GETTING STARTED WITH THE OPINION PLUS AS A KIOSK

Before starting make sure that you have all the components listed above

1. If using the Opinion Plus Kiosk with a Wired LAN, plug in an Ethernet cable into the Ethernet port of the OP.
2. Plug in the USB cable supplied with the Bixolon Printer into the USB port of the Opinion Plus.
3. Plug in power adaptor supplied with the Opinion Plus into the power port of the Opinion Plus.
4. Plug in the power adaptor supplied with the Bixolon Printer into its power port.
5. Power both on and wait for the Kiosk application to boot up.

SAFETY INSTRUCTIONS:

Please retain this information for future reference

- This product can only be used with a 5V power supply rated at 3A. Please only use the supply provided with the Opinion Plus
- Only attach peripherals that have been approved for operation with the Opinion Plus.
- Where peripherals are used that have not been provided directly by Wavetec (such as mice), please ensure that the cables or connectors used offer adequate insulation in order to meet safety requirements.
- Do not expose the Opinion Plus to water or place it in an area with high levels of moisture.
- Take care while handling the Opinion Plus to avoid mechanical damage to the unit
- For normal operation in a desktop or wall mounted configuration ensure that the Opinion Plus is held securely in place with the mounting holes in its base.
- Do not pierce the plastic casing for any reason

FCC Caution.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
