* Please check whether the SIM card is dirty, oxidized, or irregular in shape.

* Check whether the network is abnormal.

* It is recommended to try after resetting the APN. Go to Settings>Mobile network >

Advanced > Access Point Names, then tap on the top right and select "Reset to default".

* Restore network settings and try again.

* Go to Settings > System>Reset options, select Reset WiFi, mobile & Bluetooth.

Q10. What to do with unstable signal, no signal, and poor signal?

* Metal protective shell, magnetic bracket or chuck may interfere with the signal. If you have used one, please remove it and try again.

* Closed indoor environments may result in poor signal. You can change your a

-current location and try again.

* It is recommended to try after resetting the APN. Go to Settings>Mobile network >Advanced>APNS, then tap

Q11. What should I do if there is an echo during a phone call?

* If you occasionally hear the other person's echo during a call, it may be that the microphone or earpiece of the other person is abnormal. You could suggest earphones.

* If you occasionally hear your echo during a call, it may be that you have blocked your microphone accidentally.

-03-

* If you hear echos during all calls, please contact us for more help.

Q12. Why can't the SIM card be inserted into the card slot?

* Please check whether the SIM card is dirty, oxidized, or irregular in shape.

* Check whether the orientation of the SIM card is right.

* Check whether the orientation of the card tray is right.

This product bears the selective sorting symbol for Waste Electrical and Electronic Equipment (WEEE). This means that this product must be handled in accordance with European Directive 2012/19/EU so that it can be recycled or dismantled to minimize its impact on the environment.

The user has the choice to hand over his product to a competent recycling organization or to the retailer when purchasing a new electrical or electronic device. This product can be used in all EU Member States.

This device in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU. All essential radio test suites have been carried out.

1. Use careful with the earphone maybe possible excessive sound pressure from earphones and headphones can cause hearing loss.

2. CAUTION: RISK OF EXPLOSION F BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES RDING TO THE INSTRUCTIONS.

-04-

3. The product shall only be connected to a USB interface of version USB 2.0

4. Adapter shall be installed near the equipment and shall be easily accessible.

5. The plug considered as disconnect device of adapter

6. Operation temperature: Operating Temperature:

-15 °C to 55 °C

7. SAR: The device complies with RF specifications when the device used at 5mm from your body (SAR limit 2.0 W/Kg). The device is in compliance with the requirements.

8. The symbol indicates DC voltage

Restrictions in the 5 GHz band: According to Article 10 (10) of Directive 2014/53/EU, the packaging shows that this radio equipment will be subject to some restrictions when placed on the market in Belgium (BE), Bulgaria (BG), the Czech Republic (CZ), Denmark (DK), Germany (DE), Estonia (EE), Ireland (IE), Greece (EL), Spain (ES), France (FR), Croatia (HR), Italy (IT), Cyprus (CY), Latvia (LV), Lithuania (LT), Luxembourg (LU), Hungary (HU), Malta (MT), Netherlands (NL), Austria (AT), Poland (PL), Portugal (PT), Romania (RO), Slovenia (SI), Slovakia (SK), Finland (FI), Sweden (SE), the Turkey (TR), Norway (NO), Switzerland (CH), Iceland (IS), and Liechtenstein (LI). The WLAN function for this device is restricted to indoor use only when operating in the 5150 to 5250 MHz.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information:

This 4G SMARTPHONE meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless

-06-

of age or health.

FCC RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: 4G SMARTPHONE

(FCC ID: 2BX29-ULTRA S25) has also been tested against this SAR limit. SAR information on this can be viewed on-line at

<http://www.fcc.gov/oet/ea/fccid/>. Please use the device FCC ID

number for search. This device was tested for typical body-worn operations with the back of the handset kept 10mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 10mm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 10mm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
