Speaker With Wireless ChargerX1 2. User manual X1 3. C-to-C quick charging cable X 1	FAQ 1. If you're experiencing interrupted or slow charging, check the following: (1) The back of your devices should not have any metal, pop sockets, or credit cards (2) Put the devices in the center of the charging surface (this lets the charging coil in your devices line up with the one inside the wireless charger) (3) Check whether the adapter is QC3.0 fast charger 2. If you're failing to charge your device, please try out the following: (1) Please restart your cell phone and test with other Type-C charging cable. (2) Please check whether the indicator turns on or not. (3) Please check if the adapter is a QC3.0 fast charger 3. Charging slow: harging efficiency depends on the receiving power of your devices, and do not keep those apps keep running during charging. 4. The phone is charging intermittently, or the indicator light flashes. If the charging current is not enough, please use a adapter with sufficient power 5V/3A or 9V/3A above. 5. Charging fever: It is normal for the receiving coil or transmitter board to generate heat during wireless charging. If the wireless charger is too hot, please take your devices off, when the wireless charger is cooled down, please charge it again.	SAFETY NOTICE 1. Do not disassemble or throw the product into fire or water to avoid short circuit. 2. Do not use wireless charger in extremely hot, humid or corrosive environment. 3. Make sure there are no any metal, pop rings, credit cards or magnetic interference charges. 4. Keep out of reach of children and pets. 5. If the charging station overheats and stops charging during use, please remove the charging device and try charging after cooling down. 6. Avoid dropping the product from high place. 7. Use in -20~+40°C temperature environment. 8. No charger does not work. Do not put metal objects or magnetic cards on the charging area. If the product does not work due to overheating, please take off the phone and charge it again when it is cooled down. 9. If there are another problems, please contact our after-sales for solution.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation. Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: --Reorient or relocate the receiving antenna. --Increase the separation between the equipment and receiver. --Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. --Consult the dealer or an experienced radio/TV technician for help. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC Radiation Exposure Statement This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. For BT function, the device has been evaluated to meet general RF exposure requirement. The device can be used without restriction. For wireless charger function, the device has been evaluated to meet general RF exposure requirement. This device must operate with a minimum distance of 20 cm between the radiator and user body.
