Installation Steps

1

If you are replacing an older garbage disposal flange start here. If not please move to step 2. Turn off electrical power to the garbage disposal and remove all drain connections, then remove garbage disposal. Loosen the 3 mounting screws on the garbage disposal mounting hardware. Then remove retaining snap ring and hardware from old disposal rim.

2

If you are replacing an old flange and have a gasket, you can place that on the new flange. If not, apply an ample amount of putty under the flange rim. Insert the sink flange into the sink drain opening and press down firmly to compress the putty. Wipe any excess putty away.

3

NOTE: Turn on the electrical power to the garbage disposal.

Position the garbage disposal mounting hardware onto the disposal rim and reinstall the retaining snap ring. Tighten the 3 mounting screws (alternate the tightening of each screw a few turns at a time until mounting hardware is tight and secure). Attach the garbage disposal and turn on water to check for leaks.

4

When it is needed, put the cap with sealing ring onto the flange.
