

AUTEL MAXI HVAC HVACBOOK1 AUTO HEATING & AIR CONDITIONING TEXTBOOK

AUTOMOTIVE HVAC TEXTBOOK COVERING SYSTEMS, DIAGNOSTICS, & REPAIR BASICS

AUTO HVAC TEXTBOOK INCLUDES:

- Suggested pre-reading for the Autel Academy Advanced HVAC Training Course, helping learners build foundational knowledge before hands-on instruction
- A comprehensive automotive textbook focused on HVAC (heating, ventilation, and air conditioning) systems in vehicles
- Explains key components such as refrigeration cycles, heating systems, engine cooling, and electronic climate controls
- Designed to align with ASE (Automotive Service Excellence) certification standards, especially Test A7
- Includes instruction on refrigerant handling, recovery, recycling, and environmental considerations
- Addresses both manual and automatic temperature control systems used in modern vehicles
- Features illustrations, real-world service procedures, and hands-on learning tools
- Includes newer content on advanced HVAC systems, including those in high-voltage/electric vehicles
