## How To Use

**Step 1:** Connect the receiver to the phone's USB-C port to power it. The microphone will auto pair with the receiver. The receiver will turn off after being unplugged.

**NOTE:** For Oppo / Vivo / iQOO / realme brand mobile phones must go to the settings to enable OTG power supply for the receiver to work.

**Step 2:** Press the power button for 3 seconds to turn the microphone on. The indicator light will turn blue when powered on. To turn the microphone off, press the power button for 3 seconds.

**Reverb Mode:** Press the power button twice to enter reverb mode.

## How To Use Cont.

**Step 3:** Open the phone camera, livestreaming apps or other apps to use the microphone. To pause recording, press the power button once.

**NOTE:** The indicator light on the receiver will remain on when plugged in.

**NOTE:** Wireless receiver's USB-C port can be used as bypass charging port for your phone to charge during your recording session.

### Specifications

Size(Case): 3.35 X 1.54 X 2.01 inches  
Product Weight: 4.16 oz  
Frequency range: 20-20 KHz  
Charging input voltage: DC 5 V  
Battery full charge voltage: 4.1-4.25 V  
Charging time: approximately 90 minutes  
Charging interface: USB-C

## Light Indicator

### Microphone

Function	Light
Power On	Red and blue light flash alternately

## MVMT PRO STUDIO DUAL WIRELESS MICROPHONES

2x Wireless Plug & Play Microphones  
with USB-C Receiver and Charging Case

This device complies with part 15 of the FCC Rules, FCC ID: 2BMOI-Q8  
Operation is subject to the following two conditions:  
(1) This device may not cause harmful interference, and  
(2) This device must accept any interference received, including interference that may cause undesired operation.  
Noted: Changed or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this device. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.  
These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:  
- Reorient or relocate the receiving antenna.  
- Increase the separation between the equipment and receiver.  
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.  
- Consult the dealer or an experienced radio/TV technician for help.  
The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
