12 Files

It is recommended to use the FAT32 format and plug it into the USB interface, which can play files more smoothly.

Cleaning Method

Before cleaning, you must make sure that you have unplugged the power plug.

Do not use insecticides or other volatile chemicals on the projector or lens. Do not use rubber or vinyl products to touch the projector. This can damage or cause coating peel off.

Clean the Projector

Wipe with a soft dry cotton cloth. Use a soft cloth dipped in a diluted neutral detergent to wipe it, then with a dry cloth. If you use chemical fiber cloth, please follow the precautions.

Do not use thinner, benzene or other solvents to avoid quality degradation or peeling of the spray coating.

When cleaning the dirt, you can insert a brush in the front of the vacuum cleaner, avoid directly use the vacuum cleaner without any connectors or the nozzle, avoid scratches.

Dust cleaning of lens

Use the same method to clean the camera lens, use the professional hair dryer for the camera or the cleaning paper for the glasses lens. Be careful not to scratch the lens.

Dust cleaning at suction and outlet

The dust in the air inlet and outlet prevents ventilation, which will increase the internal temperature and cause malfunctions. Cleaning guidelines: at least clean once use every 10,000 hours.

Turn off the projector, disconnect the power.

Clean the exterior with an electric vacuum cleaner, and install a brush head adapter on the vacuum cleaner. Please be careful not to use a vacuum cleaner without an adapter or brush head.

Thanks for reading!

Enjoy your time with this projector!

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.
