unexpected movement, loss of control, and serious injury or death. Before riding always check that the quick-release lever is firmly locked in place and the seat does not move.

Wheels

1. Some bicycles will come equipped with quick-release levers for the front wheel. The wheels must be securely locked. Ensure the wheel quick-release lever is firmly locked in place. **Figure 1.3**

Seat Post

2. Ensure the seat post's ***minimum insertion marks*** are **not** visible above the quick-release seat clamp and the clamp is locked in place.

   Note: See ***Section 4: Adjusting the Seat Height*** if adjustments are needed.

Machine Translated by Google

PERSONAL SAFETY

⚠ WARNING!

Riding a bicycle without protective gear, clothing, or a helmet may result in serious injury or death. Always wear protective gear, clothing, and helmet when riding the bicycle. Ensure protective gear does not interfere with steering, braking, and pedaling.

Protective Gear and Clothing

Always wear: Figure 1.4

- Colors that are easily seen and, if possible, reflective clothing.
- Clothing appropriate for the weather conditions.
- Use of protective gear such as pads for the knees and elbows is highly recommended for children.
- A properly fitted, ASTM or SNELL approved, bicycle helmet shall be worn at all times by riders of the bicycle.

Do not wear:

- Loose clothing parts, strings, or jewelry that may become entangled with moving parts on the bicycle or interfere with handling of the bicycle.
- Pants with loose pant legs. If necessary, always tuck pant legs into a sock or use a leg band to avoid the clothing becoming caught in the drive chain.
- Shoes with untied shoe laces.

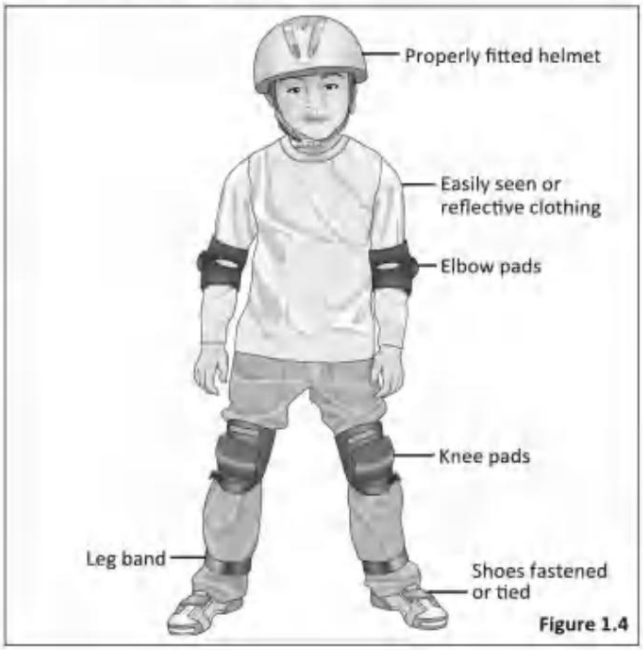

Figure 1.4

Helmet Use

Important! Many states and provinces have passed helmet laws. Make sure you know your state's helmet laws. It is your job to enforce these rules with your children. Even if your state/province does not have a children's helmet law, it is recommended that everyone wear a helmet when cycling. When riding with a child carrier seat or trailer, children must wear a helmet.
It is strongly advised that a properly fitting, ASTM or SNELL approved, bicycle safety helmet be worn at all times when riding your bicycle. In addition, if you are carrying a passenger in a child safety seat, they must also be wearing a helmet.

The correct helmet should: Figure 1.5

- Be comfortable
- Have good ventilation
- Fit correctly
- Cover forehead

Incorrect helmet position: Figure 1.6

- Helmet ***does not*** cover the forehead

Reflectors

⚠ WARNING!

Missing, damaged, or dirty reflectors will affect the ability of others to see and recognize you as a moving bicyclist, increasing the risk of being hit, serious injury or death. Always check the reflectors are in place and make sure they are clean, straight, unbroken and securely mounted before riding the bicycle.

Important! Federal regulations require every bicycle over 16 inches to be equipped with front, rear, wheel, and pedal reflectors. Many states require specific safety devices. It is your responsibility to familiarize yourself with the laws of the state where you ride and to comply with all applicable laws, including properly equipping yourself and your bike as the law requires. Bicycles under 16 inches are considered "sidewalk bicycles" and may not be fitted with reflectors. These bicycles should **not** be ridden on streets, at night or unsupervised by an adult.

Check and confirm the front and rear reflectors are in the correct position: **Figure 1.7**

- **Front Reflector:** Should aim forward (when viewed from above) and be mounted so it is within 5 degrees of vertical.
- **Rear Reflector:** Should aim straight back (when viewed from above) and be mounted so it is within 5 degrees of vertical.

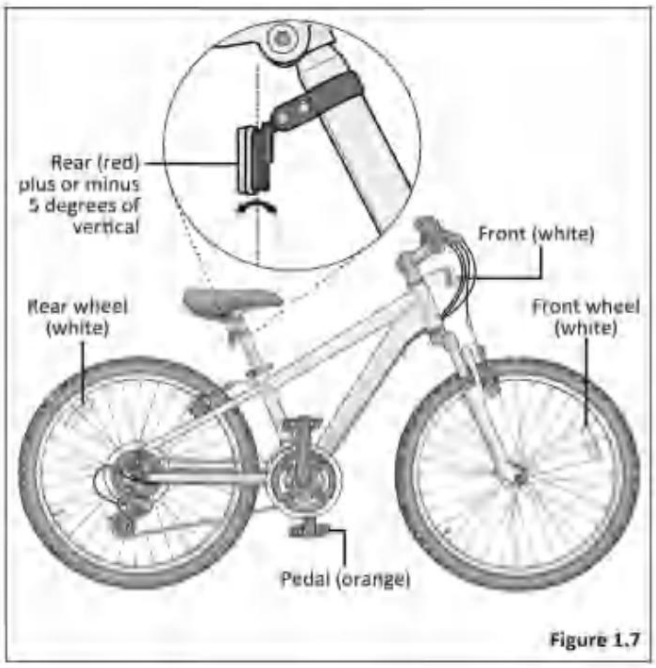

Figure 1.7

RIDING SAFETY

⚠ WARNING!

Riding the bicycle in unsafe conditions (i.e. at night), in an unsafe manner, or disregarding traffic laws may result in an unexpected movement, loss of control, and serious injury or death.

General Safety

- Familiarize yourself with all the bicycle's features before riding. Practice gear shifts, braking, and the use of toe clips and straps, if installed.
- Always ride defensively in a predictable, straight line. Never ride against traffic.
- Expect the unexpected (e.g., opening car doors or cars backing out of concealed driveways).
- Take extra care at intersections and when preparing to pass other vehicles.
- Maintain a comfortable stopping distance from all other riders, vehicles and objects. Safe braking distances and forces are subject to the prevailing weather conditions. Do not lock up the brakes. When braking, always apply the rear brake first, then the front. The front brake is more powerful and if it is not correctly applied, you may lose control and fall.
- Always use the correct hand signals to indicate turning or stopping.
- Obey the traffic laws (e.g., stopping at a red light or stop sign, giving way to pedestrians).
- Wear proper riding attire, reflective if possible, and avoid open toe shoes.
- Do not use items that may restrict your hearing and vision.
- Do not carry packages or passengers that will interfere with your visibility or control of the bicycle.

Road Conditions

- Be aware of road conditions. Concentrate on the path ahead. Avoid pot holes, gravel, wet road markings, oil, curbs, speed bumps, drain grates and other obstacles.
- Cross train tracks at a 90 degree angle or walk your bicycle across.

Wet Weather

- When riding in wet weather always wear reflective clothing and use safety lights to enhance visibility.
- Exercise extreme caution when riding in wet conditions.
- Ride at a slower speed. Turn corners gradually and avoid sudden braking.
- Brake earlier, it will take a longer distance to stop.
- Pot holes and slippery surfaces such as line markings and train tracks all become more hazardous when wet.

HOW TO ASSEMBLE THE REAR DERAILLEUR

01

Parts And Tools

Rear Derailleur	Rear Axle	Allen wrench
		

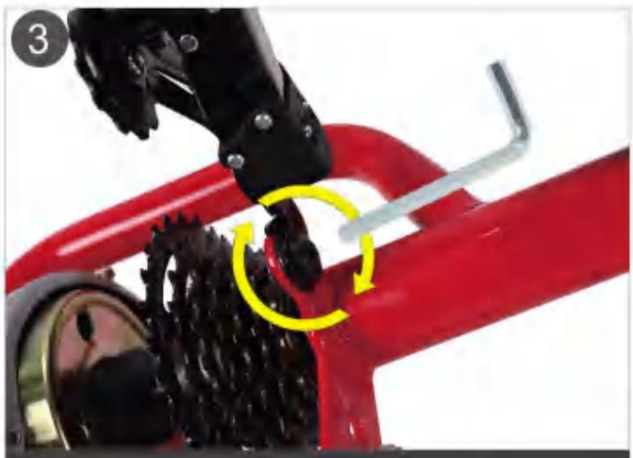

Assembly Steps

1. screw hole of the rear axle.

2. Put the bolt of the rear derailleur into the hole of the rear axle.

3. Tighten with a Allen wrench.

4. Finished

Machine Translated by Google

HOW TO ASSEMBLE THE REAR WHEELS

02

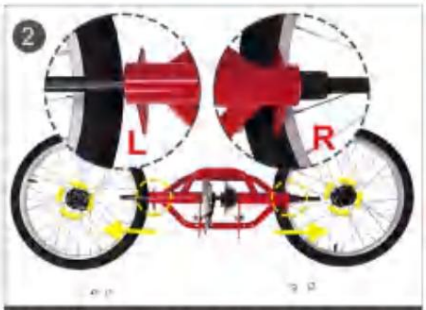

Parts And Tools

Assembly Parts	Rear Wheels	Nut caps	Wrench
			

Assembly Steps

1. Differentiate the left or right wheel according to the shape of the screw hole.

2. Differentiate the left or right of the rear axle According to the rear axle's ends shapes.

3. Insert axle right end into the right wheel.

4. Put the gasket , nut and tighten with a wrench.

5. Put the metal tube on axle left end.

6.Follow Step 3.

7.Follow Step 4.

8. Cover the rear axle nut caps.

9. Finished

Machine Translated by Google

HOW TO ASSEMBLE THE REAR AXLE

03

Parts And Tools

Assembly Parts	Frame	Wrench	Wrench
			

Assembly Steps

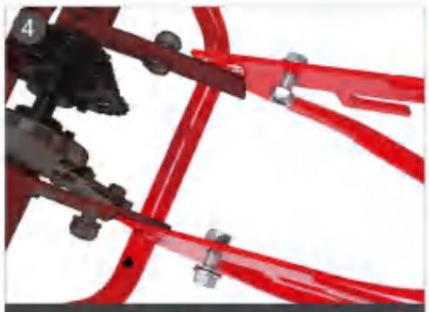

1.Loosen the screws.

2.Connect the rear axle and frame, as shown.

3.Assemble rear axle and frame.

4.Display

5.Tighten the screws.

6.Tighten the nuts.

7.All screws and nuts are tightened.

8.Finished.

HOW TO ASSEMBLE THE CHAIN COVER

05

Parts And Tools

Assembly Parts	Chain Cover	Screwdriver
		

Assembly Steps

1. Locate the two screw holes on the frame.

2. Put on the chain cover and tighten the screws with a screwdriver

3. Tighten the second screw

4. Finished

Machine Translated by Google

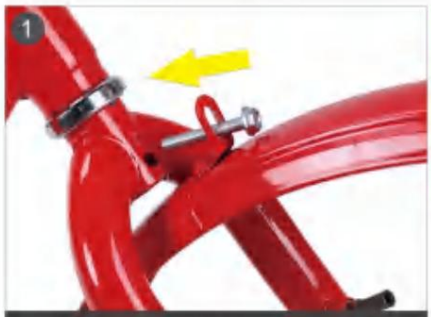

HOW TO ASSEMBLE THE FRONT WHEEL

06

Parts And Tools

Fork	Front Fender	Front Wheel	Tools
			

Assembly Steps

1.Assemble the front fender.

2.Tighten the screw.

3.Assemble front wheel and frame.

4.Assemble the washer.

5.Assemble the fender holder.

6.Tighten the screw.

7. Finished

Machine Translated by Google

HOW TO ASSEMBLE THE BELL AND REFLECTORS

07

Parts And Tools

Bell	Front & Rear Reflector	Wheel Reflector	Screwdriver
			

Assembly Steps

1.Attach the bell on the handlebar.

2. Tighten the screw.

3. Assemble the front reflector.

4. Tighten the screw.

5. Finished.

6. Attach reflectors on rear fenders.

7.Tighten reflector with screw.

8. Attach the reflectors on the wheel.

9.Follow step 8.

Machine Translated by Google

HOW TO ASSEMBLE THE REAR FENDER

08

Parts And Tools

Rear Axle	Rear Fender	Screwdriver
		

Assembly Steps

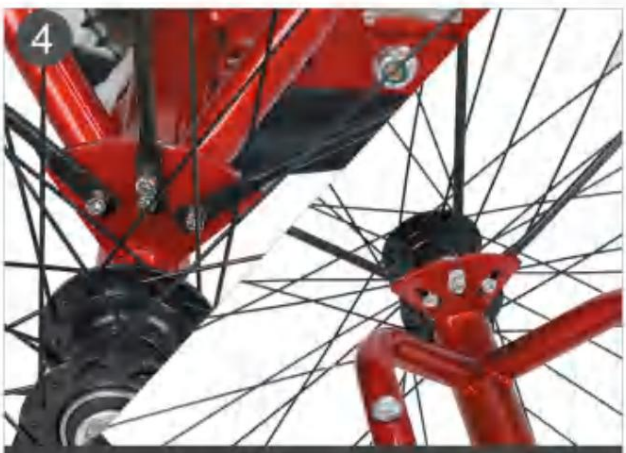

1.Notice the circled hole on the rear axle.

2.Prepare fenders and holders.

3. Tighten the screws.

4. Finished.

Machine Translated by Google

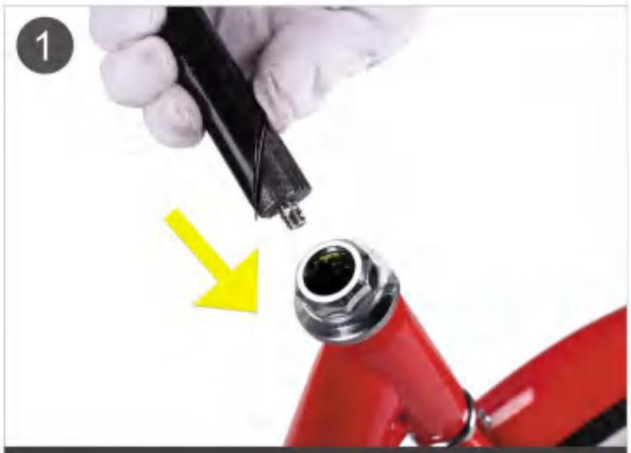

HOW TO ASSEMBLE THE HANDLEBAR

09

Parts And Tools

Handlebar Tube	Handlebar	Screwdriver
		

Assembly Steps

1. Insert the stem into the Handlebar Tube.

2. Adjust the height of handlebar and tighten the screw.

3. Tighten the screw.

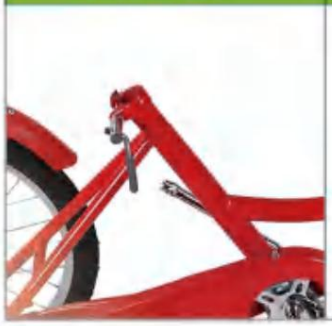

4. Finished

Machine Translated by Google

HOW TO ASSEMBLE THE SADDLE

10

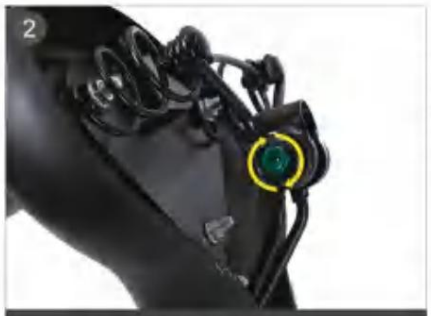

Parts And Tools

Saddle Tube	Saddle Post	Saddle	Wrench
			

Assembly Steps

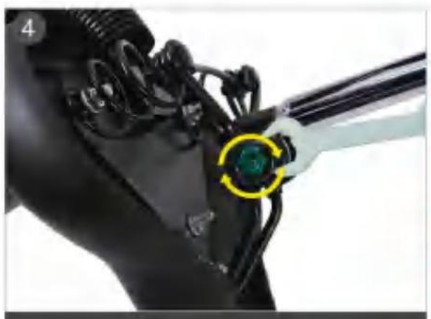

1.Need to put the saddle post into the circled hole.

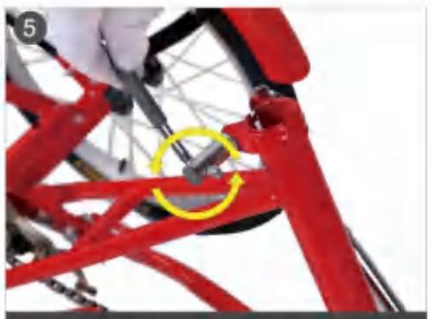

2. Loosen the screw.

3. Insert saddle post.

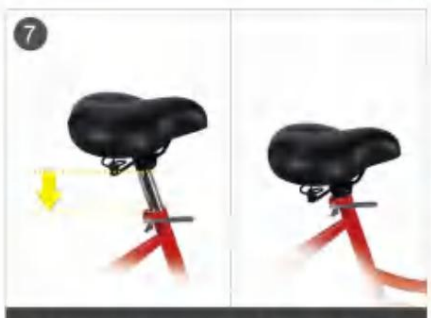

4. Tighten the screw.

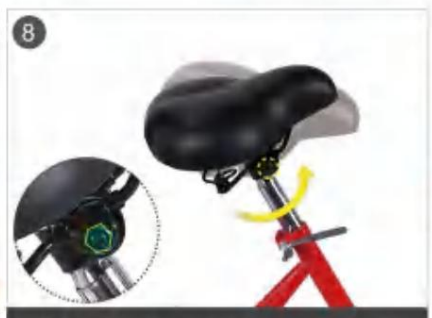

5. Loose the saddle post clamp.

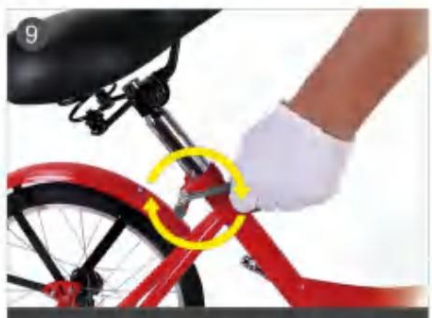

6. Insert the saddle.

7. Adjust the height of the saddle.

8. Adjust the angle of the saddle.

9. Tighten the saddle post clamp.

HOW TO ASSEMBLE THE SHIFTER CABLE

13

Parts And Tools

Shifter	Shifter Tubes	Rear Derailleur
		

Assembly Steps

1.Insert a shifter wire into a shifter tube.

2.Insert the derailleur cabel into the shift lever and fix it.

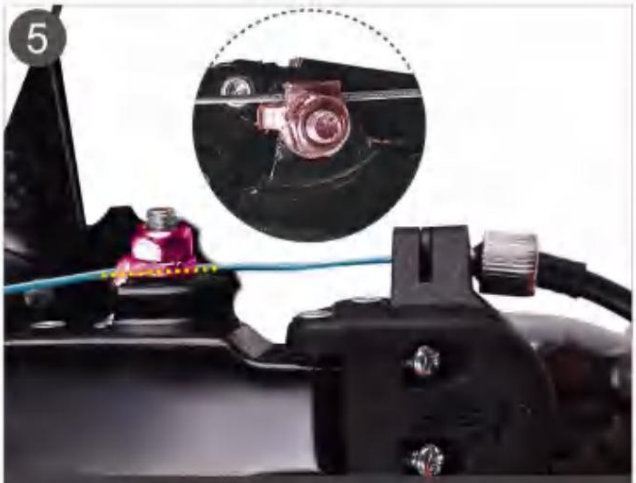

3.Run the shifter wire through the holes on the frame.

4.Insert the shifter wire through the hole of derailleur.

Machine Translated by Google

HOW TO ASSEMBLE THE SHIFTER CABLE

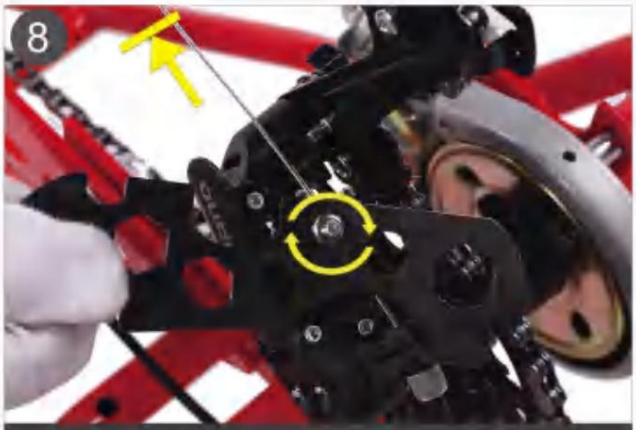

5.Bear down the shifter wire with the sheet.

6.Adjust front shifter to 7th speed when assemble the derailleur.

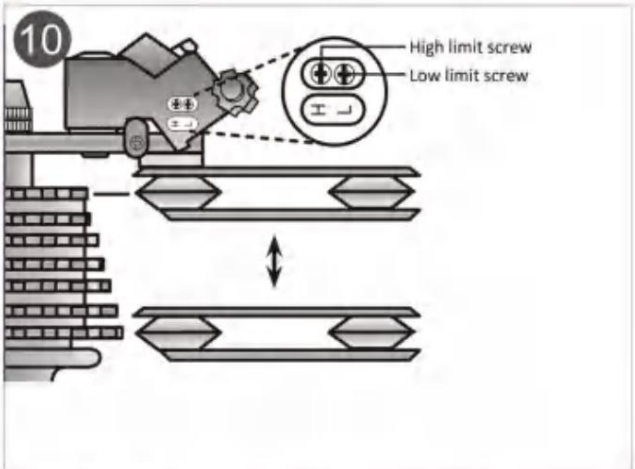

7.Adjust the chain to the smallest gear when assemble the derailleur.

8.Straighten the shifter wire and tighten the screw.

9.Adjust the derailleur by adjusting screws.

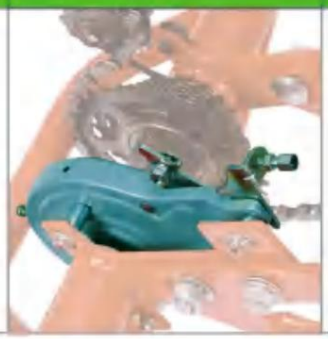

10.Rectify derailleur position by adjusting screws.

Machine Translated by Google

HOW TO ASSEMBLE THE REAR BRAKE

14

Parts And Tools

Rear Brake Wire	Right Brake Lever	Rear Brake	Wrench
			

Assembly Steps

1.Squeeze the brake lever.

2. Put the wire tip into the hole of the lever.

3. Rotate all parts of the brake until all the slots are in a straight line.

4. Pull the wire and rotate all parts of the brake to make sure the wire doesn't fall out.

Machine Translated by Google

HOW TO ASSEMBLE THE REAR BRAKE

14

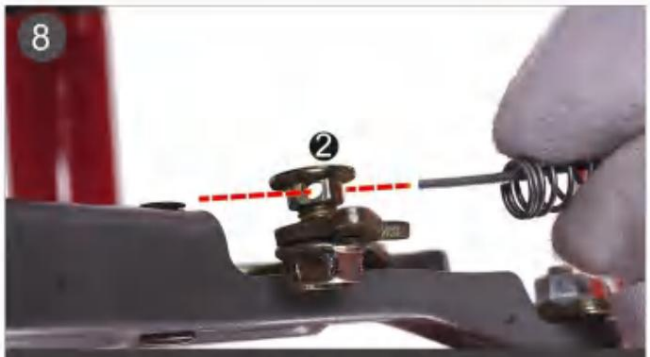

5. Insert the brake tube into the brake lever.

6.Run the wire through hole NO.1.

7.Put on the brake spring.

8.Run the wire through hole NO.2.

9. Tighten the screw.

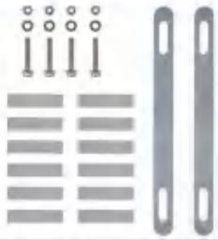

10.Finished.

Attenzione e sicurezza

2 Safety

SAFETY SIGNAL WORDS

The following safety signal words indicate a safety message. The symbol alerts you to potential hazards. Failure to follow the warning may result in damage to property, injury, or death.

This manual contains many Warnings and Cautions concerning the consequences of failure to follow safety warnings. Because any fall can result in serious injury or even death, we do not repeat the warning of possible injury or death whenever the risk of falling is mentioned.

⚠ WARNING!

Indicates a hazard or unsafe practice that will result in severe injury or death. Failure to read, understand and follow the safety information in this manual may result in serious injury or death.

⚠ CAUTION!

Indicates a hazard or unsafe practice that could result in minor injury.

NOTICE

Indicates a hazard unrelated to personal injury, such as property damage.

USER RESPONSIBILITY

⚠ WARNING!

Do not install any kind of power plant or internal combustion engine to a bicycle. Adapting a bicycle in this manner poses an extreme safety risk to rider and could result in loss of control or death.

All persons assembling, using, and maintaining the bicycle must read and understand the safety warnings and operating instructions in this manual before using the bicycle.

It is the responsibility of the user, or in the case of a child rider, an adult, to ensure the bicycle is properly maintained and in proper operating condition. Doing so will reduce the risk of injury. Always conduct regular maintenance and inspection of your bicycle. Complete the Safety Checklist at the end of this section before each use.

A responsible adult must always supervise the use of the bicycle by a child. You must ensure:

- The child is wearing the proper protective attire and approved bicycle helmet.
- The child is seated securely and the bicycle is properly fitted to the child.
- The child understands applicable laws and common sense rules of safe responsible bicycling.

Quick-release Levers

⚠ WARNING!

Improper setup or maintenance of the quick-release levers may result in an unexpected movement, loss of control, and serious injury or death. Before riding always check that the quick-release lever is firmly locked in place and the seat does not move.

Wheels

1. Some bicycles will come equipped with quick-release levers for the front wheel. The wheels must be securely locked. Ensure the wheel quick-release lever is firmly locked in place. **Figure 1.3**

Seat Post

2. Ensure the seat post's ***minimum insertion marks*** are **not** visible above the quick-release seat clamp and the clamp is locked in place.

   Note: See ***Section 4: Adjusting the Seat Height*** if adjustments are needed.

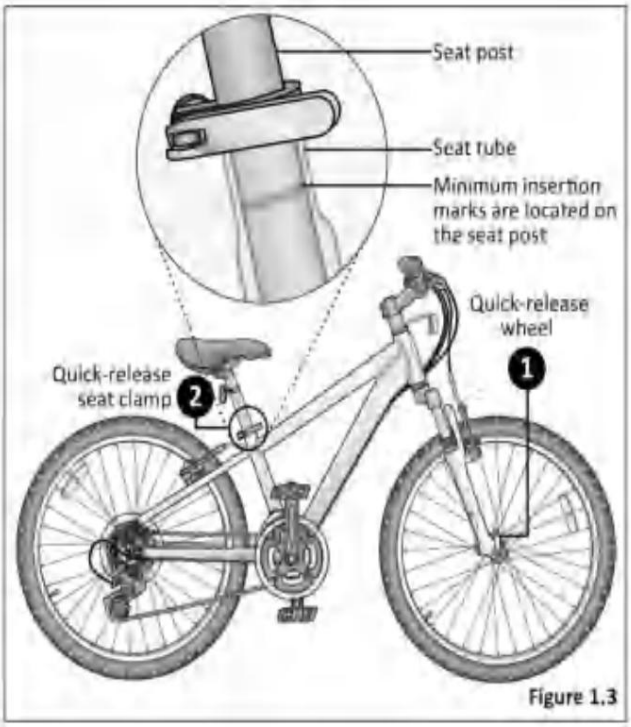

Figure 1.3

Machine Translated by Google

PERSONAL SAFETY

⚠ WARNING!

Riding a bicycle without protective gear, clothing, or a helmet may result in serious injury or death. Always wear protective gear, clothing, and helmet when riding the bicycle. Ensure protective gear does not interfere with steering, braking, and pedaling.

Protective Gear and Clothing

Always wear: Figure 1.4

- Colors that are easily seen and, if possible, reflective clothing.
- Clothing appropriate for the weather conditions.
- Use of protective gear such as pads for the knees and elbows is highly recommended for children.
- A properly fitted, ASTM or SNELL approved, bicycle helmet shall be worn at all times by riders of the bicycle.

Do not wear:

- Loose clothing parts, strings, or jewelry that may become entangled with moving parts on the bicycle or interfere with handling of the bicycle.
- Pants with loose pant legs. If necessary, always tuck pant legs into a sock or use a leg band to avoid the clothing becoming caught in the drive chain.
- Shoes with untied shoe laces.

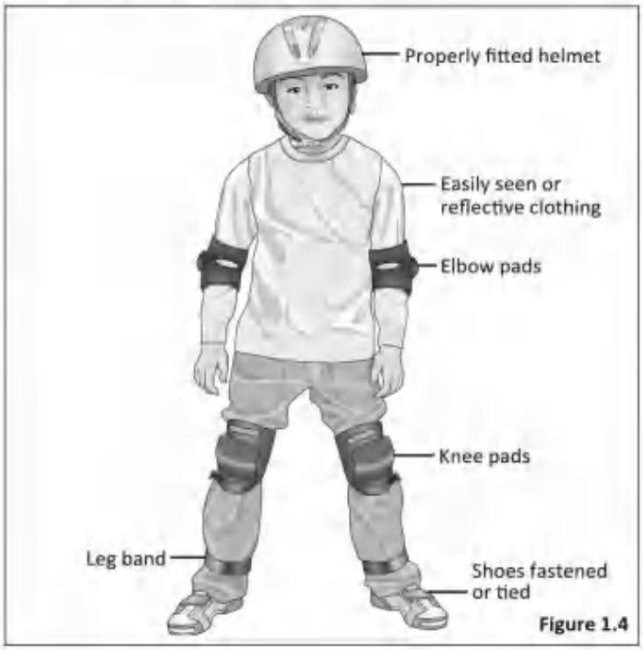

Figure 1.4

Helmet Use

Important! Many states and provinces have passed helmet laws. Make sure you know your state's helmet laws. It is your job to enforce these rules with your children. Even if your state/province does not have a children's helmet law, it is recommended that everyone wear a helmet when cycling. When riding with a child carrier seat or trailer, children must wear a helmet.
It is strongly advised that a properly fitting, ASTM or SNELL approved, bicycle safety helmet be worn at all times when riding your bicycle. In addition, if you are carrying a passenger in a child safety seat, they must also be wearing a helmet.

The correct helmet should: Figure 1.5

- Be comfortable
- Have good ventilation
- Fit correctly
- Cover forehead

Incorrect helmet position: Figure 1.6

- Helmet ***does not*** cover the forehead

Figure 1.5

Figure 1.6

Machine Translated by Google

Reflectors

⚠ WARNING!

Missing, damaged, or dirty reflectors will affect the ability of others to see and recognize you as a moving bicyclist, increasing the risk of being hit, serious injury or death. Always check the reflectors are in place and make sure they are clean, straight, unbroken and securely mounted before riding the bicycle.

Important! Federal regulations require every bicycle over 16 inches to be equipped with front, rear, wheel, and pedal reflectors. Many states require specific safety devices. It is your responsibility to familiarize yourself with the laws of the state where you ride and to comply with all applicable laws, including properly equipping yourself and your bike as the law requires. Bicycles under 16 inches are considered "sidewalk bicycles" and may not be fitted with reflectors. These bicycles should **not** be ridden on streets, at night or unsupervised by an adult.

Check and confirm the front and rear reflectors are in the correct position: **Figure 1.7**

- **Front Reflector:** Should aim forward (when viewed from above) and be mounted so it is within 5 degrees of vertical.
- **Rear Reflector:** Should aim straight back (when viewed from above) and be mounted so it is within 5 degrees of vertical.

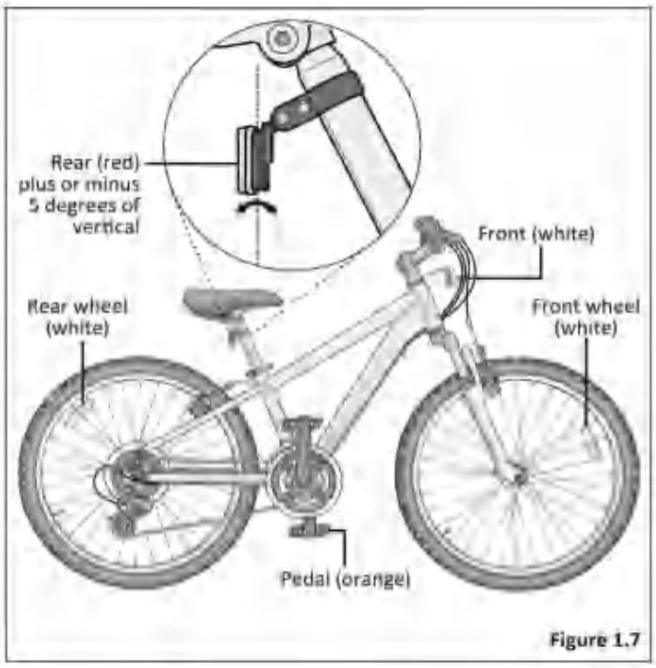

Figure 1.7

RIDING SAFETY

⚠ WARNING!

Riding the bicycle in unsafe conditions (i.e. at night), in an unsafe manner, or disregarding traffic laws may result in an unexpected movement, loss of control, and serious injury or death.

General Safety

- Familiarize yourself with all the bicycle's features before riding. Practice gear shifts, braking, and the use of toe clips and straps, if installed.
- Always ride defensively in a predictable, straight line. Never ride against traffic.
- Expect the unexpected (e.g., opening car doors or cars backing out of concealed driveways).
- Take extra care at intersections and when preparing to pass other vehicles.
- Maintain a comfortable stopping distance from all other riders, vehicles and objects. Safe braking distances and forces are subject to the prevailing weather conditions. Do not lock up the brakes. When braking, always apply the rear brake first, then the front. The front brake is more powerful and if it is not correctly applied, you may lose control and fall.
- Always use the correct hand signals to indicate turning or stopping.
- Obey the traffic laws (e.g., stopping at a red light or stop sign, giving way to pedestrians).
- Wear proper riding attire, reflective if possible, and avoid open toe shoes.
- Do not use items that may restrict your hearing and vision.
- Do not carry packages or passengers that will interfere with your visibility or control of the bicycle.

Road Conditions

- Be aware of road conditions. Concentrate on the path ahead. Avoid pot holes, gravel, wet road markings, oil, curbs, speed bumps, drain grates and other obstacles.
- Cross train tracks at a 90 degree angle or walk your bicycle across.

Wet Weather

- When riding in wet weather always wear reflective clothing and use safety lights to enhance visibility.
- Exercise extreme caution when riding in wet conditions.
- Ride at a slower speed. Turn corners gradually and avoid sudden braking.
- Brake earlier, it will take a longer distance to stop.
- Pot holes and slippery surfaces such as line markings and train tracks all become more hazardous when wet.

PERSONAL SAFETY

⚠ WARNING!

Riding a bicycle without protective gear, clothing, or a helmet may result in serious injury or death. Always wear protective gear, clothing, and helmet when riding the bicycle. Ensure protective gear does not interfere with steering, braking, and pedaling.

Protective Gear and Clothing

Always wear: Figure 1.4

- Colors that are easily seen and, if possible, reflective clothing.
- Clothing appropriate for the weather conditions.
- Use of protective gear such as pads for the knees and elbows is highly recommended for children.
- A properly fitted, ASTM or SNELL approved, bicycle helmet shall be worn at all times by riders of the bicycle.

Do not wear:

- Loose clothing parts, strings, or jewelry that may become entangled with moving parts on the bicycle or interfere with handling of the bicycle.
- Pants with loose pant legs. If necessary, always tuck pant legs into a sock or use a leg band to avoid the clothing becoming caught in the drive chain.
- Shoes with untied shoe laces.

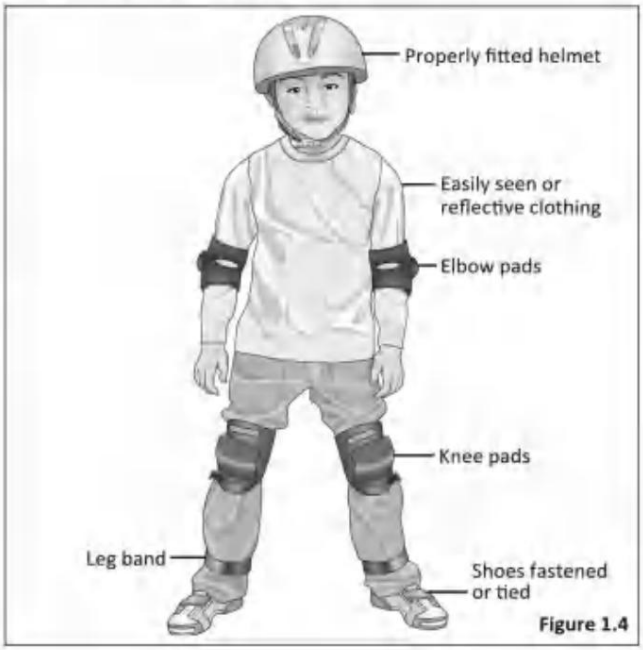

Figure 1.4

Helmet Use

Important! Many states and provinces have passed helmet laws. Make sure you know your state's helmet laws. It is your job to enforce these rules with your children. Even if your state/province does not have a children's helmet law, it is recommended that everyone wear a helmet when cycling. When riding with a child carrier seat or trailer, children must wear a helmet.
It is strongly advised that a properly fitting, ASTM or SNELL approved, bicycle safety helmet be worn at all times when riding your bicycle. In addition, if you are carrying a passenger in a child safety seat, they must also be wearing a helmet.

The correct helmet should: Figure 1.5

- Be comfortable
- Have good ventilation
- Fit correctly
- Cover forehead

Incorrect helmet position: Figure 1.6

- Helmet ***does not*** cover the forehead

Figure 1.5

Figure 1.6

Reflectors

⚠ WARNING!

Missing, damaged, or dirty reflectors will affect the ability of others to see and recognize you as a moving bicyclist, increasing the risk of being hit, serious injury or death. Always check the reflectors are in place and make sure they are clean, straight, unbroken and securely mounted before riding the bicycle.

Important! Federal regulations require every bicycle over 16 inches to be equipped with front, rear, wheel, and pedal reflectors. Many states require specific safety devices. It is your responsibility to familiarize yourself with the laws of the state where you ride and to comply with all applicable laws, including properly equipping yourself and your bike as the law requires. Bicycles under 16 inches are considered "sidewalk bicycles" and may not be fitted with reflectors. These bicycles should **not** be ridden on streets, at night or unsupervised by an adult.

Check and confirm the front and rear reflectors are in the correct position: **Figure 1.7**

- **Front Reflector:** Should aim forward (when viewed from above) and be mounted so it is within 5 degrees of vertical.
- **Rear Reflector:** Should aim straight back (when viewed from above) and be mounted so it is within 5 degrees of vertical.

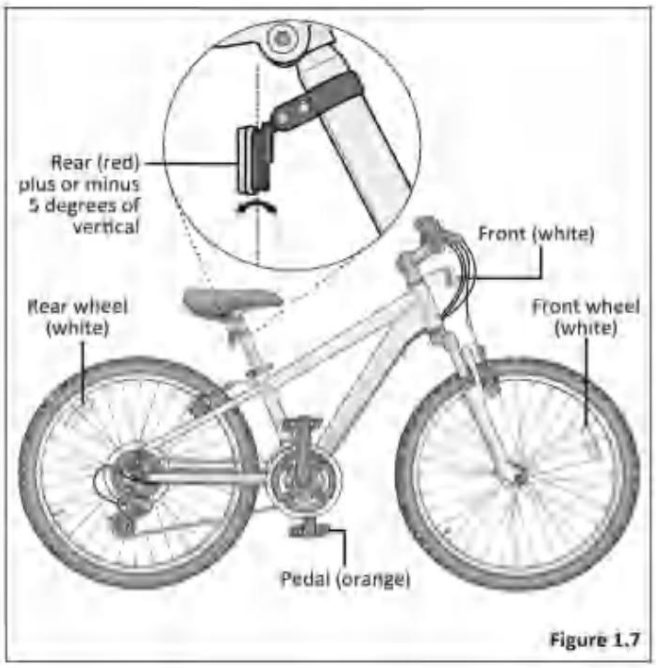

Figure 1.7

RIDING SAFETY

⚠ WARNING!

Riding the bicycle in unsafe conditions (i.e. at night), in an unsafe manner, or disregarding traffic laws may result in an unexpected movement, loss of control, and serious injury or death.

General Safety

- Familiarize yourself with all the bicycle's features before riding. Practice gear shifts, braking, and the use of toe clips and straps, if installed.
- Always ride defensively in a predictable, straight line. Never ride against traffic.
- Expect the unexpected (e.g., opening car doors or cars backing out of concealed driveways).
- Take extra care at intersections and when preparing to pass other vehicles.
- Maintain a comfortable stopping distance from all other riders, vehicles and objects. Safe braking distances and forces are subject to the prevailing weather conditions. Do not lock up the brakes. When braking, always apply the rear brake first, then the front. The front brake is more powerful and if it is not correctly applied, you may lose control and fall.
- Always use the correct hand signals to indicate turning or stopping.
- Obey the traffic laws (e.g., stopping at a red light or stop sign, giving way to pedestrians).
- Wear proper riding attire, reflective if possible, and avoid open toe shoes.
- Do not use items that may restrict your hearing and vision.
- Do not carry packages or passengers that will interfere with your visibility or control of the bicycle.

Road Conditions

- Be aware of road conditions. Concentrate on the path ahead. Avoid pot holes, gravel, wet road markings, oil, curbs, speed bumps, drain grates and other obstacles.
- Cross train tracks at a 90 degree angle or walk your bicycle across.

Wet Weather

- When riding in wet weather always wear reflective clothing and use safety lights to enhance visibility.
- Exercise extreme caution when riding in wet conditions.
- Ride at a slower speed. Turn corners gradually and avoid sudden braking.
- Brake earlier, it will take a longer distance to stop.
- Pot holes and slippery surfaces such as line markings and train tracks all become more hazardous when wet.

HOW TO ASSEMBLE THE REAR DERAILLEUR

01

Parts And Tools

Rear Derailleur	Rear Axle	Allen wrench
		

Assembly Steps

1. screw hole of the rear axle.

2. Put the bolt of the rear derailleur into the hole of the rear axle.

3. Tighten with a Allen wrench.

4. Finished

Machine Translated by Google

HOW TO ASSEMBLE THE REAR WHEELS

02

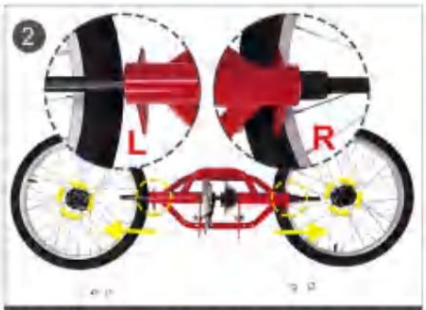

Parts And Tools

Assembly Parts	Rear Wheels	Nut caps	Wrench
			

Assembly Steps

1. Differentiate the left or right wheel according to the shape of the screw hole.

2. Differentiate the left or right of the rear axle According to the rear axle's ends shapes.

3. Insert axle right end into the right wheel.

4. Put the gasket , nut and tighten with a wrench.

5. Put the metal tube on axle left end.

6.Follow Step 3.

7.Follow Step 4.

8. Cover the rear axle nut caps.

9. Finished

Machine Translated by Google

HOW TO ASSEMBLE THE REAR AXLE

03

Parts And Tools

Assembly Parts	Frame	Wrench	Wrench
			

Assembly Steps

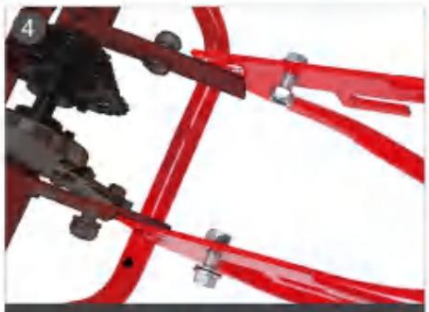

1.Loosen the screws.

2.Connect the rear axle and frame, as shown.

3.Assemble rear axle and frame.

4.Display

5.Tighten the screws.

6.Tighten the nuts.

7.All screws and nuts are tightened.

8.Finished.

2 Safety

SAFETY SIGNAL WORDS

The following safety signal words indicate a safety message. The symbol alerts you to potential hazards. Failure to follow the warning may result in damage to property, injury, or death.

This manual contains many Warnings and Cautions concerning the consequences of failure to follow safety warnings. Because any fall can result in serious injury or even death, we do not repeat the warning of possible injury or death whenever the risk of falling is mentioned.

⚠ WARNING!

Indicates a hazard or unsafe practice that will result in severe injury or death. Failure to read, understand and follow the safety information in this manual may result in serious injury or death.

⚠ CAUTION!

Indicates a hazard or unsafe practice that could result in minor injury.

NOTICE

Indicates a hazard unrelated to personal injury, such as property damage.

USER RESPONSIBILITY

⚠ WARNING!

Do not install any kind of power plant or internal combustion engine to a bicycle. Adapting a bicycle in this manner poses an extreme safety risk to rider and could result in loss of control or death.

All persons assembling, using, and maintaining the bicycle must read and understand the safety warnings and operating instructions in this manual before using the bicycle.

It is the responsibility of the user, or in the case of a child rider, an adult, to ensure the bicycle is properly maintained and in proper operating condition. Doing so will reduce the risk of injury. Always conduct regular maintenance and inspection of your bicycle. Complete the Safety Checklist at the end of this section before each use.

A responsible adult must always supervise the use of the bicycle by a child. You must ensure:

- The child is wearing the proper protective attire and approved bicycle helmet.
- The child is seated securely and the bicycle is properly fitted to the child.
- The child understands applicable laws and common sense rules of safe responsible bicycling.

Quick-release Levers

⚠ WARNING!

Improper setup or maintenance of the quick-release levers may result in an unexpected movement, loss of control, and serious injury or death. Before riding always check that the quick-release lever is firmly locked in place and the seat does not move.

Wheels

1. Some bicycles will come equipped with quick-release levers for the front wheel. The wheels must be securely locked. Ensure the wheel quick-release lever is firmly locked in place. **Figure 1.3**

Seat Post

2. Ensure the seat post's ***minimum insertion marks*** are **not** visible above the quick-release seat clamp and the clamp is locked in place.

   Note: See ***Section 4: Adjusting the Seat Height*** if adjustments are needed.

2 Safety

SAFETY SIGNAL WORDS

The following safety signal words indicate a safety message. The symbol alerts you to potential hazards. Failure to follow the warning may result in damage to property, injury, or death.

This manual contains many Warnings and Cautions concerning the consequences of failure to follow safety warnings. Because any fall can result in serious injury or even death, we do not repeat the warning of possible injury or death whenever the risk of falling is mentioned.

⚠ WARNING!

Indicates a hazard or unsafe practice that will result in severe injury or death. Failure to read, understand and follow the safety information in this manual may result in serious injury or death.

⚠ CAUTION!

Indicates a hazard or unsafe practice that could result in minor injury.

NOTICE

Indicates a hazard unrelated to personal injury, such as property damage.

USER RESPONSIBILITY

⚠ WARNING!

Do not install any kind of power plant or internal combustion engine to a bicycle. Adapting a bicycle in this manner poses an extreme safety risk to rider and could result in loss of control or death.

All persons assembling, using, and maintaining the bicycle must read and understand the safety warnings and operating instructions in this manual before using the bicycle.

It is the responsibility of the user, or in the case of a child rider, an adult, to ensure the bicycle is properly maintained and in proper operating condition. Doing so will reduce the risk of injury. Always conduct regular maintenance and inspection of your bicycle. Complete the Safety Checklist at the end of this section before each use.

A responsible adult must always supervise the use of the bicycle by a child. You must ensure:

- The child is wearing the proper protective attire and approved bicycle helmet.
- The child is seated securely and the bicycle is properly fitted to the child.
- The child understands applicable laws and common sense rules of safe responsible bicycling.

Quick-release Levers

⚠ WARNING!

Improper setup or maintenance of the quick-release levers may result in an unexpected movement, loss of control, and serious injury or death. Before riding always check that the quick-release lever is firmly locked in place and the seat does not move.

Wheels

1. Some bicycles will come equipped with quick-release levers for the front wheel. The wheels must be securely locked. Ensure the wheel quick-release lever is firmly locked in place. **Figure 1.3**

Seat Post

2. Ensure the seat post's ***minimum insertion marks*** are **not** visible above the quick-release seat clamp and the clamp is locked in place.

   Note: See ***Section 4: Adjusting the Seat Height*** if adjustments are needed.

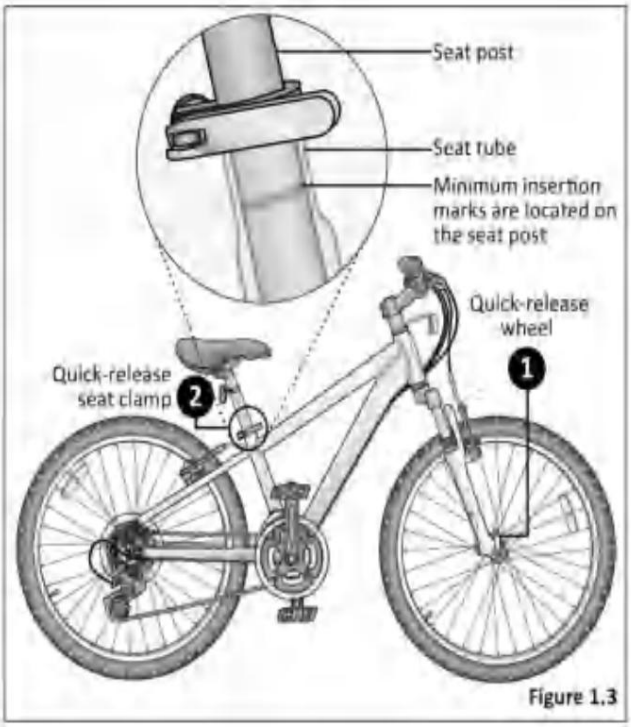

Figure 1.3

Machine Translated by Google

PERSONAL SAFETY

⚠ WARNING!

Riding a bicycle without protective gear, clothing, or a helmet may result in serious injury or death. Always wear protective gear, clothing, and helmet when riding the bicycle. Ensure protective gear does not interfere with steering, braking, and pedaling.

Protective Gear and Clothing

Always wear: Figure 1.4

- Colors that are easily seen and, if possible, reflective clothing.
- Clothing appropriate for the weather conditions.
- Use of protective gear such as pads for the knees and elbows is highly recommended for children.
- A properly fitted, ASTM or SNELL approved, bicycle helmet shall be worn at all times by riders of the bicycle.

Do not wear:

- Loose clothing parts, strings, or jewelry that may become entangled with moving parts on the bicycle or interfere with handling of the bicycle.
- Pants with loose pant legs. If necessary, always tuck pant legs into a sock or use a leg band to avoid the clothing becoming caught in the drive chain.
- Shoes with untied shoe laces.

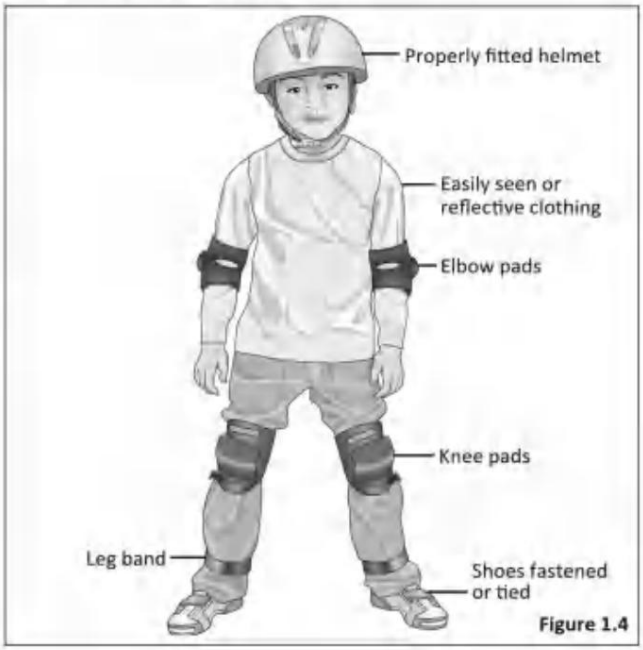

Figure 1.4

Helmet Use

Important! Many states and provinces have passed helmet laws. Make sure you know your state's helmet laws. It is your job to enforce these rules with your children. Even if your state/province does not have a children's helmet law, it is recommended that everyone wear a helmet when cycling. When riding with a child carrier seat or trailer, children must wear a helmet.
It is strongly advised that a properly fitting, ASTM or SNELL approved, bicycle safety helmet be worn at all times when riding your bicycle. In addition, if you are carrying a passenger in a child safety seat, they must also be wearing a helmet.

The correct helmet should: Figure 1.5

- Be comfortable
- Have good ventilation
- Fit correctly
- Cover forehead

Incorrect helmet position: Figure 1.6

- Helmet ***does not*** cover the forehead

Figure 1.5

Figure 1.6

Machine Translated by Google

Reflectors

⚠ WARNING!

Missing, damaged, or dirty reflectors will affect the ability of others to see and recognize you as a moving bicyclist, increasing the risk of being hit, serious injury or death. Always check the reflectors are in place and make sure they are clean, straight, unbroken and securely mounted before riding the bicycle.

Important! Federal regulations require every bicycle over 16 inches to be equipped with front, rear, wheel, and pedal reflectors. Many states require specific safety devices. It is your responsibility to familiarize yourself with the laws of the state where you ride and to comply with all applicable laws, including properly equipping yourself and your bike as the law requires. Bicycles under 16 inches are considered "sidewalk bicycles" and may not be fitted with reflectors. These bicycles should **not** be ridden on streets, at night or unsupervised by an adult.

Check and confirm the front and rear reflectors are in the correct position: **Figure 1.7**

- **Front Reflector:** Should aim forward (when viewed from above) and be mounted so it is within 5 degrees of vertical.
- **Rear Reflector:** Should aim straight back (when viewed from above) and be mounted so it is within 5 degrees of vertical.

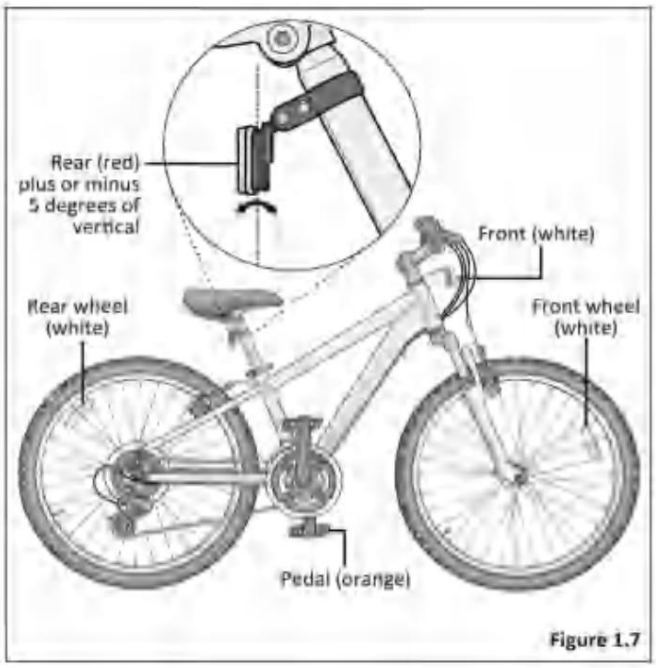

Figure 1.7

RIDING SAFETY

⚠ WARNING!

Riding the bicycle in unsafe conditions (i.e. at night), in an unsafe manner, or disregarding traffic laws may result in an unexpected movement, loss of control, and serious injury or death.

General Safety

- Familiarize yourself with all the bicycle's features before riding. Practice gear shifts, braking, and the use of toe clips and straps, if installed.
- Always ride defensively in a predictable, straight line. Never ride against traffic.
- Expect the unexpected (e.g., opening car doors or cars backing out of concealed driveways).
- Take extra care at intersections and when preparing to pass other vehicles.
- Maintain a comfortable stopping distance from all other riders, vehicles and objects. Safe braking distances and forces are subject to the prevailing weather conditions. Do not lock up the brakes. When braking, always apply the rear brake first, then the front. The front brake is more powerful and if it is not correctly applied, you may lose control and fall.
- Always use the correct hand signals to indicate turning or stopping.
- Obey the traffic laws (e.g., stopping at a red light or stop sign, giving way to pedestrians).
- Wear proper riding attire, reflective if possible, and avoid open toe shoes.
- Do not use items that may restrict your hearing and vision.
- Do not carry packages or passengers that will interfere with your visibility or control of the bicycle.

Road Conditions

- Be aware of road conditions. Concentrate on the path ahead. Avoid pot holes, gravel, wet road markings, oil, curbs, speed bumps, drain grates and other obstacles.
- Cross train tracks at a 90 degree angle or walk your bicycle across.

Wet Weather

- When riding in wet weather always wear reflective clothing and use safety lights to enhance visibility.
- Exercise extreme caution when riding in wet conditions.
- Ride at a slower speed. Turn corners gradually and avoid sudden braking.
- Brake earlier, it will take a longer distance to stop.
- Pot holes and slippery surfaces such as line markings and train tracks all become more hazardous when wet.

Always wear: Figure 1.4

- Colors that are easily seen and, if possible, reflective clothing.
- Clothing appropriate for the weather conditions.
- Use of protective gear such as pads for the knees and elbows is highly recommended for children.
- A properly fitted, ASTM or SNELL approved, bicycle helmet shall be worn at all times by riders of the bicycle.

Do not wear:

- Loose clothing parts, strings, or jewelry that may become entangled with moving parts on the bicycle or interfere with handling of the bicycle.
- Pants with loose pant legs. If necessary, always tuck pant legs into a sock or use a leg band to avoid the clothing becoming caught in the drive chain.
- Shoes with untied shoe laces.

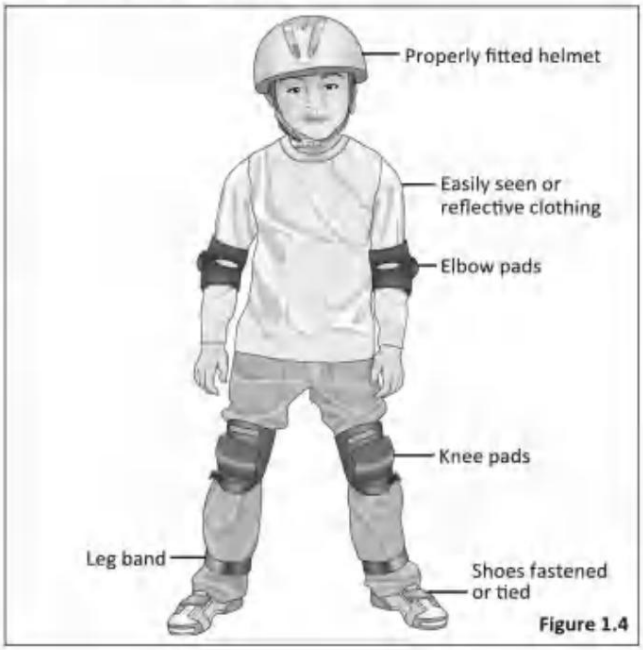

Figure 1.4

Helmet Use

Important! Many states and provinces have passed helmet laws. Make sure you know your state's helmet laws. It is your job to enforce these rules with your children. Even if your state/province does not have a children's helmet law, it is recommended that everyone wear a helmet when cycling. When riding with a child carrier seat or trailer, children must wear a helmet.
It is strongly advised that a properly fitting, ASTM or SNELL approved, bicycle safety helmet be worn at all times when riding your bicycle. In addition, if you are carrying a passenger in a child safety seat, they must also be wearing a helmet.

The correct helmet should: Figure 1.5

- Be comfortable
- Have good ventilation
- Fit correctly
- Cover forehead

Incorrect helmet position: Figure 1.6

- Helmet ***does not*** cover the forehead

Reflectors

⚠ WARNING!

Missing, damaged, or dirty reflectors will affect the ability of others to see and recognize you as a moving bicyclist, increasing the risk of being hit, serious injury or death. Always check the reflectors are in place and make sure they are clean, straight, unbroken and securely mounted before riding the bicycle.

Important! Federal regulations require every bicycle over 16 inches to be equipped with front, rear, wheel, and pedal reflectors. Many states require specific safety devices. It is your responsibility to familiarize yourself with the laws of the state where you ride and to comply with all applicable laws, including properly equipping yourself and your bike as the law requires. Bicycles under 16 inches are considered "sidewalk bicycles" and may not be fitted with reflectors. These bicycles should **not** be ridden on streets, at night or unsupervised by an adult.

Check and confirm the front and rear reflectors are in the correct position: **Figure 1.7**

- **Front Reflector:** Should aim forward (when viewed from above) and be mounted so it is within 5 degrees of vertical.
- **Rear Reflector:** Should aim straight back (when viewed from above) and be mounted so it is within 5 degrees of vertical.

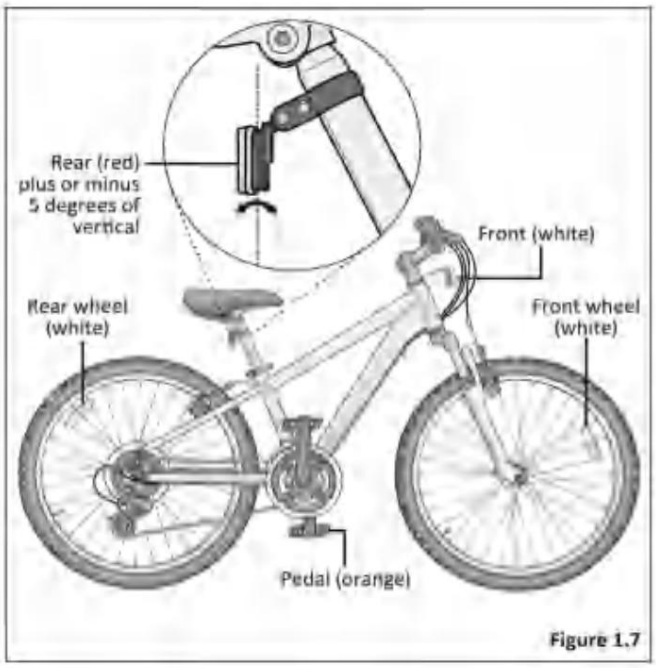

Figure 1.7

RIDING SAFETY

⚠ WARNING!

Riding the bicycle in unsafe conditions (i.e. at night), in an unsafe manner, or disregarding traffic laws may result in an unexpected movement, loss of control, and serious injury or death.

General Safety

- Familiarize yourself with all the bicycle's features before riding. Practice gear shifts, braking, and the use of toe clips and straps, if installed.
- Always ride defensively in a predictable, straight line. Never ride against traffic.
- Expect the unexpected (e.g., opening car doors or cars backing out of concealed driveways).
- Take extra care at intersections and when preparing to pass other vehicles.
- Maintain a comfortable stopping distance from all other riders, vehicles and objects. Safe braking distances and forces are subject to the prevailing weather conditions. Do not lock up the brakes. When braking, always apply the rear brake first, then the front. The front brake is more powerful and if it is not correctly applied, you may lose control and fall.
- Always use the correct hand signals to indicate turning or stopping.
- Obey the traffic laws (e.g., stopping at a red light or stop sign, giving way to pedestrians).
- Wear proper riding attire, reflective if possible, and avoid open toe shoes.
- Do not use items that may restrict your hearing and vision.
- Do not carry packages or passengers that will interfere with your visibility or control of the bicycle.

Road Conditions

- Be aware of road conditions. Concentrate on the path ahead. Avoid pot holes, gravel, wet road markings, oil, curbs, speed bumps, drain grates and other obstacles.
- Cross train tracks at a 90 degree angle or walk your bicycle across.

Wet Weather

- When riding in wet weather always wear reflective clothing and use safety lights to enhance visibility.
- Exercise extreme caution when riding in wet conditions.
- Ride at a slower speed. Turn corners gradually and avoid sudden braking.
- Brake earlier, it will take a longer distance to stop.
- Pot holes and slippery surfaces such as line markings and train tracks all become more hazardous when wet.
