Directions For Use

The whole handset surface is a touch panel. If there is no touch within 10 seconds, the screen is locked and all keys are locked correspondingly. You can touch “ⓘ” keys to unlock screen. When screen lightened, all keys unlocked and handset enter operation state.

Display Screen

Display the height value of the desk.

Up & Down Key

Please keep pressing UP/DOWN key to adjust desk height until you get an optimum height.

Memory Key

After seting memory keys, the desk can lift automatically to memory height.

How to Set Memory Mode

Click the “ⓘ” key when running to a specific point. The display screen displays “S-” and “-” flashes. At this time, press “ ” button to store the position to the corresponding label. the memory height is successfully saved,Then light press “ ”, the desk moves to memory height automatically.

Set Key ⓘ

Press the “ⓘ” key when memory bits and internal parameters need to be set.

Initialisation

1. When “RST” is on the display screen, press the “↓” button until the desk frame reaches its lowest point. After hearing the “di” sound and desk frame rebounds, initialization is completed.
(P.S. The button cannot be released during this operation, otherwise the initialization will fail)
2. Forced initialization: Press the “↓” button until the desk frame reaches its lowest point, then release the button and press it again for about 5 seconds until hear the “di” sound and desk frame rebound, and the initialization is completed.
3. Restore the factory settings: When new controller is changed or the parameters need to be restored to the factory settings, press the “↑” and “ⓘ” buttons simultaneously, you will hear the first “di” sound after about 5 seconds and second “di” sound after 10 seconds. When the display screen shows “RST”, please operate refer to the No.1 item.
