Product Description
The XgenTag is a light-powered wireless electronic tag.
The device does not require any user setup, pairing procedure, switch, or operating mode selection. When exposed to sufficient ambient light, the device automatically powers on and operates according to its intended functionality.

Operating Instructions
1.Remove the XgenTag from its packaging.
2.Place the device in an environment with sufficient ambient light.
3.The device automatically starts operating when illuminated.
4.No user interaction, configuration, or maintenance is required.
5.The device should be operated at a minimum separation distance greater than 20cm.

Intended Use
The XgenTag is intended for indoor and/or outdoor operation according to the product specifications.
No battery replacement or servicing by the user is required.

FCC Regulatory Statements
FCC Part 15 Compliance Statement (15.19(a)(3))
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
1.This device may not cause harmful interference.
2.This device must accept any interference received, including interference that may cause undesired operation.

FCC Warning (15.21)
Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC Interference Statement (15.105)

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try correcting the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF Exposure Statement

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with a minimum distance of 20cm between radiator and any person.
