Please read carefully before using

FCC Caution.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1) The device may not cause harmful interference, and

2) The device must accept, and be able to operate, with any interference that may be received, including interference from radio transmitters.

Any change or modification not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, which provides for the protection against harmful interference in a residential installation. This equipment generates and can use radio frequency energy and, if not properly installed or used, it may cause interference to radio communications. However, there is a negligible potential for these digital devices to cause harmful, unintended interference which can be minimized by following the operating instructions in this manual. Repairs or alterations to this equipment may void the user's authority to operate this equipment.

Caution: Do not attempt to modify the equipment or its operation. Repairs or alterations to this equipment may void the user's authority to operate this equipment.

* **RF warning for Mobile device:**

The equipment complies with FCC exposure limits for human exposure to radio frequency electromagnetic fields. The equipment should be installed and operated with minimum distance 15cm between the surface of the body and the equipment.
