Intelligent Interconnection Box Manual

Product Features

This product is designed to convert the original wired CarPlay system into wireless CarPlay, Android Auto, AirPlay, and Miracast.

Instructions for use

Instructions for use conditions: It must be the original car infotainment system and support wired carplay for use in the vehicle model. To confirm whether this product can be used, please refer to the vehicle manual or consult the car dealer to confirm whether the vehicle has wired carplay. You can also check whether the original car infotainment system application has the carplay logo

Compatible phone models: Apple phone iOS 6 or above, Android phone Android 11 or above, Miracast. Android phone with built-in wireless screen mirroring function is required for use.

Steps to connect the original vehicle

1. Start the car.

1

1. Turn on the START/STOP button

2

2. Connect the Wireless Carplay Adapter to your vehicle's USB or USB C port (Information transmission port).

3

3. Wait for 15 seconds (some cars need to select the Carplay icon on the display screen), a connection window will pop up.

Carplay/Android Auto connection steps

Step 1: Connect the Internet Box first.

Step 2: Click on the CP/AA icon on the interface.

Step 3: Make sure your phone is connected to Bluetooth.

Step 4: Turn on Bluetooth and WiFi on your phone.

Step 5: Search for Bluetooth on your phone for pairing.

Step 6: After connecting to Bluetooth, it will automatically recognize and connect to Carplay/Android Auto.

Carplay/Android Auto Connection Interface

AirPlay connection steps

Step 1: First, connect the Internet Box.

Step 2: Click on wireless screen mirroring.

Step 3: Open the mobile WIFI, match the box model, and enter the password 88888888.

Step 4: Find the wireless screen projection entrance on your phone (usually available in the drop-down menu function list) or search for it in the settings.

Step 5: Find the device name of the box in the wireless screen list, click on the device name and connect to it, and then cast the screen for use.

AirPlay Connection Interface

It is recommended to update your phone to the latest version or use it with iOS 18 or above

Mirror link connection steps

Step 1: Turn on WIFI on your phone.

Step 2: Click on wireless screen mirroring.

Step 3: Find the wireless screen projection entrance on your phone (usually available in the drop-down menu function list) or search for it in the settings.

Step 4: Find the device name of the box in the wireless screen casting list.

Step 5: Click on the device name to connect and cast the screen for use.

OTA upgrade

Need to upgrade OTA in case of connection failure or disconnection.

Step 1: Turn on your phone's WiFi.

Step 2: Connect to WIFI, name: "SmartBox-xxxx", Password: "88888888".

Step 3: Open the mobile browser.

Step 4: Enter the website address "192.168.1.101".

Step 5: Enter the OTA upgrade interface.

Step 6: Pull down the upgrade interface, click "Update", and after loading the box, the upgrade is complete.

OTA update

Step 1: Open the WIFI connection details on your phone, click on the three dots in the upper right corner, select WiFi direct connection, find the corresponding box name, and click connect.

Step 2: Open the built-in browser on your phone and enter 192.168.1.101 to enter the OTA upgrade interface. Click on the upgrade option at the bottom.

PS: Do not disconnect the box or power during the update process

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: —Reorient or relocate the receiving antenna. —Increase the separation between the equipment and receiver. —Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. —Consult the dealer or an experienced radio/TV technician for help. Note: The Grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. Such modifications could void the user's authority to operate the equipment. The device has been evaluated to meet general RF exposure requirement. To maintain compliance with FCC's RF exposure guidelines, the distance must be at least 20 cm between the radiator and your body, and fully supported by the operating and installation configurations of the transmitter and its antenna(s).
