[Free Repair Policy]

1. If the product fails during the warranty period, we will repair it free of charge if it is used normally according to the instructions on the instruction manual and product label and operated according to regulations.

2. Even within the warranty period, the following cases will require repair for a fee.

(a) Failure and damage caused by improper use, improper repair or modification.

(b) Failure and damage caused by falling, moving the installation location, transportation, dropping, etc. after purchase.

(c) Failure and damage caused by fire, earthquake, storm and flood disasters, gas disasters, lightning strikes, other natural disasters, pollution, abnormal voltage and other external factors.

(d) Failure and damage caused by non-normal household use (e.g., long-term commercial use, installation on vehicles or ships).

(e) This manual is not posted.

(f) The purchase date, customer name, and retailer name are not recorded in this manual, or the relevant text is changed.

(g) The product is acquired through transfer, resale, second-hand sale, auction, etc.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harm full interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1)This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Specific Absorption Rate (SAR) information:

This Device meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health. FCC RF Exposure Information and Statement the SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. The Device has also been tested against this SAR limit. This device was tested for typical body-worn operations with the back of the device kept 0mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain an 0mm separation distance between the user's body and the back of the device. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.
