

Q79 Long-Lasting Sports Wireless Earphones

• Connection Method

1. Open the charging case to power on the earphones automatically, or press and hold the touch area of the earphones for 5 seconds. Wait until one earphone's indicator light flashes and the other turns off. Then, enable Bluetooth on your phone, search for (Q79), and click to connect.

2: Connect the headphones to two devices simultaneously: First, successfully connect to the first device. After successful connection, turn off the Bluetooth of the first device, turn on the second device, and repeat step 1. After confirming successful connection, turn on the Bluetooth of the first device and click on the Bluetooth list model (Q79) to connect.

Note: Do not connect the interface to power!!! Charging operations may damage the earphone battery.

version: V6.0

Transmission distance: 10 meters

Standby time: about 6 months (theoretical value)

Charging voltage: 5V/1A

Charging time: approximately 1.5H for earphones;
approximately 2H for charging case

Frequency response range: 20Hz~20kHz

Charging interface: Type-C

Scope of application: Bluetooth enabled playback devices

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

RF Exposure Information

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
