

Gen2 Bibi magnet wireless pad User Manual

1. Product Introduction

This product is an electromagnetic induction wireless charging transmitter, designed for wirelessly powering electronic devices with built-in wireless charging function. With intelligent power identification, overheating protection and foreign object detection functions, it provides safe, stable and efficient wireless charging for daily and office use.

2. Specifications

Model: BQ2-WHT

USB C Input: 5Vdc,3A, 9Vdc,2.22A

Wireless Output:5W/7.5W/15W

FCC ID: 2A9G4-BQ2

Made in Vietnam

3. Safety Precautions

- Do not place metal objects, magnetic cards or any magnetic accessories on the charging area.
- Do not disassemble, modify or impact the product arbitrarily.
- Keep the product away from high temperature, humid and dusty environments.
- Thick or metal protective cases may affect charging performance, please remove before charging.
- Unplug the power supply if the product is not in use for a long time.
- Keep this device out of the reach of children.
- Slight heat generation during charging is normal. Stop using immediately if abnormal heat, odor or malfunction occurs.

4. Troubleshooting

- No charging: Check power connection, re-center the device, and remove foreign objects on the charging pad.

- Intermittent charging: Adjust device position and remove metal or magnetic accessories.
- Overheating: Stop charging and place the product in a ventilated area to cool down.

FCC Compliance Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and

used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure Compliance:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with

minimum distance 20cm between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
