**FAQ**

1. Built-in Battery included?  
No built-in battery, need connect with power directly (USB line & Power adapter available)
2. 5G wifi supporttable?  
Only support 2.4G wifi, no 5G wifi acceptable
3. Can it go through walls or be used to control IR devices in upstairs/downstairs rooms?  
IR can not go through walls, so make sure there are no obstacles between IR remote and IR enabled devices.
4. What devices can be controlled with wifi remote control  
You can control TV, Fan, Air conditioner and other IR enabled appliances.

**5. What we should do when we are unable to use IR remote to control an electric device?**

Please check the following:

- 1). IR remote network in good condition (click any key on the remote control panel in the app and see whether the indicator light starts flashing. If it flashes, it indicates to work properly.
- 2). There is no object blocking between IR remote and electric device.
- 3). The factory remote control of electric device is IR enabled. (cover the top of the remote control with hand or any object, then press any keys. If the device does not respond, it is IR based, otherwise, it is bluetooth or RF based remote control.)
