Using instructions

- Place the Apple Watch in the stand charging area for wireless charger.
- Place the mobile phone with magnetic suction on the magnetic suction position for wireless fast charger.
- Connect the wireless charging headset to the headset charging slot for wireless charger.

Precautions

- Please confirm whether your mobile phone has wireless charging function before use.
- Check whether the phone deviates from the wireless inductive charging area of the charger.
- Whether a non-metallic protective case is used for charging mobile phones, and the thickness of the protective case is recommended not to exceed 4mm.
- When metal objects touch the charging area, the charger will automatically identify and provide power off protection.
- When the temperature of the charger is too high, it will automatically start the protection.Please unplug the power supply first and use it after the charger recovers the temperature.
- For your safety, please do not use wet hand plug and unplug electrical appliances.
- Avoid putting it in a place easily accessible to infants and children;
- Do not use the product if it is contaminated with water or dirt;
- Non-professional personnel are not allowed to open and repair without authorization.

Made In China

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.

Note: The Grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. such modifications could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement.
To maintain compliance with FCC's RF exposure guidelines, the distance must be at least 20 cm between the radiator and your body, and fully supported by the operating and installation configurations of the transmitter and its antenna (s).
