

INSTRUCTIONS TO REPLACE DAMAGED HANDS

1. Remove the second hand or center pin by gently pulling up and away from the clock.
2. Repeat this with the minute and then the hour hand.
3. Have your new set of hands ready. First, place the hour (short) hand onto the shaft and gently push down. Point hand to the 12 position.
4. Second, place the minute (long) hand onto the shaft and gently push down. Point hand to the 12 position.
5. Next, place the second hand or the center pin on top of the shaft and gently push down.
If using a second hand, it should point to the 12 position.
6. With all hands securely on the shaft and in the 12 position, set the time by moving the dial on the rear of the clock in either a clockwise or counterclockwise direction until the hands indicate the correct time.
