

Motorcycle CarPlay/Android Auto SMART SCREEN

User's Manual

❖ Product Overview

Specialized Carplay & Android Auto screen for motorcycles, audio output via: Bluetooth headphones / motorcycle Bluetooth helmet / motorcycle-specific Bluetooth speaker. Wireless control APP - Elook Pro for remote viewing (with rear and front recorder MAX+ version as an optional feature), wired peripheral remote control (optional), GPS (optional), tire pressure warning (optional).

❖ Host Installation

1. Fix the main unit to the handlebars. If the handlebars have a narrow position or the diameter does not match, it is necessary to consider purchasing additional fixing accessories to ensure the safety and stability of the installation.
2. Connect the power cord to the positive and negative terminals of the motorcycle's power supply. If there is an ACC line version, connect it to the ACC line of the key. Try to place the wire connection points in a dry and clean environment. After installation, the wires should be hidden within the decorative panel or fixed with cable ties to prevent accidental touching.
3. If you order the GPS version (steering wheel remote control version), please place the GPS antenna (steering wheel remote control version) in an area without metal coverage to ensure the stability of the product's signal.

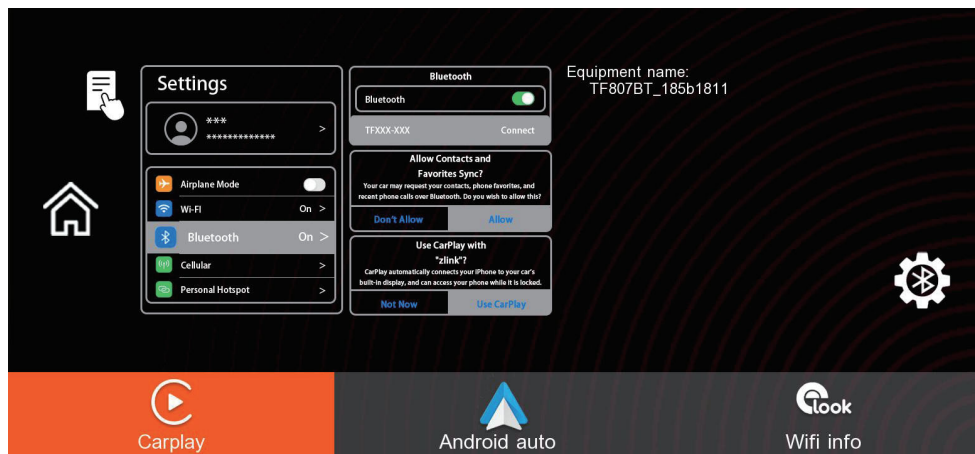

❖ Function Description

1. Wireless CARPLAY

Wireless Carplay connection steps

- (1) Select the Carplay function in the connection menu.
- (2) Turn on the Bluetooth and WIFI switches on your phone.
- (3) Connect to the corresponding Bluetooth name (TF811_xxx/KPL_xxx). Bluetooth connection does not require a password. After successful Bluetooth connection, no further actions are needed.
- (5) After the Bluetooth connection, wait for your phone to activate the Carplay function. This usually takes 8-12 seconds for screen mirroring (the initial connection time may be longer).
- (6) After the connection is successful, the device may restart and automatically reconnect. This is a normal phenomenon during the first connection.
- (7) If you need to disconnect Carplay, turn off the Bluetooth and WIFI on your phone, or ignore the Bluetooth device on your phone after turning off WIFI.

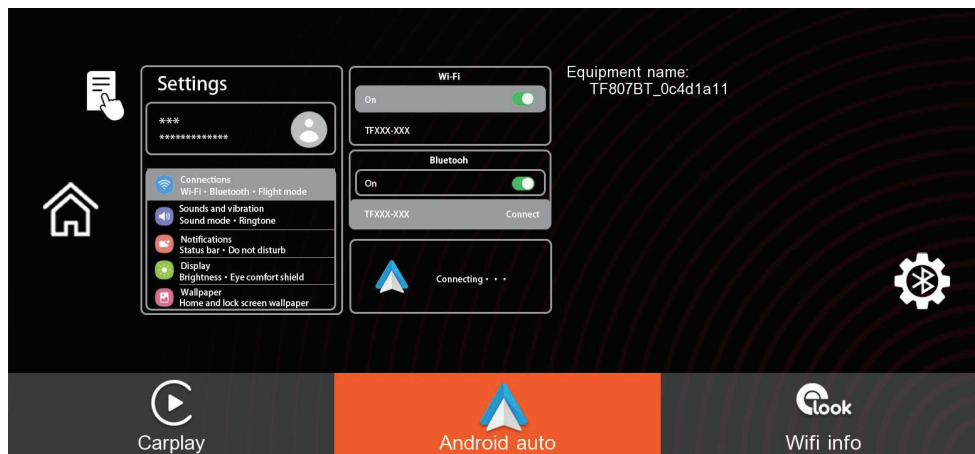

Note: make sure your iPhone is iPhone 6 or above.

2. Android Auto

Wireless Android Auto connection steps

- (1) Select the Android Auto function in the connection menu.
- (2) Turn on the Bluetooth and WIFI switches on your phone.
- (3) Connect to the corresponding Bluetooth name (TF811_xxx/KPL_xxx). Bluetooth connection does not require a password. After successful Bluetooth connection, no further actions are needed.
- (5) After the Bluetooth connection, wait for your phone to activate the Carplay function. This usually takes 8-12 seconds for screen mirroring (the initial connection time may be longer).
- (6) After the connection is successful, the device may restart and automatically reconnect. This is a normal phenomenon during the first connection.
- (7) If you need to disconnect Android Auto, turn off the Bluetooth and WIFI on your phone, or ignore the Bluetooth device on your phone after turning off WIFI.

Note: make sure your Android smart phone support ANDROID 10.0 or above system.

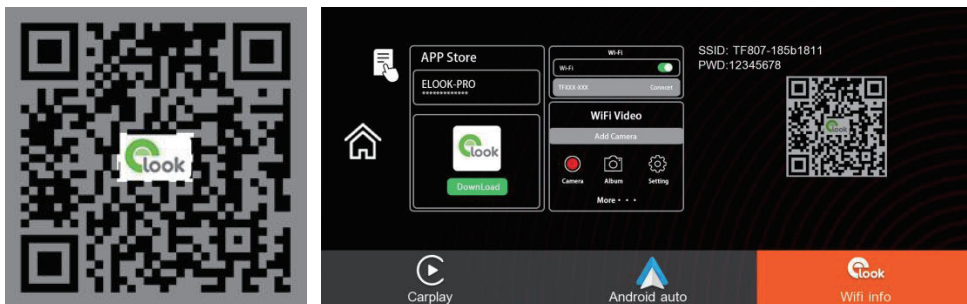

Wireless Elook Pro APP

Available in the MAX+ version which includes front and rear recorders as an optional feature

Elook Pro APP Connection Steps

- (1) 1. Select the WiFi Info function in the mobile device's connection menu.
- (2) 2. Connect the car's WiFi hotspot (TF807-XXX) on the mobile device. The default password is: 12345678.
- (3) 3. Scan the QR code to download the apk file and click on "Connect Device".
- (4) 4. Support real-time preview, control the machine, and save the machine's videos and pictures to the mobile device.
- (5) Instructions for controlling the machine:
- (6) Click the symbol in the preview interface on the mobile device. 
- (7) Instructions for saving pictures to the mobile device:
- (8) Click the symbol in the preview interface on the mobile device. 
- (9) Select the picture or video for saving and deletion.

Note: This function can only be used with the models equipped with front and rear recorders as an optional feature.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
