35W Travel Charger with 25W Wireless Charger

DEAR CUSTOMER,

Thank you for purchasing this product. For optimum performance and safety, please read these instructions carefully before connecting, operating or using this product. Please keep this manual for future reference.

1.0 INTRODUCTION

This product is a high-performance travel charger. Type-C port output support 35W. Wireless Charger output support 25W. It is compatible with various USB protocols (such as iPhone and other smart phones). It is helpful for long-distance travel as well as convenient for business!

2.0 FEATURES

- Internal chip allows 100-240VAC of input voltage
- Type-C port output supports 35W
Wireless charger output support 25W
- Precise current-limiting output, overload protection and automatic restart after troubleshooting make the product safer and give you more peace of mind.
- Over Current Protection

- Over Voltage Protection
- Short Circuit Protection with Auto-recovery
- Over Temperature Protection with Auto-recovery
- Product shell is made of fireproof material.
- Intelligent and convenient to use.

3.0 SPECIFICATIONS

Input	100~240V AC 50/60Hz 1.2A USB C:9V3A,12V3A,15V2.33A
Input Frequency	50/60Hz
Standby Input Power	0.8W
Output	Type-C: 5V3A, 9V/3A, 12V2.91A, 15V2.33A PPS:5-11V/3A Wireless charger: 25W USB C+Wireless:20W+15W
Over Current Protection	Yes
Over Voltage Protection	Yes
Short Circuit Protection	Yes
Over Temperature Protection	Yes
Port	Type-C Port & Wireless charger
Socket	US
Operating Temperature Range	-10~25°C
Storage Temperature Range	-20~85°C
Operating Relative Humidity	20%~90% RH
Storage Relative Humidity	5%~95% RH
Ripple And Noise	≤ 200mVp-p
Rise Time	20ms
Turn-on Delay	3s
Line Regulation	±3%
Efficiency	Output ≥ 82%
Color	

Size(L*W*H)	59.9mm *59.9mm* 40mm
Weight	183.2g
User Manual	English Version

4.0 PACKAGE CONTENTS

Before attempting to use this unit, please check the packaging and make sure the following items are contained in the shipping carton:

- Main unit×1
- User Manual×1

5.0 OPERATION

Operation Procedures

1. Plug the travel charger into a socket.
2. Plug one Type-C connector of the cable into the Type-C interface of travel charger and plug the other connector of the cable into the electronic device (mobile phone, tablet PC, etc)
3. Please unplug the travel charger after the electronic device is fully charged.

Operation Notes

1. For optimum performance, please use the travel charger according to the user manual.
2. Please plug the travel charger into socket which voltage range should be 100-240VAC.
3. Please unplug the travel charger after using.

Note: Our products have protection functions and the two tips above are suggestions just for safety.

4. Do not use the travel charger with an electronic product which is not in conformity with the specifications, so as to avoid any problem caused by specification mismatching.

5. It's normal that travel charger will be a little overheated in the use process.

6. When the travel charger stops working under over-current, over- temperature or short-circuit protection, please unplug the device after it automatically returns to work, then you need to check whether the device is compatible with this charger.

7. Do not let the travel charger close to fire, such as stove, candles and etc.

8. Do not let the travel charger soak into liquid, such as swimming pool, bathtub, etc.

9. Do not wash the travel charger with corrosive cleaner.

10. If the travel charger cannot work properly, please contact the store or distributor in your area.

FCC STATEMENT

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
 - (1) This device may not cause harmful interference, and
 - (2) This device must accept any interference received, including interference that may cause undesired operation.
2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
