Installation

Remove your existing deadbolt

Note: Please contact customer service if door thickness exceeds 1-3/4 in for a thick door kit.

1-3/8" to 1-3/4"
(35mm - 44mm)

1-1/2" or 2-1/8"
(38mm to 54mm)

If drilling a new door, use the supplied template and instructions available at:
[kwikset.com/doorprep](https://www.kwikset.com/doorprep)

1 Install the latch

A UP is on top.

B If the rectangle shaped hole is not centered in the door hole, rotate the latch face to extend the latch.

[OUTSIDE]

! If your door is not chiseled, install the drive-in collar.

1. Use a flathead screwdriver to remove latch face.

2. Twist and pull the collar off.

3. Install the drive-in collar to the latch.

4. Install latch to the door.

2 Install the strike

3 Install the exterior assembly

[OUTSIDE]

Remove adapter ring if bore hole measures 1-1/2" (38mm) diameter.

A

Cable goes under the latch.

[INSIDE]

Keep parallel to
the door edge

Tighten the screws evenly.
DO NOT over-tighten.

52367
(2X)

- B** Route the cable through the center hole of the mounting plate, then push the cable down into the bottom hole.

- C** Insert the key and test the latch. If the bolt does not extend or retract smoothly, adjust the screws. Leave the bolt **LOCKED/EXTENDED**.

Before You Continue

Ensure the latch bolt is in the extended position.

4 Install the interior assembly

 DO NOT install the batteries. Wait until Step 5.

 DO NOT remove the sticker from the turnpiece. Ensure the turnpiece remains in a vertical position.

Remove the interior cover from the interior assembly.

- B** Connect the cable.
Ensure a tight cable
connection.

- C** Excess cable will sit
inside the bottom of the
interior housing.

- D** Ensure the flat blade
fully engages with the
turnpipe shaft.

Ensure cable remains
connected.

Secure the interior
assembly onto the
mounting plate.
Ensure latch bolt
is extended.

52502
(2X)

Ensure the bolt is
in the extended
position.

[INSIDE]

5 Install batteries

- A Remove sticker from the turnpiece.

- B Insert (4) AA batteries (included) into the battery pack.

⚠ Ensure correct polarity. Use new, non-rechargeable alkaline batteries only.

With the door open, install the batteries. **NOTE:** Lock must be installed on the door before inserting the batteries.

[INSIDE]

Download the Kwikset
app & create an account
to complete set up

Complete your lock set up

Follow the instructions
in the Kwikset app to
complete lock setup.

If this lock was professionally installed (or installed by someone other than the homeowner), make sure this step is performed by the homeowner.

Reference Guide

Locking

To lock your door, press the Kwikset logo button. The lock will play a tune, and the button will flash amber as the deadbolt extends.

Unlocking

To unlock your door, enter the user code. The lock will play a tune, and the Kwikset logo button will flash green as the deadbolt retracts.

SmartKey® Re-key

Re-key the lock to work with your existing key by following the **SmartKey® Re-key instructions**.

NOTE: If Auto-Lock is enabled, remove the batteries before re-keying your lock.

Factory Reset

Factory Reset will:

- delete all access codes and associated schedule
- reset lock settings to default
- lock will show as offline in the Kwikset App
- lock will be deactivated and will need to be set up as new

Factory Reset should be used when:

- you want to change the lock owner
- you have lost your phone
- you are troubleshooting the lock

1. Press and hold the Programming Button.

2. While still holding the Programming Button, insert the batteries. Continue holding the Programming Button for 30 seconds.

Continue to the next page for additional steps.

3. After 30 seconds, the Status LED light will flash RED and lock will beep. Release the Programming Button.

4. Press the Programming Button again within 5 seconds.

5. SUCCESS: Lock will play a series of beeps, Status LED will flash GREEN, then pulsing BLUE.

UNSUCCESSFUL: Lock will play a single-tone sound, Status LED light will flash RED.

Troubleshooting

If you have any issues, please visit our support center: kwikset.com/support or call us at **1-800-327-5625**.

Important Safeguards

1. Read all instructions in their entirety.
2. Familiarize yourself with all warning and caution statements.
3. Remind all family members of safety precautions.
4. Always have access to your lock's standard key.
5. If using the Auto-Lock features, make sure you have your smartphone or standard key with you to prevent locking yourself out.
6. Familiarize yourself with all light bar error notifications.
7. Replace low batteries immediately.
8. Dispose of used batteries according to local laws and regulations.

WARNING: This Manufacturer advises that no lock can provide complete security by itself. This lock may be defeated by forcible or technical means, or evaded by entry elsewhere on the property. No lock can substitute for caution, awareness of your environment, and common sense. Builder's hardware is available in multiple performance grades to suit the application. In order to enhance security and reduce risk, you should consult a qualified locksmith or other security professional.

Regulatory Compliance

FCC ID: NUL-9255
IC: 34767-GED9255

FCC Interference Statement

This product complies with standards established by the following regulatory bodies:

- Federal Communications Commission (FCC)
- Industry Canada

FCC

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

IMPORTANT! Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

Industry Canada

This device contains license exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's license-exempt RSS(s). Operation is subject to the following two conditions: (1) This device may not cause interference. (2) This device must accept any interference, including interference that may cause undesired operation of the device.

L'émetteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes: (1) L'appareil ne doit pas produire de brouillage; (2) L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

RF Exposure

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 cm between the radiator and a human body.

This equipment complies with ISED radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 cm between the radiator and a human body.

Cet équipement est conforme aux limites d'exposition aux rayonnements ISED établies pour un environnement non contrôlé. Cet équipement doit être installé et utilisé avec une distance minimale de 20 cm entre le radiateur et un corps humain.
