- * >8 ft rotating swivel cord with safety plug and hang loop
- * Intended for household, hotel or professional solon usage
- * Max sound: 83.4 Decibel

Drying wet hair with larger styling nozzle

First take out a large nozzle with a "lock" mark on it. Next, align the lock mark with another lock mark on the hair dryer. Then press the nozzle and rotate it, then you can blow your wet hair.

Straighten the hair with a smaller styling nozzle

Hold the smaller styling nozzle at a 45-degree angle to the hair. Hold the hair in one hand and the hair dryer in the other. Then adjust the hot air to blow the hair slowly from top to bottom.

Use a curly hair diffuser nozzle

After blow-drying, place your hair on a blow-dryer, which is designed for curly hair to keep the shape and style of the hair. To protect your hair, use warm air, not hot air to blow your hair.

Warnings

- * It is not recommended for young children and requires close supervision.
- * People with inexperience or physical, sensory or intellectual problems should be monitored.
- * If you use an appliance in the bathroom, unplug it from the outlet and keep it away from the water.Do not use equipment when it is prone to water
- * If the dryer slides into the water at startup, don't try to put it in the water;Just unplug it
- * To improve safety, it is recommended to install a differential circuit breaker in the circuit of the toilet with a rated working differential current not exceeding 30mA (10mA is ideal).

General safety instructions

- * Before using this product, please read this instruction carefully and keep it for future use
- * Before connecting the appliance, check that the voltage on the appliance matches the local mains voltage
- * Be sure to unplug electrical appliances in the following situations:
 - > When not in use and when you attach attachments
 - > Before cleaning
 - > In any case of trouble or failure
- * To protect children from electric shocks, do not leave the appliance unattended while plugged in
- * Regular inspection of products and cables; Do not use the product if any damage is found
- * Keep the power cord away from the hot surface to prevent melting. Use only original accessories
- * The air inlet and outlet must not be closed when the hair dryer is in use. Do not use utensils with wet or wet hands
- * If the appliance becomes damp or damp, remove it from the socket immediately
- * Use the equipment only for its intended purpose to avoid possible fire and damage to the product; Do not use and place under blankets, towels or MATS
- * In order to avoid possible overheating of the product, it is recommended that the cable is fully expanded and that the product not be turned on when not in use.

NOTE: The nozzle heats up during operation. When using this machine, avoid direct contact between body parts and hot surface.

Operating procedures

Blow-dry your hair

1. Dry your hair with a towel to remove excess moisture
2. Fully unfold the cable and plug it into the main power supply
3. Slide on/off button to turn on the air intensity and temperature Settings suitable for your hair.Low and medium temperature Settings, mild drying and molding with minimal damage. High heat setting ensures strong air intensity.

- * Start distributing, blow-dry from roots to ends
- * To increase the lifting force of the root, place the dryer under the root for a few seconds. Use the cool shot feature to create more lasting styles
- * Press and hold the on/off button to close the dryer
- * Please turn off the power after use and unplug from the main power supply. Let it cool down and put it away

Cooling shot botton

This feature helps with styling by blowing the cool air out of the hair, ensuring a longer blow-dry. After this switch is released, the device will run again at a preset temperature.

Professional concentrator

Concentrator allows you to solve airflow lock directly to ensure easy hair style.

Cleaning filter

Remove the cover plate as shown and clean the ventilation filter with a wet cloth.

Maintain and Store information

- * After setting, place the machine on a flat, heat-resistant surface
- * Disconnect the power supply and unplug immediately after use
- * Allow to cool completely before cleaning or packaging
- * Do not place or store in any damp or damp place. Do not hang the power cord when storing. Don't wind the wire around the machine
- * Do not unplug the cable or the product itself

Important warranty information

Hair dryers are rigorously tested during manufacturing to ensure the highest level of safety and operation. In normal use, its design is scientific and without defects.

Note: there may be a little odor when using, generally from the ion, safe to use.
