

AL08-W

Quick Start Guide

Smart Doorbell

Download and login

01

Kindly select your preferred method to download the App before establishing a connection with the device.

Scan code download

Scan the QR code to download the APP

App Store download

Search in Apple Store or Google Play and download

Apple Store Google Play

Sign up and log in

Open the app , use the third-party shortcut to log in or register an account

App will be updated continuously, and the interface is subject to App

Add a new device / Scan code

02

When connecting the device, make sure the device is powered on.

Step 1
Click the Add button

Step 2
Scan the QR code of the fuselage

Step 3
Select the Wi-Fi to connect to and enter the password

Step4
Show the QR code to the device lens, When you hear the beep, click next

Step5
Wait for the distribution network and the addition to complete

If adding fails, try
1. Reconnect the power supply of the device once to ensure that it is powered on;
2. Check whether the Wi-Fi connected to the device can access the Internet normally
3. Check if the Wi-Fi password is entered correctly

After trying the above methods, it still fails, it is recommended to contact the online customer service for help

Step6
After waiting for the search, select the connected device

Step7
Select the Wi-Fi to connect to and enter the password

Step8
Wait for the distribution network and the addition to complete

Common problem

04

If the following methods still don't solve your problem, please contact the customer service of the camera you purchased, or contact the online customer service in the App, and we will solve it for you as soon as possible.

Problems	Solution
What should I do if the device is sun successfully added?	check whether the Wi-Fi password is correct, and the network can be connected correctly, then RESET the camera, and add it again after completion.
How to download video?	Click the "Record Screen" button during playback, and click the red button after recording, and the video file will be saved to the phone;
What if the display device is offline?	First confirm whether the power supply and network are normal, and there is no problem before powering off the camera and restarting it. If the connection is still disconnected after restarting, please remove the camera from the APP and add it again.
The memory card is full, what should I do?	No manual processing is required. When the remaining memory card capacity is less than or equal to 500M, the camera will automatically overwrite the oldest video file.
What should I do if I cannot receive the warning	1. Confirm that the message in the App device settings is on 2. Apple mobile phone: In the mobile phone settings, find the application and enable the "message notification" permission. Log out of and log in again. Android phone: In the message notification, find and enable the "Allow Notification" permission. Alarm messages are stored for up to 7 days
How to share the device with others?	Click share and send the link to the sharer. The sharer can complete the operation step by step according to the content of the connection. Share up to 10 people per device

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
