Press to switch to Music mode, the display will show: “**MUSIC**”.

3 CONNECT TO SUBWOOFER

4 CONNECT TO THE TV VIA ARC

Steps 01:
Connect one end of the HDMI cable to the ARC/eARC port on the back of your TV.

Steps 02:
Then connect the other end into the HDMI ARC port of the soundbar.

Steps 03:
Press “ARC” button on the remote control to select “ARC” input.

What's the difference between: HDMI IN, HDMI ARC, HDMI eARC?

- ① HDMI IN is a standard HDMI input that allows you to connect devices to your TV or audio system. It supports audio and video signals, but it does not support audio return channel (ARC) or enhanced audio return channel (eARC) functionality.
- ② HDMI ARC is a special HDMI port that supports two-way communication between your TV and audio system. This means that audio can be sent from your TV to your audio system, and audio system can send audio back to your TV.
- ③ HDMI eARC (Enhanced Audio Return Channel) is an updated version of HDMI ARC that supports higher quality audio formats such as Dolby Atmos and DTS:X.

Note:

When ARC is connected, your TV remote control can control the soundbar and TV simultaneously:

- ① Turn on/off
- ② Adjust the volume

If there is no sound: try setting the TV audio output to PCM: TV Settings > Home > Settings> Sound > Digital Audio Output > PCM.

5 CONNECT TO TV VIA OPTICAL / COAXIAL / AUX

EN

OPTION 1: OPTICAL

NOTE:
1. Make sure the TV's port is OPTICAL OUT.
2. If audio is playing from the internal TV speakers, mute or minimize TV volume.

OPTION 2: COAXIAL

NOTE:
1. Make sure the TV's port is COAXIAL OUT.
2. If audio is playing from the internal TV speakers, mute or minimize TV volume.

OPTION 3: AUX

NOTE:
1. Use the 3.5mm to 3.5mm audio cable to connect to your TV's RCA AUDIO OUT port.

If there is no sound: try setting the TV audio output to PCM: TV Settings > Home > Settings> Sound > Digital Audio Output > PCM
