Do not discard it at will, or put it at high temperature (temperature above 60 degrees) and fire to avoid danger; Do not disassemble, repair or modify this product yourself.

Warning: The rechargeable batteries of this product must be disposed of properly for recycling, Please do not put the battery in the fire to avoid explosion.

Use tips to share

① Because of the 2.4GHz radio wave used by Bluetooth, the equipment using this band is more common (such as wireless WIFI, etc.), the headset is easily interfered, and here may be discontinuities, which is correct. If you are unable to recover, stay away from this environment or reconnect.

② After the Bluetooth headset is turned on, it will automatically connect to the phone that was paired last time. If you want to pair with another phone, please turn off the Bluetooth of the original phone. When the Bluetooth headset is turned on, other phones can search for devices by turning on Bluetooth.

③ When not using the headset, put the headset in the charging case, and the headset will automatically shut down and recharge the battery. If you do not have a charging case, you can manually disconnect the Bluetooth connection, and the headset will automatically shut down after about 5 minutes.

④ If you feel that the sound quality is poor for the first time, here is no heavy bass, or it is uncomfortable to wear and easy to fall, etc. It is recommended that you move and adjust the earphones to make the sound outlet closer to the ear canal.
