FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

This device complies with FCC radiation exposure limits set forth for an uncontrolled environment and it also complies with Part 15 of the FCC RF Rules. This equipment must be installed and operated in accordance with provided instructions and the antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be provided with antenna installation instructions and consider removing the no-co-location statement. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Caution!
Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Operation Video

Viewing Method:

Scan the QR code below with your phone to learn about the detailed usage and operation of the product.

APP Download, Account Registration and Login

Download method:

1. Scan the QR code below to download and install the "Sulink" app

2. Search for "Sulink" app on the App Store or Google Play to download and install it

Note: iOS 9.0 or later is required for iPhone devices; Android 5.1 or later is required for Android devices

3. Account registration

(Confirm your region, then complete the registration following the app prompts or via a third-party account)

1 Click Register

2 Confirm region and register an account

Add Device to the APP

1. After the camera is powered on and started, you will hear a voice prompt.

2. Open the APP, log in and tap the "+" icon on the page or at the top right corner. To add a WiFi device, enable nearby wireless search on your phone; the device can be automatically detected for pairing. For 4G devices, scan the code directly. Network configuration and registration take approximately 30 seconds, please wait patiently.

Note: Please connect your mobile phone to a Wi-Fi network operating on 2.4 GHz. Do not select a Wi-Fi network with "5G" in its name unless the specified device explicitly supports both 2.4 GHz and 5GHz.

1 Add Device
2 Device detected
3 Connect to 2.4GHz WiFi network

4 Configuring network, wait.
5 Device added successfully

Common Issues

1. Unable to connect to the device?

- Press and hold the reset button to reset the device before binding.
- Avoid special characters in your Wi-Fi name and password. Letters and numbers are recommended.
- Place the device closer to the router and reduce interference from walls.

2. Is there static or noise during two-way audio?

- Keep your phone at least 5 meters away from the camera during two-way audio or live viewing.
- Install the camera away from high-power electrical appliances.

3. How to share the camera view with family members?

- Open the app, find and click the "share" button, then enter your family members' accounts.

Note: The person you're sharing with must also download the app and create an account.
