INSTALLATION GUIDE AND USERS MANUAL

VICTORY

Ceiling Mount Range Hood

Model Name: SUNSET

☐ BLACK Powder-coat ☐ Stainless Steel ☐ WHITE Powder-coat

NOTICE: For residential use only.

READ AND SAVE THESE INSTRUCTIONS

Installer: Leave this guide with the homeowner.
Homeowner: Keep this guide for future reference.

This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.

IMPORTANT SAFETY NOTICE

Read all instructions before installing and operating this appliance

- The installation in this manual is intended for qualified installers, service technicians or persons with similar qualified background. Installation and electrical wiring must be done by qualified professionals and in accordance with all applicable codes and standards, including fire-rated construction.
- DO NOT attempt to install this appliance yourself. Injury could result from installing the unit due to lack of appropriate electrical and technical background.
- Range hood may have very sharp edges; please wear protective gloves if it is necessary to remove any parts for installing, cleaning or servicing.
- Activating any switch ON before completing installation may cause ignition or an explosion.
- Due to the size and weight of this range hood, two-person installation is recommended.

To reduce the risk of fire, electric shock, or injury to persons:

- WARNING To Reduce The Risk Of Fire Or Electric Shock, Do Not Use This Fan With Any Solid-State Speed Control Device.
- For general ventilating use only. DO NOT use to exhaust hazardous or explosive materials and vapors.
- The combustion air flow needed for safe operation of fuel-burning equipment may be affected by this unit's operation. Follow the heating equipment manufacturer's guideline and safety standards such as those published by the National Fire Protection Association (NFPA), and the American Society of Heating, Refrigeration and Air Conditioning Engineers (ASHRAE), and the local code authorities.
- Before servicing or cleaning unit, switch power OFF at service panel and lock service panel to prevent power from being switched ON accidentally.
- Clean grease laden surfaces frequently. To reduce the risk of fire and to disperse air properly, make sure to vent air outside. DO NOT vent exhaust into spaces between walls, crawl spaces, ceiling, attics and/or garages.
- Ducted fans MUST always be vented to the outdoors.
- Use only metal ductwork and this unit MUST be grounded.
- Sufficient air is needed for proper combustion and exhausting of gases through the duct to prevent back drafting.
- When cutting or drilling into wall or ceiling, be careful not to damage electrical wiring or other hidden utilities.
- All electrical wiring must be properly installed, insulated and grounded.
- Old duct work should be cleaned or replaced if necessary to avoid the possibility of a grease fire.
- Check all joints on duct work to insure proper connection and all joints should be properly taped.
- Use this unit only in the manner intended by the manufacturer. If you have questions, contact the vendor.

To reduce the risk of a stove top grease fire:

- Keep all fans, spacers, filters, grease tunnels, oil containers and grease-laden surfaces clean. Grease should not be allowed to accumulate on fan, baffle, spaces, filter, grease tunnel and oil container.
- Always turn range hood ON when cooking at high heat or when cooking foods that produce flames.
- Use high settings on cooking range only when necessary.
- Never leave surface units unattended at high settings. Boil overs cause smoking and greasy spillovers that may ignite. Heat oils slowly on low or medium settings.
- Clean ventilating fan frequently.
- Always use appropriate cookware and utensils size.
- Always use cookware appropriate for the size of the surface element.

IMPORTANT SAFETY NOTICE

Read all instructions before installing and operating this appliance

To reduce the risk of injury to persons in the event of a stove top grease fire:

- Smother flames with a close-fitting lid, cookie sheet, or metal tray, then turn OFF the burner. Be careful to PREVENT BURNS. Never pick up a pan that has flames—you may be burned. Keep flammable and/or combustible material away from flames. If the flames DO NOT go out immediately, EVACUATE and CALL the FIRE DEPARTMENT or dial your local emergency service immediately.
- DO NOT use WATER, including wet dishcloths or towels — it will result in a violent steam explosion
- Use an extinguisher ONLY if:
  - You know you have a Class A, B, C extinguisher, and you already know how to operate it.
  - The fire is small and contained in the area where it has started.
  - The fire department is on the way.
  - You can fight the fire while having access to a safe exit.

To reduce the risk of injury to persons in the event of a gas leaks:

- Extinguish any open flame.
- DO NOT turn on the range hood fan or any type of ventilator.
- DO NOT turn on the lights or any type of appliance.
- Open all doors and windows to disperse the gas. If you still smell gas, call the gas company and fire department or dial your local emergency service immediately.

Your safety and the safety of others is very important. We have provided many important safety messages in this manual and on your appliance. Always read and obey all safety messages. All safety messages will tell you what the potential hazard is, tell you how to reduce the chance of injury, and tell you what can happen if the instructions are not followed.

WARNING – TO REDUCE THE RISK OF FIRE, ELECTRIC SHOCK, OR INJURY TO PERSONS, OBSERVE THE FOLLOWING:

a) Use this unit only in the manner intended by the manufacturer. If you have questions, contact the manufacturer.
b) Before servicing or cleaning unit, switch power off at service panel and lock the service disconnecting means to prevent power from being switched on accidentally. When the service disconnecting means cannot be locked, securely fasten a prominent warning device, such as a tag, to the service panel.

WARNING
To Reduce The Risk Of Fire, Electric Shock Or Injury To Persons, Do Not Use Replacement Parts That Have Not Been Recommended By The Manufacturer (e.g. Parts Made At Home Using A 3D Printer).

WARNING
TO REDUCE THE RISK OF FIRE, USE ONLY METAL DUCTWORK.

WARNING – TO REDUCE THE RISK OF A RANGE TOP GREASE FIRE:
Use proper pan size. Always use cookware appropriate for the size of the surface element.

WARNING

This is the safety alert symbol. This symbol alerts you to potential hazards that can hurt you and others. All safety messages will follow the safety alert symbol and the word “WARNING”.

The manufacturer and/or distributor/reseller declines all responsibility in the event of failure to observe the instructions given here for installation, maintenance and suitable use of the product.

The manufacturer and/or distributor/reseller further declines all responsibility for injury due to negligence and the warranty of the unit automatically expires due to improper maintenance.

The manufacturer and/or distributor/reseller will not be held responsible for any damages to personal property or real estate or any bodily injuries whether caused directly or indirectly by the range hood.

ELECTRICAL REQUIREMENTS

IMPORTANT: Observe all governing codes and ordinances.

It is the customer's responsibility:

- To contact a qualified electrician
- To assure that the electrical installation is adequate and in conformance with National Electrical Code, ANSI/NFPA 70 — latest edition*, or CSA Standards C22. 1-94, Canadian Electrical Code, Part 1 and C22. 2 No. 0-M91 - latest edition** and all local codes and ordinances.

If codes permit and a separate ground wire is used, it is recommended that a qualified electrician determine that the ground path is adequate.
A 120-Volt, 60 Hz, AC-only, fused electrical supply is required on a separate 15-amp circuit.
DO NOT ground to a gas pipe.
Check with a qualified electrician if you are not sure that the range hood is properly grounded.
DO NOT have a fuse in the neutral or ground circuit.

IMPORTANT: Save this Installation Guide for electrical inspector's use.

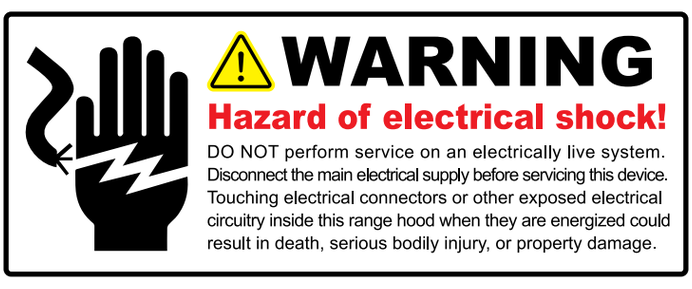

The range hood must be connected with copper wire/plug only.
The range hood should be connected directly to the fused disconnect (or circuit breaker) box through flexible armored or non-metallic sheathed copper cable. A U.L. - or C.S.A. - listed strain relief must be provided at each end of the power supply cable.

Wire sizes (copper wire only) and connections must conform with the rating of the appliance as specified on the model/serial rating label. Wire sizes must conform to the requirements of the National Electrical Code ANSI/NFPA 70 — latest edition*, or CSA Standards C22. 1-94, Canadian Electrical Code Part 1 and C22. 2 No. 0-M91 - latest edition** and all local codes and ordinances. A U.L. - or C.S.A. - listed conduit connector must be provided at each end of the power supply cable (at the range hood and at the junction box).

Copies of the standards listed may be obtained from:

* National Fire Protection Association
Batterymarch Park
Quincy, Massachusetts 02269

** CSA International
8501 East Pleasant Valley Road
Cleveland, Ohio 44131-5575

VENTING REQUIREMENTS

- Vent system must terminate to the outside (roof or side wall).
- DO NOT terminate the vent system in an attic or other enclosed area.
- DO NOT use 4" or 5" laundry-type wall caps. Use a 6" or larger Wall/Roof Cap.
- Use metal/aluminum vent only. We recommend using Rigid instead of Flex duct.
- Always keep the duct clean to ensure proper airflow.

For the most efficient & quiet operation:

- It is recommended that the range hood be vented with a 6" or bigger round metal/aluminum vent work.
- The size of the vent should be uniform.
- Use no more than two 90° elbows.
- Make sure there is a minimum of 24" (61 cm) of straight vent between the elbows if more than one elbow is used.
- DO NOT install two elbows together.
- The length of vent system and number of elbows should be kept to a minimum to provide efficient performance.
- Use aluminum foil tape to seal all joints in the vent system.
- Use caulking to seal exterior wall or roof opening around the cap.
- Use 45° elbows instead of 90° elbows when possible.

IMPORTANT:

- A minimum of a 6" round duct (standard for this range hood) must be used to maintain maximum airflow efficiency.
- Always use rigid type metal/aluminum ducts if available to maximize airflow when connecting to provided duct.
- Please use Duct Run Calculation below to compute total available duct run when using elbows, transitions and caps.
- ALWAYS, when possible, reduce the number or transitions and turns in the duct run. If a long duct run is required, increase the duct size from 6" to 8". If a reducer is used, install a long reducer instead of a pancake reducer. Reducing the duct size will restrict airflow and decrease efficiency.
- If turns or transitions are required: Install as far away from opening and as far apart, between 2, as possible.

Minimum Duct Size:

- Round - 6" minimum

CALCULATING VENT SYSTEM LENGTH

To calculate the length of the duct system you require, subtract the equivalent feet for each “Vent piece” (table below) used in the system from the “Recommended maximum run” (table below). The longest duct run that is acceptable (if completely straight) is 50 feet. The number of vent pieces (elbow, transition, etc.) installed in your duct run will determine the maximum length the duct run can be. Please refer to the example below:

Duct Run Calculation:	
Recommended Maximum Run	
6" Round Duck	50 ft
Vent Piece Deduction	
Each 90° Elbow Used	9 ft
Each 45° Elbow Used	5 ft
Each Round - Rectangle transition used	7 ft
Side Wall Cap with Damper	7 ft
Roof Cap	7 ft

Duct Run Calcuation example:

One roof cap, two 90º elbows, and one 45º elbow used:

7ft + 9ft + 9ft + 5ft = 30ft used.

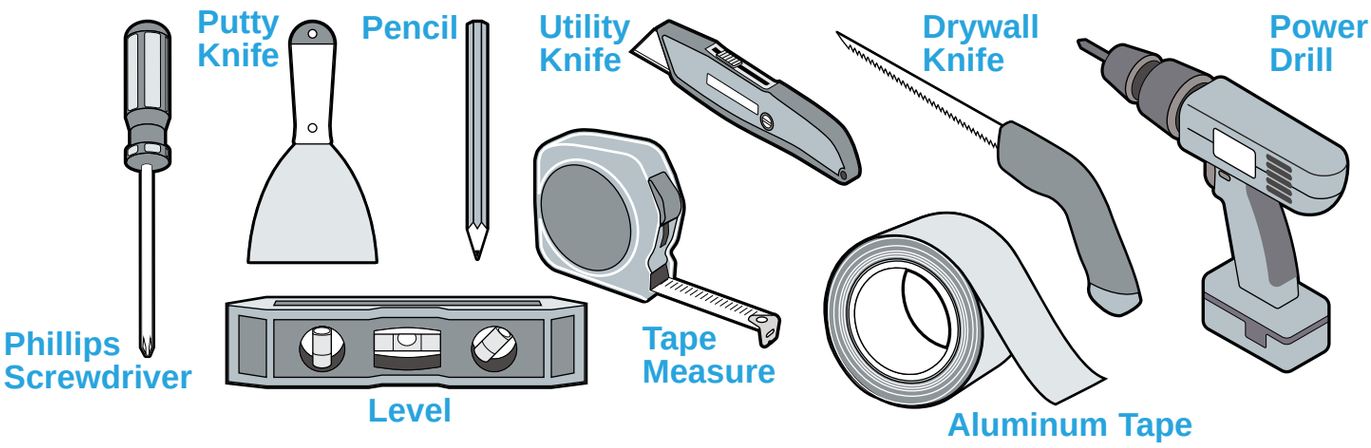

The above vent pieces used are equivalent to 30ft of a straight duct run. Subtract 30ft from the allowable 50ft. The remaining distance of 20ft is the longest that the straight ducting (in addition to the vent pieces) can be.

SPECIFICATIONS[3]

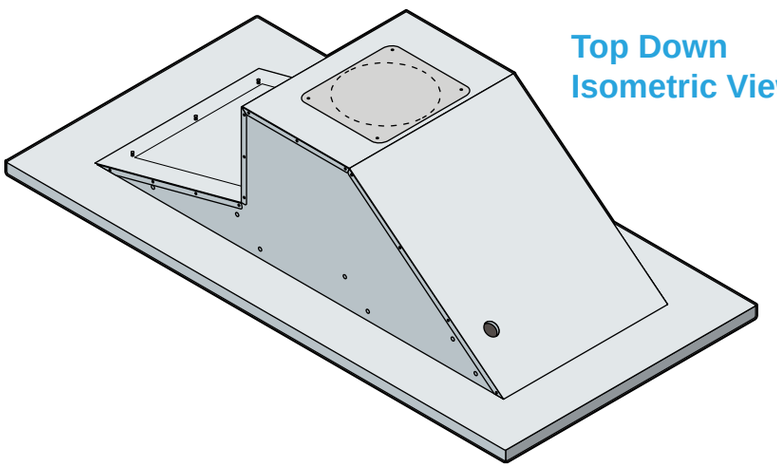

Body Design	Seamless Stainless Steel or White
Power Rating	120V/60Hz (USA & Canada standard)
General Input Power	305 W + 16 W Light
Motor Input Power	305 W
Ampere	3 A
Levels Of Speed Control	4 Levels
Airflow[1] (Q/L/M/H)	150 CFM / 300 CFM / 450 CFM / 600 CFM
Noise Level[2] (Q/L/M/H)	1.0 Sone / 2.5 Sone / 4.0 Sone / 6.0 Sone
Number Of Motors	Single Motor
Motor Type	Single Chamber Ultra Quiet
Fan Type	Centrifugal Squirrel Cage
Control Type	Wall Switch
Filtration Type	Aluminum Filters with Stainless Steel Cover
Illumination	12V LED Lights (3000K)
Venting Size	6 inch Round (Side or Top*) *Must select before purchase

1. In House Test Static Pressure “0”.
2. One sone is roughly equivalent to the sound of a refrigerator (1kHz) at 40 decibels.
3. Subject to change without notice, please contact your local reseller for details.

PREPARATION

⚠ WARNING

Excessive Weight

Require three or more persons to move and install this range hood. Spinal or other bodily injuries could occur if it is not followed.

⚠ WARNING

Severe Injury

Rotating fan can cause severe injury. Stay clear of fan when motor is running.

Advanced Preparations:

- Be familiar with the controls of the range hood by reading through Range Hood Operations.
- Place the range hood on a flat, stable surface. Connect the range hood to a designated standard outlet (please refer the product label for the suitable voltage of this unit) and turn on the range hood. Verify all operations of the range hood by referring to Range Hood Operations. Place all supplied parts and required hardware on a flat, stable surface and verify the existence of all supplied parts.
- Carefully remove the white or blue plastic protective coat from the range hood.

Preparations:

NOTE: To avoid damage to your hood, prevent debris from entering the vent opening.

- Decide the location of the venting pipe from the hood to the outside. Refer to Venting Methods.
- A straight, short vent run will allow the hood to perform more efficiently.
- Try to avoid as many transitions, elbows, and long run as possible. This may reduce the performance of the hood.
- Using 45° elbows is better than using 90° elbows.
- IMPORTANT: Peel white plastic protective coat off the hood, if any.
- Use aluminum tape to seal joints between pipe sections.

WARNING – TO REDUCE THE RISK OF FIRE, ELECTRIC SHOCK, OR INJURY TO PERSONS, OBSERVE THE FOLLOWING:

a) Installation work and electrical wiring must be done by qualified person(s) in accordance with all applicable codes and standards, including fire-rated construction.

b) Sufficient air is needed for proper combustion and exhausting of gases through the flue (chimney) of fuel burning equipment to prevent back drafting. Follow the heating equipment manufacturer's guideline and safety standards such as those published by the National Fire Protection Association (NFPA), and the American Society for Heating, Refrigeration and Air Conditioning Engineers (ASHRAE), and the local code authorities.

c) When cutting or drilling into wall or ceiling, do not damage electrical wiring and other hidden utilities.

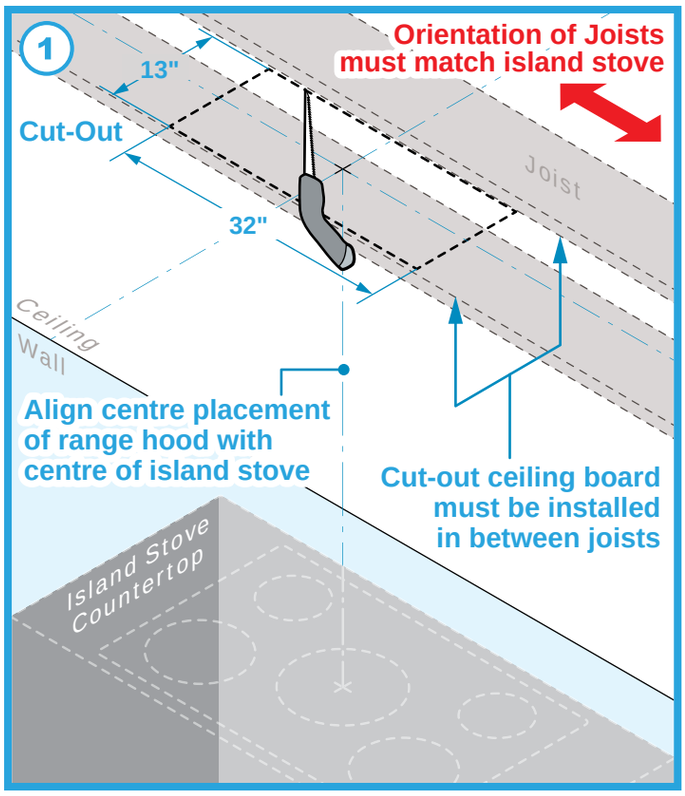

d) Ducted fans used to exhaust contaminants must always be vented to the outdoors.

THE HOOD MUST BE TESTED BEFORE INSTALLATION.

PLEASE TEST THE RANGE HOOD FOR PROPER OPERATION BEFORE BOXING IT, OR RECESSING IT INTO THE CEILING.

DO NOT CLOSE THE BOX AROUND THE HOOD UNTIL THE TEST HAS BEEN PERFORMED.

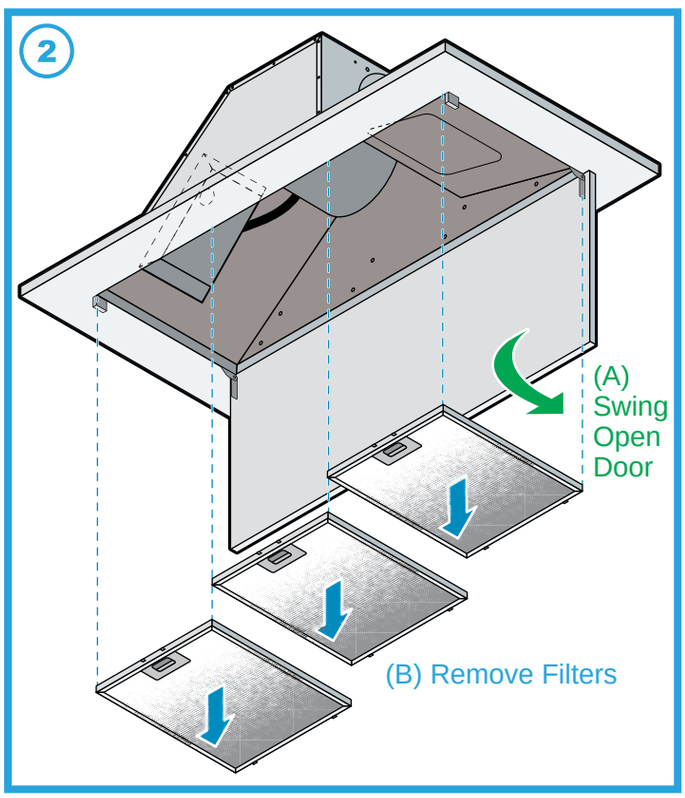

Victory Range Hoods Inc. will not be responsible for additional labour costs related to reinstallation of the hood due to transportation internal damage or wiring issues.

This is a typical flush-installation between the joists.

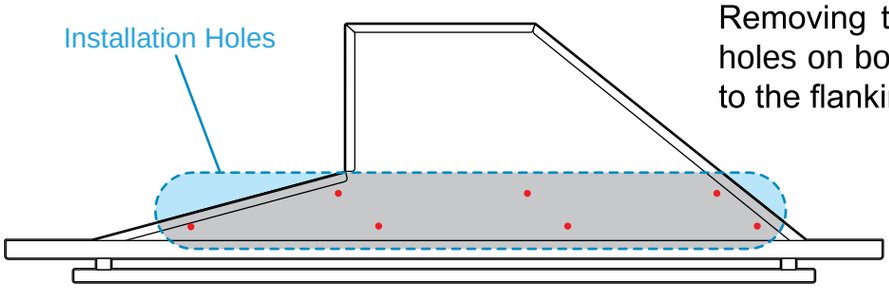

Please NOTE: The orientation of the joists and the orientation of the stove must match.

If the orientation does not match, the range hood may need to be dropped down into a box in order to rotate it.

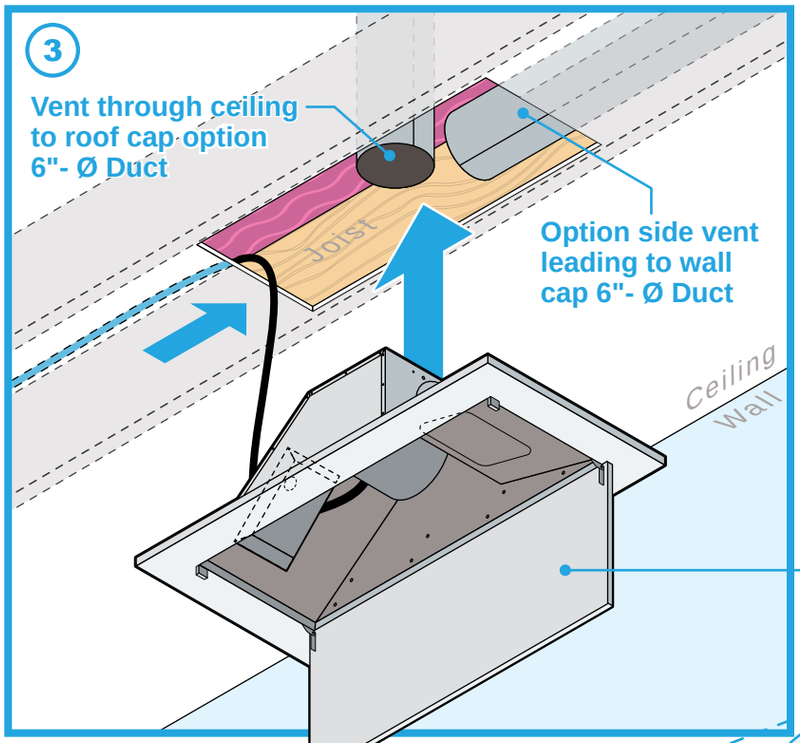

(A) Open both doors to reveal the mesh filters.

(B) Remove each filter, and set aside for re-installment.

Removing the filters reveals the installation holes on both side walls to fasten screws on to the flanking joists.

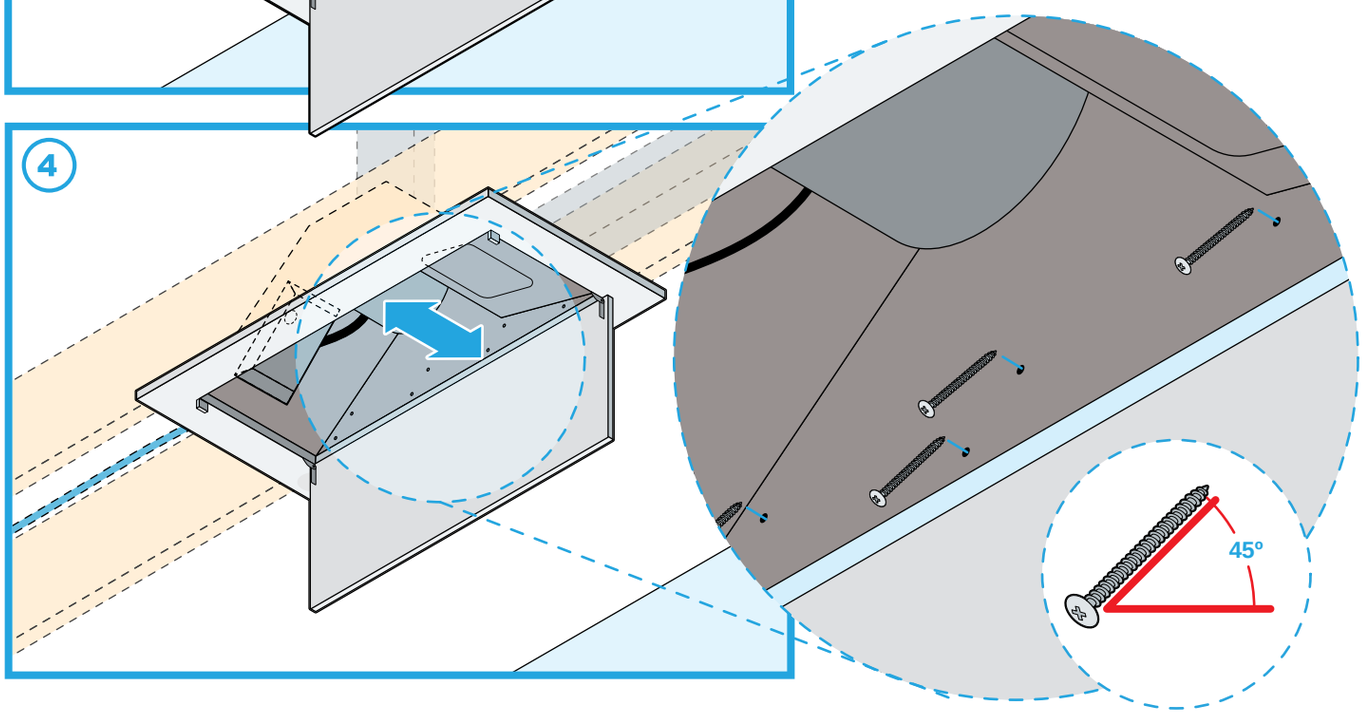

INSTALLATION

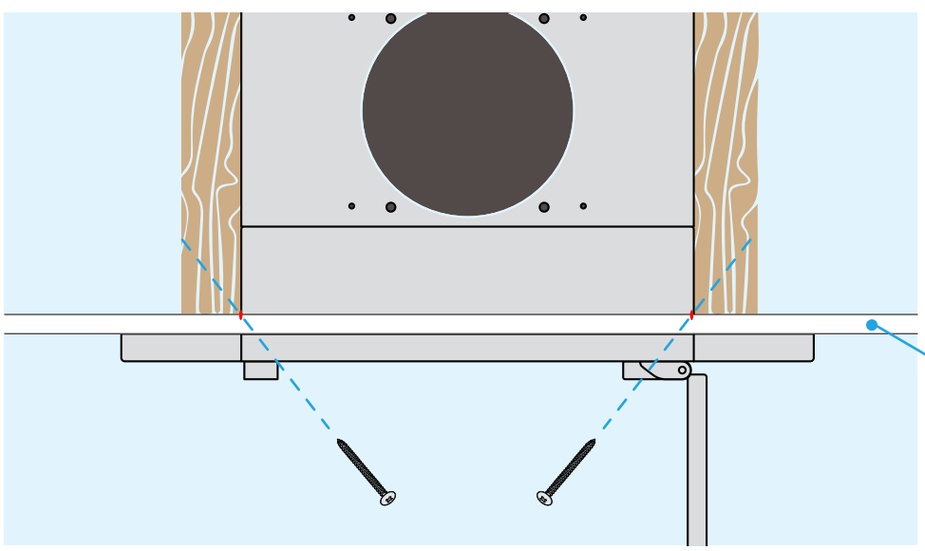

(3) Lift up range hood to attach the exhaust vent to the 6" duct tube of your option (top or side vent).

Wiring coming from wall switch panel and entering into the electrical box

2 x 14-3 Cables
(6 conductors + ground)

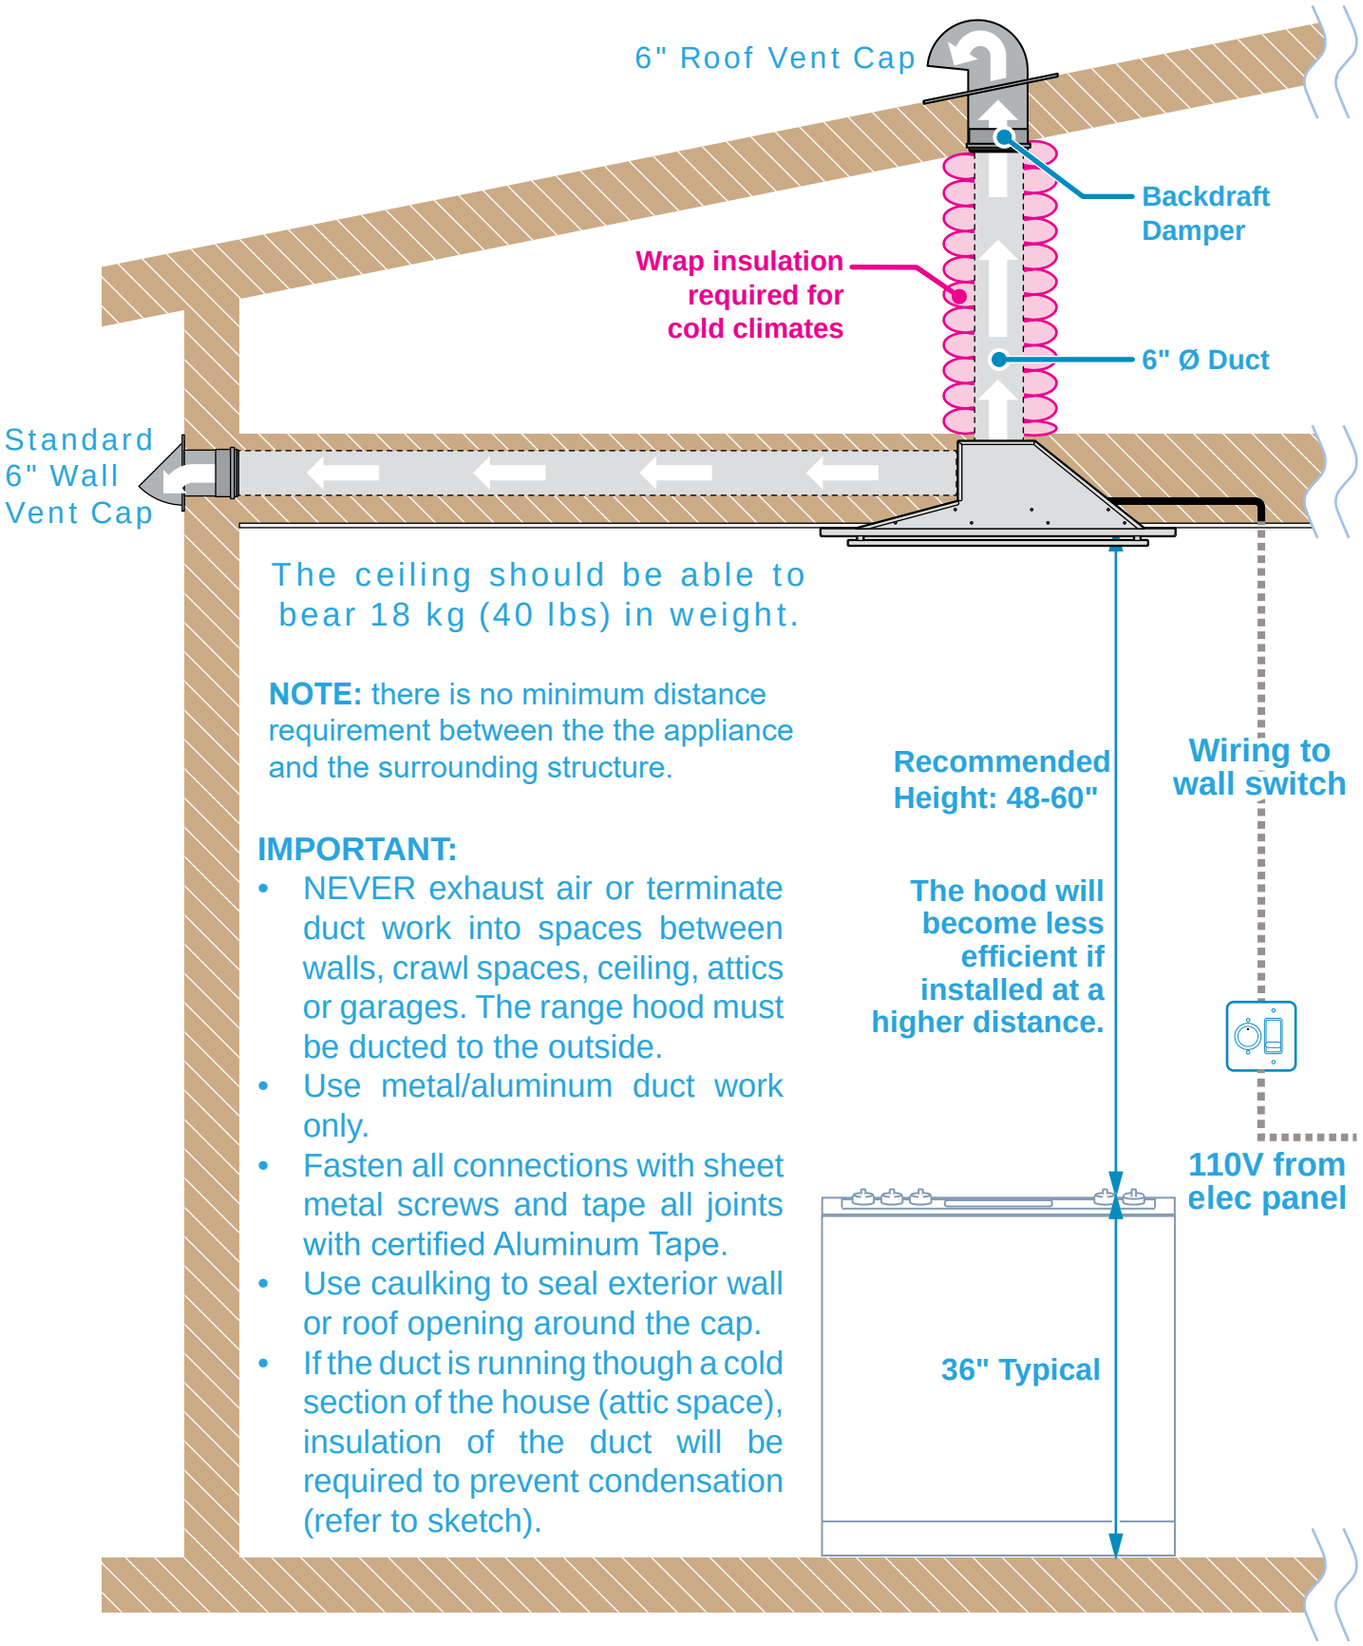

(4) Anchor your range hood by fastening woodscrews through the side walls where the installations holes are located to the joists flanking the range hood. Use as many as needed to have a secure fit.

NOTE: ***Woodblocking may be needed if there is more space in between joists for installation.***

VENTING METHOD

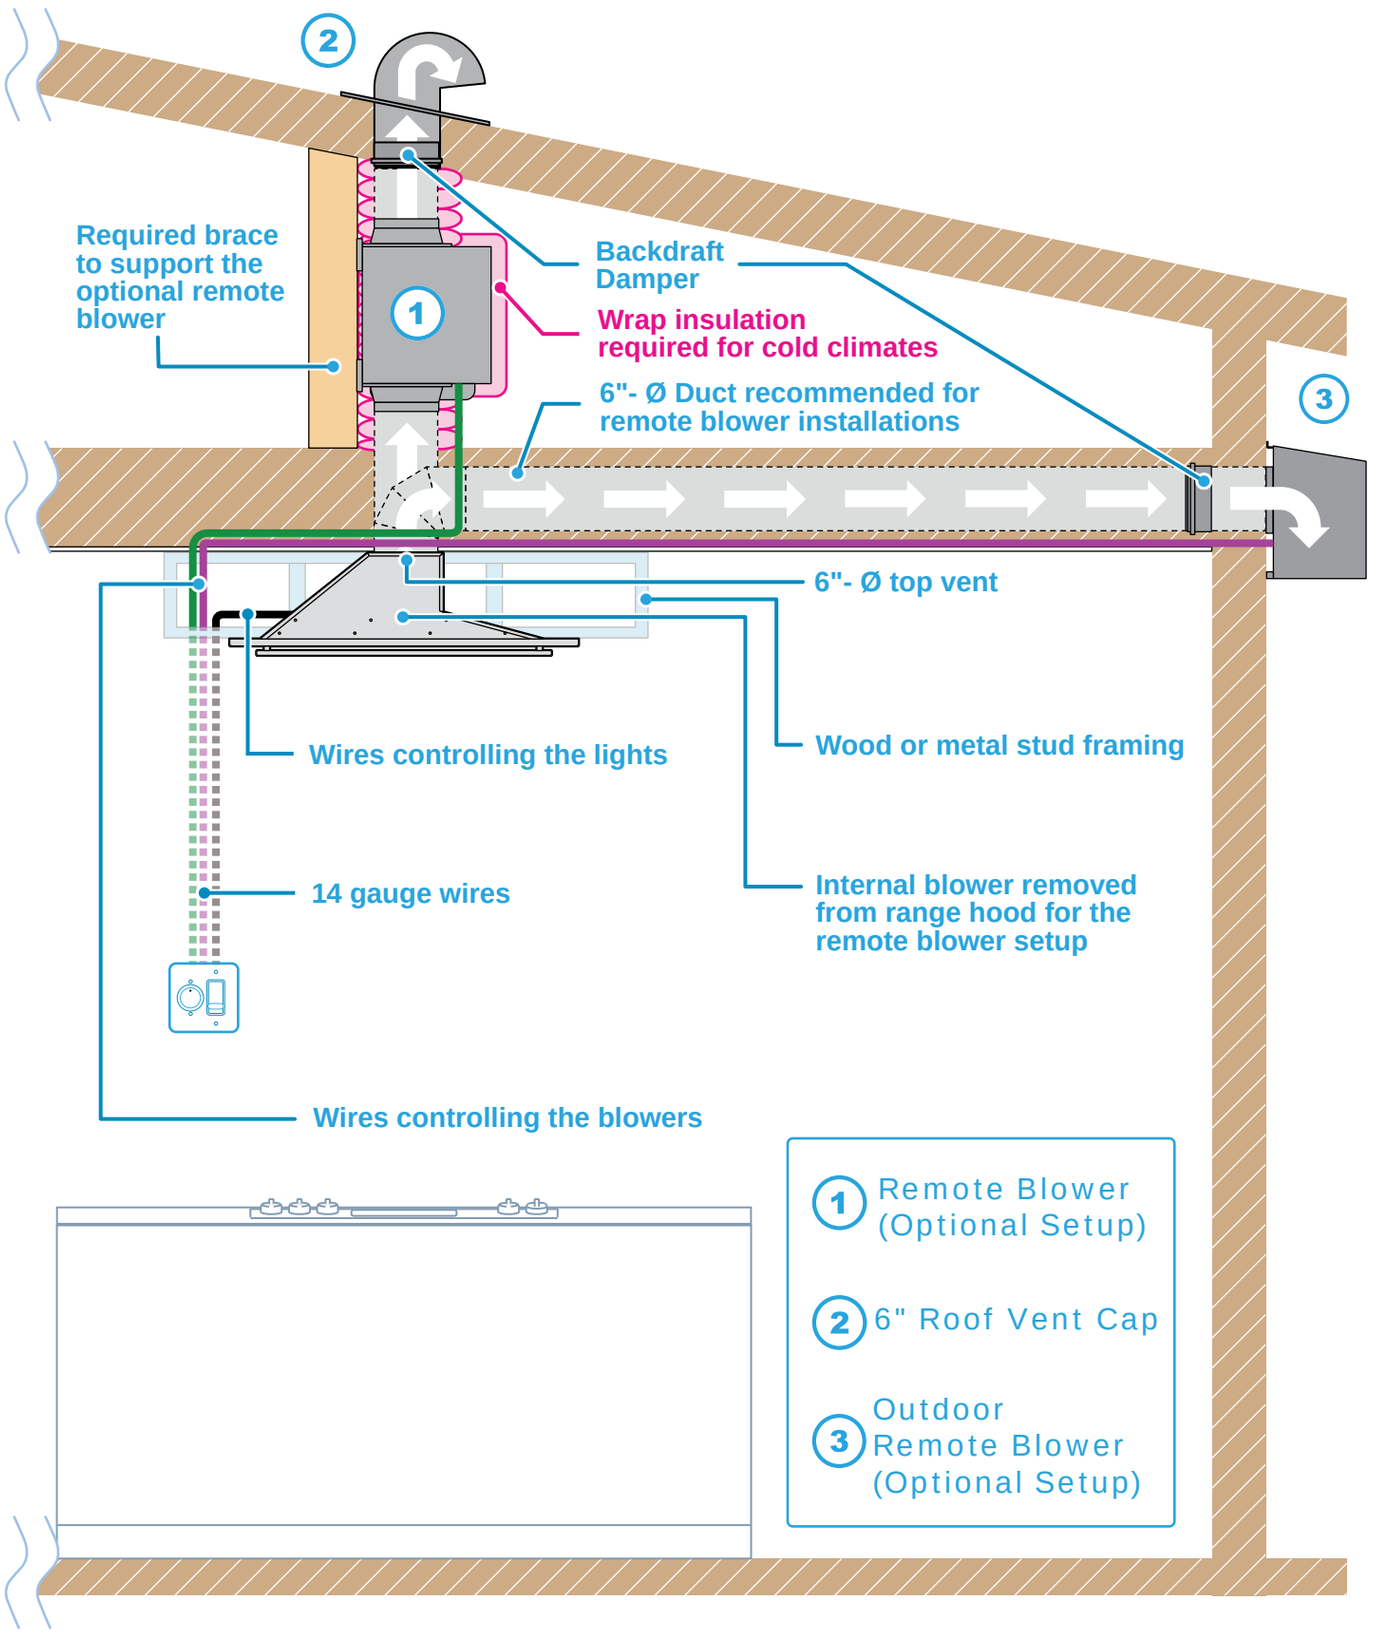

- The range hood should be placed at a maximum distance of about 8' from the floor for best performance.
- This range hood is factory set for venting through the roof or wall.
- Vent work can terminate either through the roof or wall.

NOTE:

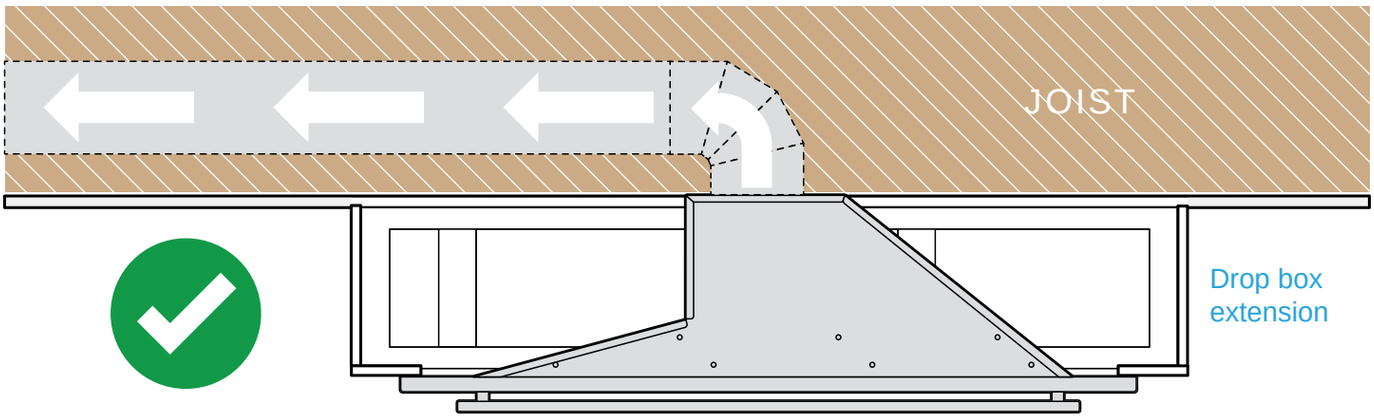

– there shall be adequate ventilation of the room when the range hood is used at the same time as appliances burning gas or other fuels (not applicable to appliances that only discharge the air back into the room); the minimum clearance distance to be maintained between the cooking surface and the lowest edge of the range hood;
– there is a fire risk if cleaning is not carried out in accordance with the instructions;
– do not flambé under the range hood;
– CAUTION: Accessible parts may become hot when used with cooking appliances.

REMOTE BLOWER (Optional)

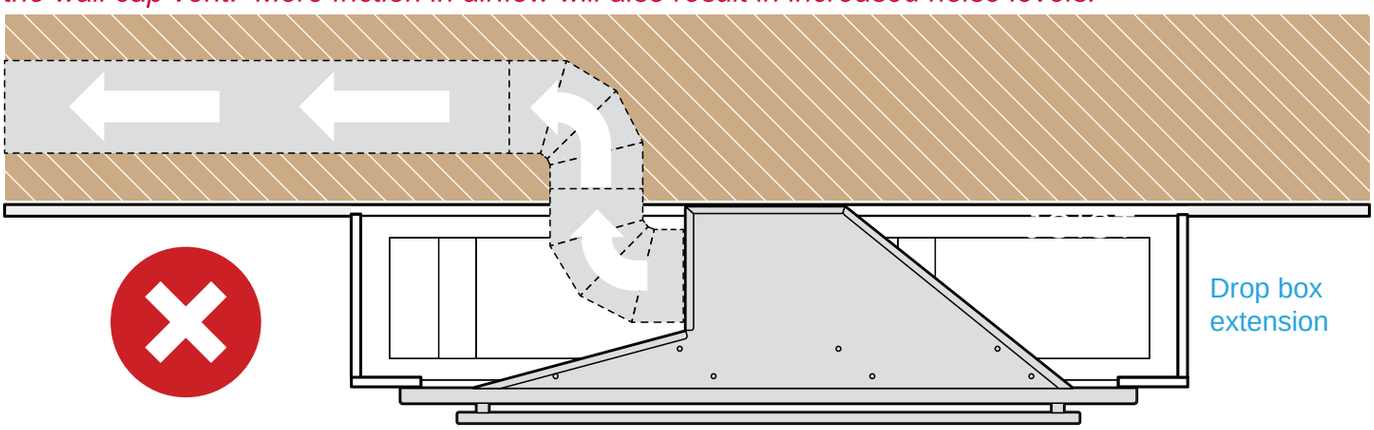

DO'S AND DON'TS FOR DUCT VENTING

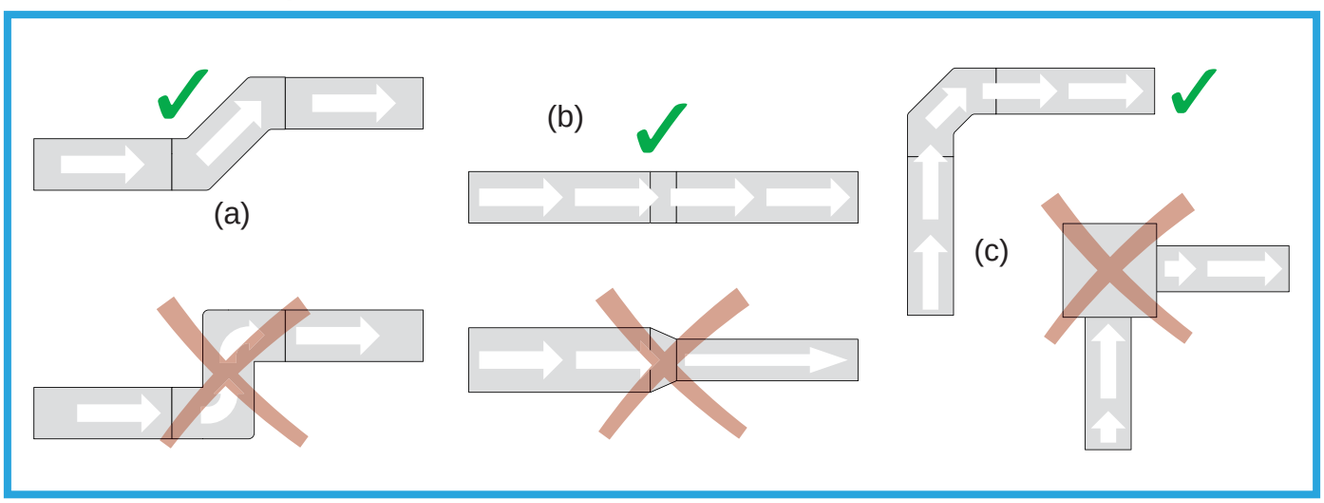

If you choose to use a drop box extension to vent out through your standard wall cap, ensure your exhaust vent is attached from the top opening, and use an elbow joint duct.

NOTE: Do NOT exhaust through the side opening to vent in a drop box extension by using dual elbow joint ducts, as this will add friction to air flow and not provide optimum venting directed outside through the wall cap vent. More friction in airflow will also result in increased noise levels.

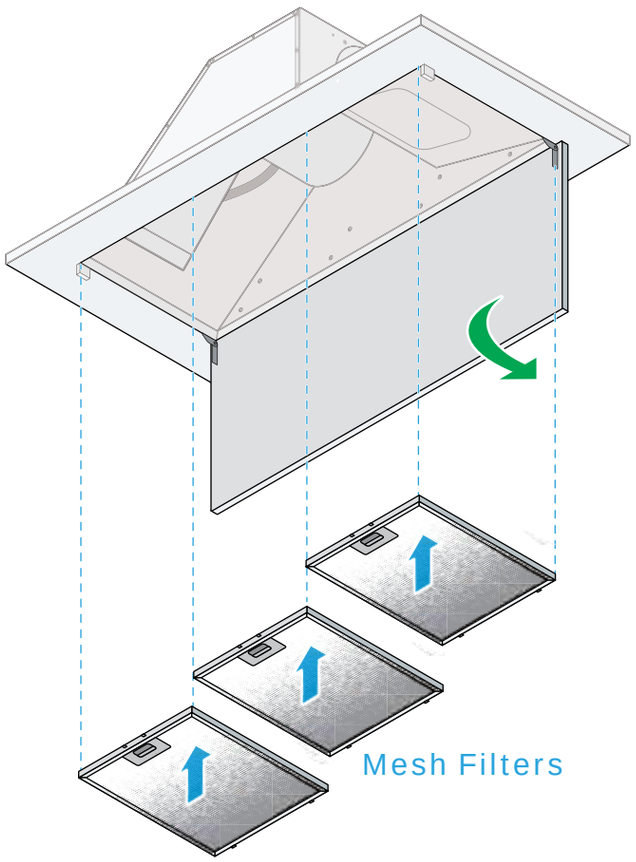

a. Avoid the use of sharp elbows. Use 45 degrees instead, if possible.
b. DO NOT use REDUCERS. Keep the size of the duct the same, as per the manual. A reducer will reduce the CFM of the hood and increase the noise.
c. DO NOT use plenum boxes. Boxes create turbulence and make the hood inefficient. Use a smooth elbow to guide the air outdoors.

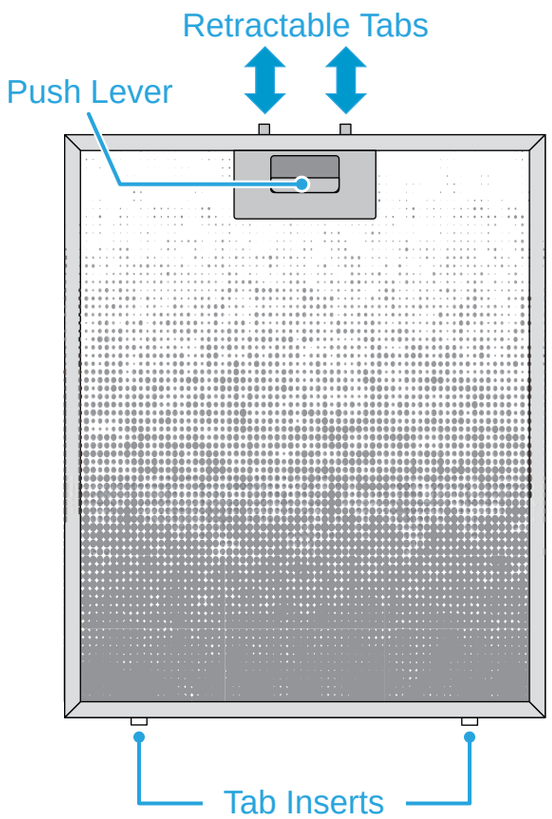

- The air must not be discharged into a flue that is used for exhausting fumes from appliances burning gas or other fuels (not applicable to appliances that only discharge the air back into the room);
- The minimum distance between the supporting surface for the cooking vessels on the hob and the lowest part of the range hood. (When the range hood is located above a gas appliance, this distance shall be at least 65 cm. If the instructions for installation for the gas hob specify a greater distance, this has to be taken into account. The distance of 65 cm can be reduced for:
  • non-combustible parts of range hoods, or
  • parts operating at safety extra low voltage, provided these parts do not give access to live parts if deformed);
- Regulations concerning the discharge of air have to be fulfilled.

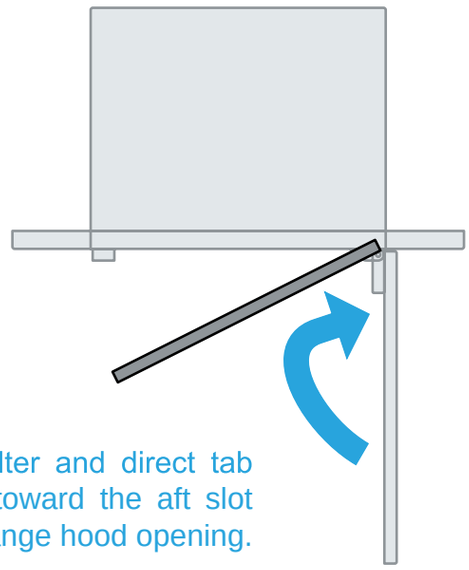

FILTERS

BOTTOM VIEW

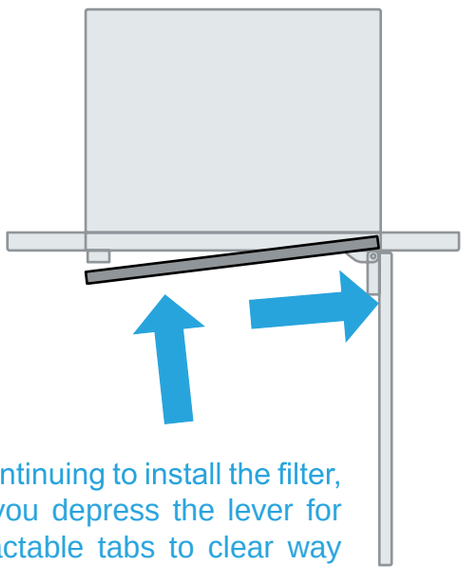

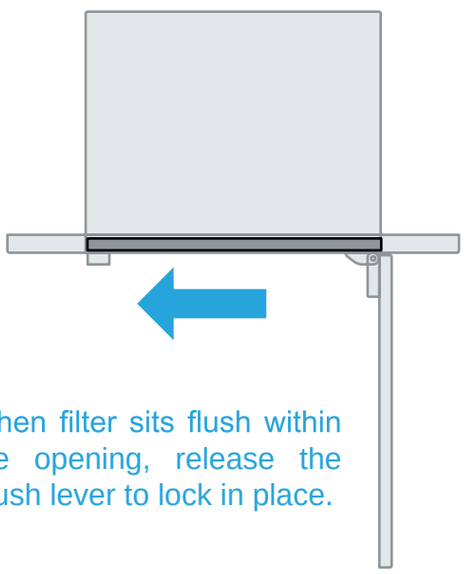

FRONT VIEW

Angle filter and direct tab inserts toward the aft slot of the range hood opening.

While continuing to install the filter, ensure you depress the lever for the retractable tabs to clear way for flush insertion.

When filter sits flush within the opening, release the push lever to lock in place.

TROUBLESHOOTING

1. If the range hood or lights do not operate after installation:	• Check if the range hood has been plugged in, make sure that all power has been turned back ON, and all electrical wiring are properly connected.
2. One light is not working.	• Swap out light assembly to working ones to determine whether it is caused by defective bulbs. ***Contact Victory Range Hoods for assistance to replace bulb***.
3. The range hood vibrates when the blower is on:	• The range hood might not have been secured properly on to the ceiling or wall. • The impeller may be out of balance.
4. The blower or fan seems weak:	• Duct is too small. Range hood WILL NOT function efficiently with insufficient duct size. For example: Connecting this hood to 4" or 5" duct will reduce the suction and create extra noise and vibrations. Check if duct is clogged or if damper unit is not installed correctly or opening properly. A tight mesh on a side wall cap unit might also cause restriction to the air flow.
5. The lights work but the blower is not spinning at all, is stuck or is rattling.	• The blower might be jammed or scraping the bottom due to shipping damage. Please contact us immediately.
6. The hood is not venting out properly:	• Make sure the distance between the stove top and the bottom of the hood is within 48" and 60" in distance. **Due to different ceiling height configurations, recommended height may not be applicable.* • Reduce the number of elbows and length of duct work. Check if all joints are properly connected, sealed, and taped. • Make sure the power is on high speed for heavy cooking. • The duct size must be 6", or larger. Please make sure there are NO reducers or plenums in the duct work. • ***Refer to DO'S and DON'TS for DUCT VENTING page for illustrative examples.***

NOTE: *For all other inquiries, please contact Victory Range Hoods.*

MAINTENANCE

Operations:

- Read and understand all instructions and warnings in this manual before operating the appliance. Save these instructions for future reference.
- Always leave safety grills and filters in place. Without these components, operating blowers could catch on to hair, fingers and loose clothing.
- NEVER dispose cigarette ashes, ignitable substances, or any foreign objects into blowers.
- NEVER leave cooking unattended. When frying, oil in the pan can easily overheat and catch fire. The risk of self combustion is higher when the oil has been used several times.
- NEVER cook on “open” flames under the range hood. Check deep-fryers during use: Superheated oil may be flammable.
- The saturation of greasy residue in the blower and filters may cause increased inflammability. Keep unit clean and free of grease and residue build-up at all times to prevent possible fires.
- Filters must be cleaned periodically and free from accumulation of cooking residue. Old and worn filters must be replaced immediately.
- DO NOT operate blowers when filters are removed. Never disassemble parts to clean without proper instructions. Disassembly is recommended to be performed by qualified personnel only. Read and understand all instructions and warnings in this manual before proceeding.
- SAFETY WARNING: Never put your hand into area housing the fan while the fan is operating!

Cleaning Exterior surfaces:

- Clean periodically with stainless steel cleaner and clean cotton cloth. Do not use corrosive or abrasive detergent (e.g. Comet Power Scruv®, EZ-Off® oven cleaner), or steel wool/scoring pads, which will scratch and damage the stainless steel surface. For heavier oil use liquid degrease such as “Forumla 409®” or “Fantastic®” brand cleaner.
- If the hood looks splotchy (stainless steel hood), use a stainless steel cleaner to clean the surface of the hood. Avoid getting cleaning solution onto or into the control panel. Follow directions of the stainless steel cleaner. CAUTION: Do not leave on too long as this may cause damage to the hood finish. Use a soft towel to wipe off the cleaning solution, gently rub off any stubborn spots. Use a dry soft towel to dry the hood.
- After cleaning, you may use non abrasive stainless steel polish such as 3M® or ZEP®, to polish and buff out the stainless luster and grain. Always scrub lightly, a with clean cotton cloth, and with the grain.
- DO NOT allow deposits to accumulate or remain on the hood.
- DO NOT use ordinary steel wool or steel brushes. Small bits of steel may adhere to the surface and cause rusting.
- DO NOT allow salt solutions, disinfectants, bleaches, or cleaning compounds to remain in contact with stainless steel for extended periods. Many of these compounds contain chemicals, which may be harmful. Rinse with water after exposure and wipe dry with a clean cloth.

Cleaning Aluminum Grease Filter:

- Filters should be cleaned after every 30 hours of use.
- ***Aluminum filters are NOT dishwasher safe.*** Spray “Formula 409®” or equivalent degreasing detergent and leave to soak if very dirty. Dry the filters and re-install before using the hood.

Replacing Filters:

- Should filters wear out due to age and prolonged use, please contact Victory Range Hoods to order replacement filters.

Lights (for units with lights):

- Rectangular Lights, LED, are to be used in this range hood
- Rated Wattage 2.5W (max 5W for replacements)
- Light fitting dimensions: 7cm x 2cm

NOTE: *For all other inquiries, please contact Victory Range Hoods.*

WARRANTY

TO OBTAIN SERVICE UNDER WARRANTY:

You must present proof of original purchase date.

Please provide an original dated proof of purchase (sales receipt / invoice) in order to obtain service under warranty.

Parts Warranty (5 Years) & Motor Warranty (Lifetime*)

For 5 years from the date of original purchase, Victory Range Hoods will provide free of charge, non-consumable replacement parts or components that failed due to manufacturing defects. Subject to the conditions and limitations set forth below, Victory Range Hoods will replace any part of its products that prove defective by reason of improper workmanship or materials. Replacement parts or products will be provided by Victory Range Hoods on an exchange basis, and will be either new or refurbished to be functionally equivalent to new.

*The Lifetime motor warranty is only applicable to the original purchaser and is non-transferable. Proof of purchase and an order number are both required in order to create a warranty claim. The Lifetime motor warranty is only valid for as long as the original purchaser owns the range hood. If the range hood is re-sold or transfered in any way to another owner, the Lifetime motor warranty will no-longer apply.

Who is Covered:

This warranty is extended to the original purchaser for products purchased for ordinary home use.

This Warranty Will Be Voided When:

Product is damaged through negligence, improper installation, accident, abuse, misuse, natural disaster, insufficient or excessive electrical supply, abnormal mechanical or environmental conditions, or any unauthorized disassembly, repair, modification, or failure to follow installation instructions. When product is used commercially or other than its intended purpose. Damaged because of improper connection with equipment of other manufacturers. Repaired or modified by anyone other than Victory Range Hoods. This limited warranty also does not apply to any product on which the original identification information has been altered, obliterated or removed, has not been handled or packaged correctly or has been sold as second-hand.

What is Not Covered:

Consumable parts such as light bulbs, metal and charcoal filters. The natural wear of finish, and wear due to improper maintenance, use of corrosive and abrasive cleaning products, pads, and oven cleaner products. Chips, dents or cracks due to abuse, misuse, freight damage, or improper installation. Damage of product caused by accident, fire, floods or acts of God. The manufacturer and/or distributor/ reseller is not liable for, and does not cover under warranty, any loss of properties or any costs associated with removing, servicing, installing, or determining the source of problems with this product.

This warranty is valid in Canada and the United States of America. It is non-transferable and applies only to the original purchaser and does not extend to subsequent owners of this product. Any applicable implied warranties, including the warranty of merchantability, are limited in duration to a period of express warranty as provided herein beginning with the date of original purchase and, no warranties, whether expressed or implied, shall apply to this product thereafter.

To obtain warranty service, you may contact Victory Range Hoods. Please confirm the terms of Victory Range Hood's policies prior to contacting us. Typically, you must include product identification information, such as the model number/name with a detailed description of the problem you are experiencing. You must also include proof of the date of original purchase as evidence that the product is within the applicable warranty period, and that it is a genuine range hood from Victory Range Hoods.

The information in this document is subject to change without notice, please contact Victory Range Hoods for updated details.

DISCLAIMER

Carefully inspect all items for damages before accepting delivery. Note any damages on the freight bill or express receipt. Request name and signature of the carrieł s agent and keep a copy to support your claim. Upon acceptance of items, owner assumes responsibility for its safe arrival. Report damages to the carrier and file a claim immediately. Failure to do so may result in the denial of your claim. The carrier will furnish you with necessary forms for filing a claim.

Damages on any returns or exchanges caused during transit are not covered under our warranty (the customer must insure the return with the shipping company). If your range hood is damaged in transit, please contact us within 14 days of receiving your new order to report the damages. Victory Range Hoods will, to the best of its ability, file a damage claim and investigate the matter.

Please inspect contents of package(s) carefully upon receiving! We must be notified of any damages and/or missing parts within fourteen (14) days upon your receipt of the package(s). Claims will not be accepted after fourteen (14) days. NOTE: Items are thoroughly tested and carefully packed in our facility before shipping.

Products must be returned in good working condition with ALL original parts and documentation packed in all original cartons, fillers and shipping cartons. A restocking fee of 10% will be charged for all approved return(s). Exchanges or returns will not be accepted if the unit has been installed, and may be rejected if parts are missing.

Make sure to inspect the hood for damages and defects before installation. Appearance flaws of the hood found after installation and not affecting hood performance are not covered under our warranty for returns or exchanges. Service visits are not covered under warranty and will carry a service charge.

CONTACT US

If you require assistance, please contact Victory Range Hoods. Please have your order number and model of the range hood ready. You must have this information in order to receive a response to your request.

If you need replacement parts, we recommend using only genuine parts. Our accessories and parts are engineered and designed specifitally for Victory Range Hoods. Each part is rigorously tested assuring the utmost in durability and reliability, providing a factory match, factory-installed appearance and functionality tailored to each individual range hood model.
