Installation

1. Install the foot end caps on the legs (these may have already been installed).
2. Assemble the top side frame with the bottom side frame; fix them with short screws.
3. Connect the tubes together; fix them with screws, but do not tighten them.
4. Connect the tubes with the two side frames using long screws.
5. Tighten all the screws to make sure the rack is solid.

Attention!

- Always remove the dumbbells before adjusting the depth of the tubes.
- Always remove the dumbbells before moving the rack.
