Important Safety Information

READ AND FOLLOW ALL SAFETY INSTRUCTIONS

SAFETY REQUIREMENTS

DANGER: Risk of fire or explosion. Flammable refrigerant used. Do not puncture refrigerant tubing.

- Do not use mechanical devices to defrost refrigerator.
- Ensure that servicing is done by factory authorized service personnel, to minimize product damage or safety issues.
- Consult repair manual or owner's guide before attempting to service this product. All safety precautions must be followed.
- Dispose of properly in accordance with federal or local regulations.
- Follow handling instructions carefully.

WARNING: Keep ventilation openings, in the appliance enclosure or in the built-in structure, clear of obstruction.

WARNING: Do not use mechanical devices or other means to accelerate the defrosting process, other than those recommended by the manufacturer.

WARNING: Do not damage the refrigerant circuit.

WARNING: Do not use electrical appliances inside the food storage compartments of the appliance, unless they are of the type recommended by the manufacturer.

CAUTION: Children should be supervised to ensure that they do not play with the appliance.

DANGER: Risk of child entrapment. Before throwing away an old appliance:

- Remove the door or lid.
- Leave shelves in place so that children may not easily climb inside.

This appliance is intended to be used in household and similar applications such as:

- Staff kitchen areas in shops, offices and other working environments;
- Farm houses and by clients in hotels, motels and other residential type environments;
- Bed and breakfast type environments;
- Catering and similar non-retail applications.

SAFETY REQUIREMENTS

This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.

Do not store explosive substances such as aerosol cans with a flammable propellant in this appliance.

POWER SOURCE AND TEST RUNNING

This appliance requires a single-phase power supply, 50Hz, voltage range 187~242V. If the voltage is unstable, please install a voltage stabilizer with capacity above 1000W.

Avoid turning on and off the power too frequently. If the power is turned off, wait 5 minutes before turning it on again.

When the freezer will be out of use for a long time, disconnect the power first, then clean it. Examine the circuit to ensure it is in good working order before using it again.

Do not connect your appliance to extension cords or together with another appliance in the same wall outlet. Do not splice the power cord. Do not under any circumstances cut or remove the third ground prong from the power cord. Do not use extension cords or ungrounded (two prongs) adapters.

If the power supply cord is damaged, it must be replaced by the manufacturer, its service agent or similar qualified person in order to avoid hazard.

SAVE THESE INSTRUCTIONS!

INSTALLATION INSTRUCTIONS

LOCATION

- Two people should be used when moving the appliance.
- Remove interior and exterior packaging prior to installation. Wipe the outside of the appliance with a soft, dry cloth and the inside with a lukewarm wet cloth.
- Place the appliance on a floor that is strong enough to support it when it is fully loaded.
- Do not place the appliance in direct sunlight or near sources of heat, such as a stove or heater, as this can increase electrical consumption. Extreme cold ambient temperatures may also cause the appliance to perform improperly.
- Do not use the appliance near water, for example, in a wet basement or near a sink.
- This appliance is intended for indoor household use only. It is not designed for outside installation, including anywhere that is not temperature controlled (garages, porches, vehicles, etc.).
- Before connecting the appliance to a power source, let it stand upright for approximately 6 hours. This will reduce the possibility of a malfunction in the cooling system from handling during transportation.
- Allow 12.7 cm (5 inches) of space between the back, sides and top of the appliance and all adjacent walls.
- This appliance is intended for free-standing installation only and is not intended to be built into a cabinet or counter. Building in this appliance can cause it to malfunction.
- **IMPORTANT:** Before using the appliance, remove the rubber plug from the accessory bag and install it in the interior of the appliance. Do not run the appliance without the plug installed as this can cause water leakage and damage to flooring.

OPERATING INSTRUCTIONS

FEATURES

1. Wire Basket
2. Control Panel
3. Defrost Drain
4. Adjustable Foot

IMPORTANT NOTE

The freezer lid may be difficult to open immediately after closing it. This is normal and is due to the pressure difference between the cold interior of the freezer and the warm air that has just entered the freezer when the lid was opened. The pressure will equalize within a few minutes.

If the lid is especially difficult to open, wait 5 minutes to allow the pressure to equalize and then try again.

OPERATING INSTRUCTIONS

TEMPERATURE CONTROL

The temperature of the appliance is controlled by setting the thermostat dial on the front of the cabinet.

- The number 1 indicates the warmest setting. The number 7 indicates the coldest setting.
- The number 5 setting should be sufficient for regular home use.
- The temperature range of the appliance is approximately -12°C to -24°C (10.4°F to -11.2°F).
- To stop the cooling function, turn the dial to the "0" position.

Notes:

- The temperature inside the appliance can vary based on ambient room temperature, the frequency that the lid is opened and the amount of fresh food that has recently been added to the appliance.
- Do not overload the appliance as this can affect performance.
- Do not freeze large quantities of fresh food at the same time.

LEVELING INSTRUCTIONS

There are two adjustable feet on the bottom of the cabinet that can be adjusted to ensure that the appliance is level. To level the appliance:

1. Turn the adjustable foot counter-clockwise until the top of the foot is touching the bottom of the cabinet.
2. Slowly turn the adjustable foot clockwise until the appliance is level.

Indicator Lights

1. **Power indicator light:** Illuminates when the appliance is connected to a working power source.
2. **Run indicator light:** Illuminates when the compressor is operating.
3. **Alarm indicator light:** Illuminates when the temperature inside the appliance is too high.

OPERATING INSTRUCTIONS

DEFROSTING

This appliance should be defrosted approximately twice a year or when a 6 mm (1/4 inch) layer of frost has formed.

Unplug the appliance, remove all contents and leave the lid open. Follow the instructions below:

1. The interior defrost drain is located on the inside floor of the cabinet. Remove the rubber cover from the defrost drain. Defrosted water will flow into the hole and out through the exterior defrost drain cap. See Figure 1.
2. The exterior defrost drain cap is located on the front of the cabinet. Gently pull out the exterior drain cap approximately 20 - 25 mm until the water hole is visible. See Figure 2.
3. Twist the exterior drain cap so that the arrow points downward. See Figure 3.
4. Place a bucket or pan under the drain cap to catch defrosted water. Check the appliance regularly during defrosting to ensure that the water is not overflowing.
5. When all water has been drained, twist the drain cap until the arrow is pointing upwards and then push inward until it is flush with the cabinet. See Figure 4.
6. Replace the rubber cover in the interior defrost drain.

After defrosting is complete, set the temperature control to maximum for 2 to 3 hours before returning to the desired temperature setting and replacing the contents.

IMPORTANT

Never use electrical appliances during defrosting. Do not use pointed or sharp objects to remove frost as this can damage the refrigerant lines. If these lines are accidentally pierced it will render the freezer inoperable and void the manufacturer's warranty.

CARE & MAINTENANCE

CLEANING

Ensure the appliance is unplugged before cleaning.

- To clean the inside of the appliance, use a soft cloth and a solution of one tablespoon of baking soda to one quart of water or a mild soap solution or some mild detergent.
- Clean the outside with a soft, damp cloth and some mild detergent.
- It is important to keep the area where the lid seals against the cabinet clean to ensure a tight seal. Clean this area with a soapy cloth. Rinse with a damp cloth and let dry.

Note: Do not use cleaners containing ammonia or alcohol on the appliance. Ammonia or alcohol can damage the appearance of the appliance. Never use any commercial or abrasive cleaners or sharp objects on any part of the appliance.

POWER FAILURE

Most power failures are corrected within a few hours and should not affect the temperature of your appliance if you minimize the number of times the lid is opened. If the power is going to be off for a longer period of time, take the proper steps to protect your contents.

Note: Wait 3 to 5 minutes before attempting to restart the refrigerator if operation has been interrupted.

ENERGY SAVING TIP

The appliance should be located in the coolest area of the room, away from heat producing appliances, and out of direct sunlight. Do not overload the unit or block any ventilation openings.

VACATION

- **Short vacations:** Leave the appliance operating during vacations of less than three weeks.
- **Long vacations:** If the appliance will not be used for several months, remove all items and turn off the appliance. Defrost, clean and dry the interior thoroughly. To prevent odor and mold growth, leave the lid open slightly, blocking it open if necessary.

MOVING

- Remove all contents.
- Tape the lid shut.
- Be sure the appliance remains in the upright position during transportation. Protect the outside of the appliance with a blanket.
- If the appliance is placed on its back or side during transportation, upon reaching the destination, allow it to remain in its operating position for 6 hours to avoid damage to internal components.

DISPOSAL

This marking indicates that this product should not be disposed with other household wastes throughout the EU. To prevent possible harm to the environment or human health from uncontrolled waste disposal, recycle it responsibly to promote the sustainable reuse of material resources. To return your used device, please use the return and collection systems or contact the retailer where the product was purchased. They can take this product for environmental safe recycling.

PROBLEM	POSSIBLE CAUSE
No power	<ul style="list-style-type: none"> • A fuse may be blown or the circuit breaker tripped • Plug not fully inserted into the wall outlet
Internal temperature not cold enough	<ul style="list-style-type: none"> • Temperature setting is too warm • The lid is not shut properly or opened excessively • Recently added a large quantity of warm food to the cabinet • Close proximity to heat source or direct sunlight • Ambient temperature or humidity is very high
Appliance runs continuously	<ul style="list-style-type: none"> • Temperature setting is too cold • The lid is not shut properly or opened excessively • Recently added a large quantity of warm food to the cabinet • Close proximity to heat source or direct sunlight • Ambient temperature or humidity is very high
The appliance makes a gurgling noise when operating	<ul style="list-style-type: none"> • This noise is completely normal. The refrigerant inside the appliance will make a gurgling noise as it changes from a liquid to a gas and back again.
The indicator light is on but the compressor does not run and makes a buzzing noise	<ul style="list-style-type: none"> • The power voltage is <187 V. Put a power-regulator of more than 1000W on the circuit.
The compressor starts and stops repeatedly and does not run regularly	<ul style="list-style-type: none"> • The power voltage is >242 V. Put a power-regulator of more than 1000W on the circuit.
The appliance makes a rattling noise	<ul style="list-style-type: none"> • Ensure that the appliance is leveled on a stable surface.

WARRANTY

**Congratulations on the purchase of your new Danby product.
This appliance comes with a 2 year warranty.**

Please call 0300-303-3904 to register your product and receive full terms and conditions.

This quality product is warranted to be free from manufacturer's defects in material and workmanship, provided that the unit is used under the normal operating conditions intended by the manufacturer. This warranty is available only to the person to whom the unit was originally sold by a Danby Products authorized dealer.

TERMS OF WARRANTY

During the first twenty-four (24) months, any functional parts of this product found to be defective will be repaired or replaced, at warrantor's option, at no charge to the original purchaser.

EXCLUSIONS

Save as herein provided, by Danby, there are no other warranties, conditions, representations or guarantees, express or implied, made or intended by Danby or its authorized distributors and all other warranties, conditions, representations or guarantees, including any warranties, conditions, representations or guarantees under any Sale of Goods Act or like legislation or statute is hereby expressly excluded. Save as herein provided, Danby shall not be responsible for any damages to persons or property, including the unit itself, howsoever caused or any consequential damages arising from the malfunction of the unit and by the purchase of the unit, the purchaser does hereby agree to indemnify and hold harmless Danby from any claim for damages to persons or property caused by the unit.

There are no express warranties other than those on the face here of and described above. No warranties whether expressed or implied, including but not limited to, any implied warranties of merchantability or fitness for a particular purpose, shall extend beyond the respective warranty periods provided above. This warranty does not affect the consumer's legal rights under applicable National legislation.
