

**DOUK AUDIO**  
MAKE HI-FI AFFORDABLE

MC3

### Introduction

MC3 is a 3-channel audio switcher, with balanced XLR and RCA inputs and outputs, suitable for making contrasts among different devices. Passive audio splitter converts signals into balanced or unbalanced, with a metal casing that effectively avoids external noise and ensures high-quality signal transmission; gold plated XLR ports ensure high reliability electrical connections and minimize signal attenuation during transmission. Designed with both HOT/COLD mode switching and GND common terminal, supporting remote control, exquisite appearance, and easy to use.

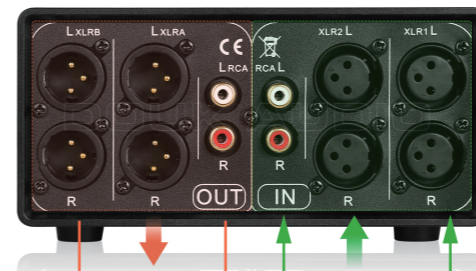

### Warm Tips

1. If there is static noise, it is usually caused by common ground or empty load, just need to add an audio isolation module to one of the active speakers/amplifier/preamp. For example, MC3--isolation module--devices, or audio source--isolation module--MC3.
2. When a microphone is connected to the XLR input, the signal can only pass through the XLR output, no signal conversion occurs.

### Step for use

1. Connect audio sources (e.g., phone, MP3, TV, CD player) to the unbalanced(RCA) input. Or connect audio sources (e.g., microphone, sound card, turner, preamp) to the balanced(XLR) input.
2. Connect the output devices(e.g., amplifiers, active speakers, equalizers) to the unbalanced(RCA) output. Or connect the output devices(e.g., studio monitors,converters, mixer) to the balanced(XLR) output.
3. Rotate the INPUT/OUTPUT knob to switch between different input and output combinations, allowing direct comparisons of audio quality.

### Front and Rear panel

### Parameters

Brand: Douk Audio  
 Audio input: 1\*RCA / 2\*XLR  
 Audio output: 2\*XLR / 1\*RCA  
 Hot-swappable: support  
 Dimensions(W\*D\*H): 150\*105\*68 mm / 5.91\*4.13\*2.76 in  
 Net weight: 485g / 1.07lb  
 Package weight: 700g / 1.54lb  
 Packing List: 1x Audio Selector 1x Manual
