Operating Instructions for Smart Sport Watch Product

A. Find all the places to be sure to connect our smart watch through the "Gloryfit" APP.

B. Perform the following steps to enable the answer/call function.

If you don't need to use the call function, you can turn off the answer/call function so that the battery can last longer.

◆ Appearance Description

◆ Schematic Diagram of Charging

Operate in strict accordance with the following figures:

- Please use the provided specific magnetic charging cable to charge by aligning it with the charging contacts on the back of the watch.
- Do not use a power adapter with a voltage exceeding 5V and an output current exceeding 1A for charging, as this may cause charging failure and damage to the magnetic charging cable or the device.
- Please activate the watch when it runs out of power before charging; the watch screen will only light up after about 5 minutes of normal charging.

◆ Introduction to Watch Function

①. Do Not Disturb On/Off
②. Brightness adjustment
③. Search function
④. Call Bluetooth switch
⑤. Theme mode switch
⑥. Setting

Main interface: Display the current time, date, steps and other information of the watch; press the main interface for a long time to switch the main dial left and right, and click to confirm.

Call function: Click the call switch. Open the phone settings Bluetooth - search connection Bluetooth/Wi-Fi/USB/FTT to play music, etc.

Steps: Display current steps, distance and calories of the watch.

Heart rate: Slide to this page and keep a while and automatically measure the current real-time dynamic heart rate. Connectable to APP to set real-time monitoring and view data records.

Blood oxygen: Slide to this page and keep a while and automatically measure the current blood oxygen data and vibrate to indicate the result.

Swatches: Click on the icon on this page to select the multiple sport modes system. Select a sport mode, click the icon to start, and slide right to cancel or stop the sport.

Sleep: The bracelet can record and display your sleeping time last night, and the trend of sleep state and light sleep. More detailed data can be viewed synchronously in the APP.

Weather: Display the local weather conditions. Connect the synchronization APP for remote use, and open the phone APP to ensure that the APP gets the positioning permission function and network connection.

Message: The watch can receive cell phone calls, SMS, QQ, Wechat and other notification alerts, which can be set according to the message alert and turn on the corresponding push watch on the APP. This page can turn on the message function. This function needs to be connected with the phone and make sure the APP gets the corresponding permission.

Music: After connecting the APP, the watch can control the mobile phone player to play music; switch to the previous song and the next song. This function must be opened in the mobile phone; please refer to the manual for details.

Stopwatch: Click on the icon to start the function, and click start for timing, pause or reset. Slide right to home.

Search: Click this icon, your phone will begin to indicate the orientation of your phone, the function requires your phone to stay connected with the watch APP. No use on the phone in stand mode.

Setting: Click on the icon to start the function. Switch left and right to set the brightness adjustment, screen lock time, turn off the watch and view the watch information.

◆ Watch APP Installation and Connection Instructions

As a Bluetooth product, most of the functions of this product need to be connected to a special APP for normal use, such as time display, call alert, and message alert. For Android phones, please do not use Bluetooth to connect and pair with the watch directly. Please scan the following QR code to select the version suitable for your mobile phone system or enter main application markets to download and install Glory Fit.

◆ Device Connection

Before using the APP, please turn on the mobile phone Bluetooth and mobile phone GPS positioning to obtain the mobile phone positioning permission. After the connection is successful, it will prompt "To pair with the APP/USB/FTT", please select pairing.

The watch connection steps are as follows:

- Open the APP and make settings according to the prompt.
- Click Select Device to search.
- Select the name of the searched Bluetooth/Wi-Fi/USB/FTT.
- Connection successful.

1. For Android users, the APP should obtain permissions and turn background, otherwise it will affect the user experience.

2. For systems below iPhone 6S (1), after connecting to the APP, you need to connect to the watch via Bluetooth.

3. For systems below iPhone 6S (1), after connecting to the watch via Bluetooth, you can make calls, play music, make music and other functions.

◆ Precautions

- No charging with water stains.
- This product is an electronic monitoring product, not for medical use, and the measurement data is for reference only.
- It is not recommended to wear it for water baths and long-time swimming.
- Please charge with the matching charging cable.

◆ FAQ

1. Problems such as the watch cannot be searched in the APP or the watch cannot synchronize with the time of the phone.

Answer:

- Make sure your phone's Bluetooth and phone GPS positioning are on before using it for the first time.
- Users need to open the APP to obtain positioning permission (Phone Settings - Applications).
- If the watch has already been paired with a Bluetooth connection in the phone, please cancel the pairing first and then search for the connection in the APP.
- If the watch is not used for a long time, the Bluetooth will go into a dormant state. Please turn off the Bluetooth of the watch and the phone, reopen it after about 1 minute, and try to search the connection in the APP again.
- The watch must be connected to the APP; otherwise, the steps, sleep, time, and other function will not work properly.

Answer: For the first time use:

For Android users: Please operate according to this page prompt, or open the information center function in the APP and open the APP notification permission according to the prompt.

For Apple users: After the watch is connected to the APP, the phone will pop up a pairing request, please choose to allow pairing and turn on the switch of the application reminder that you need to use in the APP. Please open the "Notification Center" in the application you need to use via Phone Setting - Notification.

3. The reminder switch is turned on, but there is no reminder on the watch, or the reminder is sporadic.

Answer:

If the phone turns on the message notification and the corresponding notification permission according to the above tips, the Bluetooth is kept on, and the APP alert function is not working, and the user needs to re-check the message push function.

4. Android's phone Bluetooth often disconnects or has no message alert after a period of connection.

Answer:

Android will from time to time clean up the phone's background applications or applications that consume more power for smooth system operation. If the APP is not set to allow background running, it will be easily closed by the system and the Bluetooth will drop out. Different Android phones have different methods for APP background running settings. As in the Huawei nova 5 SE: Settings - Battery - Prevent Background Running - APP - Application Launch Management - Manually manage to turn on background running.

FCC Notice

This equipment is in part of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential environment. This equipment generates, uses, and can radiate radio frequency energy and, if not used and not installed according to the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device has been designed to meet general RF exposure requirements. The device can be used safely without restrictions unless otherwise notified.
