Precaution

Please read all safety instructions before using the product. Important safety instructions:

1. Do not immerse the lithium-ion battery in water. Do not use the product if the battery is wet. Do not use the product if the battery is damaged or deformed.
2. Do not use the product if the battery is overheated or if the battery is leaking.
3. Do not use the product if the battery is swollen or if the battery is deformed.
4. Do not use the product if the battery is damaged or if the battery is deformed.
5. Do not use the product if the battery is damaged or if the battery is deformed.
6. Do not use the product if the battery is damaged or if the battery is deformed.
7. Do not use the product if the battery is damaged or if the battery is deformed.
8. Do not use the product if the battery is damaged or if the battery is deformed.
9. Do not use the product if the battery is damaged or if the battery is deformed.
10. Do not use the product if the battery is damaged or if the battery is deformed.

Precaution

Do not immerse the lithium-ion battery in water. Do not use the product if the battery is wet. Do not use the product if the battery is damaged or deformed.

Product Specification

Parts Identification

* Product Specifications

Item#	Specification
Model Name:	PHILIPS AOU610 DIFFUSER
Model:	WJZ271
Oil Capacity:	120ml
Essential Oil Consumption:	Lower @ 0.017 g/h • Medium @ 0.123 g/h Higher @ 0.322 g/h
Rated Input Voltage:	DC 5V/2A
Over Voltage Protection:	DC 24V No permanent overvoltage or burnout
Rated Power:	5W
Battery Capacity:	4000mAh Rechargeable Lithium Battery
Charging Time:	Approx. 4 hours

Note:

Actual oil consumption and battery life may vary depending on fragrance oil type, mist level, usage conditions, and ambient environment.

* Product Diagram & Button Functions

The diagram illustrates the Philips AOU610 Diffuser and its various parts. It includes a top-down view of the main unit with numbered callouts (1-10) pointing to specific features like the diffuser holes, power button, water level indicator, and control panel. An inset shows the disassembly process: removing the top cap (1), taking out the water tank (2), and separating the base (3). A separate cable (4) is also shown.

- A. Diffuser Holes
- B. Power Buttons
- C. Automatic On/Off Button
- D. Time Indicator
- E. Volume up/Down Buttons
- F. Water Fill / Full Water Buttons
- G. Volume Down/Up Buttons
- H. Auto Stop
- I. On/Off Button
- J. Essential Oil Bottle
- K. Type C Charging Cable

Bluetooth Connection

Power Switch ③

- Press the power switch to turn the light on.
- Press the power switch to turn the light off.

Internal Lens Area ④

Color	Light Color	Beam Pattern	Beam Angle	Beam Distance
White	White	Spot	10°	100m
Blue	Blue	Spot	10°	100m
Purple	Purple	Spot	10°	100m
Orange	Orange	Spot	10°	100m
Green	Green	Spot	10°	100m

Notes:
The Offroad Light has a memory function. When turned on again, it will keep the previous mode and beam setting.

Light Beam ⑤

- Press the light beam to adjust the beam angle.
- Press the light beam to adjust the beam color.

The external light is for decorative lighting only and will not turn on after power supply.

Teaser Light ⑥

- Short press: Press the telescopic trigger.
- Long press: Press the telescopic trigger.
- Press the telescopic trigger: Press the telescopic trigger.
- Press the telescopic trigger: Press the telescopic trigger.

The telescopic trigger will allow the telescopic trigger.

Volume Buttons ⑦

- Press the volume button to increase the volume.
- Press the volume button to decrease the volume.

When the Bluetooth is connected, you can play music from the Offroad Light speaker. Press the volume button to increase the volume. Press the volume button to decrease the volume. Press the volume button to increase the volume. Press the volume button to decrease the volume.

Charging Instructions

- Press the charging button to charge the Offroad Light.

Charging / Charging Status

Charging	Indicator Light
Not charging	Light is not lit
Charging	Light is lit
Charging 100%	Light is lit
Charging 50%	Light is lit
Charging 20%	Light is lit
Charging 10%	Light is lit

Please charge the Offroad Light when the red indicator light appears.

Notes:

- Please charge the Offroad Light with the original power supply, or a compatible power supply.

Bluetooth Search Connection Control Your Phone

- Turn on the Bluetooth.
- Enable Bluetooth on your phone.
- Search for the Offroad Light.
- Once connected, the Offroad Light will play the original audio.
- Operate music and play the Bluetooth.

FILTER WICK REPLACEMENT GUIDE

It is recommended to replace it every 2-4 weeks or when the aroma weakens.

Filter Wick Tool

New Wick Tray

Hook

Filter wick clogging is normal after long time use.

How to Fix It?

1. Replace the Filter wick:

2 new Filter wick accessories is included in the package. Please refer to the following guide for detailed replacement steps.

Please follow the labeling instructions shown on each of this card. Important: Use only 95% or higher ethanol, such as an ethanol or isopropyl alcohol.

1. Remove the old wick

2. Clean the wick

3. Need More Help?

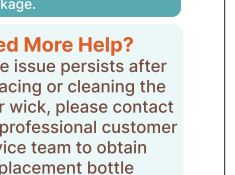

The new wick may be too long. Please trim it to the correct length. Please do not use alcohol to clean the wick. Please do not use a replacement wick.

4. Insert the new wick

5. Clean the wick

FILTER WICK CLEANING GUIDE

It is recommended to clean it every 2-4 weeks or when the aroma weakens.

Filter Wick Tool

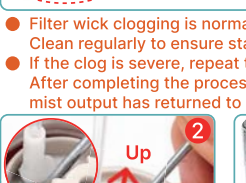

Hook

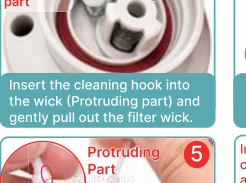

New Wick Tray

1. Remove the old wick

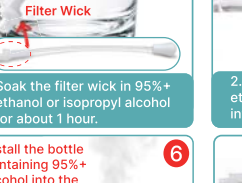

2. Clean the wick

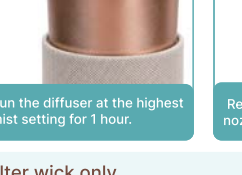

3. Need More Help?

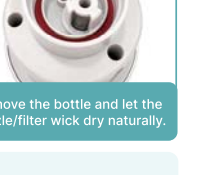

The new wick may be too long. Please trim it to the correct length. Please do not use alcohol to clean the wick. Please do not use a replacement wick.

4. Insert the new wick

5. Clean the wick

• Clean the Filter wick only.
 • Do not use water.
 • Only 95%+ ethanol or isopropyl alcohol.
 • Make sure the Filter wick is fully dry before re-assembling.
 • Do not immerse the diffuser bowl in water.

Troubleshooting	Troubleshooting
● TROUBLESHOOTING ■ The Diffuser Does Not Turn On Possible Causes - The battery, charging cable or not connected properly, or the device is not fully charged. Solutions 1. Check if the battery with the initial USB cable or AC/DC power adapter of the battery indicator is functioning, check the device instruction manual for the correct charging cable and adapter. 2. Check if the battery is fully charged. If the device is not working after the charging time, try the device for longer or contact the customer service.	Possible Causes - The battery is not fully charged or plugged in the wrong way to charge and power cables are not connected to the selected port. Solutions 1. Check the battery indicator. 2. Check if the battery is fully charged. 3. Check if the power cable is connected to the selected port.
■ No MIDI Output Possible Causes - The device is not installed properly, the USB cable is loose or the installed software is not compatible. - The device is not fully installed in the system. Solutions 1. Make sure the device is installed through a USB cable. 2. Make sure the device is installed in the correct MIDI channel. 3. Check the device manual and software user manual for the correct MIDI channel and software user manual.	Possible Causes - The device is not installed properly, the USB cable is loose or the installed software is not compatible. - The device is not fully installed in the system. Solutions 1. Check the device manual and software user manual for the correct MIDI channel and software user manual. 2. Check if the device is installed in the correct MIDI channel.
■ Diffuser Keeps Working Continuously Possible Causes - The device is not working properly, or the selected item does not exist. Solutions 1. The device may not be working correctly or the selected item does not exist. Please try to select another item.	Possible Causes - The device may not be working properly or the selected item does not exist. Solutions 1. Check if the device is working properly or the selected item does not exist.

Troubleshooting	Troubleshooting
❖ Linkage Problem Cause: The engine is not responding, the engine is slow, or the engine stops after starting. Solutions: 1. Make sure the engine is cold and the throttle is closed. 2. Check the engine oil level and oil quality. 3. On 25 cc, check the air filter and the air filter cover while the engine is running. 4. Check the spark plug and the spark plug cap.	❖ Battery Drain Faster Than Expected Problem Cause: The engine is very idling or on a low load, the engine runs, but the battery is not charging. Solutions: 1. Use a lower load when idling or stop it for a long time. 2. Lower the engine speed slightly for a long time. 3. Turn off the engine light to stop the engine consumption. 4. Fully charge the battery before the engine is used.
❖ Bluetooth Cannot Be Found Problem Cause: The Bluetooth is not turned on, the phone is too far away, or the Bluetooth was previously connected to another phone. Solutions: 1. Make sure the Bluetooth is turned on. 2. Make sure the Bluetooth is turned on your phone. 3. Make sure you are close to the phone. 4. Make sure the phone is not connected to another phone, disconnect or remove it. 5. Turn off the Bluetooth. 6. Turn on the Bluetooth. 7. Repeat the Bluetooth operation.	❖ The engine light does not turn on Problem Cause: The engine light may be turned off, the battery may be too low. Solutions: 1. Press the engine light button to turn the engine light on. 2. Press and hold the engine light button to turn the engine light on or off. 3. Charge the battery or the battery may be low.
❖ Bluetooth is Connected but No Sound Problem Cause: The phone volume is too low, the Bluetooth speaker volume is too low, or music is not playing. Solutions: 1. Increase the phone's volume. 2. Increase the phone's volume. 3. Increase the phone's volume. 4. Increase the phone's volume. 5. Increase the phone's volume. 6. Increase the phone's volume. 7. Increase the phone's volume.	❖ The motor does not work as expected Problem Cause: The motor function is not working, the motor is not working automatically after the selected working time. Solutions: 1. Check the motor function button is locked (S1, S2, S3, S4, S5, S6). 2. The phone is not working automatically after the selected motor time. 3. The phone is not working after the selected motor time. Check the motor function is not a motor.

FAQ

Q1: Why is the scent weak?

The scent strength may be affected by room size, ventilation, air circulation, oil type, concentration, and how long.

Please try the following:

1. Select 2 to 3 drops.
2. Place the diffuser in a more open space.
3. Make sure the diffuser is not too close to the wall.
4. If the effect can't be noticed for several weeks, clean or replace the Wick stick inside the diffuser.

Q2: Why can't I smell wood scented?

1. This is a specially designed fragrance. The scent particles are very fine and may not always be clearly noticed.
2. The fragrance is the natural appearance of fragrance by itself only.

Q3: Why does the scent become weaker after a period of use?

1. Oil drops on the wick may build up on the wick. After 1-2 weeks, wipe the wick with a cotton swab, especially when you change a wick of a newly concentrated fragrance.
2. Please remove the wax that will be solidified during the use time or in 200°C when the wick is not used for a long time to avoid the fire.
3. If the diffuser is used 2-4 weeks is recommended, depending on usage frequency and the type of wick used.
4. After 2 weeks of use after cleaning 2-3 times, replace the filter stick with a new one.

FAQ

Q4: What type of oil can I use?

1. Use pure essential oils or oil blends that are compatible with the diffuser.
2. Do not use alcohol, perfume, or other volatile liquids.
3. Do not use carrier oils, massage oils, or any thick oils, or diluted oils, unless they are specifically noted to support your skin type.

Q5: Why can't I plug my phone into the Bluetooth speaker?

1. Make sure the phone is powered on and the Bluetooth is turned on.
2. If the phone can't connect to the Bluetooth speaker, disconnect the Bluetooth before plugging the phone in.
3. Please restart the Bluetooth in your phone and restart the diffuser before trying again.

Q6: Why is there no sound after Bluetooth connection?

1. Please make sure the Bluetooth is turned on and the phone and music playback device are connected to the Bluetooth speaker.
2. Please make sure the Bluetooth is turned on and the volume buttons on the back of the phone are pressed.
3. Please make sure the phone is not muted, Bluetooth is turned on, and music is playing.

Q7: What is the charging light mean?

1. The light is on: the battery is being charged.
2. The light is off: the battery is fully charged.
3. The light is red: battery is low. Recharge the battery.
4. The light is yellow: the battery is low. Recharge the battery.
5. The light is blue: the battery is low. Recharge the battery.

Q8: Why can't the diffuser remember my previous settings?

1. Please turn the diffuser a couple of times on and off, and keep the power on for several times before setting.
