

KING LUCKY

M36 USER MANUAL

Product appearance

The host x 1

Specification x 1

Charging cable x 1

Certificate of qualification x 1

Product parameter

1. The microphone parameters

Frequency range: 2.4GHz

Channel system: dual channel

Sampling rate: 32 KHZ

Rated input: 5V=1A

Battery capacity: 3.7V/110 mA

Charging mode: Type-c

Charging time: about 1 h

Battery life: about 8 h

2.Receiver parameter

Frequency range: 2.4GHz

Search current: 21-22 mA

Operating current: 22.2-22.5mA

Startup current: 21 mA

3.Charging bay parameter

Battery type:polymer lithium-ion battery

Input voltage: DC 4.8~ 5.4V

Output voltage: DC 4.7~ 5.4V

Charging times: 3.5 times

Product size: 86.5*62.5* 34mm

Battery capacity: 800 mAh

Battery weight: 10g

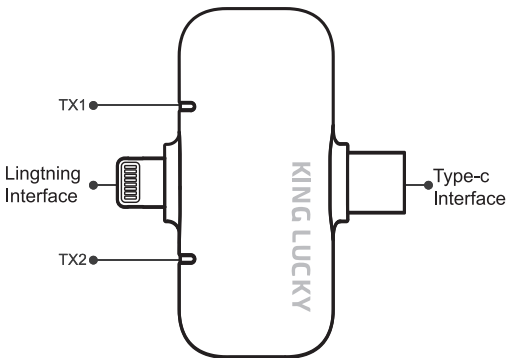

Charging mode: Type-c

voltage current: 5 V/1A

Charging time: about 90 minutes

Basic functions of receiver

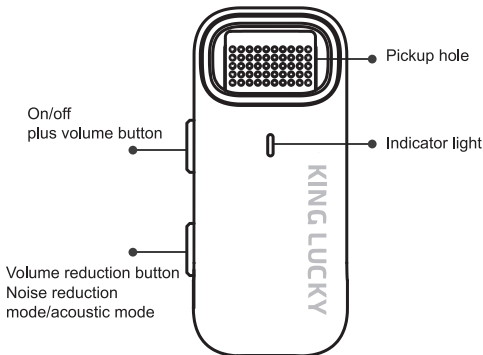

Receiver host (RX)

1. When which microphone is connected, its corresponding indicator light stays on.
2. When both microphones are connected at the same time, both indicator lights stay on simultaneously.

Basic functions of transmitter

Transmitter host (TX)

1. Long press the power button: Press and hold for 3 seconds to turn on; short press to increase the volume.
 2. Long press the volume down button: Turn noise reduction on/off (noise reduction mode is turned on by default when the device is turned on); short press to decrease the volume.
 3. Charging indicator: When the battery is low, it flashes quickly; when charging, it flashes slowly; when fully charged, it stays on constantly.
- Connection indicator: When waiting to connect after turning on, it flashes slowly, and the blue light stays on when connected successfully.
- Mode indicator: The noise reduction mode is indicated by a green light, and a blue light is displayed when noise reduction is turned off.

Function operation description

Microphone (transmitter: default noise reduction on startup)

Scenario Description	Operating instruction	Lamp effect	Remarks
Power On	1.Open the lid of the charging case and remove the microphone. 2.Press and hold the power button for 3 seconds.	Blue light flashing slowly	Switching on/off noise reduction: with prompt sound.
Power Off	1.Close the lid of the charging case. 2.Press and hold the power button for 3 seconds.	Light off	
Pairing	Search and pair the microphone while the device is turned on.	Blue light flashing slowly	
Pairing successful	The microphone is in search and pairing mode.	The green light is on	
Turn on/off noise reduction (noise reduction mode is turned on by default)	Press and hold the microphone volume down button to control the noise reduction function.	Non-noise reduction recording: Blue light stays on. Turn on noise reduction recording: Green light stays on.	
Increase volume	Short press the microphone power button to increase the volume.	/	
Decrease volume	Short press the microphone noise reduction button to decrease the volume.	/	
Charge	1.Put the device in the charging case and close the lid ; 2.Use the Type-C charging cable of the microphone device ;	Charging: The blue light flashes slowly Fully charged: The blue light is on	

Receiving end

Power On	Insert the device interface.	Blue light flashing slowly	/
Power Off	Unplug the device to turn off the power.	/	
Pairing	The receiver automatically searches for pairing after turning on.	Blue light flashing slowly	
Pairing successful	The receiver successfully pairs after turning on.	The blue light is on	

Charging bay

Scenario description	Operating instruction	Lamp effect specification	Remarks
Individual charging	Insert Type-C charging cable.	Charging: The corresponding battery indicator flashes during charging. When fully charged, the corresponding battery indicator will stay on. If there is still remaining battery to charge, the indicator will continue to flash until all four battery indicators are constantly on. Fully charged: All four battery indicators are constantly on.	
Charging the microphone	Put the microphone into the charging compartment and close the lid.	During charging, the current battery indicator of the charging compartment will light up with a blue light and then turn off after 4 seconds.	
Battery level display	Open the charging case	The first light is always on, indicating that the battery is at the 25% level;	The indicator light will turn off automatically after it is on for 4 seconds
		The second light is always on, indicating that the battery is at the 50% level;	
		The third light is always on, indicating that the battery is at the 75% level;	
		The fourth light is always on, indicating that the battery is at the 100% level.
