

5K WATERPROOF CAMERA

User manual

Product Characteristics

- ❖ Ultra-high video resolution, supports 5K 30fps.
- ❖ Ultra-high photo resolution, supports 96MP.
- ❖ 60 filters, 8 film effects, 10 scene modes, 5-level beauty enhancement, enabling ultra-free shooting.
- ❖ Supports HDR (High Dynamic Range) imaging, capturing more details.
- ❖ 10-meter water resistance, 1.5-meter drop resistance, IP6X rated for complete dust resistance, suitable for multi-scenario use.
- ❖ Supports ISO100-6400, enabling low-light shooting in varying conditions.
- ❖ 8X digital zoom, ultra-fast focusing.
- ❖ High-speed continuous shooting, capturing every action.
- ❖ Built-in high-power LED flash.

Camera usage tips

Camera safety and operation

- Please do not disassemble or repair the camera yourself.
- Avoid exposing the camera to extreme temperatures or humid environments.
- When transitioning from a cold environment to a warm one, one must adapt gradually to prevent condensation.
- Do not press the lens hard or expose it to direct sunlight for extended periods.
- Clean with a slightly damp soft cloth only, and avoid using chemical solvents.
- Handle with care to avoid impacting the camera's display screen.

Camera usage warning

- Do not point the flash directly at people's eyes at close range, as it may cause discomfort or injury.

- Do not operate the camera while walking or driving to prevent accidents.
- Do not allow the camera strap to entangle around a child's neck, as it poses a risk of suffocation.

Camera maintenance tips

- When the camera is not in use, please store it in a cool and dry place and remove the battery.
- Please wear a lanyard when using the camera to prevent it from accidentally falling.
- Using a camera bag can prevent scratches on the lens and screen.
- When cleaning the lens, please gently blow away the dust first, and then wipe it with a cloth specifically designed for optical equipment. If necessary, Lens cleaning solution can be used.
- Do not use organic solvents to clean the camera.
- Avoid touching the lens directly with your hands, as dirt on the lens can affect the imaging quality.

Storage card usage tips

Formatting and compatibility

- The new card needs to be formatted before its first use, and cards previously used in other devices also need to be reformatted.
- Do not directly use a memory card that has been formatted by another camera, video recorder, or card reader.

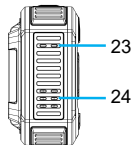

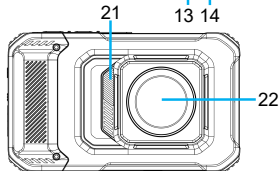

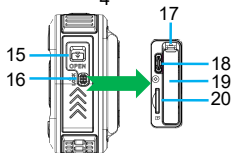

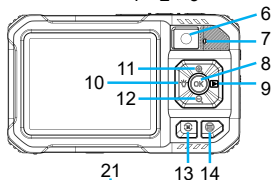

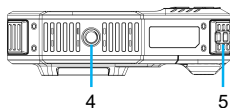

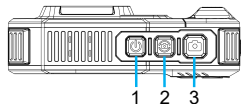

Operational precautions

- Before inserting or removing the memory card, turn off the camera power.
- Avoid bending, dropping, or squeezing the memory card, and keep it away from strong magnetic/electric fields.
- It is normal for the memory card to become slightly warm after prolonged use.

Data protection

- Do not power off or remove the card when recording, deleting, formatting, or reading data.
- Regularly back up important data to other storage devices.

Introduction of camera parts

No.	Name	Function
1	Power Button	Short press to turn on the camera. Long press to turn off the camera.
2	Camera switch button	Switch between main camera and selfie camera.
3	Shutter Button/ Confirm Button	Photo mode: Press halfway down to auto-focus, full press to take photo. Video mode: Press halfway down to auto-focus, full press to record.

15	Battery Cover	Install battery, Micro SD card, and USB port.

16	Battery Warehouse Switch	Battery cap Lock / unlock
17	Battery latch	Fixed battery
18	USB Port	Support Type-C/ USB
19	Battery Slot	Battery storage location
20	Micro SD card Slot	Support up to 1T (Micro SD Card)
21	LED light	Support flash and fill light functions
22	Lens	/
23	MIC hole	Sound pickup
24	Horn hole	/

Preparation before Use

Battery Cover ON / OFF

1. Turn on the battery cover: Slide the battery compartment switch to the left and hold it, then flip the cover open outward.

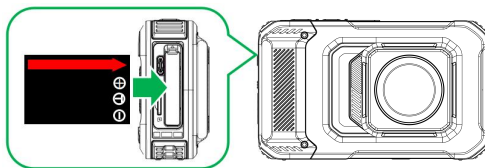

2. Turn off the battery cover: Press the battery compartment cover down until you hear a click, indicating that the switch is locked and the cover is securely closed.

Battery Insert / Remove

1. To install the battery:

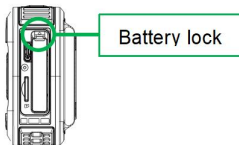

a. Open the battery compartment cover. b. Insert the battery, aligning the electronic contacts as illustrated, until the lock engages with an audible click. c. The battery is now securely installed.

2. To remove the battery:

a. Open the battery compartment cover.

b. Push the battery lock to release it, and then take out the battery.

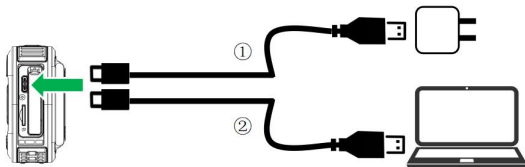

How to Charge the Camera

1. Please use the Type-C/USB cable to charge the camera. (Do not charge under water.)

① Use a Type-C/USB cable paired with a 5V charger to charge the camera;

② Connect the camera to the computer using a Type-C/USB cable.

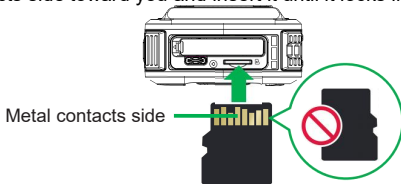

2) When the camera light goes out, it means the camera is fully charged.

Note: If the charging light flickers slightly, it indicates that the battery is not installed or reversed. Please check if the battery is installed correctly.

Micro SD Card Insert / Remove

1) Insert the Micro SD card: As shown by the illustration, face the card's metal contacts side toward you and insert it until it locks in place.

2) Remove the Micro SD card: Press the Micro SD card, then it can pop up.

Caution: 1. This camera is compatible with 1TB Micro SD cards. Class10 is recommended, we do not recommend using U3 level card.

2. When the Micro SD card is used for the first time, please format it by the camera.

How to format a memory card

1. In photo or video mode, press the Menu button to enter the camera menu. Use the Right button to select the camera system settings **【】** , then press the Down button to choose the "Format Memory Card" option.
2. Press the OK button to confirm formatting.
3. Press the Menu button again to exit the system settings page.

Camera Setting

System Settings

1. In photo or video mode, press the Menu button to enter the camera menu. Use the Right button to select the camera system settings 【】.
2. Use the Up and Down buttons to select a menu item, then press the OK button to enter the sub-options.
3. After completing the settings, press the Menu button again to exit the system settings.

Photo Settings

1. In photo or video mode, press the Menu button to enter the camera menu. The photo settings 【】 will open by default.

2. Use the Up and Down buttons to select a menu item, then press the OK button to enter the sub-options.
3. After completing the settings, press the Menu button again to exit the photo settings.

Recording Settings

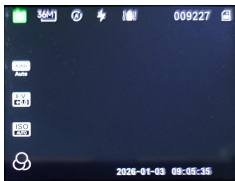

1. In photo or recording mode, press the Menu button to enter the camera menu. Use the Right button to select the recording settings **【】** .
2. Use the Up and Down buttons to select a menu item, then press the OK button to enter the sub-options.
3. After completing the settings, press the Menu button again to exit the recording settings.

Playback Settings

1. In photo/recording mode, press the Right button to enter the camera's playback mode.
2. In playback mode, press the Menu button to enter the playback menu. Then, press the Right button to switch between the playback settings【】 and system settings.
3. In the playback settings, use the Up and Down buttons to select a menu item, then press the OK button to enter the sub-options.
4. After completing the settings, press the Menu button again to exit the playback settings.

CE RoHS

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- - Reorient or relocate the receiving antenna.
- - Increase the separation between the equipment and receiver.
- - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- - Consult the dealer or an experienced radio/TV technician for help.ct.

*RF warning for Portable device:

The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition without restriction.
