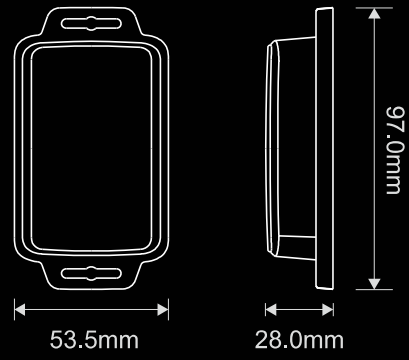
Durable | Ruggedized

GPX-Moko-M6 Bluetooth Beacon

The GPX-Moko-M6, a high-performance Bluetooth asset tracking tag, is designed for industrial applications, offering exceptional structural and installation advantages. Equipped with a large 5200mAh battery, this product boasts an exceptionally 10 years lifespan. Additionally, its moderate size allows for easy deployment on a wide range of industrial assets.
With its water-resistant design, unparalleled broadcasting range and longest battery life, GPX-Moko-M6 tag can be one of the best choices for asset tracking in warehouse, constructions and logistics.

General Specs

Connectivity:	Bluetooth Low Energy (BLE)
Dimensions (mm):	97.0*53.5*28.0
Color:	Gray
Material:	PC + ASA
Waterproof:	IP67
Shock resistance:	IK08
Sensor:	Hall switch
Battery capacity:	5200mAh (LI-SOCI2)
	Replaceable battery
Battery lifespan*:	10 years (LI-SOCI2)
Operating temperature:	-20°C to 60°C (Li-SOCI2 battery)
Installation:	Screw | Sticker | Zip Tie

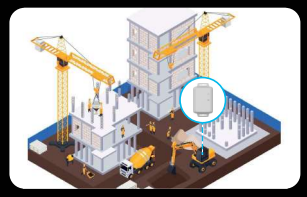


Various Installation Methods

Features

- Magnetic mounting
- IP67 waterproof
- IK08 shock resistance
- 10 years battery life

Application



Constructions

- Geo-fence alerts
- Asset anti-theft alarm
- Equipment managements

Warehouse

- Improve utilization of tools and equipments
- Prevent the use of equipment overdue maintenance or calibration
- Optimize stock levels eliminate shortages

Manufacturing

- Raw material tracking
- Turnover box utilization monitoring

FCC STATEMENT

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

RF warning statement:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
