

NCHH User Guide

Novacore Hand Held Transmitter

AUDIX®

Features

- ① Microphone Capsule
- ② Upper Housing
- ③ LCD Screen
- ④ Power Switch
- ⑤ Mute Button
- ⑥ Multifunction Locking Slider
- ⑦ SET Button
- ⑧ MODE Button
- ⑨ Battery Holder
- ⑩ Battery Charging Contacts
- ⑪ USB Type-C Charging Port
- ⑫ Charging Indicator
- ⑬ Sync Window
- ⑭ Rear Cap
- ⑮ Lower Housing

Battery Insertion

■ Installing AA Batteries

- Rotate and detach the lower housing.
- **Ensure the power switch is off.** Insert one battery with the **negative (-) pole facing upward** into the right slot, then insert another battery with the **positive (+) pole facing upward** into the left slot, following the polarity marks.

⚠ Caution

1. **Do not** use AA-sized 14500 lithium batteries (voltage exceeding 1.8V) or mix disposable batteries with 14500 lithium batteries.
2. Using incorrect batteries may cause malfunction or damage, which is not covered under warranty.

■ 18500 Rechargeable Lithium Battery Installation

- Rotate and detach the lower housing.
- **Ensure the power switch is off.** Insert the lithium battery with the positive (+) pole facing upward into the left slot, following the polarity marks.

⚠ Caution

1. **Use only an 18500 lithium-ion battery** and confirm the polarity is correct before charging.
2. **Turn off the transmitter before charging.**
3. **Do not remove the battery during charging.** Disconnect the cable or dock first if removal is necessary.
4. **If the charging indicator does not light up,** check the battery installation.
5. **If the transmitter fails to power on,** recheck the polarity or charge level of the battery.

■ Charging Methods

• Using USB Type-C Cable Charging

1. Connect the USB Type-C cable to the charging port.
2. Observe the charging indicator:
 - **Orange light:** Charging in progress.
 - **Green light:** Fully charged.

USB Type-C Charging Port

Battery Charging Contacts

• Using Charging Dock (Optional)

1. Connect the charging dock (e.g., **NCC1** or **NCC2**) to a power source and confirm that the **power indicator lights up**.
2. Place the transmitter into the charging dock and check the status:
 - **Red light:** Charging in progress.
 - **Green light:** Fully charged.

Operating Instructions

■ Power On/Off

- **Push the power switch upward** to turn on the transmitter. The LCD screen will light up.
- **Push the power switch downward** to turn off the transmitter.
- **Note:** The LCD screen will display “OFF...” and automatically dim when turned off.

■ Mode Selection

Press the MODE button to toggle through available functions displayed on the LCD screen.

■ Parameter Setting

- **Press the SET button.** The parameter on the LCD screen will blink, indicating that the parameter is ready to be adjusted.
- **Press SET again** to confirm and apply the desired change.

■ Lock

- **Enable the lock function** to prevent accidental operation. All functions except **MUTE** will be locked.

-  **To lock:** Push the locking slider to the right.
-  **To unlock:** Push the locking slider to the left.

NCHH Lock Display

NCHH LCD Display Settings

LCD Display Overview

- 17 Function Area
- 18 Parameter Area
- 19 Battery Level Indicator
- 20 Audio Input Level

Battery Level Display

- The battery level indicator displays the remaining battery level in six stages: **100%, 80%, 60%, 40%, 20%, and 10%.**

- When the battery level drops to 10%, recharge immediately.** If the level is too low, the LCD screen will display **"OFF"** and the transmitter will automatically power off.

LCD Display Functions

- Group (GRP), Channel (CH), and Frequency (FREQ)**
 - Group, channel, and frequency settings are for display only and cannot be changed directly.
 - To change group, channel, or frequency settings, scan for available frequencies on the receiver.** Then use the **SYNC** function to synchronize the settings with the transmitter.

- The specific group and channel set via PC software will be displayed as “GRP - CH” with asterisks (**) replacing the numbers.

- AF GAIN (Audio Gain Adjustment)**

- Adjustable from **0 dB** to **6 dB** in 3 dB increments.
- Increasing the **AF GAIN** narrows the dynamic range of the input signal and increases the risk of system noise and feedback.

- AF L-CUT (Low-Cut Filter)**

- Options: **L-CUT (Low Cut)** or **FLAT**.
- When set to **L-CUT**, the frequency response at **100 Hz** is reduced by approximately **3 dB**.

- AF LIMIT (Audio Limiter)**

- Options: **YES** or **NO**.
- When set to **YES**, the maximum output of the receiver is limited.

- ENCRYPTION (Encryption Function)**

- This is a **display-only function**; it cannot be set on the transmitter.
- To enable encryption, configure it on the receiver in **encryption mode** and synchronize using the **SYNC function**.
- Refer to the receiver's encryption settings for more details.

- **RF POWER (RF Output Power)**

Options: HIGH or LOW to adjust RF transmission power.

- **Mute Mode (Mute Settings)**

1. Select between **MAN (Manual)**, **AUTO**, or **DIS (Disabled)**.

2. **MAN (Manual Mute)**

- Press the mute button to enter mute mode. **The AF MUTE indicator blinks.** Press again to unmute.
- The mute function is automatically disabled when the transmitter powers off.
- When you power the transmitter back on mute will not be engaged.

3. **AUTO (Automatic Mute)**

- The transmitter **automatically enters mute mode** under specific conditions, and the mute button is disabled.
- **Pointing the microphone head downward** mutes the transmitter, while **pointing it upward** restores audio.
- **Remaining stationary for over 4 seconds** automatically mutes the transmitter. Light movement or usage will unmute.

4. **DIS (Disabled)**

The mute function is turned off and cannot be enabled in this mode.

- **Error Codes**

1. **ROM-ER:** Channel not programmed or internal data error.
2. **ERROR1:** RF frequency targeting circuitry failure.
3. **NO-03:** The set frequency exceeds the upper limit. Verify that the transmitter and receiver are within the same frequency range, then restart the transmitter.
4. **NO-04:** The set frequency exceeds the lower limit. Verify that the transmitter and receiver are within the same frequency range, then restart the transmitter.

Cautions

1. **Turn off** the transmitter when not in use to conserve battery life.
Remove the battery if not used for an extended period.
2. Avoid **covering the transmitting antenna** (rear housing section) with your hand to maintain transmission efficiency.
3. Do not **cover the microphone grille** with your hand to prevent degradation of sound quality, loss of directionality, or feedback issues.
4. Hold the transmitter properly to maintain an appropriate **distance between the microphone and the mouth**, ensuring optimal sensitivity and sound quality.
5. Keep the microphone grille **clean and unobstructed**. After use, **unscrew and clean** the grille to avoid debris affecting performance.
6. Follow the regulations of different countries regarding **frequency range, RF output power, and maximum deviation limits**.
7. Refer to the **actual product** in the event of any specification discrepancies.
8. Do not spray **alcohol directly** onto the condenser capsule to avoid damage and voiding the warranty.

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: To assure continued compliance, any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. (Example - use only shielded interface cables when connecting to computer or peripheral devices).

FCC Radiation Exposure Statement

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 0.5 centimeters between the radiator and your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

The antennas used for this transmitter must be installed to provide a separation distance of at least 0.5 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Frequency range

FCC: 470 – 608 MHz

CE: 470 – 789 MHz / 823 – 832 MHz

Dispose of any unusable devices or batteries responsibly and in accordance with any applicable regulations.

Disposing of used batteries with domestic waste is to be avoided!

Batteries / NiCad cells often contain heavy metals such as cadmium(Cd), mercury(Hg) and lead(Pb) that makes them unsuitable for disposal with domestic waste. You may return spent batteries/ accumulators free of charge to recycling centres or anywhere else batteries/accumulators are sold.

By doing so, you contribute to the conservation of our environment!

Warranty

All Audix products are warranted to the original purchaser to be free of defects in materials and workmanship from the date of purchase as follows:

- > **5 years for VLM Dynamic microphones**
- > **3 years for Fusion Series and Condenser microphones**
- > **1 year for all other products**

In the event of a product failure due to materials or workmanship, Audix will repair or replace said product at Audix discretion, at no charge with proof of purchase from an authorized Audix dealer. Audix does not pay or reimburse shipping costs for warranty repairs or returns. The warranty excludes any causes other than manufacturing defects, such as normal wear, abuse, environmental damage, shipping damage, or failure to use or maintain the product per the supplied instructions.

All implied warranties, including but not limited to implied warranties of merchantability and fitness for a particular purpose are hereby excluded. The liability of Audix, if any, for damages relating to allegedly defective products shall be limited to the actual price paid by Dealer for such products and shall in no event include incidental or consequential damages of any kind.

OTHER THAN THIS WARRANTY, AUDIX MAKES NO WARRANTIES, EXPRESS OR IMPLIED, WITH RESPECT TO THE PRODUCTS, THE USE OF THE PRODUCTS, THE PERFORMANCE OF THE PRODUCTS. AUDIX SHALL NOT BE LIABLE FOR SPECIAL, INCIDENTAL, CONSEQUENTIAL, INDIRECT OR SIMILAR DAMAGES ARISING FROM OR BASED ON THE SALE, USE, STORAGE OR DISPOSAL OF THE PRODUCTS, AUDIX'S SERVICE WORK, BREACH OF WARRANTY, BREACH OF CONTRACT, NEGLIGENCE, OR ANY OTHER THEORY OF LIABILITY, EVEN IF AUDIX HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.
