Safety Instructions</div><div><p>Thank you for purchasing Runotar Arm-type Electronic Blood Pressure Monitor.</p><p>⚠️ Avoid dropping the device or subjecting it to strong impacts.</p><p>⚠️ This device is not a direct diagnostic device. It is only suitable for monitoring the blood pressure and pulse rate of adults. The measurement results should not be used for self-diagnosis or treatment. Please follow your doctor's advice.</p></div><div><p>Blood pressure is an important indicator of the human circulatory system. The home blood pressure monitor is easy to use regularly. It is crucial for preventing cardiovascular disease, encouraging hypertension patients to seek treatment, and managing high blood pressure.</p><p>Blood pressure fluctuates continuously throughout the day and night. The highest values typically occur during the day and the lowest at midnight. It is recommended that you measure your blood pressure at roughly the same time each day.</p><p>Various activities such as physical exercise, excitement, stress, eating, drinking, smoking, body posture, and other factors (including taking a blood pressure measurement) can influence blood pressure readings. Due to these factors, it is uncommon to obtain identical blood pressure readings in multiple measurements.</p><table><caption>Definition and Classification of Blood Pressure Levels from                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Hypertension Grade II (Medium) | 160-179                                                                                                                                                                        | 100-109 | Hypertension Grade III (Serious)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | ≥180 | ≥110   | Isolated Systolic Hypertension | ≥140     | <90 | <div><div>2. Working Principle</div><div><p>The Electronic Blood Pressure Monitor adopts the principle of oscillometric method, receives the blood pressure signal in the armband (cuff) through the pressure sensor, and measures the systolic blood pressure and diastolic blood pressure of the human body after processing by the chip. During the process of measuring blood pressure, the blood pressure sensor detects the number of pulsations of arterial blood vessels, and then converts them into the number of pulsations within a minute to achieve pulse rate measurement.</p></div></div> |                                                                                | <div><div>3. Intended Purpose</div><div><p>This device is a digital monitor intended for use in measuring blood pressure and pulse rate in adult patient population who can understand this instruction manual with the arm circumference range printed on the arm cuff.</p><p>Population: Adult, not including pregnant patients.</p><p>Contraindications: No known contraindications.</p><p>Side effects: Not applicable.</p></div></div> |                        | <div><div>4. Product Introduction</div><div><p>Product Name: Electronic Blood Pressure Monitor</p><p>Model: BP-202</p><p>This equipment is composed of a main body and a cuff. The main body is composed of a central processing unit, a pressure sensor, an air pump, a solenoid valve, a uniform speed vent valve, a PCB board, and an TFT display.</p></div></div> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | <div><div>5.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 2 users with 99 memories each | Measure Time   | Approx. 60s              | Auto off                  | Auto power off after 60 seconds of inactivity | Cuff Specification | Approx. 22 to 42cm (8.6" to 16.5") | Dimension             | Approx. 132mm (l) × 71mm (w) × 93mm (h) (5.2" × 2.8" × 3.7") | Weight       | Approx. 248g (Included cuff) | Package List | USB-C cable, Instruction manual | Lifetime                      | 5 years | <div>2) The screen will display 0.0kPa, indicating successful switching.</div> <div>3) Press the "SET" button to save and proceed to the next setting.</div> <div><div>8.2 User Switching</div><div>1) After completing the previous setting, enter the user setting.</div><div>2) Press the "START/STOP" button to switch between "1" and "2" users. 3) Press the "SET" button to save and proceed to the next setting.</div><div><div>8.3 Date/Time Setting</div><div>1) After completing the previous setting, enter the date setting (year, month, day).</div><div>2) Press the "START/STOP" button to adjust the year, then press the "SET" button to enter the month setting.</div><div>3) Press the "START/STOP" button to adjust the month, then press the "SET" button to enter the day setting.</div><div>4) Press the "START/STOP" button to adjust the day, then press the "SET" button to save and proceed to the next setting.</div><div>5) Press the "START/STOP" button to switch between 12-hour and 24-hour format.</div><div>6) Press the "SET" button to save and proceed to the hour setting.</div><div>7) Press the "START/STOP" button to adjust the hour, then press the "SET" button to enter the minute setting.</div><div>8) Press the "START/STOP" button to adjust the minute.</div><div>9) Press the "SET" button to save and proceed to the next setting.</div><div><div>8.4 Voice Settings</div><div>1) After completing the previous setting, enter the voice settings.</div><div>2) Press the "START/STOP" button to switch between ON and OFF.</div><div>3) Press the "SET" button to save and proceed to the next step.</div><div><div>8.5 Clearing Memory Data</div><div>1) After completing the previous setting, enter the memory deletion setting.</div><div>2) Press and hold the "START/STOP" and "SET" buttons simultaneously for 2 seconds. When the screen displays "--", all memory data has been successfully deleted.</div><div>3) Press the "SET" button to save and turn off the device.</div></div><div>Note: Memory deletion will permanently erase all stored measurement data for all users on this device.</div></div></div></div> |                                | <div><div>8.6 Viewing Stored Memory</div><div>1) Short press the "SET" button to enter the memory viewing mode to check the measurement data stored on the device.</div></div> |         | <div><div>9. Blood Pressure Measurement Method</div><div><div>9.1 Check and Prepare Before Measurement</div><div>1) Avoid exercising, bathing, drinking stimulating drinks (such as coffee or alcohol), and smoking within 30 minutes before the measurement.</div><div>2) Rest in a comfortable and stable environment for at least 5 minutes before the measurement.</div><div>3) Remove light-fitting or thick clothing from your arm, bare the upper arm or wear thin shirts for the measurement.</div><div>4) Sit in a chair with your feet flat on the floor and arms on the table.</div><div><div>9.2 Apply the Cuff</div><div>1) Unfold the cuff into a loop and ensure it is open wide enough for your arm to fit in.</div><div>2) Wrap the cuff around the upper arm. Make sure the bottom edge of the cuff is 2 cm to 3 cm (approx. 1 inch) above the inner elbow.</div><div>3) Secure the cuff with the fabric fastener. Leave enough space to fit one finger between the cuff and your arm.</div><div><div>Correct measurement posture:</div><div>A. Rest your elbows on the table.</div><div>B. Align the cuff with your heart height.</div><div>C. Relax your body with palms facing up.</div></div></div></div><div>Note: During inflation, please keep your arm still to ensure accurate readings. Any movement may affect the measurement. Feeling the cuff pressure is normal during inflation. Refer to the "Error and Fault Troubleshooting" section for error indications.</div><div>2) The device will stop automatically after full inflation and proceed to detect your pulse rate. Once the measurement is complete, your blood pressure and pulse values will be displayed.</div><div><div>10. Error and Fault Troubleshooting</div><div><table><thead><tr><th>Symbol</th><th>Cause</th><th>Solution</th></tr></thead><tbody><tr><td>ER1</td><td>Abnormal sensor signal</td><td>Check whether the cuff is normal and whether it is worn correctly, re-measure.</td></tr><tr><td>ER2</td><td>No measurement results</td><td>Check whether the cuff is normal, whether it is worn correctly, whether the blood pressure monitor communicates with heart. #### FCC Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is

dealer or an experienced radio/TV technician for help.

as been evaluated to meet general RF exposure requirement. The device can be used exposure condition without restriction.
