EARBUDS INTRODUCTION

EARBUDS FUNCTION

Function	Operation
Power ON	TREBLAB X5 turn on automatically when you take the earbuds out from the charging case. Alternatively, press and hold the POWER button on the left and right earbuds for 2 seconds.
Power OFF	TREBLAB X5 turn off automatically when you put the earbuds into the charging case. Alternatively, press and hold the POWER button on the left and right earbuds for 4 seconds, or just on one of them if X5 have been connected via TWS.
Pairing	Tap 3 times both the VOLUME - button on the right earbud and the NEXT button on the left earbud to enable pairing mode manually. It will disconnect the earbuds (you will hear the “Disconnected” voice prompt) from the current connected device if X5 were connected before.
Volume up	Press the VOLUME + button on the right earbud.
Volume down	Press the VOLUME - button on the right earbud.
Pause/Play	Press and hold the POWER button on the left or right earbud for 2 seconds until you hear the sound notification.
Previous track	Press the PREVIOUS / POWER button on the left earbud.
Next track	Press the NEXT button on the left earbud.

Answer a phone call	Press the VOLUME + button on the right earbud or the PREVIOUS / POWER button on the left earbud during the incoming call.
Reject a phone call	Press the VOLUME - button on the right earbud or the NEXT button on the left earbud during the incoming call.
Hang up	Press and hold the VOLUME - button on the right earbud or the NEXT button on the left earbud for 1 second.
Voice assistant activation	Press and hold the VOLUME - button on the right earbud or the NEXT button on the left earbud until you hear the sound notification.

WEARING METHOD

The correct size of ear-tips and ear-fins is critical for maximum external noise isolation and a snug secure fit. It is also common to have different sized ear canals so try on one ear-tip and ear-fin at a time to find the best fit for each side.

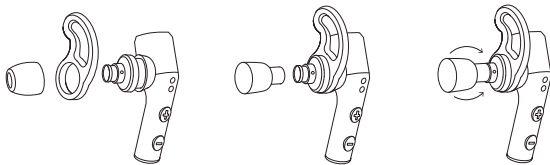

To change the silicone ear-fins:

Identify the left and right earbuds. Look for L/R mark near the round hole in the ear-fin, which is used to fix it on the earphone. Then choose the size that best fits each ear - S, M or L.

To change the silicone ear-tips:

1. Fix the rubber ear-fin in the hooking position (you can remove it at all for a better fitting).
2. Put the rubber inner part of the foam ear-tip on the top of the nozzle.
3. Rotate and push the ear-tip tube until it covers the ear-tip pillar firmly and completely.

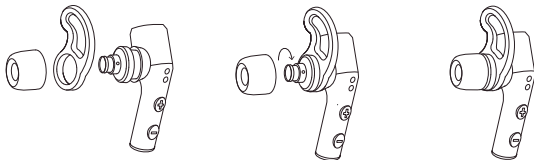

To change the foam ear-tips:

1. Fix the rubber ear-fin in the hooking position (you can remove it entirely for better fitting).

To change the foam ear-tips:

1. Fix the rubber ear-fin in the hooking position (you can remove it at all for a better fitting).
2. Put the rubber inner part of the foam ear-tip on the top of the nozzle.
3. Rotate and push down the ear nozzle trying to screw it into the inner rubber part of the ear-tip.

Fitment advise

1. Place the assembled earbud with the ear-tip in your ear canal.
2. Tuck the ear-fin into the front ear fold directed upwards. Adjust the earbuds to a suitable angle until you have a tight and snug fit.

USING THE CHARGING CASE

To power ON/OFF the charging case:

1. Press the CHARGING button to turn the charging case on. The charging indicators of the left and right earbuds will continuously and slowly flash several times while the earbuds are charging: 4 times = the full battery, 3 times = 75% of the battery, 2 times = 50% of the battery, 1 time = 25% of the battery.
2. Press and hold the CHARGING button for 1 second until the left and right earbuds' charging indicators flash quickly 3 times and then go off - the charging case is now turned off.
3. The charging case will turn off automatically:
 - after being idle for 8 hours;
 - after taking the earbuds out from the charging case;
 - when the earbuds are fully charged.
4. You can use the charging case to charge your earbuds while it's connected to a power source. Also, your charging case has a built-in battery and it can be used to recharge your earphones.

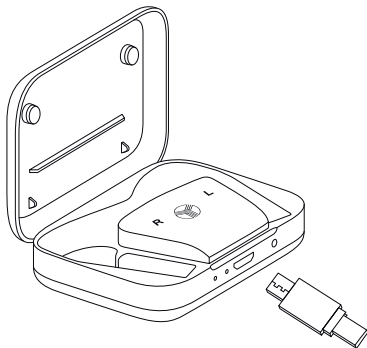

To charge the earbuds with the charging case:

1. When the earbuds' battery is low, a red light will be flashing on the right earbud and you'll hear the "Battery Low" voice prompt every 2 minutes until you charge them.
2. Place the left and right earbud into the correct slots in the charging case and close the charging cover. It will help the earbuds to take the right position in the charging case (the pins in the charging case should touch the copper sheet on the earbuds).

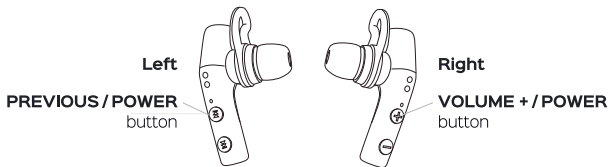

3. The charging case will turn on automatically. The earbuds will be turned off automatically - now the charging case starts to charge the earbuds. The charging indicators on the charging case will flash blue every second. When the earbuds are fully charged, the charging indicators will stop flashing and go off. If you do not use **X5** for a long time, then turn on the charging case manually by pressing the **CHARGING** button to charge the **X5** earbuds.

To charge the case:

When the charging case gets connected to a power source, the red **CHARGING** indicator of the charging case will turn on. The indicator will go off after the case is fully charged.

TURNING ON/OFF THE EARBUDS

To turn ON the earbuds

- ❶ Take the earbuds out from the charging case, **X5** will turn on automatically. Alternatively, press and hold the **POWER** button on both earbuds for 2 seconds. You will hear the “Power ON” voice prompt, and the blue LEDs will flash.
- ❷ You will hear the “Stereo mode” and “Connected” voice prompts when the earbuds are connected via TWS.
- ❸ You will hear the “Connected” voice prompt when **X5** are connected to a smart device.

To turn OFF the earbuds:

- ❶ Press and hold the **POWER** button on both earbuds for 4 seconds, or just on one of them if **X5** have been connected via TWS. You will hear the “Power OFF” voice prompt, the red LEDs will light up for 1 second and then go off.

🔌 Alternatively, plug the left and right earbud into the correct slot in the charging case. Turn on the charging case. The earbuds will turn off automatically.

PAIRING

You can pair the **X5** earbuds with your device either together or separately. Using only one earbud at a time will help you extend the overall playtime. Please read the instructions below to make the pairing process smooth and easy.

Note: To ensure the best level of Bluetooth operation, we recommend you to keep the distance between the Bluetooth device and **TREBLAB X5** as short as possible.

To pair both earbuds:

Note: You can only connect and play audio from one device at a time. The earbuds save up to 6 connected devices in the pairing list.

1. Turn on the earbuds. You will hear the “Power ON”, “Stereo mode” and “Connected” voice prompts when the earbuds will be connected to each other via TWS and then - the “Pairing” voice prompt a few seconds later (the LED will flash red and blue rapidly on right earbud).
2. Activate Bluetooth on the device, scan/search for **TREBLAB X5**, and tap **CONNECT**.
3. If prompted by your device to connect, select Yes.
4. You will hear “Connected” from the right earbud.

The right earbud is the Master (main) one. For the better performance, keep your smart device in your right pocket, in the bag on your right side, on the right side

of the table, etc.

When you turn on the earbuds, they will try to reconnect with the recently connected device. If the reconnection does not happen automatically, the earbuds will try to find the next device in the pairing list.

If the earbuds after turning on connect to another device, you can disconnect them manually: tap 3 times both the **VOLUME -** button on the right earbud and the **NEXT** button on the left earbud to enable pairing mode manually. It will disconnect the earbuds from the current device to which **X5** were connected.

To pair the right earbud only:

Note: When you are using only the right earbud, switching tracks is not available. You will be able to switch tracks with your smart device.

1. Press and hold the **POWER** button on the right earbud. You will hear the "Power ON" voice prompt and "Pairing" a few seconds later. (The LED will flash red and blue rapidly).
2. Activate Bluetooth on the device, scan/search for **TREBLAB X5**, and tap **CONNECT**.
3. If prompted by your device to connect, select Yes.
4. You will hear "Connected" from the earbud after the successful connection.

To pair the left earbud only:

Note: When you are using only the left earbud, the volume adjustment is not available. You will be able to control the volume with your smart device.

1. Press and hold the **POWER** button on the left earbud for 2 seconds until you hear "Power ON". (The blue LED light will flash rapidly.)

2. After a few seconds, press the **NEXT** button on the earbud 3 times. The LED will start flashing red and blue rapidly.
3. Activate Bluetooth on the device, scan/search for **TREBLAB X5**, and tap **CONNECT**.
4. If prompted by your device to connect, select Yes.
5. You will hear “Connected” in the left earbud after connecting (the LED indicator on the left earbud will flash blue every 7 seconds).

PHONE CALLS

Note: When you use both earbuds, they will transmit the sound during phone and video calls.

To answer an incoming call: Press the **POWER** button on any earbud.

To reject an incoming call: Press the **VOLUME -** button on the right earbud or the **NEXT** button on the left one.

To finish the conversation: Press and hold the **VOLUME -** button on the right earbud for 2 seconds while on the line.

Multicalls*: Press the **POWER** button on any earbud to answer the first call. When the second one is incoming, press and hold the **POWER** button to pick it up. The first call will enter into the hold on status. Press and hold the **POWER** button again to hold on the current (second) call.

*To be able to use this option, your device needs to support the multicalls management.

VOICE ASSISTANTS SUPPORT

TREBLAB X5 headphones are compatible with Siri, Alexa, Google Voice Assistant and others. To use a voice assistant, press and hold the **VOLUME -** button on the right earbud, or the **NEXT** button on the left earbud for 2 seconds.

TROUBLESHOOTING

Problem	Solution
The device doesn't find TREBLAB X5	Make sure that TREBLAB X5 are in pairing mode, and the LEDs are flashing blue and red. Refer to the function list on how to enter into pairing mode manually. If X5 are in pairing mode and flashing blue and red, but still not found by your device, please restart your device and the headset.
Frequent disconnection	Make sure that the distance between your device and the earphones is less than 33 feet/10 meters. Make sure the earbuds are not running out of power. Make sure that nothing is blocking the signal between your device and your Bluetooth earbuds: - Proper environment (no antennas, steel, other BT devices nearby) - Clear pathway (no solid obstructions: walls, cumbersome furniture etc.)

- No other electronics on the body (no walkie-talkies, etc.)

If the earbuds are on, but disconnected from the device for longer than 3 minutes, they will automatically go off to save power.

Can't turn the headphones on

Please make sure the earbuds are charged, if not – charge them and try again.

Can't connect the earbuds to your device

Make sure that **TREBLAB X5** are charged.

Go to your device's Bluetooth menu and delete all saved devices from the list by tapping "Forget this device".

Turn your device's Bluetooth off, then turn it back on: **TREBLAB X5** won't be in the list of devices.

Power off the device, then turn back on.

Take **TREBLAB X5** out from the charging case, this will turn them on; or turn them on manually as described above.

Turn on pairing mode and follow the instructions for the connection (page "PAIRING").

If the problem is not resolved, please reset **TREBLAB X5** (see the instructions below) and repeat the pairing steps.

RESET TREBLAB X5

You can reset your earbuds to the factory default settings. It will delete all the information about any saved connected devices from the pairing list.

- ✔ Power off both earbuds.
- ✔ Press and hold both **POWER** buttons for 10 seconds. You will hear the "Power ON" voice prompt and sound notifications from the left earbud, and - the "Power ON", "Pairing" prompts and sound notifications from the right earbud.
- ✔ Power on the earbuds. They are now restored to the factory default settings.

SAFETY RULES

- ✔ Never disassemble or modify your headset for any reason. Doing this may cause the headset to malfunction or become combustible. The damage to your device can void the manufacturer's warranty.
- ✔ Do not allow your device to get wet - liquids can cause serious damage. The damage to your device caused by water can void the manufacturer's warranty.
- ✔ Excessive sweating may damage the product. Make sure the headphones are dry before charging.
- ✔ Avoid exposing **TREBLAB X5** to extreme temperatures (below 37°F/3°C or above 112°F/45°C). Extreme temperatures can cause the deformation of the X5 components, reduce the battery life and the lifespan of your new earphones.
- ✔ Avoid putting the device's LED lights close to the eyes of children or animals.
- ✔ Do not use your **X5** during a thunderstorm. Thunderstorms can cause serious malfunction and increase the risk of electric shock.

NOTE: Use only Micro USB cable for charging.

BATTERY INFORMATION

- ✔ Your device is powered by rechargeable batteries.
- ✔ Unplug the charging case from the electrical plug when not in use.
- ✔ If left unused, a fully charged battery will lose its charge over time.
- ✔ We recommend to charge twice a month to ensure the battery integrity.
- ✔ Please do not leave the device (and the charging case) in hot or cold places, such as a closed car in summer or winter because this will reduce the capacity and lifetime of the batteries.
- ✔ Do not put the batteries in a fire as they may explode.
- ✔ Batteries may also explode if damaged.

RECYCLING

The earphones can be recycled and they should be to keep our planet clean. Where should you bring them?

In the **US**, there are a couple of options:

1. Best Buy has a recycling program. Just take the broken earbuds with you next time you visit the Best Buy store.

This link will help you find the best location:
<https://www.bestbuy.com/site/store-locator/>

2. Check for other possible locations next to you on these websites (just enter your ZIP to find a location):

<https://www.call2recycle.org>

<https://search.earth911.com>

<https://recyclenation.com/find>

<https://www.cta.tech/Consumer-Resources/Greener-Gadgets>

In **Canada**, please visit the links below:
