AIR PURIFIERS

**For your better health**

## 600W Series

### Whole House Air Purifier

### Unit Set Up

#### Attach the top

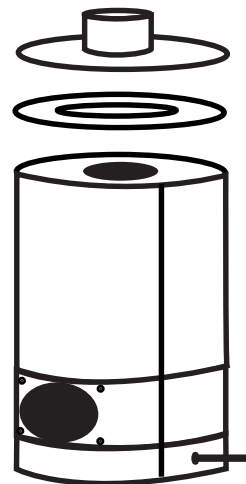

Place the white felt gasket on top of the filters  
Place the top and align the holes in the top with the holes on the 4 brackets without pushing the top completely down all around  
Place one screw with its washer and screw in partially  
Fit the top onto the body all around  
Screw in the 3 remaining screws  
Tighten fully the first screw

#### Attach the elbow

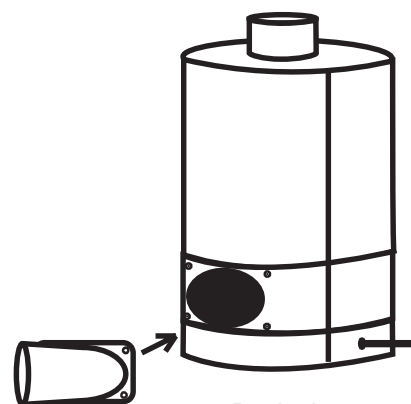

Place the elbow over the oval opening on the unit so that the elbow is towards the left when looking from the back of the unit.  
(The clean air flows out in a clockwise direction)  
Attach the elbow with the 4 screws provided

#### Attach standard 5" pipes

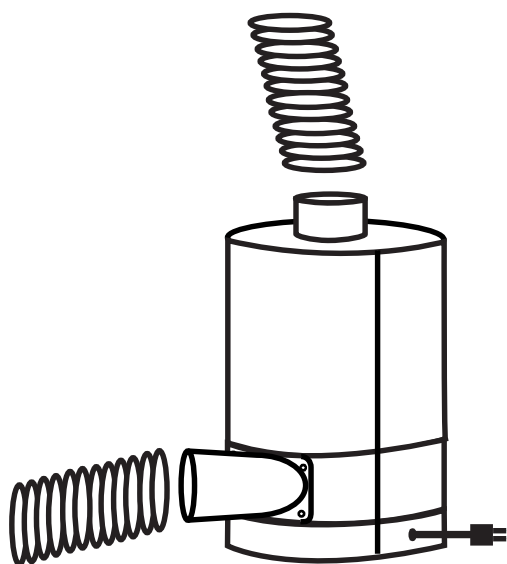

Attach standard 5" pipes from the house ventilation system to create a bypass to the air purification system
