Installation

1. Install the foot caps on the ends of the legs (May have been installed already.)

2. Install the top caps on the top of the side support tubes (May have been installed already.)

3. Install the caps on the ends of the bar tubes (May have been installed already.)

4. Assemble the side frame as per the drawing.

5. Choose the hole pattern of the side frame and the bar tubes to make the angle you need.

6. Fix six right-angle steel crossbars on the two side frames; you can adjust the depth.

7. Tighten all the parts and now it is ready to use.

Attention!

1. When you move the rack or adjust the angle and depth of the crossbars, please remove all the dumbbells on it/them.
2. Check and tighten all loose parts after a while for maintenance.
