VII . Precautions

1, It is not recommended to wear it while taking a hot bath.

First factor: Hot baths generate steam, and due to the high temperature of the bath water, it is easy to generate a lot of steam. Steam is a gas with a small molecular radius, so it can easily penetrate the gaps in the smartwatch case. When the temperature drops, the water will gradually condense into water droplets, which can cause damage to the circuit board and then damage the smartwatch.

2, When connecting Wireless, make sure the Wireless of your mobile phone and smartwatch is turned on. Please make sure that the smartwatch is not connected to another account when doing Wireless search; please place the smartwatch and mobile phone as close as possible when doing Wireless search.

3. If the user's mobile phone has installed other software, such as mobile phone manager, in order to ensure the normal operation of the background APP, please turn on the mobile phone's message push and allow the background operation, otherwise it can not be pushed messages.

IX. WARNING

This app is not a medical device. Data obtained during the use of this app is for reference only, and should not be used for clinical diagnosis, medical research, diagnostic, or treatment purposes.

Operating Frequency Band: 2402~2480 MHz

Maximum RF power: 1.46mW (1.63dBm)

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
