- Children must always use the equipment under adult supervision.
- Do not attempt to repair damaged or worn components yourself.
- Do not modify the equipment.
- Use the equipment only for its intended purpose.
- Consult a coach or qualified professional before attempting new or advanced skills.
- Only one person should use the equipment at a time.
- Activities involving height and motion carry inherent risks. Serious injury, paralysis, or death may occur from improper or proper use.
- The manufacturer is not responsible for injury or damage resulting from misuse of this equipment.

Rule 3: Have Fun

Practice safely and enjoy your training.

Before Starting

Leg configurations setting:

Adjustable to 17.7 in, 20 in, 22 in, or 24 in.

IMPORTANT NOTE:

- The actual lowest usable height in adjustable mode is approximately 17.7 inches, based on the lowest hole position and assembly design.
- This may vary slightly depending on floor surface and installation.

Step 1

- Position the posts on the beam, aligning them with the four holes. Ensure the holes on the posts face toward the ends of the beam.

Register Product

Thank you for choosing PyleUSA. By registering your product, you ensure that you receive the full benefits of our exclusive warranty and personalized customer support. Complete the form to access expert support and to keep your PyleUSA purchase in perfect condition.

- Loosely install four bolts with lock washers and flat washers.

C. Repeat for the second post.

- Tighten all bolts securely.

Step 2

- Slide the support over the post.

- Adjust to the desired height and insert the hand-tightened bolt into the corresponding hole.

- Tighten the hand bolt securely.

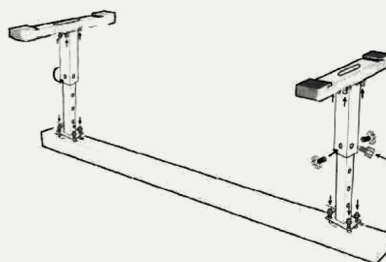

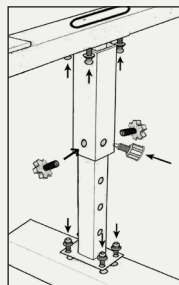

Step 3

- Align the four holes in the feet with the holes in the support base.

- Loosely install the bolts with lock washers and flat washers into each foot.

- Tighten all bolts securely.

- Turn the beam upright. The assembly is complete.
