Frequently Asked Questions

Fail to turn on/control the light strip

1. Check if the power supply is plugged in.
2. Check if the data cable is connected correctly and if the signal source (TV box, game console, laptop, projector, etc.) is working properly.
3. Check if the USB cable of the light strip is plugged in tightly
4. Check if the HDMI port of the sync box is connected to the TV.
5. Press and hold the 'switch' button for 5 seconds to restore the sync box to its factory default settings. Then use the remote control to control it.
6. If the indicator light is not on, it means that the controller has not detected the signal of the port. Please check if the signal source and output device are connected properly (the power port needs to be plugged in before detection)

Colors of the light strip are not in sync with the TV

Check if the installation direction is the same as the direction showed in the user manual. Please refer to "Installation Steps".

Fail to have screen sync light effects when using TV's built-in app

1. This product needs to be connected to any device such as TVBOX, PS4, PC, etc. through an HDMI cable to connect the signal with Syncbox and use the light synchronization function. The built-in TV application cannot use the light synchronization function.

Return and Refund Policy

1. If you are not satisfied with the product you purchased, please return the intact product for a refund. The returned product must come with its original packaging, which includes all accessories, gifts, invoices, and instructions.
2. In the event of product damage caused by improper personal management, refunds will not be processed. If you receive a product with quality issues, you can contact customer service by phone for assistance
3. If you have applied for a return or exchange, please keep your phone open after the application is successful so that we can contact you.

Kind reminder : For your benefit, please carefully count and inspect the goods you ordered after receiving them. If there are any issues with product delivery, packaging damage, or incorrect quantity, please promptly report them to the delivery personnel in person so that we can handle them as soon as possible.

Warranty Terms

Register the product you have purchased and enjoy a one-year free warranty service from the date of purchase (excluding accessories)

During the warranty period, if there is any non-human damage to Haocheng's product performance, the following three guarantee services can be enjoyed:

1. Within 7 days (including 7 days) from the date of purchase, if the product experiences performance faults that are not caused by human factors, you can choose to refund the full payment at once according to the invoice price or replace it with a product of the same model and specifications, or choose free repair.
2. From the 8th day to the 15th day (including the 15th day) from the date of purchase, if the product experiences performance failures that are not caused by human factors, you can choose to replace it with a product of the same model and specifications, or choose free repair.
3. The starting date of product warranty is based on the invoice issuance date. If the last day of the warranty validity period falls on a statutory holiday, the day after the holiday shall be the last day of the validity period.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
