sanag S8S AI

Packing List

Specifications

Bluetooth version: V6.0	Charging cradle battery capacity: 400mAh
Earphone battery capacity: 39mAh	Charging cradle input: 5V=0.5A
FCC ID: 2BNT0-S8S-ULTRA	Transmission distance: 10 meters (unobstructed)

Automatic Power On And Pairing

- Open the charging case lid. The earbuds will automatically power on and enter pairing mode.
 - When the earphones are pairing, the ice blue light on the main earphone flashes and the light on the secondary earphone is off.
- * Manual pairing: Place both earbuds in the charging case with the lid open. Press and hold the charging case button for 6 seconds. When the red light on the case turns solid red for 3 seconds, release the button. The ice-blue light will flash and the earbuds will begin pairing.

- Open your phone's Bluetooth settings, search for the pairing name "sanag S8S AI," and tap Connect.
- The next time you use it, open the charging case and the earbuds will automatically reconnect.

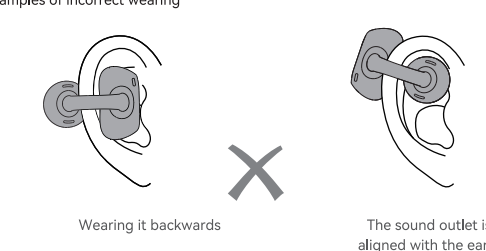

How To Wear Headphones Correctly

Do not bend or stretch the ear hooks excessively to ensure the best fit.

- Long press for 3 seconds: Voice Assistant
- Click: Interrupt AI voice conversation

Charge The Charging Case

- Please bring your own 5V/2A internal adapter and the included Type-C charging cable to charge the charging case.
- Charging: ≤70% battery, the orange light is always on
- >70% battery life: ice blue light is always on
- After full charge: light goes out

Other More Features

Manual startup

- If the earbuds do not power on automatically when you remove them from the charging case, press and hold the Touch button (on both earbuds) for 3 seconds to power them on.
- * Auto Power Off: If the headset is not connected to the device for more than 1 minutes, the headset will automatically shut down.

Game Mode

- Download and install the Sanag App, connect the headset, and turn on the game mode in the App device interface.

Restore factory settings

- Place both earphones in the charging case, open the case cover, press and hold the charging case button for 9 seconds. The charging case indicator light will turn orange for 3 seconds and then flash 3 times quickly. The earphones will be restored to factory settings.

Charging case power display

- 50%-100%: Ice blue light
- 21%-50%: Orange light
- ≤20%: Red light

APP Operation Guide

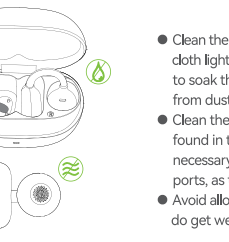

- APP operation: 1. After connecting the earbuds to your device, access the sanag app to enable dual-device connection.
- 2. Select Connect New Device and follow the app's instructions to establish a connection with the second device.

● Device connection:

1. Turn on your phone's Bluetooth and connect to the sanag S8S AI.
2. Open the app, tap Add Device, and authorize the relevant permissions.
3. Wait 5-10 seconds for the devices to connect.

In Order To Maintain Good Product Performance, It Is Recommended That You Clean And Maintain The Headset Regularly

- Clean the earphones by gently wiping them with a soft cloth lightly dampened with clean water. Be careful not to soak the earphones in water and keep them away from dust and moisture.
- Clean the earphone ports. If dust or foreign matter is found in the ports, remove them with tweezers if necessary. Avoid blowing or inhaling forcefully on the ports, as this may damage the earphones.
- Avoid allowing moisture to enter the earphones. If they do get wet, dry them thoroughly before using them.

Precautions

- Avoid exposure to high temperatures, sunlight, or chemical cleaning agents.
 - Keep the product dry and away from moisture.
 - Store in the original protective case to minimize impact and dust accumulation.
 - Regular maintenance maintains sound quality and prevents damage to electronic components.
- * If you encounter any problems during cleaning or use, please contact our customer service. We will be happy to assist you.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

Thank You!
