Functions

**Conversation – Voice Translator**

Translate conversations with people speaking different languages.

**Call – Call Translator**

Translate phone calls in real time.

**Photo – Photo Translator**

Take a photo of a book page, newspaper or a restaurant menu to translate the text.

**Text – Text Translator**

Type or dictate a text to translate it.

**Group Chat – MultiTalk**

Exchange chat messages with people speaking different languages.

**Learning**

Learn vocabulary and useful expressions in different languages.

7 – Conversation in Voice Translator

- A** **Select your language**
To set your language, select it in the bottom-left corner of the screen.
- B** **Select your conversation partner's language**
To set your conversation partner's language, select it in the bottom-right corner of the screen.

Start the conversation

The default setting of Voice Translator is the automatic mode. In this mode, the device automatically recognizes when either participant in the conversation is speaking. To begin a conversation, just tap the microphone icon and start speaking. You can also use the Speech Recognition Buttons on the right side of the device to control the conversation manually.

Tap the Stop icon to end the conversation.

Tap the More options icon to open conversation settings.

Tap the Share icon to share the translation via email.

Gestures

To expand the status bar, swipe your finger down from the top edge of the screen. You can check your Wi-Fi connection, battery level and other important settings there.

Navigate the view by swiping up and down.

To play the translation, tap on a phrase.

To delete or share a translated phrase, press and hold it.

To adjust the font size, pinch or stretch the screen with two fingers.
