Product Specifications

Li-Battery capacity: 10000mAh (3.85V/38.5Wh)

Rated capacity: 6000mAh (5V=2A)

Conversion: ≥60% (5V=2A) Total Output: 20W (Max)

Type-C output: 5V=3A/9V=2.2A/12V=1.67A

Wireless charging output: 2.5W/5W/7.5W/10W/15W

Type-C input: 5V=3A/9V=2A

Product size: (5000mAh) 104*66*7.8mm

Product size: (10000mAh) 104*66*13.5mm

WARNING

- (1) Improper use may cause the battery to malfunction, overheat, or even catch fire or explode.
- (2) Do not allow children to use this product alone
- (3) The magnetic power bank may generate a small amount of heat during the charging process, but this is usually within safe limits and will not cause any harm to your device.
- (4) Before connecting the product to a power source, please check that the power supply voltage matches the voltage labeled on the product.
- (5) When charging the product, please make sure to use a charger that meets local safety standards to prevent electric shock or damage to the battery.
- (6) Do not expose the magnetic power bank to pressure, impact, strong vibration, or liquids. Any of these conditions may cause the product to short-circuit or damage the battery or circuitry. When this happens, stop using the product immediately and dispose of it properly.
- (7) When the product expands, deforms, leaks, or significantly reduces its capacity, stop using it immediately and dispose of it properly.
- (8) Do not charge or discharge the product in places that may affect the dissipation of heat (e.g., pants pockets, closed bags, beds, sofas).

06

- (9) Make sure the product is not covered by clothing, pillows, bedding or other debris during this process.
- (10) Do not disassemble the product yourself or subject it to pressure, shock, strong vibration, liquids, fire and other heat sources (such as stoves, heaters) or ambient temperatures above 35°C (95°F).
- (11) Do not place the magnetic power bank in a vehicle or other place under direct sunlight when the temperature is high.
- (12) The magnetic power bank contains a lithium polymer battery. Do not open the case under any circumstances that could damage the battery or jeopardize safety.
- (13) In order to ensure a better experience, prevent harm to the user or others and cause financial loss, please do not change the way of using the magnetic power bank, and please observe the above precautions.
- (14) Avoid prolonged exposure to high or low temperatures, so as not

07

FCC Warning

- 15.19 Labeling requirements.
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.
15.21 Information to user.
Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
15.105 Information to the user.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment

08

- and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.
FCC RF Radiation Exposure Statement:
1. This Transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
2. This equipment complies with RF radiation exposure limits set forth for an uncontrolled environment.
3. This equipment should be installed and operated with minimum distance 5mm between the radiator and your body.
